Mr. GILLIE. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include a short editorial from the Fort Wayne (Ind.) News-Sentinel, commenting on a recent statement made by my able colleague from South Dakota, the Honorable KARL E. MUNDT:

[From the Fort Wayne (Ind.) News-Sentinel]

GOOD FENCES MAKE GOOD NEIGHBORS

On the subject of foreign trade and tariffs Representative KARL MUNDT, Republican, of South Dakota, recently made the sound, if

homely, point that "good fences have made good neighbors of Americans for 150 years. Good fences have kept out coolie and peon products, and Americans have developed their country, with no hatred in their souls for any people." Now, however, with the Roosevelt-Hull "reciprocity" program in effect, we find ourselves being generous with some nations, selfish with others, while over all forms of prejudicial trade policies and unneutral trade agreements the people's representatives in House and Senate have not a single word to say. Inquires Representative MUNDT: "Can it make for peace to delegate the power to create warlike disputes and hatreds to the executive branch of the Government? Did one-man control keep Russia or Germany at peace? Did it save Ethiopia from Italy?" And he adds: "In fact, the whole record of history belies the assertion that executive trade treaties make for peace—especially does it belie the theory that low tariffs or free trade makes for peace. * * * It takes a crafty political orator to show how peace can be promoted by stimulating an aggressive trade war through an attempt to drive foreign products out of foreign markets by sacrificing our own farmers and laborers through the acceptance of increased imports in order to force sales abroad of the products of a few pampered American monopolies." It would be impossible to improve upon that statement.

Fourth Reorganization Plan

EXTENSION OF REMARKS

OF

HON. EDWIN A. HALL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, April 19, 1940

EDITORIAL FROM THE BINGHAMTON PRESS

Mr. EDWIN A. HALL. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Binghamton Press of April 13, 1940:

[From the Binghamton (N. Y.) Press of April 13, 1940]

THE FOURTH REORGANIZATION MEMO

When the basic legislation on the executive reorganization idea was put through Congress, outright promises were made by White House spokesmen that the Forest Service would be let alone. And it was on the first three reorganization memoranda sent to Congress. Under the reorganization law, Congress has 60 days in which it may veto Presidential reshuffle ment plans. For at least the past 30 days Capitol Hill has been hearing rumors that, after all, Harold Ickes was going to have his say in the fourth reorganization memorandum, and that at least a part of the Forest Service and Rural Electrification was to be turned over to the Interior Department.

So a number of leaders from both Houses went privately to Mr. Roosevelt and told him just what would happen to his fourth reorganization plan if anything of the sort were done. They told him that the Congress simply wouldn't stand for it, and that, in view of the assurances previously given, he would have something on his hands if he were to attempt transfer of the two agencies.

So, when the fourth memorandum on executive reorganization went over to Congress, those agencies were let alone. But the President had done something else which started an immediate uproar on Capitol Hill. He proposed to move Civil Aeronautics Authority, now an independent agency, into the Commerce Department, merged with the Air Safety Board.

Casting back into the history of aviation in the United States, it will be remembered that the Department of Commerce formerly did exercise entire control over the development of civil aeronautics; that all sorts of politics were played; that the aviation companies were in continual hot water; and that Mr. Roosevelt himself was responsible for setting up C. A. A. by itself and away from the political pressures of the Commerce Department.

The aviation companies (and they are the ones who probably know most about the practical side of it) have been entirely satisfied with C. A. A. as an independent agency. Further, there is some proof of the pudding, since just about a month ago American aviation completed an entire year without a single passenger fatality. That at least suggests the wisdom of the present set-up; and just why Mr. Roosevelt wants to change it isn't at all clear to Congress.

Immediate opposition by Senator PATRICK MCCARRAN and others to the President's plan may easily develop into a row which would junk the entire fourth memorandum. That opposition is likely to be spurred by Mr. Roosevelt's suggestion that the 21 independent offices and quasi-judicial agencies, specifically exempted from reorganization measures by the original legislation, be now thrown into the general bag and that he be permitted to reshuffle them as he sees fit. Here is his exact language on that point:

"I strongly recommend the reenactment of the Reorganization Act without exemptions. The structure and the management of our Government, like the activities and services it performs, must be kept abreast of social and economic change."

The question which immediately occurs to the layman is whether Mr. Roosevelt is talking about the social and economic changes stimulated by government or resulting from the ordinary processes and developments of American life. There's a big difference there, and it needs careful attention.

An agreement is an agreement. Mr. Roosevelt got his reorganization plan through Congress originally on the theory that those 21 agencies would not be bothered. Congress has kept to its end of the arrangement; Mr. Roosevelt should stick to his. Meantime, Civil Aeronautics Authority should be left where it is, and there's a vast question as to whether the Weather Bureau and Soil Conservation Service should be taken away from the Department of Agriculture. Both of them fall naturally within the agricultural realm.

The Agricultural Adjustment Act

EXTENSION OF REMARKS

OF

HON. HAROLD D. COOLEY

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, April 19, 1940

Mr. COOLEY. Mr. Speaker, during the week I introduced six bills for the purpose of amending certain sections of the Agricultural Adjustment Act of 1938. I have today introduced a bill which incorporates all of the provisions of the six bills introduced earlier in the week, and in addition thereto an amendment to the penalty section of the tobacco quota law, and as an explanation of the bill which I have today introduced I desire to state that the bill represents the considered judgment of many Members of Congress from districts in which tobacco is grown, and each provision of the bill is approved by officials of the Tobacco Section of the Department of Agriculture.

These amendments have been carefully considered by farmers and farm leaders in all of the States in which tobacco affected by the law is grown. They have been widely discussed and almost unanimously approved by farmers, warehousemen, bankers, and businessmen in communities where tobacco is grown, and practically every Member of Congress representing districts in which tobacco is grown has participated in drafting the amendments and in the discussions of the provisions of the bill which I have today introduced.

The bill would amend the Agricultural Adjustment Act of 1938, as amended, so as to facilitate and make more effective administration of the tobacco-marketing-quota provisions of the act.

Section 1 of the bill amends paragraph (3) (C) of section 301 (b) and would make it possible, in fixing the amount of the marketing quota, to make allowance for any temporary increase in the carry-over of tobacco in this country arising from the storing of tobacco of the 1939 and 1940 crops in this country which, except for the effect of the European war, would have been exported to and stored in foreign countries.

Section 2 of the bill amends subsection (a) of section 312 of the act and would give authority for adjusting upward the marketing quota for any marketing year so that the adjustment of marketings needed to eliminate the quantity of tobacco in excess of the reserve-supply level may be spread over a period longer than 1 year. This should result in less change of farm allotments and quotas from year to year and in less variation in the size of the crops placed on the market.

Section 3 of the bill amends subsection (c) of section 312 of the act and would provide for conducting a referendum on the question of whether producers favor the establishment of tobacco marketing quotas for a 3-year period. The establishment of marketing quotas for a period of 3 years would make it possible to provide in advance for adjustments over a period of years to eliminate excess supplies of tobacco. Such a procedure would be particularly desirable when the full adjustment required is so large that drastic reductions in allotments would be required if all the adjustments were made in 1 year.

Section 4 of the bill amends subsection (a) of section 313 of the act and would remove the present provision in the act that the marketing quota for any State in the case of flue-cured tobacco shall not be less than 75 percent of the 1937 production of flue-cured tobacco in the State. Also, it would provide that the national marketing quota for the next 3 years shall not be reduced more than 10 percent below the 1940–41 marketing quota and that the farm acreage allotments for the same years be adjusted uniformly in relation to the farm allotments for the preceding year, with the exception that any farm allotment of 1 acre or less in the case of burley tobacco and 2 acres or less in the case of flue-cured tobacco would not be reduced below the 1940 allotment, and with the further exception that an acreage equal to 2 percent of the allotments established in 1940 for farms in each State would be allotted by the local committees so as to make any needed adjustment of the individual farm allotments. This proposal is intended to simplify the determination of allotments, protect small farmers, and reduce administrative cost. The proposal recognizes that the burley and flue-cured tobacco allotments for the next 3 years will need to be about the same size as the 1940 allotments in order to eliminate the present surplus and that any changes in the allotments are likely to be small. This being the case, any changes can be made with less misunderstanding and irritation on the part of farmers and for much smaller administrative costs if they are made on a uniform basis. Also, if farmers know that the changes will be uniform they can better plan their operations in view of the needed adjustments of marketings of tobacco.

Section 5 of the bill amends section 314 of the act and would aid in preventing evasion of the marketing quotas and facilitate the handling, under the quota provisions, of tobacco carried over from one year to another. Under this amendment any producer who falsely identifies or fails to account for disposition of any tobacco would be deemed to have marketed the tobacco in excess of the farm marketing quota and would be required to pay the penalty. Any tobacco marketed just prior to the beginning of the marketing year, rather than during the normal marketing season which comes in the marketing year, would be subject to the quotas, thus tending to prevent the marketing of tobacco out of the normal channels for the purpose of evading the penalty. The amendment also permits the carrying over by producers of tobacco from one marketing year to another without paying the penalty on the tobacco if it was "within quota" in the year from which carried over or if a smaller amount of tobacco is produced on the farm in the year to which the tobacco is carried over so as to make possible marketing of tobacco within the farm marketing quota.

Section 6 of the bill amends subsection (a) of section 373 of the act and would strengthen enforcement of the marketing quotas by increasing the fine upon any tobacco warehouseman or dealer who fails or refuses, after notice of 15 days, to make a true report or keep true records as required by the regulations with respect to the tobacco marketing quotas. The regulations with respect to records and reports would be prepared after consultation with warehousemen and dealers. Increasing the maximum penalty would tend to insure compliance with these regulations in the case of any warehousemen or dealers who might otherwise attempt to violate the law.

Rural Electrification

REMARKS

OF

HON. JOHN E. RANKIN

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Friday, April 19, 1940

Mr. RANKIN. Mr. Speaker, I have requested that there be included in the new spending bill an item of $100,000,000 for rural electrification, to be loaned through the Reconstruction Finance Corporation. It will not increase the debt limit, and every dollar of it will be repaid.

I did the same thing 2 years ago, and secured $100,000,000 for that purpose. But that fund has now been exhausted. In my opinion, it did more for the farmers of this country than any other similar amount that has yet been provided. It will all come back with interest, to say nothing of the compound interest it will pay in the way of the improved conveniences and comforts it will provide for the farmers of this country, as well as the increase in the national wealth. We are making rural America a better and a brighter place in which to live.

I sincerely trust that everyone in the House will join me in this effort to secure this additional allotment of $100,000,000 for rural electrification for the next fiscal year. [Applause.]

[Here the gavel fell.]

Crop Insurance Another Step in Social and Economic Welfare

EXTENSION OF REMARKS

OF

HON. JOHN R. MURDOCK

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Friday, April 19, 1940

Mr. MURDOCK of Arizona. Mr. Speaker, some years ago as a college instructor in Arizona, I commented on a new system of State insurance for industrial laborers as follows:

> At the time compulsory industrial insurance was first advocated, many businessmen opposed it as a socialistic idea. In late years the feeling has grown that the laborer and his family should not be forced to bear all the personal risks in industry, neither should the employer be required to carry the full load. This has necessitated some scheme whereby the inevitable risks to life and limb should be distributed over the whole industry through a system of insurance.

Such being my thought and feeling toward compulsory industrial insurance for laborers 15 years ago and for a system in which the insured had no part of the expense to bear, it may readily be assumed that I would today favor a system of crop insurance for farmers, especially one in which the insured may enter voluntarily and must pay all of the cost of the insurance excepting a limited overhead. Looking upon all kinds of insurance as I do—that is, as a great, beneficial, social function by which each member of society may ease his losses through a proper distribution of those losses among all other members—I do most heartily favor this bill with its crop insurance for farmers.

Having grown up on the farm, I have ever since childhood regarded farming as the most financially hazardous occupation known to man. It may be that some of the risk—at least the property risks—can never be entirely eliminated. But I do feel that we cannot call ourselves a civilized or an intelligent Nation if we do not take some such step as is proposed in the measure before us to reduce the farmer's risks involved in crop failures. Since private companies cannot adequately insure certain crops, and since such crop insurance is a function of statistical treatment and clerical management to which the Government is so well adapted, as well as its being a requisite of the Government's duty in carrying out the general welfare, the Government ought to insure the cotton crop as well as the wheat crop. I would extend this insurance system to the corn crop and other basic crops just as soon as it can be conveniently and safely done. This service is not a gift to the farmers but a service that he has just as much right to expect from his Government as he had a right to expect another great "socialistic" piece of work inaugurated three decades ago—rural free delivery mail service.

Amendments of the Wage-Hour Law

EXTENSION OF REMARKS

OF

HON. MARY T. NORTON

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1940

LETTERS FROM COL. PHILIP B. FLEMING AND COMPARATIVE TABLES

Mrs. NORTON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following letters addressed by me to Colonel Fleming, Administrator of the Wage and Hour Division, his replies, and a comparison of the Labor Committee amendments to the wage and hour bill, the Barden and the Ramspeck amendments, also an analysis of how these various bills affect industry in our respective States.

UNITED STATES DEPARTMENT OF LABOR,
WAGE AND HOUR DIVISION,
Washington, April 18, 1940.

Hon. MARY T. NORTON,
Chairman, Committee on Labor, House of Representatives, Washington, D. C.

MY DEAR MRS. NORTON: In accordance with your oral request of several days ago, I am transmitting herewith a comparative sectional analysis of the Norton bill (H. R. 5435, as reported on April 27, 1939), the Ramspeck bill (H. R. 7349), and the Barden bill (H. R. 7133), together with an analysis showing the number of employees who are exempt under the present act, under the Norton bill, the Ramspeck bill, and the Barden bill.

Sincerely yours,

PHILIP B. FLEMING,
Colonel, Corps of Engineers, Administrator.

COMPARATIVE ANALYSIS OF NORTON, RAMSPECK, AND BARDEN BILLS

NORTON BILL (H. R. 5435)	RAMSPECK BILL (H. R. 7349)	BARDEN BILL (H. R. 7133)
Sections 1 and 2: These provisions provide for the appointment of special industry committees for Puerto Rico and the Virgin Islands for the fixing of minimum wages for the industries of such islands. The industry committee or committees are to be composed of residents of Puerto Rico, the Virgin Islands, and continental United States, and to include representatives of the public, employers, and employees. The object of the amendment is to fix wage rates for the islands (which may be below the rigid minima prescribed in section 6 of the act) which are high enough to discourage migration of business from continental United States, but which are low enough to encourage industrial development and to provide employment opportunities in the islands.	Sections 1 and 2: These sections are substantially identically the same as those contained in H. R. 5435.	Sections 1 and 2: These sections purport to embody the principles of H. R. 5435, but in section 1, on lines 9 and 10 of page 1 of the bill, there is included a parenthetical expression "(except section 7 (c) and section 13)", the effect of which is not clear but which may result in rendering less effective the administrative machinery set-up for the islands by making relief impossible for the employees listed in section 7 (c) of the act as amended.
Section 3: This section constitutes a complete redraft of section 7 (c) of the act and sets forth in detail the operations in connection with the movement of agricultural and horticultural commodities from the farm, including their preparation for market, which are to be exempt from the hour provisions of the act. This exemption is limited to 60 hours a workweek unless overtime compensation is paid thereafter, except that for a period of 14 workweeks such hours exemption is complete, and the 60-hour workweek limitation is inapplicable. This revision of section 7 (c) treats all operations therein enumerated uniformly. It contains no area-of-production limitation. But for a few exceptions it would exempt only employees engaged in establishments receiving perishable or seasonal agricultural products from farms and preparing and processing them in order to preserve their quality and make them suitable for sale. For the most part, employees engaged in the operations enumerated in section 3 of this bill fall within some hours exemption under the present act. The exemptions, listed commodity by commodity, follow: 1. Dairy products: Manufacture (including cooling, pasteurizing, printing or packing) of all dairy products except ice-cream mix, ice cream, malted milk, and processed cheese. 2. Cotton: Compressing and storing. 3. Sugar beets, sugar-beet molasses, sugarcane and maple sap: Processing into sugar, molasses, and sirup, but not the refining of sugar. 4. Domestic fruits, vegetables, nuts, and seeds: Extraction of oils, juices, and sirups, but not fermenting or refining. 5. Fresh and dried fruits and vegetables: Preparing, cleaning, grading, packing, drying, refrigerating, freezing, preserving, peeling, shelling, storing, or canning. 6. Shelled and unshelled nuts: Preparing, cleaning, grading, packing, roasting, crushing, shelling, and storing. 7. Raw grease wool, mohair, and rabbit fur: Preparing, curing, grading, and bagging. 8. Livestock: Handling, grading, loading, slaughtering, and dressing.	Section 3: No agricultural exemptions are contained in the Ramspeck bill. This section provides an exemption, not contained in either the Norton bill or the Barden bill, from the overtime requirements of the act for employees employed in mining or milling of nonferrous metallic ores or operations incidental thereto, if such employee receives overtime compensation for employment in excess of 56 hours in any workweek.	Section 3: This section would amend section 7 (c) of the present act and would include therein only exemption from the maximum hour provisions for certain operations, to which wage and hour exemption is not accorded by section 5 (b) of the bill. For the following commodities the exemption under this section would be complete for 14 weeks in a calendar year and up to 56 hours a week during the rest of the year. 1. Grain: Grading or storage at terminal markets. 2. Perishable or seasonal fresh fruits and vegetables: Wholesale distribution. 3. Any seasonal or perishable agricultural or horticultural commodity: Storage at terminal markets. 4. Trees: Felling, logging, or operations incidental to felling or logging performed prior to delivery and the delivery of logs to a mill for sawing, making pulp, or other processing. With respect to the operations pertaining to the first three of the commodities enumerated, exemption is also granted to any employee employed in handling or transportation in connection with or incidental to the specified operations. This section also grants a complete exemption from the hours provisions for 16 work weeks in a calendar year to the following: 1. Livestock: Grading, loading, slaughtering, or preparing products therefrom at the packing plant or in handling or transportation in connection with or incidental to such operations. 2. Perishable or seasonal fruits or vegetables, including dried fruits: Canning, processing, or preserving or in handling or transportation in connection with or incidental to such operations, if the employer is not exempt under the wage and hour exemption granted by section 5 (b) of the bill. The term "terminal market" is defined in this section to mean any urban center of more than 150,000 population where the commodity is customarily stored before processing, or where such commodity is

NORTON BILL (H. R. 5435)—continued

9. Poultry: Handling, storing, grading, slaughtering, refrigerating, picking, dressing, and packing.

10. Eggs: Handling, storing, grading, candling, freezing, drying, and packing.

11. Chicks, poults, etc.: Hatching, handling, and boxing.

12. Whole seeds, beans, peas, or grains: Handling, grading, cleaning, polishing, handpicking, hulling, delinting, fumigrating, drying, packing, and storing.

13. Hops, fiber crops, and forage crops: Handling, drying, baling, grinding, decorticating, and packing.

14. Honey: Preparing.

15. Nursery and horticultural stock: Handling, grading, and packing.

16. Trees and logs: Felling, logging, or operations incidental to felling or logging performed prior to and including delivery of logs to a mill for sawing, making pulp, or other processing.

Thus it will be observed that the principal hours exemptions, in addition to those provided in the present act, are for employees engaged in the operations enumerated above with respect to (1) trees and logs, (2) dried fruits and vegetables, and (3) eggs.

It is also to be noted that the hours exemptions are not applicable to the enumerated operations performed on fresh or dried fruits or vegetables, nuts, poultry, eggs, or grains, when performed at a "terminal establishment." Such an establishment is defined as an establishment which (1) is located either in the urban area where the products are to be consumed or at transportation centers for the purpose of servicing consumer markets, (2) receives the major portion of its goods from other establishments at which such goods have been previously concentrated or prepared, and (3) distributes its goods to wholesalers, retailers, consumers, or manufacturers.

No exemptions from the minimum-wage provisions of the act are contained in this section.

Section 4: This section authorizes the Administrator to make regulations necessary or appropriate to carry out the provisions of the act. Such regulations may define terms used in the act, make special provision with respect to industrial homework, and make special provision for constant wage plans consistent with the purposes of section 7, relating to maximum hours of work. Employees would be protected from any civil or criminal liability where they were complying with the regulations of the Administrator, even though such regulations should be amended, rescinded, or declared invalid.

Section 5 (a): This section exempts in addition to those now exempt high-salaried employees employed at a guaranteed monthly salary of $200 or more.

Section 5 (b): This section repeals section 13 (a) (10) and in lieu thereof grants wage and hour exemption to employees engaged in certain specified and limited operations upon agricultural commodities. These operations, commodity by commodity, are as follows:

1. Cotton: Ginning.

2. Fresh fruits and fresh vegetables in their raw or natural state: Cleaning, packing, grading, or preparing when such operations are performed immediately off the farm.

3. Leaf tobacco: Handling, tying, drying, stripping, grading, redrying, fermenting, stemming, or packing, when those operations are performed prior to storage and storing.

Employees engaged in these operations are exempt whether or not they are employed within the area of production.

This section of the Norton bill also exempts switchboard operators in telephone exchanges having less than 500 stations.

RAMSPECK BILL (H. R. 7349)—continued

Section 4: Same provisions as in the Norton bill.

Section 5 (a): Same as Norton bill.

Section 5 (b): Small telephone exchange exemption.

BARDEN BILL (H. R. 7133)—continued

customarily stored and the greater part thereof distributed to consumers within or adjacent to such urban centers.

Section 4: Same provisions as in the Norton bill, but the power to issue regulations is nullified by sections 8 and 9 of bill which propose to remove all penalties for violations of any regulations issued under this section.

Section 5 (a): The salary criterion of the "white collar" exemption is reduced to $150 a month, with the provision that the exemption applies only if the employee "is not required by his employer to work any specified minimum number of hours in any workday, workweek, or other period and has been notified by his employer in writing to that effect." The quoted requirement would be fulfilled by the posting of a simple notice to that effect.

Section 5 (b): With certain exceptions, as will appear below, section 5 (b) of the Barden bill takes the exemptions contained in section 3 of the Norton bill, which are limited to hours exemptions only, and changes them to exemptions from both the wage and hour provisions. The following is a list of the operations, commodity by commodity, for which wage and hour exemptions are granted by the Barden bill:

1. Dairy products: The manufacture of all dairy products, including ice cream, ice-cream mix, and processed cheese, but not including evaporated or condensed milk. For evaporated or condensed milk only an hour's exemption is granted.

2. Cotton: Ginning, compressing, and storing.

3. Sugar beets, sugar-beet molasses, sugarcane, and maple sap: Processing into sugar and sirup but not refining raw sugar.

4. Domestic vegetables, fruits, nuts, and seeds: Extracting oils, juices, sirups, and

NORTON BILL (H. R. 5435)—continued

(Such a provision was enacted into the act on August 9, 1939, and is therefore unnecessary.)

Section 6: This section exempts from the hours provisions employees of employers subject to the provisions of part I of the Railway Labor Act. This extends present exemption in act to include employees of refrigerator-car companies.

Section 7: This section gives the Administrator authority to provide for the employment of telegraph messengers at wages lower than the statutory minimum (but not lower than 25 cents) to prevent curtailment of opportunities for employment with a public telegraph carrier.

This section also authorizes the Administrator to permit the employment of homeworkers in rural areas at wages lower than the statutory minimum rate, insofar as it is required to prevent curtailment of opportunities for employment and will not adversely affect factory or industrial workers or give any employers a competitive advantage.

Section 8: This section protects an innocent purchaser of "hot goods"—goods produced in violation of the minimum-wage or

RAMSPECK BILL (H. R. 7349)—continued

Section 6: Same exemptions as Norton bill.

Section 7: Same provisions.

Section 8: Same provisions.

BARDEN BILL (H. R. 7133)—continued

other derivatives but not fermenting or refining.

5 (a). Seasonal or perishable fruits or vegetables: Preparing, cleaning, grading, packing, drying, peeling, shelling, precooling, refrigerating, freezing, and local storing.

(b) Perishable or seasonal fruits or vegetables: Canning, processing, and preserving, if the employer does not engage during the same calendar year in canning, processing, or preserving any agricultural commodities other than perishable or seasonal fruits or vegetables, and engages in no recanning during the same calendar year.

6. Nuts: Cleaning, grading, drying, shelling, preparing, packing, and local storing.

7. Grease wool, mohair, and rabbit fur: Shearing, grading, bagging, and local storing.

8. Livestock: Feeding, loading, grading, inspecting, and marketing when performed prior to marketing for slaughter, and marketing for slaughter.

9. Poultry: Fattening, slaughtering, refrigerating, dressing, picking, and local storing.

10. Eggs: Grading, shell treating, candling, freezing, local storing, drying, and packing.

11. Chicks, poults, etc.: Hatching or marketing.

12. Grains, dry edible beans or peas, and seeds: Grading, hand picking, cleaning, and local storing.

13. Hops, forage, fiber, and other agricultural or horticultural commodities not otherwise mentioned in these paragraphs: Cleaning, drying, packing, local storing, grading, grinding, baling, and preparing.

14. Honey: Extracting, preparing, packaging, and local storing.

15. Nursery and other horticultural and floral stock: Local storing, grading, packing, and packaging.

16. Timber: Cutting for manufacture into lumber, or the manufacture, preparing for market, or marketing of lumber during any calendar year in which at no time employer employed more than 15 employees in connection with or incidental to all such operations.

17. Leaf tobacco: Tying, drying, stripping, grading, redrying, fermenting, stemming, and packing, prior to storage.

The term "local storing" is used in many of the foregoing paragraphs. This is defined in such a manner as to include storing in any city or town up to and including a population of 150,000, and in many instances storing in cities or towns of even greater population.

It is to be noted that this section grants a wage and hour exemption to any employee employed in handling or transportation in connection with or incidental to any of the operations mentioned in the foregoing paragraphs.

It is also to be noted that the forepart of this section grants an exemption from both wages and hours to any switchboard operator of a telephone exchange having less than 500 stations.

Section 6: Same provisions as Norton bill.

Section 7: Same provisions.

Section 8: Same provisions as to protection of innocent purchaser of "hot goods," but this section does not provide penalties

NORTON BILL (H. R. 5435)—continued	RAMSPECK BILL (H. R. 7349)—continued	BARDEN BILL (H. R. 7133)—continued
maximum-hour provisions—when such innocent purchaser can show that at the time he purchased the goods he had no knowledge or reason to believe that they had been purchased in violation of the wage and hour provisions. Penalties are provided for violation of regulations or orders issued under authority granted in section 4.		for violations of regulations issued by the Administrator under section 4.
Section 9: This section provides a penalty for violation of regulations issued under section 4 of the bill and in addition provides a penalty for violations of the provisions of any wage order issued by the Administrator under section 8 of the act. These are technical amendments.	Section 9: Same provisions.	Section 9: Same provisions, excepting that a violation of regulations issued by the Administrator under section 4 of the bill is not made a violation of section 15 (a) (2) of the act. The effect is that the issuance of regulations would protect the employers but would not provide penalties for their violation by employers.
Section 10: This is a technical amendment which permits learners, apprentices, handicapped workers, messengers, and homeworkers the same right to sue for unpaid minimum wages and unpaid overtime compensation which the act now accords to all other employees covered by the act.	Section 10: Same provisions.	Section 10: Same provisions with an additional subsection establishing a statute of limitations for employee suits of 6 months from the date when the cause of action accrued.
Section 11: This is a technical amendment to the act which adds a venue provision to provide that civil actions may be brought in any district where the defendant is found or is inhabited or transacts business.	Section 11: Same provisions.	Section 11: Same provision with two exceptions: (1) before the Administrator may institute injunction proceedings for violation of regulations under section 4 of the bill, the defendant must be notified at least 5 days prior to the filing of the complaint that the regulation or order was in force. Such regulations and orders must be published in the Federal Register, and the further requirement of personal notice is an unnecessary hindrance upon the enforcement of the act. (2) Actions for violations of the "hot goods" provisions must be brought in the district court in which the prohibited employment is alleged to have occurred. This requirement would be applicable to a holder of "hot goods" who would have to transport his witnesses perhaps to another State in order to defend the action.
Section 12: This section implements the Ashurst-Sumners Act which prohibits transportation of convict-made goods into States where their sale or use is prohibited by prohibiting the transportation of convict-made goods in interstate commerce without reference to the laws of the State into which shipment is made.	Section 12: Same provisions.	Section 12: Same provisions.

ANALYSIS OF NUMBER OF EMPLOYEES EXEMPT FROM THE WAGE AND HOUR PROVISIONS OF THE FAIR LABOR STANDARDS ACT UNDER THE PRESENT ACT, THE RAMSPECK BILL, H. R. 7349; THE NORTON BILL, H. R. 5435; AND THE BARDEN BILL, H. R. 7133 [1]

I. WAGE EXEMPTIONS

It is estimated that the Barden bill, H. R. 7133, would exempt from the wage provisions of the act approximately 1,184,000 employees, or 928,000 more employees than are exempt by the act at the present time (256,000). The Ramspeck bill, H. R. 7349, provides for no new wage exemptions; therefore the number exempt by this bill is the same as the number exempt under the present act, or 256,000. The Norton bill, H. R. 5435 (draft of April 27, 1939), would exempt an estimated 273,000 or 17,000 more than are now exempt.

The number of workers in each industry estimated to be exempt from the wage provisions of the act at present and under each of these bills is tabulated below: [2]

Industry or product (with reference to provisions of bills)	Number of employees exempt from wage provisions under—			
	Present act	Ramspeck bill (H. R. 7349) [a]	Norton bill (H. R. 5435 Apr. 27, 1939, printing)	Barden bill (H. R. 7133)
Dairy products (Barden, p. 7, lines 12 to 24; p. 8, lines 1 to 2)	22,000	[a] 22,000	0	254,000
Cotton (Norton, p. 15, lines 17 and 18; Barden, p. 8, lines 3 to 5)	62,000	[a] 62,000	60,000	100,000
Sugar (beet and cane) (Barden, p. 8, lines 6 to 10)	0	0	0	67,000
Fruit, vegetable, and nut oils and juices (Barden, p. 8, lines 11 to 15)	5,000	[a] 5,000	0	58,000

[a] Exemption under act unchanged by proposed amendment.

[1] Estimates are based mainly on Census of Manufactures, 1937, Census of Business 1935, estimates made by the National Recovery Administration and the Agricultural Adjustment Administration, testimony at hearings of the Wage and Hour Division, etc. In some industries data are adequate only for rough estimates.

[2] These employees are also exempt from the hours provisions.

Industry or product (with reference to provisions of bills)	Number of employees exempt from wage provisions under—			
	Present act	Ramspeck bill (H. R. 7349)	Norton bill (H. R. 5435 Apr. 27, 1939, printing)	Barden bill (H. R. 7133)
Fruits and vegetables (Norton, p. 15, lines 21 to 24; p. 16, line 1; Barden, p. 8, lines 16 to 24; p. 9, lines 1 to 5)	68,000	[a] 68,000	[b] 131,000	321,000
Nuts (Barden, p. 9, lines 6 to 9)	1,000	[a] 1,000	0	15,000
Grease wool, mohair, rabbit fur (Barden, p. 9, lines 15 to 18)	200	[a] 200	0	7,000
Livestock (Barden, p. 9, lines 10 to 14)	14,000	[a] 14,000	0	29,000
Poultry (Barden, p. 9, lines 19 to 22)	10,000	[a] 10,000	0	36,000
Eggs (Barden, p. 9, lines 23 and 24, p. 10, lines 1 and 2)	3,900	[a] 3,900	0	16,000
Chicks, poults, ducklings, etc. (Barden, p. 10, lines 3 to 6)	[c] 10,000	[a] 10,000	0	10,000
Grains, dry edible beans or peas and seeds (Barden, p. 10, lines 7 to 11)	39,000	[a] 39,000	0	52,000
Hops, forage, fiber crops, and other (Barden, p. 10, lines 23 to 25, p. 11, lines 1 to 3)	1,500	[a] 1,500	0	8,000
Honey (Barden, p. 10, lines 12-14)	[d]	[d]	0	[d]
Nursery and other horticultural or floral stock (Barden, p. 10, lines 19 to 22)	1,400	[a] 1,400	0	2,900
Leaf tobacco (Norton, p. 16, lines 1 to 4; Barden, p. 10, lines 15 to 18)	18,000	[a] 18,000	82,000	68,000
Timber and lumber (Barden, p. 11, lines 4 to 11)	0	0	0	110,000
Handling and transportation (Barden, p. 7, lines 12 to 14, pp. 8-10, p. 11, lines 1 to 11)	0	0	0	30,000
Storage at terminal markets	0	0	0	0
Total number exempt from wage provisions [e]	256,000	256,000	273,000	1,183,900
Increase above present act		0	17,000	927,900

[a] Exemption under act unchanged by proposed amendment.
[b] Assumes that "immediately off the farm" would be interpreted to exempt all employees of packers of fresh fruits and vegetables.
[c] Exempt under definition of agriculture.
[d] No data available.
[e] These employees are also exempt from the hours provisions.

II. HOURS EXEMPTIONS [8]

It is estimated that the Barden bill would exempt from the hours provisions of the act approximately 1,957,000 employees. Under the act at the present time 969,000 workers are estimated to be exempt. The Barden bill thus provides exemption for 988,000 more employees than are exempt under the act at the present time. The Ramspeck bill, H. R. 7349, would exempt an estimated 1,182,000 workers from the hours provisions, or 213,000 more than the present act. The Norton bill, H. R. 5435, would exempt from the hours standards approximately 1,434,000 workers, or about 465,000 more than are now exempt.

The number of workers in each industry estimated to be exempt from the hours provisions of the act at present and under each of these bills is tabulated below. These estimates include the employees (listed above) who are also exempt from the wage provisions.

Industry or product (with reference to provisions of bills)	Number of employees exempt from hours provisions under [7]—			
	Present act	Ramspeck bill (H. R. 7349)	Norton bill (H. R. 5435, Apr. 27, 1939, printing)	Barden bill (H. R. 7133)
Mining or milling of nonferrous metallic ores or operations incidental thereto (Ramspeck, p. 3, lines 18–25, p. 4, lines 1 and 2)	[a] 3,000	[b] 88,000	[c] 3,000	[c] 3,000
Refrigerator-car employees (exempt by proposed addition to sec. 13 (b) of "any employee of an employer subject to the provisions of pt. I of the Railway Labor Act" (Ramspeck, p. 5, lines 17 to 21; Norton, p. 6, lines 5 to 9; Barden, p. 11, lines 15 to 19)	0	2,500	2,500	2,500
Dairy products (Norton, p. 11, lines 13 to 16; Barden, p. 7, lines 12 to 24, p. 8, lines 1 and 2)	136,000	[c] 136,000	208,000	266,000
Cotton (Norton, p. 11, line 17, p. 15, lines 17 and 18; Barden, p. 8, lines 3 to 5)	88,000	[c] 88,000	100,000	1000,00
Sugar (beet and cane) (Norton, p. 11, lines 18 to 20; Barden, p. 8, lines 6 to 10)	67,000	[c] 67,000	67,000	67,000
Fruit, vegetable, and nut oils and juices (Norton, p. 11, lines 21 and 23; Barden, p. 8, lines 11 to 15)	32,000	[c] 32,000	58,000	58,000
Fruits and vegetables (Norton, p. 11, line 24, p. 12, lines 1 to 4, p. 15, lines 21 to 24, p. 16, line 1; Barden, p. 3, lines 24 and 25, p. 4, lines 1, 2, 25, p. 5, lines 1 to 5, p. 8, lines 16 to 24, p. 9, lines 1 to 5)	390,000	[c] 390,000	446,000	488,000
Nuts (Norton, p. 12, lines 5 to 8; Barden, lines 6 to 9)	1,200	[c] 1,200	15,000	15,000
Grease wool, mohair, rabbit fur (Norton, p. 12, lines 9 to 10; Barden, p. 9, lines 15 to 18)	200	[c] 200	5,500	7,000
Livestock (Norton, p. 12, lines 11 and 12; Barden p. 4, lines 21 to 25, p. 9, lines 10 to 14)	56,000	[c] 56,000	56,000	181,000
Poultry (Norton, p. 12, lines 13 to 16; Barden, p. 9, lines 19 to 22)	36,000	[c] 36,000	27,000	36,000
Eggs (Norton, p. 12, lines 17 to 19; Barden, p. 9, lines 23 and 24, p. 10, lines 1 and 2)	3,900	[c] 3,900	16,000	16,000
Chicks, poults, ducklings, etc. (Norton, p. 12, lines 20 and 21; Barden, p. 10, lines 3 to 6)	[d] 10,000	[c] 10,000	10,000	10,000
Grains, dry edible beans, or peas and seeds (Norton, p. 12, lines 22 to 24, p. 13, lines 1 and 2; Barden, p. 3, lines 21 to 23, p. 10, lines 7 to 11)	39,000	[c] 39,000	52,000	52,000
Hops, forage, fiber crops and other (Norton, p. 13, lines 3 and 4; Barden, p. 10, lines 23 to 25, p. 11, lines 1 to 3)	1,500	[c] 1,500	8,000	8,000
Honey (Norton, p. 13, line 5; Barden, p. 10, lines 12 to 14)	(e)	(e)	(e)	(e)
Nursery and other horticultural or floral stock (Norton, p. 13, lines 6 and 7; Barden, p. 10, lines 19 to 22)	1,400	[c] 1,400	2,900	2,900
Leaf tobacco (Norton, p. 16, lines 1 to 4; Barden, p. 10, lines 15 to 18)	[f] 82,000	[c] 82,000	82,000	68,000

[a] Exemption for 14 weeks under section 7 (b) (3) of Fair Labor Standards Act, up to 12 hours a day or 56 hours a week.

[b] Does not include 5,000 office workers who might be claimed exempt under this provision since it covers persons "employed in mining or milling or operations incidental thereto."

[c] Exemption under act unchanged by proposed amendment.

[d] Exempt under definition of agriculture.

[e] No data available.

[f] Includes 64,000 exempt for 14 weeks under section 7 (b) (3).

[8] These hours exemptions are not uniform; in some cases the exemption is an unlimited year-round one; in others, a 14-week unlimited exemption with 56 or 60 hours allowed during the rest of the year; in still others, a 16-week exemption; and in some cases the exemption is dependent upon the "area of production" definition.

Industry or product (with reference to provisions of bills)	Number of employees exempt from hours provisions under—			
	Present act	Ramspeck bill (H. R. 7349)	Norton bill (H. R. 5435, Apr. 27, 1939, printing)	Barden bill (H. R. 7133)
Timber and lumber (Norton, p. 13,1 ines 8 to 11; Barden, p. 4, lines 7 to 10, p. 11, lines 4 to 11)	[a] 22,000	[c] 22,000	150,000	200,000
Handling and transportation of agricultural commodities (BARDEN, p. 7, lines 12 to 24, pp. 8–10, p. 11, lines 1 to 11)	0	0	0	30,000
Storage at terminal market (Barden, p. 4, lines 3 to 6)	0	0	0	22,000
Workers earning a guaranteed salary of $200 or more a month (Norton, p. 15, lines 8–14; Ramspeck, p. 5, lines 4–10); or $150 or more a month (Barden, p. 6, lines 19–25, p. 7, lines 1–4)	0	[g] 125,000	[g] 125,000	[g] 325,000
Total number exempt from hours provisions	969,200	1,181,700	1,433,900	1,957,400
Increase above present act		212,500	464,700	988,200

[a] Exemption for 14 weeks under section 7 (b) (3) of Fair Labor Standards Act, up to 12 hours a day or 56 hours a week.

[c] Exemption under act unchanged by proposed amendment.

[g] These represent rough estimates of the number of workers now subject to the act who would be exempt in addition to those already exempt under the definitions of executive, administrative, and professional employees and of outside salesmen and in addition to those in industries excluded under other provisions of the bills under consideration here. Such estimates are made difficult by the fact that there are no data on number of workers earning $150 or $200 who are exempt under these definitions or under other provisions of these bills. However, the estimates given in the table appear conservative in view of the fact that there are about 800,000 manual and nonmanual workers earning $200 or more a month and 1,800,000 who earn $150 or more a month in industries subject to the act. It appears likely that these bills would exempt both manual and nonmanual workers since it would be possible to meet the requirements of the Ramspeck and Norton bills by putting manual workers on a guaranteed monthly salary basis and to meet the requirements of the Barden bill by putting manual workers on a guaranteed monthly salary basis and by posting a notice to the effect that employees are not required to work any specified minimum number of hours.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
COMMITTEE ON LABOR,
Washington, D. C., April 15, 1940.

Col. PHILIP B. FLEMING,
Administrator, Wage and Hour Division, Department of Labor, Washington, D. C.

MY DEAR COLONEL: I shall greatly appreciate your having prepared for me a statement showing the effect the wage exemptions proposed by the Barden bill would have on competition in the various States.

I should particularly like information on the prevailing wages in the canning industry and other industries affected by the bill, all State minimum-wage laws, the States in which the industries the Barden bill would exempt are located, and any other relevant data.

If it is convenient, will you prepare the data in tabular form, showing the information for each State separately?

Thanking you for your fine cooperation in the past, I am,

Sincerely yours,

MARY T. NORTON.

UNITED STATES DEPARTMENT OF LABOR,
WAGE AND HOUR DIVISION,
Washington, D. C., April 19, 1940.

Hon. MARY T. NORTON,
Chairman, House Labor Committee, House Office Building, Washington, D. C.

DEAR MRS. NORTON: Attached hereto is a tabulation of the information requested in your letter of April 15.

Adequate data on prevailing wages and employment in the industries affected by the Barden bill wage exemptions are available for the canning industry only. We have therefore shown the available information listing other industries of some importance in the several States, employees of which would be exempt from the wage provisions of the Fair Labor Standards Act under the Barden bill. Also enclosed are tables showing the effect of this bill on various industries.

If we can be of any further assistance in this matter, please call on us.

Very truly yours,

PHILIP B. FLEMING,
Colonel, Corps of Engineers, Administrator, Wage and Hour Division.

Data on the fruit and vegetable canning industry and a list of some other industries granted exemptions by the Barden bill, H. R. 7133, by States

State	Mimimum-wage laws applicable to women and minors in canning industry (cents per hour)	Average hourly earnings, canning industry, 1938 (cents) [1]	Percentage of employees in canning industry in 1938 earning less than—		Number of employees in canning industry during peak month in 1937 (Census of Manufactures) [2]	Industries (other than fruit and vegetable) of some importance in specified States for which a wage exemption is provided by the Barden bill [3]
			25 cents per hour	30 cents per hour		
Alabama	None				226	Cotton warehouses, compresses and cottonseed-oil mills, logging, sawmills.
Arizona						Cottonseed oil mills.
Arkansas	13.9	[4] 23.6	[4] 17.1	[4] 98.2	5,733	Logging, sawmills, cotton warehouses, compresses and cottonseed-oil mills.
California	33.3	47.0	1.8	3.9	81,029	Logging, sawmills, beet-sugar mills, poultry-product handling, farm-product warehouses.
Colorado	None				3,105	Beet-sugar mills, logging, sawmills, livestock handling.
Connecticut	None				127	Tobacco handling.
Delaware	None				6,450	
Florida	None	[4] 28.9	[4] 15.7	[4] 63.5	9,529	Logging, sawmills, cane-sugar mills.
Georgia	None				2,496	Cotton warehouses, compresses and cottonseed-oil mills, tobacco warehouses, logging, sawmills.
Idaho	None				653	Logging, sawmills, beet-sugar mills.
Illinois	None	32.9	10.7	22.9	17,488	Dairy products manufacturing, livestock handling, poultry products handling and dressing.
Indiana	None	30.4	11.4	42.4	30,514	Poultry and livestock handling.
Iowa	None	31.1	3.7	45.3	9,009	Grain cleaning and storing, poultry-products handling, poultry dressing, livestock handling.
Kansas	None				243	Grain cleaning and storing, poultry-products handling, poultry dressing.
Kentucky	None				3,058	Tobacco warehouses, sawmills.
Louisiana	None				1,072	Logging, sawmills, cotton compresses, warehouses and cottonseed-oil mills, rice cleaning, cane-sugar manufacturing.
Maine	None				7,657	Logging, sawmills.
Maryland	None	24.1	47.3	88.5	25,646	Livestock handling.
Massachusetts	32.4				951	Wool combing and scouring.
Michigan	None				9,214	Beet-sugar mills, bean elevators, logging, sawmills.
Minnesota	[5] 22.9–31.3	34.1	.9	20.3	11,022	Dairy-products manufacturing, livestock, handling, poultry handling and dressing.
Mississippi	None				1,053	Logging, sawmills, cotton warehouses, compresses, and cottonseed oil mills.
Missouri	None				5,400	Poultry-products handling, poultry dressing.
Montana	None				571	Beet-sugar mills.
Nebraska	None				670	Livestock and poultry handling.
New Hampshire						Logging, sawmills.
New Jersey	None	35.9	.2	10.9	10,600	Poultry-product handling.
New Mexico	None					Logging, sawmills.
New York	None	30.5	16.6	49.4	20,631	Dairy-products manufacturing, poultry-products handling.
North Carolina	None				980	Tobacco warehouses and stemming plants, cotton warehouses, logging, sawmills.
North Dakota						Grain cleaning and storing.
Ohio	None	40.6	.9	5.3	10,032	Dairy-products manufacturing, beet-sugar manufacturing.
Oklahoma	None				597	Poultry-products handling, livestock handling, cotton warehouses.
Oregon:

Vermont	None				329	Logging, sawmills.
Virginia	None	[4] 23.1	[4] 51.5	[4] 72.2	9,320	Tobacco warehouses, logging, sawmills.
Washington	37.5	43.2	.9	3.0	11,158	Logging, sawmills, poultry-products handling.
West Virginia	None				1,169	Logging, sawmills.
Wisconsin	[5] 20.0–22.5	30.4	25.3	40.4	23,664	Dairy-products manufacturing.
Wyoming	None					

[1] Based on data obtained in a survey by the Women's Bureau, U. S. Department of Labor. In the case of some of the States listed the data shown cover only plants canning a limited number of products. The figures on earnings for 1938 are for a period before the Fair Labor Standards Act went into effect. Women's Bureau survey limited to 16 States. No survey has yet been made where no information has been given.

[2] The Barden bill wage exemptions apply to the canning of perishable or seasonal fruits and vegetables only. The Census of Manufactures figures in this column include some employees of plants canning nonseasonal fruits and vegetables and their products.

[3] Wage exemptions for the lumber industry (logging, sawmills, etc.) apply to plants employing 15 persons or less.

[4] No 1938 data available; data shown are for 1939, when the act's 25-cent hourly minimum wage was in effect.

[5] Wage rate varies with population of community.

Canning industry: Percentage of employees according to hourly earnings in identical fresh vegetable canneries in 1 active week of the 1938 and 1939 seasons, by States [1]

Total United States	12,703	9,571	75.3	12.0	3,132	24.7	88.0

[1] Source: U. S. Bureau of Census, Census of Manufactures, 1937, Forest Products: 1936. Mills employing less than 15 men are those mills in census classifications I and II, namely, mills producing less than 1,000,000 board-feet annually. The percentages and number of small mills is an understatement of their actual proportion inasmuch as the census does not include mills that cut less than 50,000 feet.

Address by the President to Young Democratic Clubs

EXTENSION OF REMARKS

OF

HON. ALBEN W. BARKLEY

OF KENTUCKY

IN THE SENATE OF THE UNITED STATES

Monday, April 22, 1940

TEXT OF PRESIDENT ROOSEVELT'S RADIO TALK

Mr. BARKLEY. Mr. President, I ask unanimous consent to have printed in the RECORD a radio address delivered by the President of the United States on last Saturday to various Young Democratic Clubs throughout the country.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

I understand that these meetings of young Democrats in many parts of the country are customarily held close to the birthday anniversary of Thomas Jefferson. While there have been certain debatable exceptions in the past 150 years, I can properly say that when our party system began the party of Thomas Jefferson was without question the liberal party, and his opponents, the Federalists, represented conservative thought. In more recent times since the Civil War it is equally true that when the Democratic Party has been victorious it has represented a more liberal position on public affairs than the Republican Party.

Grover Cleveland, while not perhaps what we would call today a fighting liberal, was certainly more of a liberal than James G. Blaine or Benjamin Harrison. Woodrow Wilson's 8 years in office represented a progressive meeting of difficult problems of his day, and it is not boasting for all of us to suggest that our country has perhaps been fortunate in having met modern problems of extreme seriousness in the liberal spirit—the do-something-about-it spirit—during the past 7 years.

May I quote to you a few sentences that prove the consistency of the Democratic position during recent years.

On August 24, 1935, speaking to the Young Democratic Clubs of America, I said:

PUTS TRUST IN YOUTH

"I, for one, am willing to place my trust in the youth of America. If they demand action as well as preachments, I should be ashamed to chill their enthusiasm with the dire prophecy that to change is to destroy. I am unwilling to sneer at the vision of youth. * * * But vision does not belong only to the young. There are millions of older people who have vision, just as there are some younger men and women who are ready to put a weary, selfish, or greedy hand upon the clock of progress and turn it back. * * * The spirit of America is the spirit of inquiry, of readjustment, of improvement; above all, a spirit in which youth can find the fulfillment of its ideals."

On January 8, 1936, I said:

"Whatever may be the platform, whoever may be the nominee of the Democratic Party * * * the basic issue will be the retention of popular government—an issue fraught once more with the difficult problem of disseminating facts and yet more facts, in the face of an opposition bent on hiding and distorting facts."

That, I might add, was before the Presidential election of 1936.

During the whole of the spring and early summer of that year, you were told that the result of the election was in the lap of the gods; that the Republicans had a chance to win—that people were tired of liberal government. You remember the Literary Digest and other polls—and most greatly you remember that only two States out of forty-eight voted to return to "do-nothing conservatism."

ATTACKS UTILITY CONTROL

In 1938, in speaking against the misuse of concentrated power by relatively small minority groups in our country, I said that this administration was "striving to uphold the integrity of the morals of our democracy, and that attacks (by government) on the misuse of concentrated power have been distorted into attacks on * * * our whole system of private profit and private enterprise."

And to illustrate I pointed out that at that time $600,000,000 worth of ownership of electric utilities securities held substantial control over $13,000,000,000 worth of all electric utilities securities—and I said, by way of illustration, "Here is a 96-inch dog being wagged by a 4-inch tail."

This year the Nation faces very much the same kind of electoral campaign as it did in 1932 and 1936. It seems to me very obvious that if the Democratic Party is to defeat the Republican Party next November we must nominate a liberal pair of candidates, running on a liberal and forward-looking platform.

I am not speaking tonight of world affairs. Your Government is keeping a cool head and a steady hand. We are keeping out of the wars that are going on in Europe and in Asia, but I do not subscribe to the preachment of a Republican aspirant for the Presidency who tells you, in effect, that the United States and the people of the United States should do nothing to try to bring about a better order, a more secure order of world peace when the time comes.

STRESSES CAMPAIGN ISSUE

It is the domestic scene which I stress tonight. During the next 4 years there will be new problems to face. We need a National Government with enough imagination and enough courage to meet those new problems with concrete, specific remedies—just as we have met many problems that were new during the past 7 years with imagination and courage and practical idealism. I do not say that the machinery that we have used or are using is perfect or that it cannot be improved—but you need practical idealism to make the present machinery function better.

On the other side, the preconvention campaign, up to date, has resolved itself, roughly, into three parts, none of which appeals greatly to my intelligence.

First, our opponents are seeking to frighten the country—by telling people that the present administration is deliberately trying to put this Nation into war or that it is inevitably drifting into war. You know better than that.

Second, they are telling you that many of the measures of the past 7 years are good, but that they would carry them out with greater efficiency if they were in power. I do not think that we can swallow that assertion because, quite aside from millions of fine citizens who normally vote the Republican ticket year in and year out, we and they must acknowledge that practically every serious Government scandal since the Civil War has occurred under a Republican administration, and that the underlying Republican leadership—the groups and cliques which have always owned the Republican Party—are still just as much in the saddle of ownership as they were in the old days.

SAYS FOES WANT 1929 BACK

Finally, they tell you that they will perform an amazing miracle—that they will give everybody jobs, that they will maintain relief, that they will give work to the unemployed, that they will meet the needs of the national defense, that they will reduce your taxes, and that, withal, the total of the expenditures of the Federal Government will go down so much that they will have a surplus in the Treasury. And you and I know, from long experience, when we ask them how are you going to do it, that their only answer is the vague assertion that they will repeal all of the sordid and nerve-racking restrictions on private business and let private business do the rest.

In other words, all that the country is being promised to date is a return of the old days of 1929 when America went speculation mad, when half the families of the land were sucked into an orgy of overproduction of stock gambling, while at the very moment of it unemployment was increasing, farm prices were decreasing, and we were riding for the worst social and economic fall the country had ever known.

ATTACKS REPUBLICANS

Speaking as an American, I am sorry that a campaign, which should be pitched on a level of intelligent argument, has fallen into such low estate as early as this. Speaking as a partisan, I rejoice because I am confident that the average voter in the United States is already somewhat tired of the "view with alarm" outcries of the Republican candidates.

I do not think that the campaign of Democrats should be hitched on the old level of just pointing with pride. During these 7 years I think that we have accomplished much, but that a great deal remains to be done by way of accomplishments in relation to existing problems, and that the next administration will have to devise ways and means, in a liberal and progressive spirit, to meet difficulties which we are only just beginning to appreciate and to analyze.

I say to you, therefore, that the young people of the United States—young Democrats and all the others—have another magnificent opportunity to support a government of proven liberal action rather than to switch over and take a long chance with a party historically founded on conservatism, no matter what the glitter of their studied generalities trumpeted forth in an election year.

Young people, and all of us for that matter, know what sticky flypaper looks like. We will be most careful to keep our feet and our heads away from the flypaper all this coming summer and fall, because we are possessed of good old-fashioned average American common sense.

Legal Justice

EXTENSION OF REMARKS

OF

HON. DAVID I. WALSH

OF MASSACHUSETTS

IN THE SENATE OF THE UNITED STATES

Monday, April 22, 1940

ADDRESS BY HON. DAVID I. WALSH, OF MASSACHUSETTS

Mr. WALSH. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD an address I made yesterday, Sunday, April 21, at the dedication of the new courthouse at Waltham, Mass. The address is entitled "Legal Justice."

There being no objection, the address was ordered to be printed in the RECORD, as follows:

LEGAL JUSTICE

We have assembled here today to dedicate a building for the establishment of legal justice in distinction from the administration of economic and social justice by the legislative branch of our Government. There is no greater or more serious governmental responsibility than to establish justice through legal process. Without legal justice freedom is a misnomer and justice a pretense—the very worst form of injustice. It is through legal justice that law and order is maintained and man's personal rights, his relation with his fellow men and society, preserved and protected.

We may fail in establishing economic and social justice, but to fail in the administration of legal justice is indefensible. The courthouse is next to the house of God in importance to the preservation of civilization. To debauch and scandalize the house of God is sacrilegious. To permit and sanction injustice in the civic temples of justice, the courthouse, is one of the most serious sins against society.

To assure the proper administration of justice the law requires an oath. To assure justice it is necessary that an oath shall be just and honest. An oath imposes a serious obligation. It embraces the virtues of religion and justice. To perjure one's self, by swearing what is false to be true, is an act which dishonors the name of God. A distinguished churchman has said, "A lie confirmed with an oath is to accuse God with ignorance."

Society cannot exist when perjury prevails in the courts of justice. For law and order to prevail, for exact justice to be done, it is necessary that man should be able to trust his fellow man, to believe his word under oath. Take away the oath from society and let perjury be no longer a crime is to give the sting of death to personal freedom.

The people of this community have wisely and fittingly erected this temple of justice. May it establish and preserve justice, and may the men who administer the law be endowed with the wisdom to do justice.

I have noticed in my travels through the country that the first building erected by the joint efforts of the colonists in New England was the church. They place above everything else knowledge of, reverence for, and dependency upon the Creator. He was their guide, their intermediary, and their protector.

In other parts of the country the principal landmark in the early settlements was often the courthouse. Localities were named and settlements made around the courthouse. I choose the New England concept—church first, the courthouse next in importance, in usefulness, and in helpfulness to mankind.

If ever an inscription is written on or within this building, I suggest you repeat the inscription over the entrance to the courthouse at Worcester which meets the eye of judge and juror, litigant and witness as they enter its portals, "Here speaketh the conscience of the state restraining the individual will." This beautiful building is more than an ornament to this city, more than a well-equipped and convenient place for the transaction of legal business—it is the conscience of the state speaking truth and extending justice to all.

Democratic State Convention at St. Louis

EXTENSION OF REMARKS

OF

HON. BENNETT CHAMP CLARK

OF MISSOURI

IN THE SENATE OF THE UNITED STATES

Monday, April 22, 1940

ADDRESS BY HON. C. ARTHUR ANDERSON, OF MISSOURI

Mr. CLARK of Missouri. Mr. President, I ask unanimous consent to insert in the Appendix of the RECORD an address delivered by Representative C. ARTHUR ANDERSON as permanent chairman of the Democratic State Convention at St. Louis, Mo., on April 15, 1940.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Fellow Democrats, the Democratic Party stands at the bar of public opinion about to hear judgment pronounced upon it. This is the most important and crucial year in the entire history of our great and beloved party, for we have been at the helm through 8 long years of perilous journey through a sea that has not been calm for a moment. The people of this Nation are about to pass judgment upon our navigation and take account of our stewardship.

A victory in November will be a vindication of all our efforts and a token of approval from the American people. A defeat may well mean the very end of the Democratic Party. Let's not even think of defeat but only of the means by which to achieve a glorious victory. But let the specter of defeat lie in the background and may it stare us straight in the eye if we become lax and lazy in this great campaign. Naturally, none of us believes that we will run second next fall, and I feel confident in predicting an overwhelming democratic victory in the State and all over the Nation. Nevertheless, now as never before our party must present a united front and the "command staff" of our forces must act as one with but a single purpose in mind—victory in November.

The enemy will be strong, make no mistake about that, and our chances of success lie solely and completely in our ability to unite under the glorious banner of our great party and show conclusively to every voter that his Nation, himself and his family, and his posterity can look forward with security and confidence only if we have a democratic victory. Our party alone is capable—our party alone is willing—to carry on the great social and economic reforms that have been inaugurated during the 8 years we have held the reins.

No party has ever besought the approbation of the American people with such a magnificent record of accomplishment as we do today. No party has ever achieved so much in such a short time. I know the American people will reflect their knowledge of this fact and their appreciation of our efforts at the ballot box next November.

It is the task of our party and all its candidates and all of its devoted followers to see that the accomplishments of our administration are kept constantly before the public eye. Let no one forget that the Democratic Party alone and single-handed brought order out of utter chaos in American banking; it has given the farmer of the Nation his first real chance of parity with the other classes; it has given security to the aged; it has instilled hope in the youth; it has recognized and fortified the rights of organized labor; and it has put the Nation back on the road to recovery. And greatest of all—the Democratic Party has insured peace for all our people.

To you, my friends, in whose hands lies the fate of our party, I say, first educate yourselves in the accomplishments of our party during the past 7½ years. Get a firm grasp of what we have done so that you can present a strong case to all of the people with whom you come in contact. When you are able to point out and reiterate the multitude of achievements made by our party you will then be presenting the strongest and most convincing argument possible for all our candidates from the lowest to the highest.

No political party ever won such overwhelming victories as we have during the past 8 years and yet we have demonstrated time and again that our party puts the national welfare far above and beyond partisan considerations. Perhaps this fact is nowhere better demonstrated than right here in Missouri where our party has made tremendous strides in the interest of better and cleaner government. In the Federal Government we have broadened and extended the civil service and have placed a strong prohibition against political manipulation in public office by the adoption of the Hatch laws. No clearer evidence can be adduced than these instances which show conclusively that the Democratic Party looks upon the Nation's welfare as its primary consideration. Our record is untarnished by any cloud however small and we can be proud that the Democratic Party has succeeded in bringing about momentous political reforms where our predecessors of the Republican Party failed so miserably.

At a party gathering of this kind it is always well to check back over the record to acquaint ourselves with the facts. Just because we have been "in" for two terms, let's not assume we are "in for keeps." I have already mentioned in broad outline the generally acknowledged achievements of two Democratic administrations. Let us be a little more specific. Let's get the facts in mind so that we can let everybody know about them. If we are able to present the case based on our record, no voter who is conscious of his own and his Nation's welfare will ignore us.

I don't think anybody takes particular pleasure in talking about the condition of our banks prior to the present Democratic administrations. The situation was so bad that we don't like to even mention it. But lest we forget, lest the people forget, what our party did to improve this situation, let's take time to remind them. Today our banks are safe, and our deposits are insured against loss. Bank failures have been reduced from more than 6,000 a year to less than 50. This alone is sufficient to enshrine the Democratic Party in the hearts of Americans for generations to come. But we didn't stop there. Among the first major accomplishments of the Democratic administration was repeal of the eighteenth amendment and the Volstead Act which had saddled the Nation for 12 years under Republican rule giving rise to a powerful criminal element that grew rich out of the illicit trade in liquor.

Today, after repeal by the Democrats a great brewing and distilling industry has been revived, giving employment to thousands of people, helping the farmers and all forms of transportation. In addition, the Government—Federal, State, and city—reaps immense returns from legitimate taxes upon these industries. It will long be remembered that the Republicans promised repeal but never delivered. The Democrats promised repeal and made their word good within a few weeks of inauguration.

Tremendous strides have been made to save the American farmer from the certain destruction to which Republican misrule and neglect foredoomed him. Production has been wisely planned in conjunction with a great program of conservation. After more than a century and a half of national existence, we have at last seen an administration that recognizes the soil as one of the greatest of all our natural resources, and its conservation as one of the greatest needs of our civilization. The accomplishments of the Democratic Party in solving the complex farm problem and in helping the farmer to get back on his feet will live forever in the annals of democracy in action. No greater calamity could befall the farmer of this Nation than a Republican victory at this time. Only our party can—only our party is willing—to go forward with the magnificent program now well under way. The Republicans threaten and even promise to destroy that program if elected. The welfare of our farmers is of the greatest concern to us all, and if they are neglected now I hesitate to predict the future or its consequences.

The Democratic Party has extended a helping and saving hand to the unemployed and the aged through its vast system of social security and unemployment insurance. History does not record even a simple recognition of the needs of these people by the Republican Party.

We have sought with success to aid the laboring classes by providing a floor below which wages may not fall and a ceiling above which hours of work may not extend. We have recognized and fortified the rights of workers to organize for the purpose of collective bargaining. The only recognizable contribution of the Republican Party in this field was to close its eyes while unscrupulous and avaricious employers defeated every effort of the working classes to help themselves. They closed their eyes while employers perfected elaborate systems of industrial spies and other devices which are wholly inconsistent with democracy. The Republicans would make much of their sympathy for labor, but let the people remember and recognize the fact that the Republican Party has selected as its man to raise its campaign chest and handle its funds one of the most bitter enemies of organized labor in America; a man who steadfastly refuses to recognize labor organizations and who employed every possible means to undermine public confidence in the progressive legislation of the Democratic administrations. The people of America can judge for themselves.

Perhaps there have been a few mistakes along the line in providing for the millions who now depend upon the Federal Government for even the barest necessities of life. But corrections have been made all along the line. Let us remember that the Republican inauguration gift to the Democrats back in 1932 was 10,000,000 unemployed and starving people. Never before had such a problem confronted any administration and in spite of the tremendous task involved we have achieved remarkable success. The great public-works program including the C. C. C. is proving to be of immeasurable benefit in preserving the faith of our people in our form of government, which was seriously threatened by years of Republican misrule.

It is impossible to consider the welfare of our beloved country today without some mention of the means whereby we hope to remain at peace in a troubled and war-torn world. The Democratic administration has demonstrated its sincere desire to keep us out of all foreign entanglements. We realize, of course, that war in Europe and Asia is a serious blow to American commerce and trade; but in the interest of peace, in the interest of preserving democracy here in America, we have been willing to make appropriate sacrifices in the certain knowledge that we will survive the tempest only by remaining free of all entanglements.

While resolutely determined to remain free of all wars that do not concern us, the Democratic Party has not neglected the obvious necessity of augmenting our defense system in this world, gone mad. This administration has done everything humanly possible to strengthen the national defense consistent with the efficient carrying out of so vast a program. During the years of Republican rule from 1920 to 1932 our national-defense system was neglected woefully. You cannot hope to defend this vast Nation in this day and age with a conscript army and navy built up in a few weeks or months. Modern machines of defense require skilled and scientific handling. Therefore, under Democratic leadership, we have given new life and impetus to a well-trained Army and Navy backed up by an excellent system of Reserves and National Guard.

Under Democratic leadership we have been careful to retain for our own protection and defense many scientific devices and weapons which are not known or possessed by other countries.

The leadership of the Democratic Party in these critical days of civilization has been demonstrated, tested, and proven. Wisdom dictates that we stay on the course. The Democratic Party offers the people concrete example and proof. The Republicans offer hollow promises and platitudes.

As Americans, as Democrats, we are sincerely and justly proud of our service to the Nation during the past 7½ years. But we all realize that we have only done what was expected of us. The people of America are entitled to a government that recognizes their needs and problems and does something to help them achieve the full growth of life that this Nation holds out to them. If the Republican Party recognized these things, history does not record the fact. All we know is that they pursued the "do-nothing policy" unto its bitter end.

So, my friends and fellow Democrats, we can gird ourselves for battle in the spirit of good deeds well done and fortify our beloved party with the record of the glorious victories we have wrought during the years of our stewardship.

Chinese Silver Sought To Strengthen Japan's Hold on North China

EXTENSION OF REMARKS

OF

HON. JOHN G. TOWNSEND, JR.

OF DELAWARE

IN THE SENATE OF THE UNITED STATES

Monday, April 22, 1940

STATEMENT BY HON. JOHN G. TOWNSEND, JR., OF DELAWARE

Mr. TOWNSEND. Mr. President, I ask unanimous consent to have printed in the Appendix a statement prepared by me entitled "Chinese Silver Sought To Strengthen Japan's Hold on North China."

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

How Japanese forces in China profit from the American Silver Purchase Act is indicated by Japanese newspaper reports in April dealing with the Japanese-British negotiations at Tientsin. The negotiations involve Chinese National Government silver located in vaults in the British and French concessions at Tientsin. The Japanese evidently intend to use this silver to buy supplies abroad for the purpose of strengthening their position in North China.

How this will be done is developed in a Nichi Nichi (Japanese newspaper) report published in the Trans-Pacific of March 21, 1940. States the Nichi Nichi:

"Settlement of the silver issue between Japan and Britain deserves great attention on the eve of the establishment of a new central regime in China.

"According to the substance of the agreement, the 14,000,000 yuan of silver held in the British concession in Tientsin hereafter will be under the joint custody of the Japanese and British consulates-general or of the Tientsin branches of the Yokohama Specie Bank and the Hongkong and Shanghai Banking Corporation.

"Of this amount, £100,000, or about 4,800,000 yuan, will be contributed to the poor-relief funds. Technical details will be handled by an Anglo-Japanese commission, in which a representative of the American Government will be invited to participate."

On this subject another Japanese newspaper, the Yomiuri, reports:

"Japan will purchase wheat from Canada and Australia with the £100,000 to be released under terms of the agreement. Japanese mills then will convert the wheat into flour, for distribution among needy citizens in North China. It is expected that the foreign exchange necessary for the wheat purchase will be acquired from the Tientsin branch of the National City Bank of New York with the silver as security."

The Hatch Law

EXTENSION OF REMARKS

OF

HON. CARL A. HATCH

OF NEW MEXICO

IN THE SENATE OF THE UNITED STATES

Monday, April 22, 1940

RADIO NEWS INTERVIEW WITH REPRESENTATIVE DEMPSEY, OF NEW MEXICO

Mr. HATCH. Mr. President, I ask unanimous consent to have printed in the Appendix of the RECORD a recent radio news interview with the Representative from New Mexico [Mr. DEMPSEY] concerning legislation now pending in the House of Representatives.

There being no objection, the interview was ordered to be printed in the RECORD, as follows:

Question. Congressman DEMPSEY, will you tell us the purpose of the Hatch law and the proposed amendments?

Answer. This legislation has for its purpose the protection of workers and the prevention of those practices on the part of persons in power, whether political or in our economic life, which in the past have resulted in depriving millions of our citizens of freedom of action in the exercise of their elective franchise. It is intended to put an end to political bossism and the ability of such bosses to assess contributions from Federal employees in order to perpetuate political machines of a type that have been a threat to honesty and decency in American politics and elections.

Question. Just how does this legislation accomplish that purpose?

Answer. Primarily by making it a criminal offense, punishable by a fine or prison sentence or both, for any person to intimidate, threaten, or coerce another for the purpose of interfering with the right of that person to vote as he or she may choose in any election of Federal Government officials.

Question. Are there any exceptions made to this provision?

Answer. None whatever. This provision is all-inclusive and applies equally to leaders of industry, labor, and heads of Government departments or bureaus.

Question. There are provisions in this law, however, which apply particularly to Federal officials and employees, as we understand it?

Answer. Yes. The original law as approved by the President on August 2, 1939, prohibits any official or employee in the executive branch of the Government to use his official authority to in any way influence the nomination or election of Federal officials. In their individual capacities as to political activity an exception is made of the President, the Vice President, the heads of various administrative branches and their assistants, and such other appointive officials as determine foreign and Nation-wide administrative policies.

Question. What penalty is provided for violation of the law by those Federal officials or employees who come within its provisions?

Answer. Penalties for such violations consist of removal of the offending official or employee from the position held and a ban against his future employment in public service.

Question. It has been, we understand, the contention of those opposed to this law, that it is an infringement on the liberties of those employees and officials whose political activity is restricted. What is your opinion in that regard?

Answer. It is not an infringement—it is a protection. The law in no way deprives any person of full rights as a citizen. It does not restrict any person from full freedom of individual action. Under its provisions all persons, of course, may vote as they choose and freely express their opinions. Federal employees, however, are prevented from using their official authority to influence the votes of others or from making political speeches or participating in or managing political campaigns. As a protection for the workers it prevents political bosses and machine politicians from dictating to the workers the way in which they must vote, and it prevents what has been a common practice in some sections of the country—assessment on the earnings of workers to perpetuate these vicious groups.

Question. Then this law would prohibit all political contributions by Federal employees?

Answer. No. Any Federal employee, except those paid from funds appropriated by Congress for relief purposes, may make voluntary contribution to a campaign fund of a party or an individual. The law does prohibit, however, any person from soliciting or receiving any contribution from one who is paid from relief funds.

Question. You feel then, Congressman, there is no basis for the contention of some of those who oppose this legislation in the Congress, that the civil rights of employees and officials are restricted?

Answer. Absolutely none. That point was raised, I am convinced, largely to camouflage the real reason of some for opposing the legislation. Many of those who opposed it publicly on the grounds that they were seeking to protect employees were frank to confess privately that their real basis for opposition was that the law would deprive political machines of one rich source of funds to carry on their work, funds which in many cases were used by those machines to defeat the will of the majority at the polls. Singularly enough, it is from those States which have been revealed as the worst offenders in this regard that the loudest protests have come that employees would be denied proper protection of their rights by this legislation.

Question. Another question that has been raised, Congressman DEMPSEY, is whether this law can be properly enforced. What have you to say concerning that?

Answer. Frankly, I feel that there will be no difficulty encountered in that respect. My reason for this belief is that each of the major political parties, as a matter of self-protection, will become a vital factor in exposing infractions of the law. The real value

of the legislation, however, lies in its psychological effect. I am certain that it will prove a deterrent to those activities which it prohibits and will result in cleaner elections and political campaigns. It certainly will put an end to enforced political assessments in the incomes of Federal employees. In brief, I feel that the law, coupled with the proposed amendments now before the House, constitutes a new Bill of Rights for many thousands of American citizens who have heretofore been subjected to political intimidation and abuse.

Question. We understood you to say, Congressman DEMPSEY, that you believe the amendments now pending, which will extend the provisions of the law to State and other political subdivision employees paid in full or in part from Federal funds, will be passed?

Answer. Yes. I feel confident those amendments will be passed by the House of Representatives with perhaps minor changes from the form in which they passed the Senate. I believe the vote in the House on these amendments will show even a greater majority than was given the original law.

Question. What about the attitude of the public toward this legislation?

Answer. Recent polls taken on the subject indicate a vast majority in favor of the law, as well as the amendments. After all it is public opinion which determines in the final analysis what the laws of the land should be. There is no question about public opinion in regard to this legislation. The American people are noted for their desire for fair play in politics as in everything else, and this legislation has that for its end.

The Struggle for Freedom

EXTENSION OF REMARKS

OF

HON. EDWARD R. BURKE

OF NEBRASKA

IN THE SENATE OF THE UNITED STATES

Monday, April 22, 1940

ADDRESS BY WENDELL L. WILLKIE BEFORE TOLEDO CIVIC FORUM AND ROTARY CLUB

Mr. BURKE. Mr. President, I ask unanimous consent that there may be inserted in the Appendix of the RECORD a thought-provoking address recently delivered by Wendell L. Willkie before the Toledo, Ohio, Civic Forum and Rotary Club.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

If I had the time, I should like to write a history of mankind's long struggle for freedom. It would begin back in the shadowy reaches of the cave when men first banded in groups to achieve a certain measure of freedom from the perils of the jungle. It would tell of the wars of subject races to escape from a foreign yoke; or the revolt of a people to overthrow the despots which they had themselves created. It would discuss the methods whereby, in time of peace, men have sought to protect themselves against the exercise of arbitrary power, whether in the hands of the government, the army, business, or the church. It would be a brave story of men who prized their freedom above wealth or power or security. And it would never be finished; for freedom is like the breath of life itself—it cannot be had and held forever; it must be continually recaptured and renewed.

When I was a young man in college this Nation was engaged in a great liberal crusade. Its leaders were three great Americans—all three very different in personality and background—Theodore Roosevelt, Robert La Follette, and Woodrow Wilson. Its objective was to free the American people from the excessive power of big business. "Let us ask ourselves very frankly what it is that needs to be corrected," said Woodrow Wilson. "To sum it all up in one sentence: 'It is the control of politics and of our life by great combinations of wealth.'"

American business corporations did not really get started until after the Civil War. The corporate form had, of course, existed for centuries before that date, but it was used chiefly for colleges, municipalities, and other nonprofit purposes, and later for trade and banking. It was not until the latter part of the nineteenth century that the manufacturing corporation began to flourish. This country was growing fast. Its basic industries, led by the railroads, were rapidly being organized into gigantic industrial combines, which sought to suppress all new competitors. The Sherman Antitrust Act, in 1890, was not able to stem this mounting tide of economic power. The corporate monopolies began to extend their influence to the State legislatures and even to Federal authorities. By the first years of this century they threatened to overshadow the people's government itself.

Then the liberals rose in alarm and began their long and colorful campaign to restrain this corporate power. Many of you will remember it, and many of you, like myself, undoubtedly fought under that banner. The Oil Trust, the Tobacco Trust, the Beef Trust, and other monopolies were dissolved. The railroads discontinued the issuance of political passes. What Wilson called the Money Trust was destroyed by the Federal Reserve Act of 1913. So successful was the campaign that, in his message to Congress in 1914, Woodrow Wilson felt able to state:

"Our program of legislation with respect to business is now virtually complete. * * * The road at last lies clear and firm before business."

Perhaps the restraints thus imposed upon corporate power would have been effective—perhaps the road would indeed have been clear for both business and the people—if it had not been for the World War. But wars are not good for freedom. They destroy the essential balance of society. They begin by giving dictatorial power to the government, and in the chaos that ensues after the war, this power will be passed from one hand to another, from one group to another, until once again, out of its agony, the spirit of a free people asserts itself.

In the inflation and false prosperity following the World War, businessmen, drunk with power and a public drunk with money, broke down the safeguards protecting individual liberties. When Sir James Bryce, the great critic of our civilization, wrote his concluding chapter of the American Commonwealth, in 1920, he pointed out that "the growth of vast fortunes has helped to create a political problem" and warned us against "the irresponsible nature of a power which three or four men, or perhaps one man, can exercise through a great corporation." Rightly he prophesied that this would be an outstanding problem in those next few years.

In the money-mad period of the twenties the heads of some of our corporations forgot their primary function, that of running a business enterprise in a way that would be sound for the worker, the consumer, and the investor. Instead of attending to the duties of management, they began playing with corporate structures as with a child's building blocks, becoming promoters rather than businessmen. And some financiers in Wall Street and elsewhere, instead of serving as a link between the savings of the people and the enormous capital needs of industry, became jugglers of finance, concerned primarily neither with the investor nor the investment, but with making money and securing power for themselves. There is no point now in naming names, because this power and positions are gone, and the men who wielded it are without influence. But you and I know that that was true. You have sat in board rooms, as I have done, and heard businessmen talk about putting pressure on this man or this newspaper, or this or that group, so that opposition would be eliminated:

In the normal course of events we should have corrected that condition. Although the leaders of Woodrow Wilson's new freedom were no longer active, there were other men ready to take up that cause. But the depression overturned this corporate tyranny almost overnight.

For a while I hoped that the New Deal would replace it with a truly liberal faith. Certainly no liberal movement ever had a greater opportunity or was ever given more wholehearted support by the people. But the leaders seemed to be motivated not by love but by hate; they preferred to punish rather than to reform; they wanted to destroy the evildoers, even if the doers of good should also succumb. For a time this lack of discrimination puzzled many of us, but it is puzzling no longer. Its explanation is found in the fact that the purpose of this new government was not to eliminate monopolistic control, but merely to change its ownership. Today it is not big business that we have to fear. It is big government. The abuses that corrupted the 1920's have been transferred from Wall Street to Washington.

Recall to your mind for a moment the abuses charged against business in the twenties. The first was the concentration of excessive power in the hands of a few men; second, the use of this power and the money that went with it to influence political decisions; third, the manipulation of financial markets to the detriment of the investor and the enrichment of the manipulator; fourth, the ruthless determination to destroy opposition and create a monopoly.

Every one of those abuses exists today. We can repeat each one of those accusations. But the responsible party today is not the Nation's business but the Nation's Government.

For example, on the first point, never before has this country experienced so extraordinary a concentration of power in the hands of a few men as in the Government today. All of the safeguards erected by the American people against too autocratic a government have been invaded. The powers once reserved to the States have been largely transferred to the Federal Government. And the Federal courts, which have the responsibility for protecting the rights of these States or the rights of individuals against Federal legislation, have been largely staffed by appointees of the new system.

For a time the Supreme Court stood in the way of this political usurpation of power—so much so that the President undertook his notorious and unsuccessful campaign to force a change in its membership. But deaths and retirements gave to the President,

by chance, what the people had denied to him by choice. And in the past 3 years, during which the President has been able to appoint five Supreme Court judges, the American people have had a series of decisions from the Court that have substantially changed our form of government. On almost every decision the Court has supported the administration. On almost every decision it has wiped out State and local lines and has extended Federal authority to every farm, every hamlet, every business firm and manufacturing plant in the country.

The judiciary, therefore, has offered little check upon the network of laws which the Federal Government has imposed upon the enterprises of the people.

I am not primarily concerned here with this change in the Supreme Court, nor with the extent of the regulatory laws, many of which are sound in principle and most of which will never be removed from our statute books. I am primarily concerned with the method by which these laws are administered. In the old days, laws were passed defining in black and white exactly what those who were subject to them were supposed to do. But today, laws regulating national activities or national industries must cover so many different and complicated conditions that Congress cannot do anything more than prescribe the basic principles; it must turn over to a commission the duty of formulating the rules.

It would be obviously impossible, for example, for Congress to write a law governing labor conditions which would be applicable, without further interpretation, to every business or occupation, large or small, anywhere in the country. Such a law can only be written in general terms; it must set up a commission to make it effective and to adjust it to different situations. So the commission, in effect, writes the law. The commission also prosecutes those who violate it. Then, having acted as both legislator and prosecutor, the commission undergoes another lightning change and becomes a judge sitting in judgment on its own case.

In the main, these commissioners are not appointed by Congress. They are not elected by the people. They are appointed by the Executive and responsible to him alone. Thus the people have no control over these individuals who write, enforce, and judge the rules for the 10,000,000 business enterprises of America. Every businessman in this room knows what this means. Whenever any one of you faces a commission regulation, or investigation, your first instinctive action is to classify the commissioners on the basis of those who are favorable to business and those who are hostile.

This is what is known as personal government. It is the oldest form of government known to mankind. Perhaps you will remember the old Bibical story of Esther who served under King Ahasuerus. When Haman had obtained from the King the authority to destroy Esther's people, Esther knew that her only chance for saving her people depended on winning the King's favor. So she dressed in her most beautiful clothes and prepared a fine dinner for the King with much wine, and then she said: "If it please the King, and if I have found favor in his sight, and the thing seem right before the King, and I be pleasing in his eyes, let it be written to reverse the letters devised by Haman."

Too many businessmen have had to adopt that attitude with Federal commissions in similar circumstances.

This is perhaps as complete a statement of personal government as one could find. For thousands of years mankind has suffered under government of that kind. And, in principle, there isn't much difference between that type of situation and the situation where the fate of an individual or an enterprise may depend upon the good will and favor of half a dozen Federal commissioners—or perhaps only one of them, if he is important enough to be the chairman.

Sometimes such a government has been honestly administered, sometimes dishonestly. But it is not the kind of government to be tolerated by an upright and independent people.

We have grown so hardened to the concentration of power in the hands of the executive department that we read, day after day, without a quiver, newspaper paragraphs discussing whether or not the President has decided to encourage private enterprise or whether he will continue the Government's vast spend-lend program to add to the deficit and further delay investment confidence. It is no longer news that the decision of one man should determine the direction in which this country will move. In former days in your city of Toledo you elected the officials who decided how the city's funds should be handled. Now, however, those decisions are largely made by someone in Washington over whom you have no control.

This concentration of political power in the hands of a few men not controlled by the people is just as bad as the concentration of economic power in the twenties; and it leads just as readily to the second abuse of which business was accused a decade ago, namely, the use of this power to influence political decisions.

I confess very frankly that this is a particularly sore point with me because I have personally been a victim of it so often. As most of you know, for several years the Commonwealth & Southern System, of which I am the head, was engaged in a fight to protect its operating companies in the Tennessee Valley from destruction by the Government. We lost that fight, just as every business will lose a fight against the Government, because we could not compete against a competitor with political control over unlimited funds. To destroy our business enterprises in the Tennessee Valley and to persuade municipalities to set up distribution systems of their own, the Government had two methods: First, the Tennessee Valley Authority offered its power at a less-than-cost rate with the loss subsidized out of the Federal Treasury; second, the P. W. A. would approach the municipal authorities and offer to give them free 45 percent of the cost of a new distribution system and to lend them the rest at a very low interest rate.

Now, there is no legal corruption involved in this, and obviously a municipal authority would find it difficult to refuse so tempting a proposal. But it represents one of the many ways whereby an all-powerful Government can use its funds to influence political decisions.

Today there are 31 Government agencies which can lend money and there are dozens of Government commissions regulating industry. Cooperation between the two offers frightening possibilities. A couple of weeks ago the Chairman of the National Labor Relations Board testified that the Board had an arrangement with the Reconstruction Finance Corporation whereby that Corporation would withhold any loans to companies which the Labor Relations Board had on its blacklist.

Personally, I think that various Government officials have made considerable effort to prevent the use of relief funds to influence the voters in political campaigns. Yet, we know that relief funds have been used in that way, just as they always will be where there is too much irresponsible political power. The influence of the purse is a great and grave influence, and a Government which distributes billions of dollars on spend-lend programs holds a terrifying weapon over the heads of those who displease it.

No corporate body has ever exercised or will ever be able to exercise one-tenth of the influence upon a legislature as that which political money can impose.

And this brings us to the third abuse once lodged against business and now lodged against Government: namely, the manipulation of the financial markets.

Not even a totalitarian state has more financial powers than those exercised by the present administration. Such "rigging" of the markets as the bankers were able to achieve in their heyday in this country was as nothing compared with the financial puppet show put on by the Government, in which, by pulling this string and that, the Government can lower or raise interest rates, security prices, purchasing power, and the value of various commodities.

For example, in 1934, in order to raise prices, the Government decided to lessen the value of the dollar and increase the price of gold; so, since that time the Government has been buying all the gold offered to it and paying a price of $35 an ounce. No other country and no other individual will pay such a price. If the United States should withdraw its offer, the price would immediately fall. As it is, the United States is slowly accumulating all the gold in the world. In these days gold is dug up in South Africa only to be promptly buried in Kentucky.

The Government has also set an artificial price for silver. In the 5 years 1934–39 we spent about $1,160,000,000 buying 2,100,000,000 ounces of silver at a price far above its market value. We did not need this silver, but the idea at first pleased the silver miners in two or three States. It was not wholly pleasing, however, because it made the United States the only silver market in the world, so that our exports of silver, once a leading item in our foreign trade, were reduced to a negligible amount.

The Government also maintains a stabilization fund of $2,000,000,000. The operations of this fund are kept secret by the Treasury. All that is known is that the Treasury uses these funds from day to day to buy and sell foreign exchange in order to keep the ratio at the level which it deems to be satisfactory.

The Government also influences interest rates and security markets through the activities of the Federal Reserve Board. There was a time when this Board was independent of the Government. Today, however, it is dominated by the United States Treasury. By open-market activities through the Federal Reserve banks interest rates, credit conditions and security prices generally are subject to the influences of the Government.

Manipulation is defined as the deliberate interference with the free play of supply and demand in the security markets. Some of the Government's manipulation has been desirable; some of its powers have been wisely used. But they represent a political domination of our finances beyond the wildest dream of the money-changers and economic royalists which the President used to talk about. And there is little difference in method between the pools organized by individuals to force a security price up or down and the controls practiced by various agencies of the Government to accomplish the same thing.

But these are only isolated items in this political domination of finance. Today the Government, of course, has practically complete control of the banking system. Through the Securities and Exchange Commission it has control of the security markets where securities are bought and sold, and also control over the issuance of new securities. If the Securities and Exchange Commission does not like a bond issue, it can prevent it. I know this from personal experience.

These specific powers over money, over credit, over securities, over prices, etc., are perhaps of less importance than the Government's general spending policy. When the Government first

started on its enormous expenditures for relief and public works, there was no question about their necessity. As emergency measures—and that was how they were regarded—they were sound and desirable. Unfortunately, because Government rarely relinquishes a power which it has once obtained, the emergency character of these measures was shortly disregarded; the Government embarked upon vast continuing spend-lend programs designed not to promote private enterprise but to promote direct financial and economic activity by the Government.

But even the "spend-lend" phrase was found somewhat unsatisfactory. It was too tentative and temporary. Shortly the Government began to talk about permanent Government investment.

Today the popular phrase is "compensatory Budget policy." In its complete form this policy calls for the Government to increase its expenditures (and its deficit) when business is declining and to decrease them when business begins to recover. Government never likes to curtail a spending program, and the past 7 years have demonstrated that Government spending on so huge a scale does not stimulate business, but frightens it, and also frightens the investor who supplies our enterprises with their necessary capital. The Government answers this by saying that ordinary investment methods are inadequate; the Government should take over this function also. Mr. Adolph Berle very frankly defined this attitude in his memorandum before the National Economic Committee, which stated:

"Briefly, the private financial system as at present constituted does not work. * * *

"If, therefore, wealth is to be created by creation of Government debt, the scope of Government enterprise must be largely increased. Briefly, the Government will have to enter into the direct financing of activities now supposed to be private, and a continuance of that direct financing must mean inevitably that the Government ultimately will control and own those activities. * * *"

Manipulation of the markets in the old days was child's play compared with manipulation by the Government. Also, manipulation by businessmen or financiers at least was subject to Government check. But there is no check upon the Government except the people themselves.

The fourth charge which the liberals hurled against the corporation presidents and bankers in the twenties was that they created monopolies designed to eliminate all opposition. As businessmen, we have long been familiar with the fact that the present administration is intolerant of any opposition, however moderate, to its reform measures. Laws are passed in an atmosphere hot with hatred and splattered with epithets. Those who counsel moderation, or who propose amendments, are classed with the die-hards and the Tories. As a result, many of the recent major laws have caused a suffering that would be totally unnecessary if the administration had accepted reasonable modifications. Far too often, a perfectly sound regulatory principle which might actually have been helpful to the Nation's welfare has been so distorted by the Government's desire for power or its determination to punish as to be harmful to the interest of the people.

It is a curious feature of human nature that as a man's power increases, so does his sensitivity to opposition. We are familiar with the phenomenon of the dictator who rages at the slightest reflection upon his motives or his methods. Messrs. Stalin, Hitler, and Mussolini are notorious for their dislike for anyone of a skeptical nature; even the minor voices of opposition disturb them. The same weakness can be detected in many members of the present Government. Public rebukes from the highest sources have been given to newspaper reporters who have become critical of administration policies. A chairman of one of the most important Federal commissions has long followed the practice of writing to, or calling upon, those newspaper correspondents or editors who have seen fit to criticize the chairman's actions. Pressure upon the press is a favorite weapon by which the administration seeks to silence the opposition—and to the credit of the press, it is generally a futile one.

Incredible as it may seem, members of the present administration have seriously tried to label any form of opposition as a sin. I sat as chairman of a meeting at which the Secretary of the Interior, Mr. Ickes, made a statement which would have astonished me even more if I had not heard similar statements from similar sources. Maintaining that opposition to the President was wicked, Mr. Ickes said:

"Anything you do at this time to shake the confidence of the great mass of the American people in either the President or the National Government is a sin against free enterprise, individual liberty, political democracy, and your own self-interest. No matter on what you may disagree with him, he is now a symbol of confidence whose loss of symbolic value would now make all agreements and disagreements utterly unimportant."

There have been religious fanatics in the past who have gone out to slay all those who disagreed with what they were pleased to call the one true faith. Today different religions exist peacefully, side by side, and each recognizes the existence of differing creeds within it. It is the politicians who have become fanatic. The basic principle of a democracy is the perpetual existence of an opposition. Beware the government, however virtuous, that demands 100 percent acquiescence. The difference between a good tyrant and a bad one is only a difference in time.

You will remember that business fiercely resented the efforts made by the liberals to restrain the excessive powers of business. Big business did not want to be checked in its control over the lives of the people. Now that the pendulum has swung the other way, we find that government has the same attitude. It does not want to be checked either. Just as business fought against regulation, so government today resists every effort to curb its authority.

For example, no trend in Government has been more alarming than the growth of Federal commissions with what amounts to legislative, executive, and judicial powers over industry, all combined in a few individuals appointed by the President. Last year the Senate Judiciary Committee reported to the Senate the Walter-Logan bill requiring that the rules prescribed by these commissions should be issued only after public hearings and could not be put into effect until 10 days after their publication; and requiring further that an orderly court procedure should be established for handling appeals from commission decisions. The executive department has opposed this bill, just as industry in the old days resisted proposals for industrial regulation.

Too much power in the hands of a few men; use of money to influence political decisions; manipulation of the markets; destruction of all opposition—these were the charges hurled against the economic monopolies of the first quarter of this century. They are the charges which we make today against the present form of government. The banners used by the true liberals today are the same banners used by the liberals in that other time. They bear the same inscription; they make the same appeal; but the citadel of corporate power against which they once were led has fallen. It is a new citadel of entrenched political power toward which they must be directed.

You may remember that one of the problems faced by the heroes in the old Greek legends was the fact that their enemies so often changed their shape. Hercules, for example, once had to wrestle with a foe who, finding he was being defeated in the form of a man, instantly took the form of a serpent. As Hercules again began to master him, he assumed the form of a bull. The shape of the enemy continually changed, but the enemy remained.

The enemies of liberalism continually change their shape, but their hostility remains. The liberal fights an endless battle, sometimes against one form of repression, sometimes against another. But he knows that monopoly in any form is intolerable. For many years he fought it in the form of business: And lo! today it has changed its shape—it now wears the guise of government.

The people of the United States will begin their real recovery from the depression when they demand that a curb should be placed upon a Government grown too great. In the past 10 years there was only one major activity in this country which has shown any real expansion: That is the United States Government. Government employment has increased nearly 100 percent; Government expenditures have increased nearly 200 percent, now amounting to over $9,000,000,000; Government borrowing has increased over 150 percent. The Government has created dozens of commissions and spent millions on buildings to house them. It has enormously added to its powers over our lives, and it has largely delegated those powers to Federal commissioners who are not responsible to the people nor to the Congress, but are appointed by the Executive.

Here is a real political boom! Here is one activity in which the enterpriser has become both rich and powerful. But all this has been accomplished at the expense of the people who have paid for it, not only in taxes, but in the losses which their enterprises have suffered as a result of this Government activity. The purpose of government is not to increase its own powers, but the powers of the people. The purpose of government is to make men free. In his book "The New Freedom" Woodrow Wilson made this memorable statement:

"The only thing that can ever make a free country is to keep a free and hopeful heart under every jacket in it. Honest American industry has always thriven when it has thriven at all, on freedom; it has never thriven on monopoly. It is a great deal better to shift for ourselves than to be taken care of by a great combination of capital. I, for my part, do not want to be taken care of. I would rather starve a free man than be fed a mere thing at the caprice of those who are organizing American industry as they please to organize it. I know, and every man in his heart knows, that the only way to enrich America is to make it possible for any man who has the brains to get into the game."

Woodrow Wilson was talking about economic monopoly, but his statement is just as true when it is applied to political monopoly. If the Government of the United States will sincerely dedicate itself to the purpose of making men free to carry on their economic enterprises and of making it possible for "the man with brains to get into the game," then this country, with its great trade area, its natural resources, and its business genius, will resume an economic progress which will be even greater in the future than it has been in the past.

Air Safety Board

EXTENSION OF REMARKS

OF

HON. WARREN R. AUSTIN

OF VERMONT

IN THE SENATE OF THE UNITED STATES

Monday, April 22, 1940

LETTER FROM PAUL M. NORMAN AND EDITORIALS FROM VARIOUS PUBLICATIONS

Mr. AUSTIN. Mr. President, on behalf of the Senator from Nevada [Mr. McCARRAN], who is necessarily absent, I ask unanimous consent to have inserted in the Appendix of the RECORD various communications and editorials relating to the fourth plan for reorganization as it bears on the Civil Aeronautics Authority and the Air Safety Board.

One of the communications is a letter from Paul M. Norman to the Senator from Nevada. Mr. Norman is an air-line pilot from Denver to Chicago. Another is a telegram from the Air Line Pilots of Denver, Colo., signed by J. W. Belding, chairman, to the Senator from Nevada. The editorials are from the Wyoming State Tribune of Cheyenne, the New York Times, the San Diego Union, the Los Angeles Times, and the New York Sun, respectively.

There being no objection, the communications and editorials were ordered to be printed in the RECORD, as follows:

DENVER, COLO., *April 20, 1940.*

Re: President's Reorganization Plan No. IV.

Hon. PAT MCCARRAN,

Senate Office Building, Washington, D. C.

DEAR SIR: The wisdom and vision incorporated in the Civil Aeronautics Act of 1938 are too apparent to the informed to necessitate discussion. Today air-line travel is the safest form of transportation in the world.

The gratitude of air-line personnel for the security of their lives and livelihood due to the impartiality of the independent Air Safety Board is naturally focused on those who devoted their energies to the creation of this agency.

The stabilization of the industry under the Civil Aeronautics Act has resulted in long-postponed rewards for those whose lives are devoted to the development of this industry. No one other than those selfishly interested in immediate economic advantage at the expense of continued good health of the business can favor abolishment of the Air Safety Board and subjugation of the Civil Aeronautics Authority to a bureau of the Department of Commerce.

Despair at the disastrous prospect of the President's Reorganization Plan IV is lightened for those most vitally interested by the heartening news of your sympathy and determination to prevent this disaster.

You have the unanimous support of all flying personnel, I am sure, and the assurance that the recommendations of David L. Behncke, president of the Air Line Pilots Association are the studied results of the collective experience and reason of the air-line pilots of America.

Respectfully yours,

PAUL M. NORMAN,
Air-Line Pilot, Denver to Chicago.

DENVER, COLO., *April 17, 1940.*

Senator PAT MCCARRAN,

Senate Office Building, Washington, D. C.:

Thanks again for your continued help and unfailing efforts to help us make air transportation the safest method of modern transportation. The Civil Aeronautics Act of 1938, and especially the Air Safety Board, are directly responsible for our new safety record. We air-line pilots are fighting not only for the continued healthy growth of air transportation but the continued safeguarding of our lives and the lives of our passengers. Let's not again revert to the black era of the past decade by allowing anything to interfere with the C. A. A. and Air Safety Board. Air transportation cannot be again made a political football to be tossed around without seriously impairing what we have so long fought for—safe air transportation and its relative national-defense value.

THE AIR LINE PILOTS, DENVER, COLO.,
J. W. BELDING, *Chairman.*

[From the Cheyenne (Wyo.) State Tribune of April 10, 1940]

AVIATION IS IN POLITICS

The Presidential order stripping the Civil Aeronautics Authority of police power over commercial aviation has provoked a furore among the industry's "topnotchers" and experts who have taken the trouble to read between the lines for its real meaning. Although described by F. D. R. as merely a routine shift, it may eventually subject all nonmilitary flying to the direction of politicians.

The framing of safety regulations and their enforcement now rests with the authority by will of Congress. A similarly independent safety board recommends changes whenever its investigation of an accident reveals the need. These two agencies have made such a fine record that there has not been a fatal accident for a year. But in the new order the President turns this power over to the Administrator, who is a political appointee removable at the pleasure of the President. He cannot oust the Authority, which has the same status as the Interstate Commerce Commission.

The shift also vests in the Administrator—long an administration favorite in the present instance—all control of the rapidly expanding program for training of civilian pilots. Insiders fear the move may prove as detrimental to civilian aviation as it would be if the railroads were handed over to the politicians. There are indications that Congress may block it if sufficiently aroused over the underlying issue.

[From the San Diego Union of April 4, 1940]

A REORGANIZATION BLUNDER

President Roosevelt's plan to place the Civil Aeronautics Authority under control of the Department of Commerce and abolish the Air Safety Board, is regarded by aviation experts and a great many Members of Congress as a serious blunder, one that if put into effect would retard aviation and rob it of many of its recent advances.

The commercial air lines of the country last month celebrated the completion of a full year of flying without a single fatality to passengers or members of crews. It was a record unparalleled by any transportation method as young as is commercial aviation. It indicated that some effective cooperation exists between the airlines, the C. A. A. and the Air Safety Board.

The Government had a tragic experience as a result of meddling in commercial aviation a few years ago when it canceled all mail contracts and assigned the task to Army fliers. Unprepared and untrained for the job, the brief period in which this experiment was tried resulted in the death of about a dozen Army pilots, disrupted service, and a series of crashes. Military and commercial flying are two different types of aviation, each requiring specialization of a high degree.

[From the New York Times of April 13, 1940]

SHIFTING C. A. A.

It is difficult to see any good reason for the provision in the fourth government reorganization plan which makes the Civil Aeronautics Authority an appanage of the Department of Commerce. This independent authority and the Air Safety Board, which would be abolished—its important functions having been transferred to a board within the Department—were created after long and earnest consideration on the part of both Government and the air carriers. The C. A. A. has functioned exceedingly well. It has been criticized for taking a middle-of-the-road position and endeavoring, when confronted with controversial problems, to carry water on both shoulders. In nearly all cases, however, events have proved its wisdom. It has shown initiative, notably in the pilot-training program, and has earned the respect and the thorough cooperation of the airlines.

The Air Safety Board has put force in what used to be the all too perfunctory function of accident investigation. It has not hesitated to censure where blame was due. While there has been some lag in the translation of its recommendations into action, healthful punitive measures have been taken. There has been rather widespread and to some degree justified complaint among private fliers over the red tape and complexities of the restrictions on their activities under the Air Regulation Section of the C. A. A. But on the whole these restrictions have made for safer flying of unscheduled as well as of scheduled character. The splendid record of the airlines, which has now extended well over a year without fatality or serious injury to passenger or crew member, stems in great part from their own efforts, but unquestionably a contributing factor has been the level-headed cooperation of the C. A. A. To make this independent agency a mere bureau of the Commerce Department seems to be a course of doubtful wisdom.

[From the Los Angeles Times of April 13, 1940.]

AVIATION AND POLITICS

Transfer of the Civil Aeronautics Authority to the Department of Commerce and abolition of the Air Safety Board are two very dubious provisions of the President's latest reorganization plan and Senator MCCARRAN will have substantial support in his effort to have the plan rejected by Congress. It took a long, hard fight less than 2 years ago to get aviation out of the clutches of the Commerce Department and into the hands of an independent board.

The President says the C. A. A. will still be independent and get only its budgeting through the Department of Commerce. But the present Secretary of Commerce, Harry Hopkins, is very political-minded, even though his incursions into politics have

been bungling and unsuccessful, and if there is any way in which he can turn his new powers to political ends he can be depended on to do it. Control of the Authority's budget certainly gives him a powerful leverage over it.

Whether the C. A. A., with a good many other things to do, can take over the functions of the Air Safety Board with full satisfaction is also a question. The President says this will do away with some top salaries. But presumably the men getting the top salaries are the best experts, and doing away with the best experts where human life is involved is questionable economy.

Some of the other changes are probably good ones. This is particularly to be said of transfer of the Food and Drug Administration into the same department with the Public Health Service. The Department of Agriculture has been very tender with farmers in its tolerance of lead and arsenic residues on food products. Recent development of insect sprays relatively nontoxic to humans may eliminate the lead-arsenic problem in time, but the Public Health Service will be disposed to tackle it more directly.

[From the New York Sun of April 17, 1940]

WHY REPEAT A MISTAKE?

President Roosevelt applies the dignified term of spinach to the protests of Senator McCARRAN, of Nevada, and other members of Congress against the contemplated transfer of the Civil Aeronautics Authority to the Department of Commerce, called for by Reorganization Plan No. IV, sent to Congress on April 11. There would seem to be even more of the redoubtable vegetable about the proposal to turn the C. A. A. over to the political mercies of the Department of Commerce, under the leadership of that hitherto unrecognized aeronautical authority, Harry Hopkins. The C. A. A. is less than 2 years old, having been created under a law approved by President Roosevelt on June 23, 1938. The fight for such an agency, however, began much earlier and was rooted in the congressional conviction that regulation of aeronautics by a bureau in the Department of Commerce resulted in the mixture of politics and aviation.

In the light of the offhand proposal to undo the reform accomplished in 1938, the legislative history of the law creating the C. A. A. is of interest. The Senate passed a bill to set up this new agency on May 16, 1938, without a record vote, which indicates how much opposition there was to the proposal. Two days later the House passed a bill of its own, differing in some details, also without a record vote. The conference committee ironed out the differences and produced the set-up that now exists, under which the administrative duties are separated from the quasi-judicial and quasi-legislative functions of the authority and under which the Air Safety Board operates as an entity.

The C. A. A. took over the powers exercised by the Bureau of Air Commerce in the Department of Commerce and it also took over some of the authority of the Post Office Department and the Interstate Commerce Commission. Responsibilities of the C. A. A., which already included regulation of pilot licenses, supervision of safety regulations, regulation of air mail and passenger rates and routes, and the study of accidents were added to when the C. A. A. was ordered by Congress to supervise a large-scale training program for civilian pilots. Has the C. A. A. made a good record? In the 8 months ended on August 22, 1938, before the C. A. A. took over, there were 31 fatal accidents on the commercial air lines. In the next 8 months, marking the beginning of C. A. A. regulation, there were 16 fatalities. In the year ended on March 26 last there were none. Pilots say that the C. A. A. has been more successful in safety work than the Bureau of Air Commerce was because it has been preoccupied with safety and has sought to discover the causes of accidents and eliminate the causes. The marvelous record of the commercial air lines may be a coincidence, as far as the C. A. A. and its Air Safety Board are concerned. But the record stands as a strong argument against returning to the regulatory procedure that less than 2 years ago was found highly objectionable and redolent of politics. Why turn back the regulation of air commerce to the Department of Commerce, when that Department was tried and found wanting?

Federal Loans and Grants

EXTENSION OF REMARKS

OF

HON. W. STERLING COLE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1940

TABULAR COMPARISON OF FEDERAL LOANS AND ASSESSED VALUATION

Mr. COLE of New York. Mr. Speaker, under leave to extend my remarks in the RECORD, I am inserting a table showing the relationship between the aggregate amount of Federal loans and grants received by the several States and Territories for the 5-year period ending in 1939 and the assessed valuation of the taxable property in the same States. It is to be noted that in one instance a State received 25 percent more than the total assessed worth of its taxable property and at the other extreme another State received only 11 percent.

The table follows:

Total Federal loans and grants received by States for the years ended 1934–39 in relation to assessed value of taxable property

State or territory	Total Federal loans and grants [1]	Assessed value of taxable property [2]	Percent assessed value is of Federal loans and grants
			Percent
Montana	$512,724,000	$411,000,000	124.8
Arkansas	679,287,000	555,000,000	122.4
South Carolina	494,277,000	[3] 408,000,000	121.1
Florida	527,288,000	520,000,000	101.4
Mississippi	677,373,000	[3] 692,000,000	97.9
New Mexico	278,959,000	334,000,000	83.5
Idaho	316,130,000	[3] 428,000,000	73.9
Iowa	1,067,754,000	1,464,000,000	72.9
Washington	785,611,000	1,250,000,000	62.8
Nevada	127,331,000	[3] 207,000,000	61.5
Georgia	757,214,000	[3] 1,268,000,000	59.7
Alabama	687,637,000	1,211,000,000	56.8
North Dakota	466,629,000	880,000,000	53.0
Puerto Rico	162,274,000	[4] 324,309,000	50.0
Arizona	329,691,000	675,000,000	48.8
Texas	2,009,792,000	[3] 4,241,000,000	47.4
Wyoming	192,581,000	[3] 419,000,000	46.0
Minnesota	1,047,253,000	2,308,000,000	45.4
Oklahoma	791,906,000	1,754,000,000	45.1
Oregon	484,364,000	1,093,000,000	44.3
Utah	267,688,000	618,000,000	43.3
Tennessee	694,059,000	1,664,000,000	41.7
Louisiana	649,363,000	[3] 1,666,000,000	39.0
Illinois	2,555,355,000	7,269,000,000	35.2
California	2,782,343,000	[3] 7,951,000,000	35.0
Colorado	500,634,000	1,447,000,000	34.6
Maine	242,942,000	[3] 757,000,000	32.1
South Dakota	468,761,000	1,509,000,000	31.1
Vermont	128,250,000	441,000,000	29.1
Nebraska	715,275,000	2,676,000,000	26.7
Virginia	582,340,000	[3] 2,353,000,000	24.7
Delaware	69,642,000	[3] 292,000,000	23.9
Missouri	1,142,437,000	4,789,000,000	23.9
North Carolina	647,790,000	[3] 2,831,000,000	22.9
West Virginia	419,567,000	1,878,000,000	22.3
Kansas	787,386,000	3,666,000,000	21.5
Wisconsin	1,072,905,000	5,074,000,000	21.1
Michigan	1,669,649,000	8,263,000,000	20.2
Indiana	1,013,902,000	[3] 5,073,000,000	20.0
Kentucky	599,158,000	[3] 3,060,000,000	19.6
Pennsylvania	2,314,365,000	12,763,000,000	18.1
Maryland	492,201,000	2,762,000,000	17.8
New Jersey	1,230,003,000	[3] 6,819,000,000	17.6
Ohio	2,285,936,000	13,453,000,000	17.0
New Hampshire	108,091,000	[3] 679,000,000	15.9
Massachusetts	1,144,374,000	7,443,000,000	15.4
New York	3,982,444,000	29,560,000,000	13.5
Rhode Island	161,672,000	[3] 1,447,000,000	11.2
Connecticut	353,247,000	3,151,000,000	11.2

Supreme Court Holds Sale of Hetch-Hetchy Power Illegal

EXTENSION OF REMARKS

OF

HON. FRANCK R. HAVENNER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1940

DECISION OF THE SUPREME COURT OF THE UNITED STATES

Mr. HAVENNER. Mr. Speaker, under leave to extend my remarks in the Appendix of the RECORD, I include a decision of the Supreme Court of the United States rendered today in the

suit of the Federal Government against the city and county of San Francisco to enjoin the sale of Hetch-Hetchy power to a private corporation.

[Supreme Court of the United States. No. 587. October term, 1939. *United States of America, petitioner,* v. *City and County of San Francisco, a municipal corporation.* On writ of certiorari to the United States Circuit Court of Appeals for the Ninth Circuit. April 22, 1940]

Mr. Justice Black delivered the opinion of the Court.

By the Raker Act of December 19, 1913, Congress granted the city and county of San Francisco, subject to express conditions, certain lands and rights-of-way in the public domain in Yosemite and Stanilaus National Parks. The act in terms declared that this, known as the Hetch-Hetchy grant, was intended for use by the city both in constructing and maintaining a means of supplying water for the domestic purposes of the city and other public bodies, and in establishing a system "for generation and sale and distribution of electric energy."

Upon application of the Secretary of the Interior, the United States brought this suit in equity charging the city with disposing of power through the Pacific Gas & Electric Co., a private utility, in violation of section 6 of the granting act. Section 6 provides "That the grantee (the city) is prohibited from ever selling or letting to any corporation or individual, except a municipality or a municipal water district or irrigation district, the right to sell or sublet the water or the electric energy sold or given to it or him by the grantee: *Provided,* That the rights hereby granted shall not be sold, assigned, or transferred to any private person, corporation, or association, and in case of any attempt to so sell, assign, transfer, or convey, this grant shall revert to the Government of the United States."

The district court concluded that the city was violating section 6 by the sale and distribution of Hetch-Hetchy power through the Pacific Gas & Electric Co., a private utility. Accordingly, the city was required by injunction alternatively to discontinue such disposal of the power or cease further use of the lands and rights granted it under the act for generation and transmission of electric energy. The circuit court of appeals reversed, finding that the private utility was merely acting as the city's agent in the sale and distribution of Hetch-Hetchy power and holding that section 6 does not prohibit such sale and distribution of that power by a private utility.

Here, as in the courts below, the city has defended the sale and distribution by Pacific Gas & Electric Co. of power originating at Hetch-Hetchy upon the grounds that such disposition does not violate the prohibitions of section 6, that imposition of these prohibitions was not within the constitutional authority of Congress; and that if section 6 is valid, and has been violated, the United States is not entitled to injunctive relief in equity.

1. Prohibitions of section 6: In the city's view, section 6 does not preclude private utilities from all participation in the ultimate sale and distribution of Hetch-Hetchy power. The city insists that the section, so construed, does no more than prohibit the city from selling Hetch-Hetchy power to a private utility for resale to consumers, and therefore permits consignment of the power to the company, as agent of the city, for sale and distribution. On the contrary, the Government's position rests upon the claim that Pacific Gas & Electric Co. is not in reality selling and distributing Hetch-Hetchy power as consignee and agent, but as purchaser for resale; that the grant to the city was made upon the mandatory condition that this power be sold solely and exclusively by the city directly to consumers and without private profit, in order to bring it into direct competition with adjacent privately owned utilities; and that section 6 not only withholds the right of selling for resale but also prohibits the city "from ever selling or letting" to any private corporation "the right to sell or sublet the * * * electric energy sold or given to it * * * by the city." The language of the act, its background, and its history require the construction given section 6 by the Government.

From its provisions it is apparent that the act conditions the grant upon and contemplates the development, sale, and distribution of electrical power by the city itself "for municipal and commercial use" on a scale to be gradually stepped up over a period of years. "The * * * grantee shall develop and use hydroelectric power for the use of its people, and shall * * * sell or supply such power for irrigation, pumping, or other beneficial use." The "right to sell or sublet the * * * electric energy" so generated by the city cannot, as a consequence of section 6, be sold or let. And in case of any attempt to "sell, assign, transfer, or convey [the rights granted], this grant shall revert to the Government of the United States."

From the statement of the Congressman responsible for the application of the prohibitions of section 6 specifically to electric energy, it is clear that as enacted section 6 was understood to prohibit the city from transferring to a private utility the right to sell Hetch-Hetchy power (the Government's contention) and not merely to forbid sale of power as a commodity for resale, as the city would have us hold:

"Mr. TAYLOR of Colorado. We have got to let the municipality sell to individuals or consumers.

"Mr. THOMSON of Illinois. Yes; but not the right to sell someone else the power.

"Mr. TAYLOR of Colorado. Supposing that San Francisco sells a certain block, you may say, of its power to Alameda. Has not Alameda got the right to resell that to its inhabitants?

"Mr. THOMPSON of Illinois. Mr. Chairman, in answering the question of the gentleman from Colorado, I would like to call his attention to the fact that the subject of sale as printed in this section is not the power or the water but the right to sell the power or the water.

* * * * * * *

"Mr. RAKER. That [the word "individual"] really is intended to cover any person who might attempt to buy this electric power or right. I think it would cover everybody outside of a corporation, the intention being to prevent anybody getting in and getting a right and subletting it."

In its report on the bill, the House Committee on Public Lands stated that the provision of section 6 "acquiesced in by the grantee, was designed to prevent any monopoly or private corporation from hereafter obtaining control of the water supply of San Francisco."

From the congressional debates on the passage of the Raker Act can be read a common understanding both on the part of sponsors of the bill and its opponents that the grant was to be so conditioned as to require municipal performance of the function of supplying Hetch-Hetchy water and electric power directly to the ultimate consumers, and to prohibit sale or distribution of that power and water by any private corporation or individual. On the floor of the House, the following took place between the bill's author and other Representatives:

"Mr. SUMNERS. Does San Francisco own its own lighting plant now?

"Mr. KAHN. No; it does not.

"Mr. RAKER. I understand it does not.

"Mr. KAHN. It does not own its own water supply. Its present water supply is furnished by a private company.

"Mr. RAKER. The Spring Valley Water System.

"Mr. SUMNERS. Is it the purpose of this bill to have San Francisco supply electric power and water to its own people?

"Mr. RAKER. Yes.

"Mr. SUMNERS. Or to supply these corporations, which will in turn supply the people?

"Mr. RAKER. Under this bill it is to supply its own inhabitants first. * * *"

These views were in accord with the recommendation of the then Secretary of the Interior, as set out in the Report of the Public Lands Committee of the House:

"I think that it is very proper that the Federal Government should use whatever power it has over the public lands, over the parks, and over the forests, to compel the fullest use of these waters, and indirectly to require, through its power to make conditions, the lowest possible rate for consumers."

The theme—of an intent to require public utilization of Hetch-Hetchy power independently of private utilities—recurred at a later stage of the debate in the House:

"Mr. GRAY. * * *

"As I understand the bill, it provides for the furnishing of water, and also for power for commercial use. * * *

"* * * if these works here are to be constructed to serve the baseness of commercialism, it is the vilest of all vandalism. My suggestion here to you is to strike out of this bill all the commercial profit. * * *

"Mr. KENT (a member of the California delegation and a supporter of the measure). Mr. Chairman, I should like to suggest to the gentleman from Indiana [Mr. Gray] that this bill is strictly drawn in the public interest, that there is no possibility of selfish gain, and that no corporation or individual can obtain any benefit whatsoever from this bill. It is for the benefit of the people of California."

In the Senate, Senator THOMAS, a member of the committee reporting the bill, said:

"* * * San Francisco needs electric power, and California needs development in electric power just as much as she needs ownership in water. * * *

"* * * She is anxious to extend her spheres of municipal usefulness, but she is in the grip of a power monopoly as well as that of the Spring Valley Co.

"* * * This scheme appeals to me, Mr. President, so far as the power is concerned, because the city of San Francisco as a municipality will be the owner of it, the manufacturer, the distributor of it."

And the words of Senator NORRIS, also a member of the reporting committee and a leading sponsor of the bill, on the day of its final passage through the Senate, illuminate just what the Raker Act was intended to accomplish:

"* * * I said that I was in favor of this bill to a great extent for the reason that it developed this power. This power will come into competition with the various water-power companies of California, and there are lots of them there.

"* * * this proposition is to harness that power and to put it to public use—not to give it to a private corporation. * * *

"Here is an instance where we are going to give it directly to the people if we pass this bill. It is going to come into competition with power companies and corporations that have, or will have, if this bill is defeated, almost a monopoly not only in San Francisco but throughout the greater portion of California.

"* * * These make in all, as I have counted them, 18 corporations controlling the power in the vicinity of San Francisco that are under the control of this one corporation. (Pacific Gas & Electric Co.)

"* * * When you sum them all up you will find that they own practically all of the hydroelectric power of the State of California, and this bill if passed will bring into competition with them one of the greatest units for the development of power that has ever been developed in the history of the world. It means competition.

"* * * Conservation does not mean dealing out these resources to private capital for gain. It is not necessary to accuse those corporations of doing any wrong, but here will be an instance where the cheapest power on earth will be developed and where it will be sold at cost."

Opponents of the bill themselves recognized that its regulatory conditions were designed to insure distribution of power from Hetch-Hetchy through a municipal system in San Francisco. Before final passage in the Senate, opposition had practically narrowed down to the power provisions of the measure, and these provisions contemplated a publicly owned and operated power system. Immediately before the vote in the Senate, Senator McCumber, opposed to the power provisions of section 6, offered a sweeping amendment which would have omitted that section and all other provisions relating to the generation, sale, and distribution of Hetch-Hetchy power. But this amendment was defeated. And despite this articulate opposition to the policy embodied in its power features, the act was passed.

To limit the prohibitions of section 6 of the act narrowly to sales of power for resale without more, as the city asks, would permit evasion and frustration of the purpose of the lawmakers. Congress clearly intended to require—as a condition of its grant—sale and distribution of Hetch-Hetchy power exclusively by San Francisco and municipal agencies directly to consumers in the belief that consumers would thus be afforded power at cheap rates in competition with private power companies, particularly Pacific Gas & Electric Co. It is not the office of the courts to pass upon the justification for that belief or the efficacy of the measures chosen for putting it into effect. Selection of the emphatically expressed purpose embodied in this act was the appropriate business of the legislative body.

The admitted facts shown by this record required the district court to find—as it did—that the city was violating section 6 in permitting sale and distribution of Hetch-Hetchy power by the Pacific Gas & Electric Co. Now, as it has been doing since contracting with the city in 1925, the company sells and distributes that power as follows:

Power generated in the city's plant is transmitted to the company at Newark, about 35 miles from San Francisco. There the power is delivered to the company's substation and thereafter is under the company's complete control. The company distributes and sells this power to its customers in San Francisco and elsewhere exactly as it handles other power which it generates, buys, or owns. Consumers of the power are billed by and pay the company. The city buys Hetch-Hetchy power from the company exactly as do other consumers. The city receives monthly payments from the company on a fixed basis set out in the contract. The price received by the city has remained constant from 1925 to date although rates to the consumers have varied in the interim. In the event of the refusal, failure, or inability of the company to take the available output of the city's plant in accordance with the agreement, the amount of energy which the city could have delivered is the basis of making the monthly payment, and the company must pay for power delivered to it whether actually disposed of by resale or not. The rate paid by consumers for the Hetch-Hetchy power is not fixed by the city, as it could be under the constitution of California, but is fixed by the State railroad commission just as the price of all other power sold by the Pacific Gas & Electric Co. in California is fixed.

Thus, in brief, the city does not itself distribute and sell the power directly to consumers; it has not provided competition with the private power company; and it has transferred the right to sell and distribute the power to a private power company in violation of the express prohibition of section 6 of the act.

Terminology of consignment of power, rather than of transfer by sale, and verbal description of the power company as the city's agent or consignee, are not sufficient to take the actions of the parties under the contract out of section 6. Congress, in effect trustee of public lands for all the people, has by this act sought to protect and control the disposition of a section of the public domain. The city has in fact followed a course of conduct which Congress, by section 6, has forbidden. Mere words and ingenuity of contractual expression, whatever their effect between the parties, cannot by description make permissible a course of conduct forbidden by law. When we look behind the word description of the arrangement between the city and the power company to what was actually done, we see that the city has—contrary to the terms of section 6—abdicated its control over the sale and ultimate distribution of Hetch-Hetchy power. There remains only the determinations whether the prohibitions of section 6 are constitutional and can be enforced in equity.

Second. The prohibitions of section 6 are challenged by the city as an unconstitutional invasion of the rights of the State of California on the ground that they attempt to regulate the manner in which electricity shall be disposed of in San Francisco. And the city, therefore, insists that these prohibitions must be considered only as covenants in a contract between the city and the United States. Upon this premise, the city has argued here, as it did in the court of appeals, that alleged equitable defenses render the covenants unenforceable.

When the Raker bill was before Congress, the city filed with the Public Lands Committee of the House a brief and argument in support of the bill. Citing authorities, including this Court's opinions, and legislative precedents, the city submitted to Congress that as grantee it would be bound by and as grantor Congress was empowered to impose "the conditions set forth in the Hetch-Hetchy bill." After passage of the bill the city accepted the grant by formal ordinance, assented to all the conditions contained in the grant, constructed the required power and water facilities, and up to date has utilized the rights, privileges, and benefits granted by Congress. Now, the city seeks to retain the benefits of the act while attacking the constitutionality of one of its important conditions.

Article 4, section 3, clause 2 of the Constitution provides that "The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory and other property belonging to the United States." The power over the public land thus entrusted to Congress is without limitations. "And it is not for the courts to say how that trust shall be administered. That is for Congress to determine." Thus, Congress may constitutionally limit the disposition of the public domain to a manner consistent with its views of public policy. And the policy to govern disposal of rights to develop hydroelectric power in such public lands may, if Congress chooses, be one designed to avoid monopoly and to bring about a widespread distribution of benefits. The statutory requirement that Hetch-Hetchy power be publicly distributed does not represent an exercise of a general control over public policy in a State but instead only an exercise of the complete power which Congress has over particular public property entrusted to it.

Third. Finally, on the basis of numerous objections to the district court's judgment, assigned as errors in the court below and pressed here, the city denies the Government's right—upon a balancing of equities—to relief by injunction even if the present disposition of Hetch-Hetchy power be in violation of the act.

However, after consideration of all these objections, we are satisfied that this case does not call for a balancing of equities or for the invocation of the generalities of judicial maxims in order to determine whether an injunction should have issued. The city is availing itself of valuable rights and privileges granted by the Government and yet persists in violating the very conditions upon which those benefits were granted. Congress provided "That the grantee [city] shall at all times comply with and observe on its part all the conditions specified in this act and in the event that the same are not reasonably complied with and carried out by the grantee, upon written request of the Secretary of the Interior it is made the duty of the Attorney General in the name of the United States to commence all necessary suits or proceedings in the proper court having jurisdiction thereof, for the purpose of enforcing and carrying out the provisions of this act." Pursuant to this legislative mandate, the present suit was instituted to enforce covenants exacted from a grantee of rights in the public domain by a Congress sympathetic with the local needs of San Francisco but also jealous of its own responsibility to dispose of such rights in a manner deemed by it most likely to render their benefits widespread. The equitable doctrines relied on do not militate against the capacity of a court of equity as a proper forum in which to make a declared policy of Congress effective. Injunction to prohibit continued use—in violation of that policy—of property granted by the United States, and to enforce the grantee's covenants, is both appropriate and necessary.

A substantial part of the city's argument rests upon its claim that the Department of the Interior in the period from 1913 to 1937 construed section 6 to forbid no more than sale of power for resale. We are asked to accept these administrative interpretations. And in addition the city suggests that conduct of the Department, of which these interpretations were a part, is sufficient to create an estoppel against the Government. Whether the Department at any time ever did more than merely to tolerate sale and distribution of Hetch-Hetchy power by the company as a temporary expedient is doubtful. Certain it is, however, that in 1935 the Secretary of the Interior declared the city's disposition of the power through the company to be a violation of section 6, demanded discontinuance of this violation without success, and thereafter instigated this proceeding We cannot accept the contention that administrative rulings—such as those here relied on—can thwart the plain purpose of a valid law. As to estoppel, it is enough to repeat that "* * * the United States is neither bound nor estopped by acts of its officers or agents in entering into an arrangement or agreement to do or cause to be done what the law does not sanction or permit."

The judgment of the circuit court is reversed. The judgment of the district court is affirmed and we remand the case to it.

It is so ordered.

Mr. Justice McReynolds is of the opinion that the judgment of the circuit court of appeals should be affirmed.

The United States and the Philippines

EXTENSION OF REMARKS

OF

HON. ERNEST W. GIBSON

OF VERMONT

IN THE SENATE OF THE UNITED STATES

Monday, April 22, 1940

ADDRESS BY SALVADOR ARANETA

Mr. GIBSON. Mr. President, I ask unanimous consent to have printed in the RECORD an address delivered recently by Mr. Salvador Araneta on the Town Meeting of the Air, sponsored by the D. M. H. M. newspapers, in the Philippine Islands.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

The two recent reexamination speeches of President Quezon unquestionably embody his most important pronouncements in the last years as the leader of our people. Although I cannot agree with His Excellency in his major conclusion nor in some of his minor considerations, I am happy to say that as to his major premises we find ourselves on common ground. They are the following:

First. In the next 25 years we shall not be in a position to defend our country against a major invasion;

Second. Conquest is a potential danger, which may or may not come;

Third. There is no danger that any foreign power will try to attack or conquer the Philippines as long as the American flag stays here;

Fourth. There is one thing in the fight of the Filipino people for freedom which we may never renounce, and that is the substance of freedom;

Fifth. There is a solution to the Philippine question better than complete and absolute independence in 1946; and

Sixth. We can find no greater nation with which to live than the United States.

Now then, what is the substance of freedom, which we should never renounce and that if granted to us would offer a solution to the Philippine question better than complete and absolute independence in 1946?

This question was categorically answered by the President in an interview to the press, in 1938, when former High Commissioner McNutt proposed a realistic reexamination. His Excellency clearly stated that he would accept a dominion form of government for the Philippines, like that of Canada, even without the autonomy on foreign affairs enjoyed by Canada. This is precisely the solution which has been advocated by the Philippine Civic League.

But it is contended that, if we remain under the American flag, the "substance of freedom" would never be granted to us. It may be asked, in what respect is the substance of freedom being denied to us under our present status? The President in his last two speeches has emphasized our lack of autonomy on trade matters. As you know our tariff and currency acts have to be approved by the President of the United States. He has also asserted that Congress will never pass a law establishing the economic relations between America and the Philippines on a basis of mutuality, because he believes that Congress will never grant us full right to export to the United States without limitation.

We must not forget that foreign countries are allowed to export their products to the United States without limitation, but their trade with the United States is not on a free trade nor on a preferential basis. Cuba is the only foreign country that enjoys a preferential trade with the United States and is the only foreign country whose sugar exports to the United States are subject to limitation. Whether we remain under the American flag or not, if allowed to choose between a preferential trade with certain limitations as that enjoyed by Cuba, or a nonpreferential trade but without limitations as that enjoyed, say, by Brazil, I am quite sure we would prefer the former.

The President has stated that our present economic relations with America "are unfair, untenable, and, in the end, very injurious to the interests of the Filipino people." This might be a correct statement had these relations been intended to continue indefinitely. We seem to forget that the export taxes and the limitations of our exports to the United States were devised principally to gradually diminish our dependence on the American market, and that the excise and the export taxes are funds that accrue to our Government. The oil tax alone, according to the latest estimate, will bring to the Islands more than 400,000,000 pesos.

We have been invited to say good-bye to a generous father, simply for fear that he may later become unjust to us. Aren't we being unfair to him in forgetting that if of late he has not been as generous as before, it is only because he is trying to prepare us for the battle of life that we will have to face once we obtain the emancipation that we have been asking for?

In the past the United States has preferred to give us free trade rather than complete autonomy on tariff and currency matters. I do realize that the United States might insist that we cannot have trade autonomy and preferential treatment at the same time. I am afraid that we might have to choose between these two alternatives.

Irrespective of our political ties with the United States after 1946 we can make it known that we insist on having trade autonomy, and that as between free trade or preferential trade on the one hand, and autonomy on trade matters on the other, we choose the latter. If we take this attitude I am sure the United States will grant us the substance of freedom in our economic life.

With reference to the political ties, I suggest that we make it known that we shall be glad to have the United States retain suitable naval bases in the Philippines, as authorized in the Tydings-McDuffie Act. Since the United States may not consider retaining naval bases in the Philippines unless they have some control over our foreign political affairs, we should also make it known that we are willing to leave in the hands of the United States the control of our foreign political affairs. Thus, the American flag would continue in the Philippines.

American naval bases in the Philippines with all their implications would not justify the control on the part of the United States of our economic life, but they might justify a control of our foreign political affairs. But it has been argued that the United States would not consider prolonging independence simply to give us more time to be fully prepared to defend our country. It is true that the United States in deciding to stay in the Philippines will not be motivated entirely by a mere desire to accommodate us. She will stay in the Philippines only if she has to stay in the Orient. But she may not decide to stay in the Orient if we make it impossible for her to stay in the Philippines.

Dr. Frederick Merrill, in an article entitled, "The Outlook for Philippine Independence," published in the September 1939 issue of the Foreign Policy Reports, states the following:

"If the United States is to safeguard its own interest, aid in the restoration of international law and order in China, and uphold the status quo in the Far East as a whole, the economic well-being of the Islands becomes a corrollary requisite to the program. Only by allowing the Philippines a special trade position after independence can their economic stability be assured. Such concessions, however, might require control over their external affairs or the establishment of dominion status."

And Professor Kirk in a recent study makes the following statements:

"The United States should not withdraw politically (from the Philippines) if it is to maintain any prestige in, or to exert any influence over, the general course of development in the Orient. * * * Indeed it seems quite probable that the Philippine decision will determine the course and nature of American policy toward eastern Asia."

Evidently if we insist on independence in 1946 we might finally force America to leave the Orient lock, stock, and barrel. Such an eventuality, my friends, I would hate to see. As sure as the sun will rise tomorrow, once the influence of the United States is gone from the Orient we may nominally and, on paper, have absolute and complete independence; but, in fact, a foreign power will actually be dictating to our government, and we shall be enjoying in the Philippines in a lesser measure and degree what the President refers to as "the substance of liberty." Nay, we shall have less liberty and less exercise of sovereignty than what we are now enjoying under the Commonwealth government.

It is true that "no people can consider our interest in the same light as we will and must consider our own interest." I agree that "it would be asking too much of human nature to expect the people of the United States to think of Filipino well-being first before America's well-being." It is for this reason that, following the suggestion of President Quezon, absolute autonomy in our economic life should be considered as an integral portion of what he calls the substance of freedom. But, viewing the problem from another angle, and if we wish to be realistic, we should ponder that independence in 1946 will only mean emancipating ourselves from a rich father who can afford to be generous, only to find ourselves involved in illegal relations with a poor cousin or becoming one of the four wives of an oriental, who considers a wife as a mere chattel.

A "foreign conquest of the Philippines by another power may not be the end of our future," as stated by the President. I pray that he is right in his hope that even if we are conquered we shall not be conquered forever. It thrills my heart to hear that the basis of the greatness of a people is ethics; that we should fear not a foreign conqueror but the weakness of our own people. But in these very days foreign conquerors, realizing the value of moral force, destroy not only all armed force that they encounter but moral forces as well, using even opium to achieve their end. Furthermore, I would hate to see the history of Korea repeated in the Philippines and the labors of our patriots from Rizal to Quezon all gone with the wind. President Quezon himself, in his message to the assembly on the subject of national defense, has stated the following:

"What, I ask, would be the use of seeing our country free one day, with its own flag standing alone and flying against the sky, only to see ourselves the subjects of another power the following day, with its flag the sovereign in and of our country? * * * If that be our preordained fate, why seek a new master when the stars and stripes has given us not only justice and fair treatment, welfare and prosperity, but also ever-increasing political liberties, including independence?"

I submit that the President, just by simply stating that a dominion form of government, or even a modified dominion form of government, without the autonomy on foreign political matters would be acceptable to us, and that it is a better solution than independence in 1946, has gone a long way in the present reexamination movement. His speech in the present early stages of the reexamination process should be considered as a noble and dignified redefinition of the stand of our people on the Philippine problem. Considering that Manuel Quezon is the president of our government, the leader of our people, and, above all, the father of our nation, he could not very well ask something unless he first receives reasonable assurance from Washington that the same would be acceptable. Not having received any such assurance from Washington, he has been very careful not to make it appear that he is asking for a dominion status. This consideration should be given proper weight by our friends on the other side of the Pacific. With his stand, which has the unanimous support of the people of the Philippines, reexamination, at least theoretically, has been won in the Philippines.

My friends, reexamination simply means a desire to restudy the Philippine problem and not to consider complete independence in 1946 as the best and only possible solution to our problems. Reexamination is to consider that the door is still open for future negotiations.

Reexamination, my friends, is on the march. No less a personality than Carlos P. Romulo, our country's brilliant publisher and unquestionably the Filipino Gayda, in his editorial of yesterday, has stated:

"Not once but several times in the past several months, President Quezon, in his capacity as leader of the Filipino people, has made what might be described as a counterproposal apparently inspired by the realization that the door to new negotiations has been kept slightly ajar by the American people. * * * The Filipino people have spoken and spoken in words so clear as to admit of no misunderstanding. The next move is America's."

President Quezon has definitely stated that in theory he is in favor of reexamination; that, as a matter of fact, he is against it.

If reexamination is good in theory, as stated by the President, we may abandon reexamination as a matter of fact only if the chances are nil to obtain the solution which we would accept in case the question is reexamined, and, furthermore, if by giving some of our time to reexamination we are jeopardizing our preparations for independence.

As to the latter, I trust we all agree that our preparations for independence are not incompatible with reexamination. For reexamination does not call for the building of a national structure different from that which we should build to prepare ourselves for independence in 1946. Whether or not we remain under the American flag, we have to strengthen as much as we can our national defenses; and free-trade relations with the United States should be considered a thing of the past, since it is desirable that the Philippines should become economically less dependent upon the United States.

On the other hand, the chances to obtain from the United States full autonomy on trade matters are indeed fair, if we prefer trade autonomy to trade preferences, and such a solution is so priceless to us that we should be most careful in not closing the door to future negotiations.

I am convinced that, if properly presented, reexamination will receive a sympathetic hearing in the United States, because there exists a mutuality of interests between the United States and the Philippines in the Orient because it is to the best interests of the United States to help in the building of a strong and happy Philippines that will serve as a stabilizing influence in the Far East. This can only be assured by granting us the dominion form of government enunciated by the President. Such a government, even without autonomy on foreign political affairs, is a step forward in our march to freedom and self-determination. It is not a new experiment in the world. It is an association of two nations that have common ideals, mutual faith, and an identical destiny in foreign affairs.

The lessons of Manchukuo and Munich are too recent and too grim to be forgotten. Since then peoples and statesmen of the world have become more farsighted. I am sure democratic and progressive America will realize that our countries have common interests in the Orient.

For high ideals and for our own salvation, I do believe that we should continue united with America as partners and friends in the noble enterprise of maintaining democracy, justice, the defense of Christianity, and the reign of law and order in the Far East.

National Youth Administration—How It Works and What It Does

EXTENSION OF REMARKS

OF

HON. JERRY VOORHIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1940

RADIO DISCUSSION BY BEN O'BRIEN AND J. K. BRADLEY

Mr. VOORHIS of California. Mr. Speaker, under leave to extend my remarks I am pleased to include the following broadcast on the work of the National Youth Administration participated in by Katherine Jamieson, district manager for the N. Y. A. at Modesto, Calif.; Mr. J. H. Bradley, city superintendent of schools in Modesto; and Mr. Ben O'Brien, assistant to Mr. Robert Burns, State administrator of N. Y. A. for California:

Miss JAMIESON. Good afternoon, friends. Today we have as our guests Mr. Ben O'Brien, assistant to the State administrator for the National Youth Administration, and Mr. J. H. Bradley, city superintendent of schools in Modesto. Just a few minutes ago I overheard these men talking about the N. Y. A. program and I'm going to ask them to step up to the microphone so that the rest of us can hear their conversation.

Mr. BRADLEY. I am familiar with the local N. Y. A. activities but I would like to have you give us the aims of the N. Y. A. program for our listeners, Mr. O'Brien.

Mr. O'BRIEN. The National Youth Administration, through part-time employment for youths in need, makes it possible for thousands of high-school, junior-college, and university students all over the United States as well as in California to continue their education rather than drop out of school. In helping these students to complete their education it is the aim of the program and its directors to see that these youths not only complete their courses but obtain, where possible, practical experience in their N. Y. A. work which will help them in their academic life. For example: In several instances students studying to become biology teachers have performed directed research work and made drawings of mammalian and other early forms of life. This work has given them additional background in preparing for their chosen vocation as well as being the N. Y. A. assignment by which the youth is earning enough money to remain in school.

In some countries the answer to the problem of unemployed youth would be forced labor camps or forced military training. The United States, through the National Youth Administration, offers youth the chance to earn enough money to establish themselves as independent adults and at the same time gain experience for life work—constantly building an affirmative answer to that inevitable question of the employer, "Have you had any experience?"

"Learning While Earning" might be a good slogan for youth employed by the National Youth Administration. Youths who apply for work on the out-of-school program have oftentimes left school because of lack of interest or economic conditions at home. Those who left school from lack of interest upon being assigned to N. Y. A. work are usually placed at work in the field in which they are most interested and in which there is a chance for them to adapt themselves. If the youth does not get along well there, the supervisor may transfer him from one project to another until he finds the right one. Those who left school because of economic conditions find a method through N. Y. A. to earn enough to help out at home and yet have a chance to go back to school if they so desire. Many youths on the out-of-school N. Y. A. program have, through experience on the job, fitted themselves for such widely separated positions as an orchestra leader or an airplane mechanic.

Mr. BRADLEY. Mr. O'Brien, how does a young man find out whether or not he is eligible for N. Y. A. assistance if he is in school?

Mr. O'BRIEN. Each school participating in the N. Y. A. program administers the funds allotted to that school. This is usually done through the principal. He is sometimes assisted by a welfare committee. A youth 16 years of age or older, an American citizen, and enrolled in a high school or an advanced institution of learning must apply to the principal or person designated by him to take N. Y. A. applications. The youth applying, in order to be eligible, must come from a family with an income insuffi-

cient to maintain a reasonable standard of living and really need the work in order to remain in school. It is the duty of the principal or welfare committee, with the assistance of standardized N. Y. A. application forms, to select the students for N. Y. A. activities who need work most.

Mr. BRADLEY. Is the National Youth Administration interested in teaching young people a definite line of work?

Mr. O'BRIEN. We certainly are. All over the United States N. Y. A. projects are set up with the idea of the work experience it will provide for the youths. We try to establish projects with a minimum of menial labor attached unless that labor is directly a part of the training on that project.

Mr. BRADLEY. From the background of your experience what means or techniques have you found most successful in preventing N. Y. A. workers from graduating onto relief agencies?

Mr. O'BRIEN. The N. Y. A. program by helping each youth through an economic emergency is definitely a training program. The best insurance against having our young people graduate onto any relief program is to train each one of them until he is well equipped to do a job and has developed sound work habits.

Each youth on the N. Y. A. program must maintain an active registration in the State employment office. Last year approximately 3,850 young people, employed by the National Youth Administration, left the program for private employment.

Mr. BRADLEY. In what other fields do you have good instructional projects in California?

Mr. O'BRIEN. At Susanville under the United States Forestry Service and with the cooperation of the junior college a resident project is operated for those interested in forestry as their life work.

All youths going to this project must be high-school graduates, and definitely interested in forestry. These fellows live together dormitory style in a large building supervised by a resident N. Y. A. supervisor.

Each youth enrolls for academic instruction at the junior college and after school does practical work for the United States Forestry Service. Many youths have left Susanville to accept civil-service positions in the Forestry Service or to attend the University of California to obtain their degree.

At Visalia in cooperation with the Farm Security Administration a resident agricultural project is operated. This project is run along lines similar to Susanville except that youths are taking related training in agriculture instead of forestry.

At Bakersfield a resident project is operated for boys interested in becoming airplane mechanics.

All youths on resident projects are self-supporting. They earn in the neighborhood of $30 per month on N. Y. A. After a deduction is made for room and board the youth has from $8 to $10 per month for clothes and his own personal expenses.

Mr. BRADLEY. Can any youth apply to the local N. Y. A. office and go to one of these resident projects?

Mr. O'BRIEN. Yes. Any youth may apply at the N. Y. A. office providing he is between 18 and 25 years of age, an American citizen, and a member of a family where the income is insufficient to maintain a reasonable standard of living. If the interviewing official determines that the youth is eligible the youth may be assigned to a local work project. If the worker progresses properly on the local job, he may be recommended to one of the resident projects.

As space permits, the youth will then be assigned to one of these resident centers.

Mr. BRADLEY. You have been telling me mostly about projects for boys. What activities do you have for girls?

Mr. O'BRIEN. The main activities for girls include household demonstration, nursing, cafeteria, nursery school, library, and clerical work. There are resident projects for girls where they may study dietetics, the preparation and serving of meals, nursing, child care, and library and clerical work.

Mr. BRADLEY. What agencies may N. Y. A. cooperate with in establishing projects?

Mr. O'BRIEN. The N. Y. A. may cooperate with any tax-exempt agency in establishing projects. Any Federal, State, or municipal division of Government or organizations such as the Red Cross, Boy Scouts, and Girl Scouts are justifiable cosponsors.

Mr. BRADLEY. How much does an N. Y. A. employee earn?

Mr. O'BRIEN. In high school the maximum amount earned is $6. In junior college the minimum is $10 and the maximum $20. On the out-of-school N. Y. A. program, youths work 60 hours a month at the rate of 30 cents an hour. This means that each worker may earn $18. The ambitious ones stand a chance of promotion to 35 cents an hour, which makes a maximum of $21 per month per individual on the out-of-school N. Y. A. program.

Mr. BRADLEY. From your experience, what have you found to be the most important thing a secondary school system, particularly a junior college, can do in addition to cooperating with the National Youth Administration? My idea in cooperating is to render vital, fundamental, employment-learning service to all young men and young women coming from the N. Y. A. group.

Mr. O'BRIEN. I think you have answered your own question, Mr. Bradley. I believe one of our best hopes for the future is to prepare our youth through school and through practical experience to be well trained mentally as well as technically for any future position in which they may find themselves.

Mr. BRADLEY. Is the N. Y. A. a long-time period service or an emergency service?

Mr. O'BRIEN. The money used to operate the N. Y. A. program since its origin in 1935 has come through emergency-relief appropriations; however, I do not feel that this is an emergency program. The public school was the first step toward a literate public in the United States. However, there are still those among us who have a very difficult time remaining in school due to economic conditions. In a day when an education, either academic or industrial, is becoming more and more essential, I feel that the National Youth Administration is another step toward insuring an education for those who cannot afford one but are really willing to work for what they get.

The Test of Citizenship

EXTENSION OF REMARKS

OF

HON. JOSEPH J. O'BRIEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1940

ADDRESS BY J. EDGAR HOOVER, DIRECTOR, FEDERAL BUREAU OF INVESTIGATION

Mr. O'BRIEN. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include the following address delivered by J. Edgar Hoover, Director, Federal Bureau of Investigation, United States Department of Justice, before the Forty-ninth Continental Congress of the Daughters of the American Revolution, Constitution Hall, Washington, D. C., April 18, 1940:

It is with pride that I meet with you this morning upon the occasion of the Forty-ninth Continental Congress of the Daughters of the American Revolution. Yet the pleasure of our meeting must be tempered with the necessity for bringing certain facts into the open where we may face them with the courage demanded for their remedy. These are not bright days for the America which your forefathers fought so valiantly to preserve.

Your organization has witnessed in the past a succession of remarkable instances of patriotic cooperation designed to aid our Nation toward a better plane of existence. Therefore, because you are one of the truly great influences which have molded this Nation, I want to discuss with you a most important problem concerning our country's welfare. It may be stated in simple language. Foreign "isms" are seeking to engulf Americanism; this must not be allowed to happen. It need not happen, for we have had ample warning.

No finer job has ever been done in the history of the American press than that which now is being performed by the rank and file of our truly American publications. Heroic efforts are being made by them to separate the facts from propaganda, the true from the false, the pure from the impure. Hard-working journalists and editors have given of their best efforts and thought that we might be correctly informed, and this without hysteria.

Meanwhile, the editorial staffs of magazines which have a real national conscience have striven as never before to place before us a correct and sincere evaluation of the world's problems, seeking not to influence, but to educate. The same, of course, may be said for the responsible men and women of the radio and screen.

But while all this has been taking place, there has been a contrary effort in the underworld of literacy. By oral and printed attack, numerous thinly camouflaged organizations of questionable background and endeavor have sought to wash away our national foundation in an ink-stream of vilification. It seems inconceivable that in a land dedicated to freedom, and existing under a Constitution ordained for the well-being and protection of its every citizen, there should be so many despicable ingrates.

Many of them come from countries where political murderers have stained their hands with the blood of thousands where every decent thing in life has been ravaged, where every man is expected to spy upon his neighbor and betray his best friend, and where the underlying fundamental principle of government seems that of harassing humanity and defying God.

Cloaking themselves with the guarantees of our Constitution and the things for which it stands, they have the inconceivable effrontery to tell us that they are seeking to bestow upon us the blessings of utopia—instead of degrading us to the level of the blood-smeared countries for whose principles they are the bought-and-paid-for traveling salesmen. And I say that there is no place in America for such purveyors of hate and horror.

One may rightfully ask why I, as Director of the Federal Bureau of Investigation, should direct your attention toward revolutionary efforts in America. A main reason, of course, is the fact that by Presidential order, the F. B. I. has been designated as the central agency of the Federal Government to receive and give attention to

complaints of espionage, sabotage, and matters pertaining to our national defense. In addition there is a distinct connection between the professional destructionist and the professional criminal. Both are in a state of revolt against the American way. Both are racketeers.

However, what I have to say to you today should be construed as an appeal to common sense, and a desire for a calm, common sense appraisal of existing circumstances. While there is yet time, we must lock our national stable before the horse is stolen. If we use our heads today, we will not be forced to use our rifles, our airplanes, and our battleships tomorrow. And one thing is certain. We in the United States want peace.

I must remind you that in times like these, there is great danger of misguided efforts on the part of over-zealous groups of individuals who are often the victims of those motivated by a desire to further their own selfish ends. Let me warn you against the patriotic racketeer; the only things lower are the vipers of alien "isms" whose poisonous fangs are fatal.

Our national apathy toward the subject of crime represents a condition which in fact is an incubator for the things which are anti-American. Our antisocial groups grow rapidly; it is a fact that today one out of every 26 persons in America has been arrested for an offense more serious than a traffic violation. Every 21 seconds witnesses the commission of a murder, aggravated assault, burglary, car theft, robbery, or larceny.

If we do not accomplish more toward the wiping out of this crime front, the enemy within our shores will steadily make wider use of its possibilities for the destruction of American institutions. You have seen recently in the constantly changing story of Europe, the vast inroads which have been made in neutral nations by the employment of spies, traitors, and saboteurs.

Before this year comes to a close, unfortunately, we may expect that one out of every 17 homes will be a victim of crime—either some member will be charged with an offense, or will have suffered a loss, ranging from petty larceny to life itself. Our army of criminals numbers into the millions.

The representative of gangster governments finds a fertile field for his recruits in the underworld. He sings his hymn of hate in our prisons and penitentiaries, he skulks in the dives of desperate men, there to paint his picture of the glories to come when, to quote a manifesto of the Communist Party, there will be established "a stern dictatorship * * *. It will confiscate the banks, the factories, the railroads, the mines and the farms of the big corporations."

Perhaps you have labored under the mistaken impression that the radical who dreams of overthrowing our Government classes as his future victims only persons of enormous wealth. Regardless how meager your possessions—someone will want them. If you lose them it makes little difference whether they are taken by an ordinary murderer or an international pirate masquerading as a self-appointed savior of a country whose language he can barely speak. Again I ask, why don't these perverted busybodies go back and save the countries which espouse their views? Can it be possible that there would be no money in such a venture?

The average American has understandably been so confused by the muddled charges and denials made regarding various revolutionary organizations that, with typical American apathy, he is more than eager to shrug it all away with the belief that it is a great deal of smoke and very little fire. We haven't the time, we say, to understand what the proponents of foreign "isms" are working toward and why they want it. That is exactly what these destructionists desire. Their tactics are to becloud the issue, to let others connected with ostensibly reputable organizations "front" for them, to cover their tracks with confusing statements, to confound the average brain so that they may be able to proceed toward their goal with the slightest resistance.

These "ism" advocates and their fellow-masqueraders point to our forefathers as their historical sponsors. The preamble to the constitution of the Young Communist League states that its organization "* * * cherishes the ideals of Americanism embodied in the democratic traditions of our Nation and its great patriots * * *," such as Thomas Jefferson, Andrew Jackson, and Abraham Lincoln. This organization then desecrates the memory of these great Americans by stating that it "* * * derives inspiration from those great teachers and guides of all mankind: Karl Marx, Frederick Engels, V. I. Lenin, and Josef Stalin." Others exploit the workingman, the colored races, the farmer, the renter, and the "white collar" class by any and all hokum by which they can create a smoke screen for their real endeavors. On the surface, their claims, to the unthinking person, look enticing.

However, if the claims of such organizations are so meritorious, why have they not proven of worth in the countries which sponsor the ideals of these disturbers? Is there any such thing as peace or happiness or liberty in places where the populace is ruled by the fear of secret police, where one must live or die by decree, where children are reared to the godless lullabies of rattling machine guns, the horrible burst of airplane bombs, and the juggernaut progress of clattering tanks, belching flame and death upon those who flee before them?

It is amazing what credulity such proponents of brutality attribute to us, and it makes little difference from what foreign "ism" they emanate; recent unions of allegedly opposing factions have ended much necessity to differentiate. They are of the same stripe—they use the same approach, both openly and brazenly they flaunt democracy. What the worshipers of one bloody creed desire is also the desire of others.

These newly allied destructionists stand for the complete overthrow of all American institutions. They plan for the destruction of all religion. They would strangle patriotism, or to quote the words of a youth publication of the Communist Party: "You must fight against teachings which tell you to be a patriot in your country." That is why, incidentally, as the result of propaganda, there have recently been many examples of a growing disrespect for the American flag and a cynicism toward the freedom for which it stands.

To these scoundrels the sanctity of the American home is meaningless. They dream of the day when every American school shall become their own training ground. They are under instructions to permeate our Army and Navy with proponents of revolution. Agitators have worked among farmers, particularly sharecroppers, painting rosy pictures of the day when skies shall be red with the flames of destruction, and that which has belonged to others shall change hands—simply for the taking.

The cry among these defamers of American traditions is always for more youth to be fed into the maws of deceit. In manifestoes and training manuals, plan upon plan is urged for the infiltration of agitators and destructionists into youth-serving organizations.

It should be a matter of greatest national concern that while exponents of hatred, vice, and atheism seek youth with the rapacity of a starving wolf, we should be so apathetic to the needs of our civilization that of all our crime, nearly 20 percent is committed by boys and girls of less than voting age. To whom will these boys and girls listen while in jail, reformatory, or prison—to the chaplain with his earnest hope that they will proceed upon a better life, or to the skillful agitator and his fawning promises of a place at the table of luxury if only help be forthcoming on the day when freedom shall fall, outraged and bleeding before the assault of international terrorists?

You should remember that since the Federal Bureau of Investigation is in the first line of national defense against the saboteur, the espionage agent, and the revolutionist, it also is among the first to bear the brunt of attack. And I might add that no method is too foul, no lie too rotten for these people, who dedicate themselves to the teachings of the leader of all communism, Lenin, who wrote: "We must know how to apply at need knavery, deceit, illegal methods, hiding truth by silence * * *."

Therefore, since we know in advance that every trick of falsehood will be employed to lead us astray, let us look at the truth so that we may know the lies when we hear them.

It is ever the cry of the "isms" advocate that his constitutional rights and civil liberties are constantly in danger. These destructionists care nothing about violating the civil rights of others, and they would revile our Constitution except for the smoke screen of defense it gives them while they dig deep at our foundations of decency and liberty.

Therefore, let us have an understanding in this matter here and now. I charge that accusations indicating a purpose on the part of the Federal Bureau of Investigation to become an Ogpu, a Gestapo, a national police, or anything resembling such bodies, emanate directly or indirectly from certain anti-American bodies who hope to discredit the F. B. I. as a step in a general plan to disrupt the entire United States or from well-meaning but misinformed persons who have fallen to the lies and utterly false information of those who would tear asunder America's machinery of law enforcement.

Such monstrosities as the Ogpu or the Gestapo are foreign-born. They are inhuman, uncivilized, and un-American. Any person who charges that such methods have been condoned or even considered within the Federal Bureau of Investigation deliberately purveys a malignant falsehood.

Let us proceed a bit further and really look at the record of the F. B. I. During the past 12 years, the F. B. I. has investigated more than 52,000 cases in which convictions have been obtained. Not in a single instance has a conviction been reversed in a court of appeal for the alleged violation of civil liberties during the course of the investigation. In not one single instance has a conviction been reversed on a charge of brutality, third-degree tactics, cruel or inhuman treatment.

Recently, in Washington, the Federal district attorneys from the entire Nation unanimously adopted a resolution commending the F. B. I. for its preservation of the constitutional rights and civil liberties of persons arrested by its representatives. These prosecuting officials of the Federal Government are in daily contact with our special agents in their work and are intimately acquainted with all of the policies, regulations, and practices of the F. B. I.

And I might remark that those who now seek to traduce the F. B. I. as a first line of espionage defense are most eager to have you forget those dark days when fear stalked through every nursery, when the gruff voice of gangsterism made its demands for family fortunes, threatening meanwhile the death or disappearance of American boys and girls.

Those were the days when thousands of mothers placed their faith in the Federal Bureau of Investigation, where brave men stood ready, day and night, as they do now, to battle gangsterism on its own grounds. More than one of those men now lie in their graves, sacrificed to the underworld in your defense, their memories immortal to us who were their comrades.

The Federal Bureau of Investigation of today is exactly the same organization which battled the underworld in the black hours of the kidnaping menace and which has successfully solved 177 of 179 kidnapings since June 1932. It is the same organization which has successfully met the extortion and bank-robbery menace. There have been no changes in motive, in policy, in fundamental methods or in the fidelity, bravery, and integrity by which we have sought to protect you. However, certain individuals have hoped that the

lapse of time may have lured you into disregard for the events of the past.

All I can say is that if the F. B. I. was a good organization when fiends like Bruno Richard Hauptmann, John Dillinger, Alvin Karpis, and hundreds of other blood-crazed gangsters roamed America, then it is still good today when personalities like Earl Browder, Fritz Kuhn, and other representatives of un-American organizations, no matter under what name they masquerade, seek to lead you by lies, smoke screens, and innuendoes into treacherous trails.

The extent of these efforts sometimes reaches almost unbelievable depths. Only last week, for instance, orders emanating from the Communist Party of America, demanded national and concerted action against the F. B. I. With fantastic belief in American credulity, these plotters announced that every effort must be made by members of their organization to involve F. B. I. special agents in situations where they might be accused of crimes or improper activities. Then, said these Communist leaders, with its reputation stained by the smearing and discrediting of some of its men, destruction of the Federal Bureau of Investigation could proceed unmolested.

Anyone in public life must, of course, expect criticism—it is wholesome and beneficial when constructive. This applies particularly to law enforcement. It is your duty to criticize freely when there is need; it also is the American duty to stand by the brave, honest, efficient officers who give of their best for the communities they serve. A law-enforcing agency is only as good as its popular support, regardless of whether it is a constable's office, a county sheriff, a metropolitan police department, or a Federal agency.

Despite the tremendous obstacles that have had to be overcome, the character of law enforcement is today on a higher plane than ever before. Members of the law-enforcement profession, in many instances, have faced almost insurmountable odds in overcoming the barriers of apathy and venality, to say nothing of propagandist efforts everywhere, designed to picture the officer as a brute and the civilian as an object of oppression. Remember that all propaganda is not of the direct sort. The most dangerous type is that designed to make you doubt and distrust American methods, American habits, American institutions.

You have noticed that I have not designated all of our ism enemies by name. There is a good reason; it is a part of present-day strategy among these different assailants of liberty to claim all good things for themselves and all bad things for the organization down the street, thus creating confusion while they attack our institutions. Therefore, the test of American citizenship lies in the ability to have nothing to do with any of them. The real test of citizenship is our devotion to the preservation of the American democracy for which our forefathers fought and died, and which we are permitted to enjoy as a blessed heritage.

Let us consider the miserable type of destructionist who seeks to be our self-appointed savior. Look into his background; study his so-called panaceas. Read the recent history of the countries which he so proudly points to, or by which he has been duped. What do you find? Ruthlessness, the destruction of civil rights, destruction of happiness, destruction of freedom, and the destruction of life, often in such great numbers that they beggar statistics. From a land of starvation, hatred, envy, greed, brutality, and mass murder, they come fawning to us with their lethal drugs. Let us have none of them.

Our job is to keep to the path which has led us to happiness in the past and to regard with suspicion any winding trail or alleged short cut, no matter how alluring it may be portrayed These praters against the American way of life are in reality a gang of international confidence men, seeking to steal our wallets by promising us the pot of gold at the end of the rainbow which no one will ever reach. Apply to every self-appointed savior the acid test of Americanism and if he cannot pass that, suggest that he go to the lands of stinking death which incubate his ideas.

And I hope that today you will pledge yourselves with me to a solemn rededication of citizenship. That you will give more of your efforts, more of your being and of your hearts to the task of teaching and emulating Americanism. That you will strive ceaselessly to focus the spotlight of truth upon the ism scum which seeks to undermine the foundations of our Nation. By doing so, you will illuminate the world with the brilliance of American democracy, and demonstrate the sacred character of honest, decent, human elements which, God willing, our Stars and Stripes may forever symbolize.

Can We Avoid War?

EXTENSION OF REMARKS

OF

HON. FOREST A. HARNESS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1940

Mr. HARNESS. Mr. Speaker, step by step the critical events of the present European war are outlining an alarming parallel with the American course leading to our entrance into the World War. We have now, as then, a public sentiment preponderantly opposed to American entanglement, but, at the same time, preponderantly in sympathy with the western powers. We like to think that the bitter memories of that war will help us to keep a tight rein on our sympathies. But we ought also to remember that American opinion can form quickly and swing rapidly. In fact, it should be remembered that the deciding factor in Wilson's reelection in 1916 was that tremendously effective appeal, "he kept us out of war." Yet that sentiment which elected Wilson in November of 1916 changed so completely that we willingly followed him into war just 5 months later.

Main hopeful factor for our continued peace in this present period, of course, is the memory of our bitter and futile experience in the World War. Best argument for minding our own business and sticking solely to our own immediate interests is to cite the record. The internationalist course looks pretty foolish when it is pointed out how completely we failed 23 years ago to "save the world for democracy," when we fought "the war to end wars." Against these strong restraining influences, however, we have a much more serious domestic condition causing unrest and dissatisfaction than we had 23 years ago. Then the country was sound, solvent, and prosperous. In fact, there was not a single serious immediate weak spot in the internal economy.

Nothing comparable appears in our present situation. We have just finished the first decade in American history in which we have failed to make definite economic advancements. After 10 years of depression, we still have failed to make any appreciable headway toward sound recovery. Worse still, we have gone through 7 years of Federal spending which has brought us nothing but an all-time high national debt and the heaviest peacetime taxes in our history.

One of the gravest dangers, therefore, is very largely political. The New Deal has lost favor so completely that, on domestic issues alone, it would face almost certain defeat in the forthcoming election. Here again is a striking parallel between 1916 and 1940. Wilson and the Democrats in 1916 were also slipping toward certain defeat. In the shadow of war, however, clever campaign strategy capitalized the peaceful desires of the country to reelect Wilson by the narrowest margin. It made no difference at the time that while the campaign was waged on the slogan, "He kept us out of war," Wilson's personal envoys were actually touring Europe lending encouragement and implying assurances of American help to the Allies.

If the strategy was successful in 1916, there is no reason to believe that New Deal politicians do not expect to use it successfully in 1940. In fact, it has been, and is being, used assiduously every day. The trend definitely away from the New Deal, growing out of its demonstrated failures to solve the domestic problems, makes it imperative that new dealers distract popular attention by stressing the international situation. The risks involved when an extremely dangerous international situation becomes the tool of New Deal politicians in an election year are too obvious to require discussion.

We may be overly complacent because we have tried by neutrality legislation to nullify two important factors which thrust us into the World War. Whereas we tried to defend our international rights against violations in the World War, we have voluntarily forfeited those rights at the outset of this war by banning the movement of American citizens, goods, and ships in danger zones. We have also tried by law to minimize our financial stake in this war by demanding cash from belligerents for any American purchases.

Still, we are undertaking large-scale expansions to produce implements and munitions of war for the Allies, even though we realize that their resources will be quickly exhausted. When that point is reached the next step is obvious. Either our war boom collapses and throws thousands of persons out of work, or we alter the restrictions to extend credit to the purchasers. Our "cash and carry" policy is popular now, but we may look at it very differently in a few months when it threatens us with another severe recession. Under this

threat it will be much easier to take the less painful step and become large-scale investors in another European war. As our stake in an Allied victory grows, so grows the likelihood that we will ultimately enter to protect it.

There is definitely too much American meddling in this war already. Certainly no immediate purpose is gained by our personal envoys among the combatants. In fact, the mere presence of these agents, of an outspokenly sympathetic government, carries an unpleasant implication. The President also has been overzealous in obtruding American influence in the situation, as he has repeatedly since hostilities began. Even our neutrality patrol has raised grave doubts among qualified observers, who believe it is an active devise primarily of value to the Allies.

Peaceful sentiments and wishful thinking on the part of the American people will hardly preserve peace in the face of these events as they are shaping themselves. The best peace remedy is to apply cold realism to our problems at home. If we will, we can so busy ourselves setting our own house in order that we will not have time to become involved in another war.

Stop Selling War Material to Japan

EXTENSION OF REMARKS

OF

HON. ROBERT T. SECREST

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1940

ARTICLE BY SAMUEL GRAFTON

Mr. SECREST. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article by Samuel Grafton, which was published in the New York Evening Post of April 17, 1940:

[From the New York Evening Post of April 17, 1940]

I'D RATHER BE RIGHT

(By Samuel Grafton)

If Japan's Navy is really a menace to us now, however, we have an easy way of pulling its teeth. It is reliably reported that modern battleships are built of steel. I have it on good authority, too, that they are fueled with oil. There is no question but that Japan gets its steel and oil from "us."

I put "us" in quotation marks because I don't mean "us"; I mean a few Americans in the scrap steel business and the other war materials trades who are building and powering Japan's Navy.

So with one hand "we" send supplies across the Pacific which enable Japan to build a navy to menace us, and with the other hand "we" build a two-ocean navy with which to meet the menace. There are two different kinds of "we" involved, and perhaps the time has come to make the interests of one kind subordinate to the other. This crazy thing cannot go on. It is the most ingenious device ever invented to permit a nation to hit itself squarely in its own eye.

If the process marches to its logical conclusion, some day a Japanese fleet built of American steel and powered with American oil will lock in battle with an American fleet built of steel from the same mills and powered with oil from the same wells, and somebody looking down on the bodies of American boys floating in the ocean will scratch his chin and wonder if we didn't make a mistake somewhere.

It is a question of which "we" is going to run the show, the "we" that makes a little profit on selling Japan $30,000,000 of scrapped and junked metal each year, or the "we" that will now have to spend $75,000,000 on each of four or more new capital ships to meet the menace which is the end product of this trade. In the second "we" are also the sailors mentioned somewhat grimly in the paragraph above.

We now ship 90 percent of Japan's imported war materials. Without these goods she would utter one final squawk in China and perish. With them she is taking China, and menacing us, and conquering the great iron-ore mines at Lungyen and Tayeh and Wuhu. The gun she points at China was made in America, and out of China's resources she will build a larger gun and point it at us with a bland oriental snicker.

There is no war danger in embargoing essential materials to Japan; the war danger clearly lies in not embargoing Japan. But this kind of talk is too realistic for Washington at this time of year. Remarks about the war-materials trade are considered catty and unsporting. The thing is to face our destiny with a smile; build the big ships which the American boys will man and in which they will sail off to a rendezvous of heroes. They died for the sake of the American junk business; this may be their epitaph.

Life Passes in Review in a Day With a Busy Congressman

EXTENSION OF REMARKS

OF

HON. MARTIN L. SWEENEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1940

ARTICLE FROM SOUTH END NEWS, CLEVELAND, OHIO

Mr. SWEENEY. Mr. Speaker, under leave to extend my remarks in the RECORD I include an article which appeared in the South End News, a paper of general circulation in Cleveland, Ohio. This excerpt is entitled "A Day With a Busy Congressman." I append this article because it reflects the activities of many of my colleagues from the metropolitan centers, and which are not published in the newspapers of their communities because of political antipathy and because in many instances the Representatives are not subservient to the publishers and editors of these publications.

[From the South End News (Cleveland, Ohio) of April 19, 1940]

LIFE PASSES IN REVIEW IN A DAY WITH A BUSY CONGRESSMAN

(By Fred L. Patton)

It was about 8:30 one morning a few days ago when I paid a visit to the office of Congressman MARTIN L. SWEENEY in the Federal Building, Cleveland, Ohio. The Congressman had just arrived to perform what he called a normal day's work. The Representative's office was crowded with people, overflowing into the corridors. I was privileged to sit at the desk with this busy public official, and observe the cross section of humanity he interviewed for over 6 hours without interruption, save only the intermittent ringing of telephones, which calls were really interviews in themselves.

Tragedy, tears, smiles, hopes, and despair registered in the faces of these constituents. Veterans of the World War pleaded for an opportunity to enter hospitals for treatment, or to have their compensation claims reviewed. Aged men and women solicited the Congressman to make inquiry why their old-age pensions were not forthcoming. W. P. A. workers, men and women, complaining of mistreatment, discrimination lay-offs, need for reemployment; others protested being assigned to projects in some cases 20 miles from their homes, causing them to pay from 40 to 70 cents transportation fare each day out of their meager pay of $57 per month.

A delegation of labor leaders discussed pending legislation in the Congress. One or two businessmen discussed the opportunity to obtain loans through the Reconstruction Finance Corporation; others inquired the procedure necessary to secure a Federal Housing loan.

An aged couple asking for aid in visas being issued to their relatives in the stricken areas of Europe. There were others asking the Congressman to contact the State Department to determine if their relatives and members of family were alive in Poland, Czechoslovakia, Finland, Germany, and elsewhere. Some had difficulty in obtaining citizenship. Would the Congressman advise and would he contact the Bureau of Naturalization. A delegation of students were going to visit in Washington, and wanted the Congressman to arrange hotel accommodations and sightseeing tours. A clergyman sought to have some poor boys in his parish admitted to a C. C. C. camp. Would the Congressman speak at a women's club luncheon; would he install the officers of a war veterans' post; and would he become a patron for a hospital benefit dance.

A committee of post-office employees recited a score of grievances concerning working conditions in the post office. Would the Congressman discuss the matter with the postmaster. An individual called about his railroad retirement pension. Two widows without dependents complained they could not secure W. P. A. employment and were given no consideration for relief.

A couple pleaded assistance in getting their boy released from the United States Navy, because his help was needed at home; another woman wanted her boy accepted for the Navy. A man was going to work a small farm, and he wanted information from the Department of Agriculture. There were those who wanted to know

if plumbers, carpenters, and tradesmen were being employed by the War Department in the Panama Canal Zone, and if they could find such employment there. Would the Congressman help save a home from foreclosure by contacting the Washington office of the Home Owners' Loan Corporation. Would the Congressman speak at a Townsend club meeting.

Many recalled their struggle for existence; some said they were without food; others they were to be evicted from their homes, and some said the gas was to be shut off in the face of severe cold weather.

I witnessed on this occasion a variety of scenes. Mr. SWEENEY informed me such were his days for the past 8 years in the Cleveland office. Patiently he listened. Sympathizing I knew he understood. I saw tears wiped away and smiles substituted when this public official encouraged all these victims of a man-made depression to keep up hope. Then came a period of dictating letters and answering telegrams on all conceivable subjects. When the last person had departed I made bold to ask the question, "How do you stand it?" The reply summed up the character of a man who, because of his courage in public life, has made some political enemies, but whose friends are legion, for his reply was, "But for the grace of God there goes me," referring to the last W. P. A. worker who had departed.

I ventured another question before I left, asking the Congressman if he is as busy in his Washington, D. C., office. The answer: "Practically so. There are committee meetings, congressional sessions, visiting various agencies of the Government in the interest of constituents, replying to a tremendous amount of correspondence, and receiving visitors at the office consumes all one's time." Continuing, Congressman SWEENEY said, "There is not a Member of Congress who does not go through the same experience daily in a limited degree." The legislative branch of the Government work is harder than any other department, despite the slurs cast upon it by a hostile or partisan press. The interview was over. I shook hands with Congressman SWEENEY, saying "You can keep your congressional job. I will stick to my newspaper work."

Unwise Policy of New York Stock Exchange

EXTENSION OF REMARKS

OF

HON. JOHN W. McCORMACK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1940

LETTER FROM JOHN E. YERXA TO JEROME N. FRANK AND REPLY THERETO

Mr. McCORMACK. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following letters:

BOSTON STOCK EXCHANGE,
March 25, 1940.

Hon. JEROME N. FRANK,
Chairman, Securities and Exchange Commission,
Washington, D. C.

MY DEAR MR. FRANK: On March 15, I discussed with you briefly the recent action of the New York Stock Exchange designed to stop any member who is also a member of another exchange from acting as a dealer on the other exchange in any security traded on both exchanges. To accomplish this result, the New York Stock Exchange invokes an old provision of its constitution which has never heretofore been treated as applicable to dealer activities outside of New York City.

Local exchange markets in securities also dealt in on the New York Stock Exchange are not new. For many years securities have been listed and traded on both the Boston Stock Exchange and the New York Stock Exchange. Similar situations are also true of other regional exchanges such as Philadelphia, Chicago, and San Francisco. American Telephone & Telegraph Co. capital stock and other well-known securities were listed on this exchange before they were listed in New York.

As early as 1868 local interest in New England in certain securities trade on the New York and Philadelphia Stock Exchanges prompted the Boston Stock Exchange to permit trading in those securities. This practice has been continued, and at the present time a number of members of the Boston Stock Exchange who are dealers in such stocks on that exchange are members or allied members of the New York Stock Exchange. Furthermore, Boston members have purchased New York seats in reliance upon the fact that the New York Exchange did not question the right of firms having seats on both exchanges to conduct business on both exchanges.

Now, by the adaptation of a rule never before treated as or deemed applicable, the New York Stock Exchange proposes to force local firms holding memberships in both the New York Stock Exchange and local exchanges to give up all dealer activities on the local exchanges in securities traded both on the New York Exchange and local exchanges.

From the viewpoint of public interest, it appears impossible to justify this new interpretation. In 1936, by act of Congress, exchanges were permitted to continue then existing trading privileges. In addition, exchanges were given the right to extend trading privileges to any security listed on another exchange, whenever, by reason of local distribution, local trading activity, and otherwise, the Commission was of the opinion that a local exchange market was appropriate in the public interest.

This action, to quote the House Committee on Interstate and Foreign Commerce, represented "an endeavor to create a fair field of competition among exchanges and between exchanges as a group and the over-the-counter markets and to allow each type of market to develop in accordance with its natural genius and consistently with the public interest."

The Commission, in subsequent decisions sanctioning local exchange markets, has given effect to the congressional purpose of encouraging free competition among exchanges. In no instance, we believe, has the New York Stock Exchange opposed applications by local exchanges for permission to maintain local secondary markets in securities listed on the New York Stock Exchange.

We are equally at a loss to understand how this action can be justified from the viewpoint of the New York Stock Exchange's own interest. During the past 5 years the proportion of the share volume on the New York Stock Exchange to the total share volume on all registered exchanges (20 in 1939) in the United States has been as follows:

Percent of New York Stock Exchange to total

1935	75.4
1936	73.2
1937	72.7
1938	78.8
1939	78.7

From these figures, released by your Commission, it appears that the New York Stock Exchange has not suffered from the activities of the other exchanges. A summary of the volume figures compiled by the 19 principle exchanges shows that New York's percentage back in 1928 was only 65.4 percent and in 1929 only 60.5 percent.

It is our opinion that the present action of the New York Stock Exchange is discriminatory and oppressive in its effect upon those who are members of both the New York and Boston Stock Exchanges, and that it is inconsistent with the declared purpose of Congress.

Very truly yours,

JOHN E. YERXA, *President.*

APRIL 15, 1940.

Hon. JEROME N. FRANK,
Chairman, Securities and Exchange Commission,
Washington, D. C.

MY DEAR MR. FRANK: Under date of March 25, John E. Yerxa, president of the Boston Stock Exchange, wrote you in relation to a certain policy of the New York Stock Exchange that would be discriminatory of the Boston and other exchanges of the country. I refer to the recent action, as Mr. Yerxa stated in his letter, "of the New York Stock Exchange designed to stop any member who is also a member of another exchange from acting as a dealer on the other exchange in any security traded on both exchanges." This action is not only discriminatory, but vicious. It is a deliberate action based upon a desire and intention to obtain as much a monopoly as is possible of the purchase and sale of stocks listed on more than one exchange, of which New York is a listed exchange. It is directly contrary to the congressional intent, based upon decency in such dealings, and common sense, of encouraging free competition among exchanges.

It is rather significant that the New York Stock Exchange should undertake to actively endorse such a policy at this time. I remember well when the legislation that created the Securities and Exchange Commission was pending in the Congress that the New York Stock Exchange vigorously opposed this legislation. The Boston Stock Exchange supported the objective sought by that legislation. As hearings on the bill progressed and it was apparent that the vigorous opposition of the New York Stock Exchange and others could not succeed, the New York Stock Exchange then attempted to "step into the picture" and, under the guise of supporting the objective sought, wrote the provisions of the bill relating to stock exchanges for its own benefit and to the disadvantage of the smaller stock exchanges. The smaller stock exchanges of the country had to then defend themselves against this effort of the New York Stock Exchange.

We now find this exchange engaging in the discriminatory and high-handed manner as evidenced by the action which President Yerxa of the Boston Stock Exchange property opposes. I join with Mr. Yerxa in his opposition.

If the Commission has jurisdiction over this matter, I urge, in the public interest, that the New York Stock Exchange be enjoined or ordered to stop the carrying into effect of its proposed action. If the Commission, under existing law, has no jurisdiction over this matter, I hope that a proper recommendation of legislation will be submitted to the Congress.

I will appreciate it if you will keep me advised of the action taken.

Sincerely yours,

JOHN W. McCORMACK.

APRIL 17, 1940.

Hon. JOHN W. MCCORMACK,
House of Representatives, Washington, D. C.

MY DEAR CONGRESSMAN MCCORMACK: This will acknowledge your letter of April 15, 1940, regarding the action of the New York Stock Exchange in adopting a policy of enforcement of the provisions of its constitution in such a manner as to foreclose its members from dealing for their own account on other exchanges in New York Stock Exchange listed securities.

As you mentioned in your letter, this matter was made the subject of protest to the Commission in a letter of March 25, 1940, from Mr. John E. Yerxa, president of the Boston Stock Exchange. Upon receipt of that letter, and additional protests from other sources, the Commission gave full consideration to its powers in the matter and called upon the members of its staff for a report on the progress of certain studies already in process of basic subjects bearing a relation to this important question.

Upon examination of our powers under the Securities and Exchange Act of 1934, we are satisfied that our authority to proceed to take formal action with regard to this new policy of the New York Stock Exchange is not free from substantial doubt. As a consequence, we are hesitant to take formal action in this field—no matter how important it may be—any more than we would do so in any other field where our statutory authority is not clear. A memorandum of law with respect to this question is presently under preparation by the staff of the Commission, and I would be glad to see that a copy is made available to you if you would like to have it.

We are, however, keenly aware of the possibility that the New York Stock Exchange's action may have consequences inimical to the public interest. Because of this, the Commission has instructed its Trading and Exchange Division to complete as rapidly as possible the studies which it has been making, giving special attention to the questions of interexchange competition which have been raised by the New York Exchange's action. We are hopeful that these studies may be concluded in the near future and that they will be productive of results sufficiently clear to make them a basis for a report to the Congress.

The Commission appreciates your interest in this matter, and on its behalf I want to thank you for communicating your views. I shall endeavor to see that you are kept currently advised of any significant developments.

Sincerely yours,

JEROME N. FRANK, *Chairman.*

Lincoln's Last Hours

EXTENSION OF REMARKS

OF

HON. BERTRAND W. GEARHART

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, April 19, 1940

THE STORY OF THE ASSASSINATION AS TOLD BY EMANUEL HERTZ

Mr. GEARHART. Mr. Speaker, during the intervening years, now numbering 75, much has been written concerning the facts and circumstances surrounding the foul and cowardly murder of the lamented Lincoln, the greatest crime, the most tragic event in the history of the American people.

In an effort to bring about a better understanding of this historic event, the New York Times Magazine of April 14 printed an article from the informed pen of Emanuel Hertz, an article which, because of its documentation and careful regard for truth, is of unusual importance.

In his masterful presentation, Mr. Hertz treats of the last day that was Lincoln's—of the hour and minute when he was shot by an actor in the theater—of how he was carried to an actor's boarding house owned by a rabid secessionist who would have denied hospitality to the dying abolitionist President, if the opportunity so to do had been his—of the placing of the broken body of the stricken President in a bed formerly occupied by his murderer whose performances Lincoln had often witnessed and whose acting he admired—of how the slayer was tracked to the Garrett barn where he was shot or shot himself—of how the remains of the dead slayer was returned to Washington and identified beyond the possibility of a doubt—and of how the body was again identified when released to his family for burial in Baltimore.

Never before have all of these subjects been so expertly treated of in any one single story, certainly, never before by one who writes with greater authority or with greater regard for the cause of truth, to the defense of which the author has devoted his life.

Because this highly informative and tremendously interesting article comes from the pen of one of the greatest living authorities on the life and character of the martyred Lincoln, authenticated and documented, as it is, by tireless research inspired alone by a love for Lincoln which defies measurement, I ask that Mr. Hertz's article he spread upon the pages of the CONGRESSIONAL RECORD in order that the facts which the writer so accurately records may remain forever accessible to those who may hereafter be inspired to seek a better understanding of the life and works of this sublime character.

The unanimous consent and approval of the membership of the House of Representatives having been indicated, Mr. Emanuel Hertz's article follows:

[From the New York Times magazine of April 14, 1940]

AT FORD'S THEATER 75 YEARS AGO TONIGHT

(By Emanuel Hertz)

The assassination of Abraham Lincoln, 75 years ago today, was the greatest individual tragedy in American history. Even now, after all the years that have gone by, it is still a bitter thought that some little change in circumstances could have saved him—a guard outside the box, a chance discovery of a conspiracy which involved a number of people, a decision on the tired President's part not to go to the theater that evening to see again a play he had already seen once.

But the tragedy went on to its appointed end, as though it had been written by some all-powerful playwright, and not a line could be altered. Every detail was theatrical, down to the final fact, impressive to everyone who makes a study of what happened, that Lincoln, who all his life loved the theater and befriended actors, was shot by an actor in a playhouse, and breathed his last in an actor's rooming house in a room and on a bed which had recently been occupied for a little while by the assassin, John Wilkes Booth.

Aeschylus himself could not have imagined a more perfect illustration of the workings of an inexorable fate. It may almost be said that when Lincoln listened eagerly to the recitations of Jack Kelso in the old days in New Salem he was taking the first step toward that last scene in Ford's Theater more than a generation later. His whole life was a drama in which, as in Shakespeare's tragedies, the tears and laughter were mingled.

As he settled himself into the box at Ford's Theater for what promised to be an evening's light entertainment, with the beloved Laura Keene playing Florence Trenchard in The American Cousin, he may well have been running over in his mind the actors he had known, and perhaps planning more diversions of this kind, now that the frightful thunderheads of war were drifting off.

Lincoln may even have thought of John Wilkes Booth. He had seen Edwin Booth's Hamlet and John Wilkes Booth himself in The Marble Heart. He had wanted to meet John Wilkes, so Frank Mordaunt testified, but "the actor had on one pretext or another always avoided any invitations to visit the White House." He had known so many warm-hearted actors. He could not know that John Wilkes would play Macbeth off the stage far better than he could ever have played it on the boards.

Yes; actors were pleasant folks, as Lincoln had known them. Once an acting company in Springfield found itself in difficulties because a straight-laced city government, under the influence of a revival meeting, had imposed a prohibitively heavy license tax. A young lawyer offered to appear in the case without fee. He did it with so much humor that the city fathers dissolved in roars of laughter and repealed the license tax. The lawyer was, of course, Abraham Lincoln, and it was Joe Jefferson, then a struggling youngster on the stage, who later told the story.

The actors didn't forget, and Lincoln didn't. He saw plays whenever he could—in Springfield when the road companies came there, in New York on his way to his first inauguration, in Washington when the terrible burden of the War Presidency permitted it. People connected with the stage visited the White House often. James E. Murdock, an elocutionist, stayed there 3 weeks at the time of the Bull Run campaign. One night, lying sleepless before dawn, Murdock heard a voice from a room near the President's. He got up to investigate and saw, through an open door, Lincoln kneeling in prayer. Murdock had played with Junius Brutus Booth, the elder.

There were others: James K. Hackett, who was willing to give up the stage for an English consulate, much to Lincoln's disgust; Lester Wallack and Edward Loomis Davenport, known for their performances in Macbeth; Edwin Forrest and John McCullough; Adah Isaacs Menken, actress and poet, and her husband; "General" Tom Thumb and his wife. John McDonough was brought

to the White House by Congressman Kelley of Pennsylvania and that evening discussed Shakespeare with Lincoln for 2 or 3 hours. Sometimes Lincoln would recite some favorite passage from Shakespeare. Mordaunt remembered some such occasion and wished afterward, but vainly, that he could imitate its melancholy cadences.

Lincoln may have been thinking of these things. He may have recalled the tense moment when Edwin Forrest, playing in Bulwer's Richelieu, looked significantly at the Presidential box as he spoke the lines:

"Beneath the rule of men entirely great
The pen is mightier than the sword.
Take away the sword.
States can be saved without it."

There was no mistaking the meaning. It was Forrest, not Bulwer, pleading for peace. Lincoln whispered to one of his companions, shook his head, smiled.

And now was he thinking, they that take the sword shall perish by the sword?

Or did his mind turn to the verse that Dr. Storrs had read that day at noon, as the Stars and Stripes were again raised over Fort Sumter—"The Lord hath done great things for us, whereof we are glad"?

We do know that he was in a happy mood as the curtain rose on the second act of The American Cousin. It had been a good day.

The night before, as he had told his Cabinet at that Good Friday meeting, he had had his ship dream—a dream which had repeated itself before four of the war's great battles. He had seemed again to be at sea in a vessel that was swept along by an irresistible current toward a maelstrom from which it seemed no power could save her. Faster and faster the whirling waters swept the doomed craft toward the vortex, until with the deafening roar of the waves and the sensation of sinking down an unfathomable depth the sleeper woke. It was a terrifying nightmare, but always it had come on the eve of victory.

Grant had attended the Cabinet meeting. There had been no recent news from Sherman, who was marching north on the trail of the Confederate General Johnston—the last important Southern commander to hold the field. Lincoln thought his dream might mean that Sherman had won—as, indeed, he had. This was not all mysticism on Lincoln's part. He knew the military situation thoroughly. He was himself the real commander of the Union armies. He was certain that Johnston could not hold out. Lee had surrendered 6 days earlier. The end was at hand.

Lincoln talked of reconstruction. He was hoping to get it over with before Congress returned in December. He had no bile, no thirst for the blood of Jefferson Davis or anyone else. Enough blood had been shed, he told the Cabinet. He wanted no more of it. He planned to give the battered South a chance to recuperate. He proposed to get business and trade going again, to care for the wounded, to provide for the widow of the dead soldier, to bind up the Nation's wounds—the whole Nation, North and South. He was studying how to solve the problems of the former slave. Two or three pardon cases came up for action. Was there any doubt what Lincoln's action would be? He saw Schuyler Colfax, who was leaving for the far West, and gave him a message to the miners—the mineral wealth that lay in "practically inexhaustible" quantities "from the Rocky Mountains to the Pacific" would, he thought, give employment to disbanded soldiers and help pay off the national debt.

Senator Stewart, of Nevada, asked to bring a friend over to the White House. Lincoln scrawled a note:

"I am engaged to go to the theater with Mrs. Lincoln. It is the kind of an engagement I never break. Come with your friend tomorrow at 10 and I shall be glad to see you."

At 10 tomorrow! How could Lincoln foresee what the wires would be carrying when that hour tolled?

In the afternoon he went for a drive with Mrs. Lincoln. She remembered every word and detail of it afterward. At his wish they went alone. She had never seen him "so supremely cheerful." Some superstitious foreboding came over her. "You almost startle me," she said. A tender look, almost as in the old Springfield days, must have come over his face as he answered: "And well I may feel so, Mary, for I consider this day the war has come to a close. We must both be more cheerful in the future. Between the war and the loss of our darling Willie we have both been very miserable."

There had been changes at the last in the make-up of the theater party. Robert Lincoln, who had just returned from service on Grant's staff, was to have gone, but he had been riding with John Hay, was tired, and wanted to feel what it would be like to sleep in a real bed again. It had been announced that General and Mrs. Grant would be present, but Grant was shy and dreaded the prospect of facing a demonstration in the theater. Add to that what Mrs. Grant had experienced when Mrs. Lincoln had asked whether she expected to succeed her in the White House, and it was but natural that Mrs. Grant should also dread the effect on the jealous woman of a roar of cheers for the victor of Appomattox. Lincoln would not have minded playing second fiddle to the man who had ended the war, but his wife was not so generous.

Postmaster General Dennison, who had been invited, declined because it was Good Friday. Colfax would have been present if it had not been for his early departure westward. Noah Brooks, the new Presidential secretary, wanted to come, but was told that Mrs. Lincoln had made other arrangements. Finally Mrs. Lincoln invited Miss Clara Harris and Maj. Henry R. Rathbone, an engaged couple radiant with the joy of life.

The theater was full of officers and soldiers of the Union Army, any one of whom would have died to save the President's life, but the criminal neglect of the guard, John F. Parker, had left the door unwatched. Parker should have remained outside the box. Dr. Otto Eisenschiml, in Why Was Lincoln Murdered? establishes the fact that he left his post and went out front to see the show.

At the last minute Lincoln tried to get out of going. He was tired. But Mrs. Lincoln insisted. She was proud of him and these public appearances meant a great deal to her. He gave in, as he usually did, in small matters.

"All right," he said, according to the account of W. J. Lampton. "All right, Mary, I'll go, but if I don't go down in history as the martyr President I miss my guess."

Soon the bantering words were to take on a meaning that would shake the Republic to its foundations. John Wilkes Booth was preparing for his last appearance on any stage.

Booth, the neurotic, the mediocre scion of a distinguished acting family, unworthy brother of the great Edwin Booth, was an embittered southerner who had never forsworn his Union allegiance, had never served in the Confederate Army, and had never in fact, put himself to any inconvenience for the Southern cause. He had assembled a pitiful band of conspirators—a demobilized Confederate soldier named Lewis Payne; a former spy and smuggler, George Atzerodt; a simple-minded druggist's clerk named David Herold, and some others. They met at the house of Mrs. Mary E. Surratt, a widow who took in boarders.

The fleeing Confederate government had no part in the conspiracy. The even more grotesque supposition that Secretary of War Stanton wanted to get rid of Lincoln, took no precautions to protect him and was dilatory in pursuing the conspirators is not worth an argument. The crime was Booth's—the final insane act of a man whose 26 years of life had been weak and futile, who was a second-rater in his own profession, and who wanted to win the glaring floodlight of notoriety.

The conspirators met and whispered at the Surratt house. Payne was to kill Seward. Atzerodt was to assassinate Vice President Johnson. Young Herold was to go with Booth and aid him in his escape.

Booth was known at Ford's Theater, and had access as a matter of course to all parts of the building. He knew actors, doormen, staff. No one thought anything of his comings and goings. He was young, handsome. People liked him well enough.

A few days before Good Friday, Booth dropped in to see his friend Charles Warwick, who had a room in Peterson's actors' lodging house across the street from the theater. As Warwick told the story:

"He told me he felt extremely tired. I invited him to take off his boots and dry his feet by the fire. He accepted my invitation, threw himself on the bed, and smoked himself into a profound sleep, which lasted till evening."

It was not until about noon on the day of the assassination that Booth knew for certain that Lincoln would be at the theater. Quickly he made his arrangements. In the afternoon, according to the account of William Withers, who was then the orchestra leader at Ford's, Booth came into Taltavul's saloon near the theater. He saw Withers and called to him to come and have a drink.

"We drank together," said Withers, "and during the conversation about the different members of the theatrical profession, I laughingly remarked that Booth would never be as great as his father. An inscrutable smile flitted across the actor's face as he replied: 'When I leave the stage I will be the most-talked-about man in America.' At that time the statement had no significance for me, but afterward I remembered it with a shock."

At a little before 10 o'clock Booth went to the theater. He smiled at the doorkeeper, Joseph Buckingham. "You will not want a ticket from me?" he asked—and went in. He slipped backstage, by routes he well knew, and went from the passageway through a door into the little room behind the President's box. He closed the door and secured it with a bar. Another door opened on the box, and in that door Booth had already bored a small hole so that he could study the position of the occupants.

At 10:15 he thrust the door open, placed a small derringer pistol behind Lincoln's ear, and fired. For Lincoln this earth vanished instantly. The maelstrom of his dream had swallowed him. He never spoke again or had a conscious moment.

Major Rathbone grappled with the murderer in the smoke-filled box. Booth flung him off, slashing him viciously with a dagger. Then he sprang to the stage—just such a leap as he had often made in his entrance as Macbeth. But he was spurred, and a banner was draped over the box. The spur caught in it, and Booth landed clumsily, with a broken leg, the vengeance of the flag Lincoln had saved! The break was square. He could walk, but from that moment he suffered agony. With a cry of "Sic semper tyrannis!"—his last stage lines—he rushed off.

Billy Withers, not knowing what had happened, came on him in the passageway. Booth had a dagger in his left hand, his eyes seemed starting from their sockets. Then he rushed at Withers, waving the dagger. "Let me pass!" he shouted. "Let me pass!"

He slashed Withers' sleeve, whirled by, and was gone. He had asked a boy outside, "Peanut John," to hold his horse. Booth kicked him viciously in the stomach, sprang to his saddle, and rocketed off.

The story of the pursuit and capture of the murderers has been often told. Booth and Herold were overtaken on the night of April 25 in a Virginia barn. Herold came out and surrendered. Booth either shot himself or was shot by Sgt. Boston Corbett, one of Lt. E. P. Doherty's troopers, dying in agony a little after dawn. Corbett later went insane, and his assertion that he killed Booth has been disputed. Herold, Mrs. Surratt, Atzerodt, and Payne, who had wounded but not killed Secretary Seward, were tried by a military court, convicted, and hanged.

A young Army doctor, Charles A. Leale, was the first to reach the mortally wounded President after the shot was fired. Other doctors were hurriedly summoned, but until Lincoln breathed his last Leale remained with him and kept charge of the case.

Four soldiers of the Independent Pennsylvania Light Artillery carried the dying man to a stairway. Two others came up to help and the six took him to the Peterson house across the street. He was carried into the room that Warwick had occupied and laid on the bed where Booth had lain a few days earlier. There at 22 minutes after 7 the next morning he died. Stanton spoke the solemn, unforgettable words, "Now he belongs to the ages," and the Reverend Dr. Gurley dropped to his knees and began to pray. Corporal Tanner started to write down the words of the prayer—his pencil broke and they were lost.

The tragedy was ended. Envy, hatred, and falsehood could do no more. No more would Lincoln hear the dreadful news of battle, no more pray in vain for release from intolerable anguish, no more be tormented by the harassments of office. The kindly eyes were forever closed; the sad, humorous mouth that could move to laughter or to tears was fixed in death.

A nation mourned. But its greatest and best loved hero was safe forever from all detractors. Laura Keene had held the dying man's head in her lap during the first wild confusion after the shooting. As she rose, looking at the blood on her gay dress, the curtain in a mightier theater than Ford's of a drama more poignant than Macbeth, was rung down.

Chief Justice Hughes Asked for Governmental Regulation Free From Hamstringing Appeals to the Courts

EXTENSION OF REMARKS

OF

HON. JOHN J. COCHRAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1940

EXCEPTS FROM AN ADDRESS BY CHIEF JUSTICE CHARLES EVANS HUGHES AND AN EDITORIAL FROM THE ST. LOUIS POST DISPATCH

Mr. COCHRAN. Mr. Speaker, the Logan-Walter bill has passed the House and been sent to the Senate. In my remarks at the time the bill was under consideration I stated in my opinion it never would become a law at this session of Congress. I have not changed my opinion. I find in looking over the great metropolitan papers numerous editorials criticizing the House action.

In the St. Louis Post Dispatch of Saturday, April 20, I find a reprint of a speech delivered in 1907 by Chief Justice Hughes of the Supreme Court. Even at that date Justice Hughes could see the danger in judicial review of administrative decisions.

Under permission to extend my remarks I include the article referred to:

[From the St. Louis Post-Dispatch of April 20, 1940]

MR. HUGHES' 1907 WARNING STILL TIMELY

House passage of the Logan-Walter bill providing for judicial review of questions of fact in administrative rulings recalls notable statement by Governor of New York 33 years ago; asked for governmental regulation free from hamstringing appeals to the courts.

[From an address at Elmira, N. Y., May 3, 1907; reprinted from Addresses and Papers of Charles Evans Hughes, G. P. Putnam's Sons, New York]

"There has been a determined effort through the State to make it appear that the chambers of commerce of New York and the businessmen composing those chambers of commerce are opposed to an effective scheme of State regulation of public-service corporations.

"I do not believe that the resolutions that have been passed reflect the sentiment of the businessmen of the State of New York. It would be most unfortunate were it so. There are undoubtedly many whose interests are directly affected, and who desire to maintain existing conditions and to enjoy unrestricted freedom in order that they may give rein to their own selfish purposes.

"I am amused at times at the phantoms that are conjured up by practical men whose experience should have taught them better. It is said that a commission with such broad powers would take active management of railroad corporations and practically oust their boards of directors. Imagine the situation of any such commission taking into consideration that variety of questions relating to the management of any railroad.

"Think of the great number of problems and complaints necessarily committed to any such commission, and then tell an intelligent audience that any such commission could, if it wanted to, manage any railroad.

"But what is important and vital to any scheme of regulation is this: That wherever there is an abuse the Commission can put its finger on it and hear the evidence and determine whether or not the abuse exists, and if it does exist stop it, no matter in what department of management it may be. Why, you cannot do that unless you give power which in an emergency will reach any department of management, so that wherever an evil exists which the State ought to control and correct, the power delegated by the State to such a body can be exercised for its correction.

* * * * * * *

"That does not mean that any commission should displace the operating management of any particular property. It does mean that it should have the power to exercise control sufficient to correct abuses that might exist. Now, when we consider these matters in detail, you will find, and I have found, the railroad men sitting quietly down with you and talking it over. You take up one thing after another and they will say: 'Yes; they ought to have power to do so.' Suppose so-and-so? Yes; they ought to have power to do it, assuming that they start with the premise that a public-service corporation is a public business.

"The other night, I was talking to such a gentleman, and when we got through the practical result of it all was this: I said to him: 'What you really want is a chance to go to the courts?' And he said: 'Yes; that is all there is about it.' That seemed to be the main point. A chance to go from the commission to the courts.

"I have the highest regard for the courts. My whole life has been spent in work conditioned upon respect for the courts. I reckon him one of the worst enemies of the community who will talk lightly of the dignity of the bench. We are under a Constitution, but the Constitution is what the judges say it is, and the judiciary is the safeguard of our liberty and of our property under the Constitution.

"I do not want to see any indirect assault upon the courts. And I tell you, ladies and gentlemen, no more insidious assault could be made upon the independence and esteem of the judiciary than to burden it with these questions of administration—questions which lie close to the public impatience, and in regard to which the people are going to insist on having administration by officers directly accountable to them.

* * * * * * *

"Let us keep the courts for the questions they were intended to consider. When questions of property rights are involved—the constitutional right to hold property and not to be deprived of it without due process of law is involved; when, under the guise of regulation or authority to supervise railroad management, there is an assumption of arbitrary power not related to public convenience; when there is a real judicial question—let the courts have it, and every good citizen will stand aside and hope to see it decided fairly with even-handed justice.

"But to say that all these matters of detail which will be brought before the Commission—matters requiring men to give their entire attention to the subject, to get their information in a variety of ways, to have hearings of those interested and to deal with questions from a practical standpoint—should, at the option of the corporations, be taken into courts, is to make a mockery of your regulation.

"And, on the other hand, if that policy should succeed, it would swamp your courts with administrative burdens and expose them to the fire of public criticism in connection with matters of this description, from which I hope they will be safeguarded.

"You must have administration, and you must have administration by administrative officers. You cannot afford to have it otherwise. Under the proper maintenance of your system of government and in view of the wide extension of regulating schemes which the future is destined to see, you cannot afford to have that administration by your courts.

"With the courts giving a series of decisions in these administrative matters hostile to what the public believes, and free from that direct accounting to which administrative officers are subject, you will soon find a propaganda advocating a short-term judiciary, and you will turn upon our courts—the final safeguard of our liberties—that hostile and perhaps violent criticism from which they should be shielded and will be shielded if left with the jurisdictions which it was intended they should exercise."

Mr. Speaker, I also include the editorial in the St. Louis Post-Dispatch of Friday, April 19, commenting on the passage of the bill. The editorial follows:

[From the St. Louis Post-Dispatch of April 19, 1940]

A LONG BACKWARD STEP

The House of Representatives took one of the most backward steps—many competent students of the Federal Government doubtless would say the most backward step—in its history yesterday in passing the so-called Logan-Walter bill.

This bill is not the kind of legislation which attracts public attention. It deals with a generally technical subject, namely, procedure for the expert administrative agencies which Congress has established over a half-century to regulate the complex problems arising from transportation, communication, commerce, selling of securities, relations between employer and employee, and scores of other aspects of modern economic life.

But unexciting as the subject of the bill is, its importance could hardly be overstated. One census question has raised a thousand times as much public discussion as the Logan-Walter bill, and yet we had far better skip the census altogether than allow this dangerous and destructive measure to become law.

Those are the words—dangerous and destructive.

Proponents of the bill have put up arguments which sound plausible on the surface: Uniform procedure for all administrative agencies. The right of appeal of findings of fact to the courts. The first appears in the trend of the times to simplify legal rules and forms; the second seems at first blush in keeping with the American principle of giving every litigant his day in court.

Both arguments are specious. The procedure of the administrative agencies must vary as the activities with which they deal vary. To enforce a uniform set of rules on such diverse bodies as the Federal Trade Commission, the Interstate Commerce Commission, the Securities and Exchange Commission, the Communications Commission, and a hundred other agencies, would be to clamp a strait jacket on the Federal Government.

The argument that the bill provides needed opportunity for court review is even more hollow. Questions of law involved in administrative rulings can now be appealed to the courts. Questions of fact, as determined by administrative bodies, cannot be appealed. This is precisely as it should be.

Courts are equipped to deal with issues of law. They do not have and cannot hope to have the expert information to decide complicated problems of our highly specialized society. Neither can legislative bodies. It was in recognition of this very fact that Congress turned to the administrative agency more than 50 years ago as the device for bringing expert judgment to bear on the issues which an industrial age was handing up to government for solution.

Charles Evans Hughes fought this battle and won it in New York State a generation ago. New York had turned to a State commission to regulate its railroads, and the issue arose as to whether questions of fact should be reviewable in the courts. In the address which contained the often-quoted words, "We are under a Constitution, but the Constitution is what the judges say it is," the present Chief Justice appealed to the people of New York not to bog down their courts with appeals which would tie up regulation to no good end.

The truth is that this bill, while it may have some well-meaning backers, is another in the series of periodic attempts to hamstring the social gains of the New Deal. Two years ago the forces of reaction rallied against reorganization of the executive departments. Reorganization had been urged or endorsed by every President since McKinley, Republican and Democrat alike, and yet its partisan opponents flayed it as the means for bringing a "dictator" to the United States.

Does the Senate, where this bill has now gone, want to bring Federal administration to a standstill?

Does it want to give the economic plunderers a strong hand against regulation in the public interest?

Does it want to set up a happy hunting ground for lawyers who have no interest in the merits of issues but are bent on increased litigation and fees for themselves?

If the answer is "yes," the Senate will copy the sorry mistake of the House. If it is the ringing "no" it should be, the House will be promptly and overwhelmingly repudiated.

Forty-Hour, Five-Day Work Week for Federal Employees

EXTENSION OF REMARKS

OF

HON. C. ARTHUR ANDERSON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1940

Mr. ANDERSON of Missouri. Mr. Speaker, if one were to collect together all of the addresses, remarks, or observations made in Congress during each session on the subject of maximum hours of work in industry, I venture to say that such a collection would comprise several sizable volumes.

The fact is that popular demand for Federal legislation regulating wages and hours of work in industry engaged in interstate commerce was so great that the President of the United States called the Congress into extraordinary session a few years ago for the sole and specific purpose of passing an act prescribing maximum hours and minimum wages. Congress responded with the passage of the Fair Labor Standards Act, or as it is sometimes known, the wage and hour law.

During the deliberations of this legislation high officials of the Government, labor leaders, Members of Congress who favored such legislation, one and all, indicted, tried, and convicted the unscrupulous employer or industrialist who required long and unreasonable hours of toil from his employees; and yet this same Government which accused, indicted, and tried industry has long been one of the most flagrant violators of the cause which it espoused in demanding the passage of the Fair Labor Standards Act.

With few exceptions, no maximum is set up for the hours of toil required of Government workers. Little, if any, consideration is shown these people in the long hours of toil required of them, and little, if any, provision is made to compensate them for the time they are required to put in above and beyond the regular or reasonable hours of work.

Many years ago it was written in Holy Scripture, "Let him who is without guilt cast the first stone." Yet this Government, which accused industry of unscrupulous conduct, this Government which passed the Federal wage and hour law, this Government which today employs thousands of people to ferret out violators of this law for prosecution is itself guilty of the very offenses which it decries and punishes in others. This Government which makes it contrary to law for an employer to require more than a maximum of about 40 hours of work from his employees is the same Government which makes no such provision for its own workers.

By all the rules of the game the United States Government should be the best example of the fairest employer. To that end Congress should act without further delay to set up a 40-hour 5-day maximum workweek for all Government employees. In the hope of adding impetus to this worthy cause, I have introduced a bill providing for a 40-hour 5-day workweek for all Federal employees. I trust that it will merit the serious consideration of the Congress.

Erroneous Conclusions

EXTENSION OF REMARKS

OF

HON. CLARE E. HOFFMAN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1940

LETTER FROM ELLIS E. FAULKNER

Mr. HOFFMAN. Mr. Speaker, under permission to extend my remarks in the RECORD and include therein a copy of a letter written to Hon. PRENTISS M. BROWN by Hon. Ellis E. Faulkner, a member of the House of Representatives of the State of Michigan, the following letter is offered:

HOUSE OF REPRESENTATIVES,
Lansing, Mich., April 5, 1940.

Hon. PRENTISS M. BROWN,
United States Senator, Washington, D. C.

MY DEAR SENATOR: Some of the State papers have been carrying a report of your talk before the United States Senate, during debate on the Hatch bill, in which you are alleged to have charged that Republican leaders in Michigan had "sabotaged" civil service and had "penalized" the University of Michigan $1,000,000,

because faculty members worked for the so-called State civil-service law.

If this is true, there is something wrong with your research department. It would have been very easy for you to have found out the truth in this matter before making any such statement, but perhaps the truth would not have served your purpose.

Is it common practice for Democratic Senators to base their statements on mere rumor?

Here are the facts, Mr. Senator, which you could easily have obtained, in regard to the appropriations made for the University of Michigan by the last legislature.

The University of Michigan requested	$4,782,643.43
Amount appropriated	4,475,000.00
A cut of	307,643.43

Or about 6⅔ percent.

This amount falls far short of your falsely claimed $1,000,000 and is insignificant when compared with the cuts given other departments and institutions.

In all fairness at a time when the State of Michigan was so hard up, the University of Michigan and its friends in the legislature should have been willing to take a bigger cut.

Every extra dollar that they insisted on having was necessarily subtracted from appropriations for crippled children, old-age pensions, and welfare.

You and your Democratic brethren can continue for political purposes to yell your heads off about the last legislature sabotaging the so-called civil-service law.

The people of this State know that what sabotaging was done occurred in the Democratic State affairs committee of the house when it placed 86 amendments on the senate bill.

The people of the State also know that, far from being a true civil-service law, its sole purpose was to blanket into office as many Democrats as possible and, further, that this fake civil service was costing the State $1,350,000 a year.

Will you hereafter kindly verify the statements you make for public consumption?

Yours truly,

ELLIS E. FAULKNER.

The State of Michigan, like many other States, finds that it is without funds to meet the demands of all classes, of all pressure groups, of all people and necessarily a choice must be made as to the manner in which it is to expend the funds which are available.

No doubt the people of Michigan will be interested in Mr. BROWN'S reply to Mr. Faulkner, if a reply is made. Doubtless, Mr. BROWN, as not infrequently happens to many public officials, was incorrectly advised as to the exact situation in Michigan.

Many of us know that the so-called civil service is too often a plan to perpetuate in office New Deal officeholders who have been tightly wedged in jobs formerly earned and held by Republicans.

The Mission of Our Generation

EXTENSION OF REMARKS

OF

HON. ALBERT GORE

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1940

ADDRESS BY HON. ALBERT GORE, OF TENNESSEE

Mr. GORE. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following address, which I delivered to the State convention of the junior chamber of commerce at Murfreesboro, Tenn., on April 16, 1940:

Mr. President, ladies, and gentlemen, to address this State convention of young business and professional men, who now and in coming decades increasingly will mold and influence the industrial, commercial, and cultural life and development of Tennessee, is a signal privilege and honor which I acknowledge with gratitude. From the four corners of the State you have come, and on behalf of the Fourth Congressional District and the fair city of Murfreesboro, permit me to say that you are both welcome and appreciated.

From the State of Franklin Tennessee emerged and developed, and for the three decades succeeding Jackson's inauguration became economically and politically the foremost State of the mid-south.

Impoverished by the Civil War, Tennessee, along with the South, has suffered tremendously. Moreover, the resultant bitter sectional hate and prejudice practically ostracized the region politically for many years, and fostered economic injustices which we have by no means yet fully thrown off. We are throwing them off, however, and a new day is dawning for Tennessee.

Our two most important economic endowments are our people and our physical resources. The 1930 census showed that our people were 99½ percent native born. Anglo-Saxon by descent and culture, and a pioneer American stock, they personify hard intelligence, loyalty, self-reliance and courage; and they are particularly adapted to the science of Democratic government.

Tennessee is now, as in the past, producing national leaders in disproportion to its size. I find myself unwilling to forego the temptation to cite as an example that greatest living Tennessean, who from a raftsman of logs from Tennessee's hills has climbed so high into the affections and admiration of this Nation's far-flung millions that the next President may well be Cordell Hull.

Not only does Tennessee have the purest and best American stock, but few States, if any, have a higher birth rate and, consequently, a higher proportion of children.

At a time when the population of the country as a whole is becoming stationary, our population and that of the South is growing more rapidly by natural process than any other region. Our people remain virile. Our excess of births over deaths is well above the national average. Recently the birth rate in many cities has dropped so low that the population level can be maintained only by migration.

The rural districts are especially fertile fields for replenishing the population with new and vigorous blood. We hope this will offset the unfortunate infiltration of inferior foreign blood in other regions. I recently told a Massachusetts audience that they saved the Union by preventing us from secession, but that the South would save the Americanism and democracy of the Union.

Tennessee has been richly endowed with natural resources which are now being swiftly developed. These advantages, combined with its climate, its transportation facilities, and its people, constantly encourage enterprise, court development, and beckon to the investor. The signs unmistakably point toward a brighter day for Tennessee.

While not in any way disparaging the present economic and cultural leadership of our State, but, quite on the contrary, sincerely paying honor and tribute to their ability, vision, and success, nevertheless, we young business and professional men gladly and hopefully accept the challenge of what we hope and believe to be a new and progressive era in Tennessee. In accepting this responsibility, social obligations will inevitably devolve upon us from which we must not shrink. To say that our problems cannot be solved would be defeatism; and far be it from young Tennesseans to be defeatists. To refuse to accept social obligations for the welfare of the people as a whole, along with the assumption of industrial and commercial leadership, would be a dishonoring of the trust and opportunity offered us.

As I look upon this audience of handsome, ambitious, and prosperous appearing young men who are clearly destined to occupy positions of economic leadership tomorrow, I gladly embrace the opportunity of discussing a few of our major problems and obligations.

When our forefathers ordained the free- and public-school system their leadership was immortalized and to another generation renowned the credit of adding high schools to the system. I hope it will be the destiny of our generation to make a college education available to every desirous youth in Tennessee. Great strides have been made in this direction, but we must not be satisfied with strides. We must make college training just as available as is high-school training today. In this advocacy I do not necessarily propose to place all of America's ambitious youth on the Government student pay roll. Much good and notable accomplishment has resulted from the National Youth Administration, yet we need to proceed upon a broader and a more fundamental basis.

The problem of unemployment has defied all of us—young and old. We will refuse to admit, however, that Tennessee and the Nation has reached the peak—the saturation point—of enterprise and economic development. Many countries not nearly so richly endowed as Tennessee maintain a balanced and reasonably prosperous economy with a much more dense population than ours.

A social order suffers a serious indictment when thousands and millions of its people have no opportunity to contribute their energy and talent and earn a livelihood in return. Deprivation, poverty and want, and political unrest are companions of such a condition.

The people rightly look to their Government for leadership, but let us remember that it is a government of the people. Employment by the Government for the sake of employment is necessary to relieve certain extreme and distressing situations, but, again let us not forget that if we are to maintain a system of private enterprise, there are very definite limitations to the scope of such a program. Socialization of education, roads, and certain other endeavors has been necessary and good. In the progress of democracy and human beings toward a fuller stature it is possible that certain further socialization, properly prescribed and bounded, may be desirable, but basically and fundamentally and theoretically representative democracy depends upon private enterprise and on enlightened citizenship individually responsible—each individually responsible for his own livelihood and destiny.

Strange and paradoxical though it may seem, many factory workers are idle because the farmers cannot buy the manufactured product, while the farmers curtail production because the factory workers are unemployed and cannot buy his agricultural product. Of course, it is not quite so simple as that, but, like Mark Twain's weather, no one has found the solution.

It is as baffling as the answer of the witness who was embarrassed when asked if he could read and write. He answered by saying, "I can do pretty good with figures." This point being important in the case, the lawyer repeated the question and again the witness said "I can do pretty good with figures." Finally the lawyer said, "If that is the only answer you will give, then give me an example of what you mean." The witness said, "Well, take for example, when I go somewhere and get away off down yonder and come to a fork of the road and don't know which way to go, I get out and look at these here road signs. I can read how fur, but not whur to."

Our economy is out of balance, particularly as between industry groups. One industry group, automobile workers, for example, will receive $10 to $15 per day, thus making high the price of the automobile which the farmer is expected to buy, while the farmer works hard and must have good luck to earn an average of $1 per day. How can there be an equitable flow of commerce when the channels are choked and clogged with such disparity?

This example shows that farmers and other producers of raw materials usually sell in a city market controlled by the buyer and buy in a city market controlled by the seller. The farmer gets the worst end of both bargains. This accumulating drain of money from the farm to the city and to the manufacturer has an adverse effect upon the farming prospects of Tennessee's youth. Innumerable other examples could be cited to show the inequity existing between industry groups, and the same is true, though perhaps to a less marked degree, as between the major regions of America.

Our generation must not be discouraged by the prospects. The prospects are good. Perhaps I can illustrate my optimism by a radio skit I recently heard: Nell had been on the anxious seat for a considerable time. A friend said to her, "By the way, Nell, how are you getting along in your race for matrimony?" "Oh," she said optimistically, "I think I am on the last lap now."

Though, instead of being on the last lap, our generation is just taking up the burden of responsibility, let us be both optimistic and determined—determined to solve our problems and determined to solve them within the framework of our democratic institutions and form of government.

I have never been much of an apostle of Shakespeare's doctrine, "Sweet are the uses of adversity," and yet adversity may teach us certain lessons not less profitable than those of prosperity. There are at least two lessons, conspicuous lessons, that we ought to learn from this depression. One is as to interdependence of the various economic groups here in the United States, how all classes, legitimate classes, are interdependent one upon the other in an economic sense—the farmer, the apple grower, the laborer, the businessman, the professional man—we are all embarked in the same boat, making for the same port, and subject to the same storms at sea. We are not antagonistic; our prosperity must be common and must be shared in order to be permanent as well as general. The other lesson is this: The economic interdependence of the different countries of the earth. Politically, different nations are independent, and I think ought to be, but in an economic sense the different nations cannot be wholly independent. This world is an economic unit. Various countries, however, far apart in this day are dependent one upon the other in an economic sense; the prosperity of one contributes to the prosperity of all; the adversity of one must be shared in some measure by all.

When we look back through the centuries, if we may take a leaf or learn a lesson from history, we see that the great trading nations, as a rule, have led in point of wealth, progress, prosperity, and civilization. That is true of the Phoenicians, the Carthaginians, and the Athenians, who, may I say, shine like a particular bright star in the dusk of antiquity. The end of the Dark Ages was marked by the rise of the Hanseatic League of the north and the trading republics in southern Europe.

The two great trading Nations of modern times have been the United States and the United Kingdom.

The time and occasion will not permit a full discussion of trade, though I do want to impress upon you that trade is a two-way traffic. We cannot close the door of imports without having the doors closed to our exports. As a nation, we cannot long sell without buying to a reasonable extent. We cannot afford to be consumed, or consume ourselves, by our own narrow sectionalism or nationalism. Axiomatic as this is when applied to international trade, it applies with even more force to some of the pernicious types of growing State trade barriers.

The outstanding battle of this congressional session ended in the extension of the reciprocal trade agreements program, and I believe its operation and extension will ultimately bring greatly increased opportunity to the Nation's youth.

As our society becomes increasingly more complex, young men must be increasingly alert to recognize and interpret maladjustments and take the lead in establishing a balance between industry groups, population groups, and sectional interest. When a proper balance shall have been established, then perhaps we will have found the solution of our unemployment problem.

In addition to paying a proper regard for our youth, our generation cannot disclaim an obligation to those who have contributed their fruitful years and face the evening of their life. They have performed their mission well and we must not let storm clouds of want and despair mar the setting of their sun.

Youth is more vitally affected by war and world crisis than any segment of our population, and it is of first and paramount importance to the welfare of youth, as well as the Nation as a whole, that every honorable and appropriate means be utilized to make safe our peace and security.

World events make it imperative that the United States stand unshaken in the storm as a citadel of democracy and freedom toward which the people of the world may look, like the star of Bethlehem, to guide and light their way. By maintaining peace, America and other nations of this hemisphere may for a time become the only repository of a sound and efficient government of freemen throughout the world. By holding high the torch of civilization and liberty, this Nation can be of inestimable value when the present unfortunate struggle ends. In order to meet this responsibility our Nation must exemplify, by precept and principle, both the right and the ability of freemen to govern themselves.

The ultimate safeguard of democracy is an enlightened and a consciously moral citizenship. If the citizenship lacks the intelligence or the moral courage necessary for self-government, then democracy will cease to exist.

For morality we must depend upon the consciousness of the people that they are accountable to the divine power which created them. "Love thy neighbor as thyself"; "Do unto others as you would have them do unto you," fade into nothingness unless based upon a belief and faith in the fatherhood of God; and without this faith, brotherhood of man becomes an idle dream.

Is it not more than significant that every attack upon the rights of a people to self-government by a present-day collectivistic dictatorial power has been fostered and accompanied by a contemptuous assault upon the fundamentals of religion. They see human beings only as creatures of the State to be subordinated and subjugated to its totalitarian will, possessed only of those rights and privileges which the totalitarian government in its benevolence or tyranny may grant. They begin their approach to this inglorious type of subservient citizenship by a destruction of all contact, relation, and accountability to the Creator.

The survival and progress of democracy must depend upon the youth who will steer its course tomorrow. They must be convinced that democracy offers the best opportunity for happy, hopeful human existence. No matter how dearly this generation may cherish the principles of democracy, and how inviolate we may hold the rights of self-government, unless some of that ardor, some of that belief can be imparted to the coming generations, then who is to carry the torch. Yes; this youth of Tennessee and of America must have confidence in our institutions and in our form of government if it is to long survive, and I believe it will.

You can correctly accuse me of being an optimist. By nature youth is optimistic no matter how dark the night; no matter how distant the dawn. I doubt not that tomorrow will come and that the splendors of the future will eclipse all the splendors of the past.

When we have fully accepted and courageously discharged our burdens and obligations; when we have removed narrow injustices and inequities, when we make the door of opportunity available to all our people; when we provide for properly brightening the evening shadows of life for our old; when proper provision is made to enlighten the mind of our youth upon the truth and sacredness of the principles of liberty, equality, justice, and the ability and the right of people to self-government; when we can be assured, as we are, by the godliness of American mothers as they look into the fathomless blue of their babies' eyes, that the everlasting truth of God and His creation and salvation has found lodgement in the heart, in the mind, and in the immortal soul of our youth, then we will have fulfilled our mission, and we may proudly say to the world, "Behold our democracy."

David Saposs

EXTENSION OF REMARKS

HON. THEODORE FRANCIS GREEN

OF RHODE ISLAND

IN THE SENATE OF THE UNITED STATES

Monday, April 22, 1940

LETTER FROM MARY BARTLETT, CHIEF OF THE RHODE ISLAND DIVISION OF WOMEN AND CHILDREN

Mr. GREEN. Mr. President, I ask unanimous consent to have printed in the RECORD a letter from Mary Bartlett, Chief, Division of Women and Children, State of Rhode Island, addressed to the Senator from Tennessee [Mr. MCKELLAR], repudiating the charge of communism against David Saposs, Director of the Division of Economic Research for the National Labor Relations Board.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

APRIL 17, 1940.

Senator MCKELLAR,
Appropriations Committee,
United States Senate, Washington, D. C.

DEAR SENATOR MCKELLAR: Any student of the labor movement in this country knows that the attacks against David Saposs as a Communist are unfair; anyone really interested in the labor movement fears the tendency to label everyone who believes in the Bill of Rights a Communist.

Mr. Saposs has been a capable director of the Division of Economic Research for the National Labor Relations Board. Under his competent guidance the division has released many studies that have been an important part of the work of the Board. His published writings prove him to be a scholar; his work with the Labor Board shows him to be an effective research administrator. He is a liberal who holds no brief for the authority and duplicity of the Communist Party.

Certainly the appropriation of the National Labor Relations Board should not be cut so as to strangle the Division of Economic Research nor should the Director of this Division be singled out for epithet when the value of his work has already been proved.

I should appreciate the inclusion of this letter in the CONGRESSIONAL RECORD.

Very sincerely yours,

MARY BARTLETT,
Chief, Division of Women and Children.

Federal Spending

EXTENSION OF REMARKS
OF
HON. W. STERLING COLE
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, April 22, 1940

EDITORIAL FROM THE ADDISON ADVERTISER

Mr. COLE of New York. Mr. Speaker, under leave to extend my remarks, I am inserting in the RECORD a timely editorial from the Addison Advertiser, a weekly newspaper published in Steuben County, N. Y.

[From the Addison (N. Y.) Advertiser]

MASKS ARE OFF

The current session of Congress, which opened in January with a fanfare of economy gestures, has settled back into its customary role of throwing money to the seven winds, irrespective of how such action affects the country. Irresponsible though the course of appropriations has become, it does weave a definite pattern, the pattern of handing out money to groups likely to swing their votes toward the party with the longest Santa Claus whiskers.

Spend, spend, spend has been the theory of the Democratic administration which occupied Washington in 1933, and spend, spend, spend will be the refrain until the last new dealer has been driven out of the seat of government. Congressional protestations of economy sounded well in January and February, when election was still 9 months away, but as the days grow longer the sentiment grows stronger for trying to buy another term at the expense of the long-suffering taxpayer. For several years there has been an election formula which has worked like a charm—the formula of soaking the middle-class fellow who is hit the hardest by taxes and handing the cash to the classes who vote as a group. Mr. Roosevelt taught the lesson well to his followers and they will continue the plan until enough Americans come to their senses and get rid of the spenders.

There is only one possible way to save this country from bankruptcy as well as the loss of our American system of free enterprise. That is to rid Washington of the crackpots and theorists who have gobbled our national life like a cloud of locusts. The Corcorans, the Cohens, the Hopkinses, the Franks, and scores of other of their ilk must be rooted out body and breeches. It has come to be a case either of their defeat or the loss of true American democracy. No compromise or half measure will suffice.

The efforts expended in trying to sell a third term are born of the necessity of despair. Trying to elect a Corcoran, a Hopkins, or any one of those pink theorists would be as impossible as electing Al Capone a Methodist bishop. Their only hope of continuing to inflict themselves and their ideas on the country is to hide behind the much-exploited Roosevelt charm.

Congress is like a drunken man seated on the railway track with his back toward the engine. That is an old simile borrowed from the Bryan campaign of 1896, yet it is true today. A few Democratic Representatives and Senators appeared to sense the danger last winter, but with the approach of spring the idea grew that they were tied inseparably with the New Deal crowd with whom they have been associated for 7 years. The voters of the country would be satisfied with no half-way measures. Promises of economy had been broken too many times to be believed again—judgment in this election would be passed on the history of 7 years, not on any eleventh-hour reform such as a demonstration of real economy in 1940.

So Congress has again gone on a spending spree. The people know it, which is well. The issue in this election will clearly be the failure of the new dealers to lead us out of depression and unemployment. Mr. Roosevelt has been trying desperately for more than a year to make people forget his domestic failures by headlining foreign dangers, but the immediate concern of a majority of Americans is that of restoring jobs for the millions on relief who are willing to work.

Congress having abandoned its deathbed repentance for the sins of profligacy now will come face to face with an electorate determined on a change. Doubtless Congress will succeed in dodging the issue of raising the debt limit—dodging it by appropriating just enough money to carry through until after election. Perhaps a tax boost will be avoided in the same way, but the people will be acquainted with the fact this is only a dodge. The money received on the old national homestead has been spent, even though the mortgage has not been foreclosed. Masks are off and the voters can point to the villains in November.

Award of Medal of Honor to Robert Preston Thompson

EXTENSION OF REMARKS
OF
HON. JOSEPH W. BYRNS, JR.
OF TENNESSEE
IN THE HOUSE OF REPRESENTATIVES
Monday, April 22, 1940

LETTER FROM HON. JOSEPH W. BYRNS, JR., OF TENNESSEE

Mr. BYRNS of Tennessee. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following letter which I wrote recently to Hon. CARL VINSON, chairman of the House Committee on Naval Affairs:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., April 20, 1940.

Hon. CARL VINSON,
Chairman, Committee on Naval Affairs,
House of Representatives, Washington, D. C.

MY DEAR MR. CHAIRMAN: I am in receipt of the report of the Navy Department, signed by J. H. Towers, Acting Secretary of the Navy, with reference to my bill, H. R. 8315, to award posthumously the Medal of Honor to Robert Preston Thompson, an enlisted man of the United States Navy, who lost his life on the submarine *Squalus* on May 23, 1939, and from which his body was never recovered.

I am surprised at the attitude taken by the Navy Department in this respect, particularly since they admit that the only cost to the United States Government would be $3.50 for the actual medal itself. This parsimonious attitude is all the more difficult to understand when at the first session of this Congress alone $773,000,000 was appropriated for the Navy; in the Seventy-fifth Congress $1,063,000,000; in the Seventy-fourth Congress $985,000,000; and in the Seventy-third Congress $284,000,000.

Attention is called in the adverse report to the fact that other persons lost their lives in the submarine, and, since this seems to be one of the grounds of objection of the Navy Department, I wish to advise that I am preparing a bill to give all those who lost their lives in this disaster the Medal of Honor, thus meeting one of the objections of the Department. While Mr. Thompson made no greater sacrifice than the others who lost their lives, still his case is particularly deserving when you consider the fact that his was the only body not recovered, and that his widowed mother was denied that small comfort of having her son's remains sent to her.

On the day that our country fails to show respect to those splendid young men, who gave their all for it, on that day we are showing ourselves to be unworthy of their sacrifice, and I am amazed that any Department of this Government can be so callous, so hard-hearted, as to let a matter of $3.50 stand in the way of a recognition of this young man's heroic sacrifice. Of course, it is all very well for a man safe behind a desk in the Navy Department to take such a calm view of the sacrifice made by this young man. I will be very happy to pay for the medal myself, thus meeting another objection of the Navy Department.

If medals are not created for such cases as this, I fail to know for what purpose they are created. If we fail to honor the heroic dead, we fail to do our full duty.

I respectfully ask for an opportunity to appear before the committee and argue this bill, notwithstanding the objection of Admiral Towers.

With kindest personal regards, I am

Cordially yours,

JOESPH W. BYRNS, Jr.,
Member of Congress, Fifth District, Tennessee.

America's Participation in Another Foreign War

EXTENSION OF REMARKS
OF
HON. HAMILTON FISH
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, April 11, 1940

RESOLUTION OF THE SOCIALIST PARTY OF THE UNITED STATES

Mr. FISH. Mr. Speaker, under leave granted me to extend my remarks in the RECORD, I include a resolution adopted by the Socialist Party of the United States at its national convention held in Washington, April 6 to 8, 1940, against America's participation in another European war. The preservation of American neutrality and keeping America out of foreign entanglements and wars is the most important issue before the American people. No party or Presidential candidate can afford to dodge or pussyfoot on this vital issue. I am glad that the Socialist Party and its able candidate, Norman Thomas, have espoused the cause of neutrality, nonintervention, and peace, and hope that all other national parties will do the same. I shall do everything in my power to include an antiwar or peace plank into the Republican national platform for 1940.

The European war presents to the American workers and the population generally the greatest challenge of our generation. Our task is not to isolate ourselves from the problem of the workers of the world. As firm believers in internationalism, our purpose is to follow that course of action by which the workers of the United States can best be of service to world labor.

A majority of the peoples of the old world are now pitted against each other in a war that stems from the critical condition of world capitalism. Its causes lie equally in the domestic crisis of all the powers accompanied by the building of military economics with their consequent nationalism and the incessant demands of capitalism for expansion beyond a home market of low-paid consumers to new fields for investments, for markets, for raw materials. The allied powers already held empires; domestic crisis was therefore less acute and their degree of political democracy greater. Germany, on the other hand, deprived of colonies, prestige, and internal stability by the last war, was pushed on the road to fascism and into a policy of aggression with the very connivance of the allied powers.

The cause for which Hitler has thrown the German masses into war is damnably unholy. But the war of Chamberlain and Reynaud is not thereby rendered holy. The fact that Hitler is the opponent does not make the Allied war a fight for democracy. The brutal Hitler regime—with its drowning of trade-unionism in the blood of the workers, with its bitter persecution of racial minorities, with its crushing of all human liberties—is in great part the result of the imperialist peace which followed the last war. In England and France the military and economic pressure of the war has begun to undermine the political structure of democracy, and if the war passes from its present static condition to large-scale hostilities, consuming vast quantities of men and material, the drift to military dictatorship and fascism will grow at a rapid pace. Already the French Government is invoking the death penalty to suppress dissenting opinion.

Like war, fascism has its origin in capitalism. Both war and fascism spring from the failure of the capitalist economy to solve the domestic problem and provide a secure and decent livelihood for the masses of the people. Fascism has its origin in the breakdown of the national economy, the desperate turning of the frustrated people to a messiah who promises all, and the competition among nations for the control of sectors of the world market dictated by capitalism's need for expansion.

Inherent in capitalism is the resort to conquest of small or unindustrialized nations, to war with rival imperialisms, or, when this expanson is thwarted, to a military, state-controlled economy which can intensify domestic exploitation. The struggle for bread, opposed to that for profits, is likewise international. The clash of workers against capitalism, therefore, takes many international forms: for freedom of colonies, for the overthrow of fascism, for the end of imperialist war.

The struggle against war is inseparable from the struggle for freedom, for justice for all peoples, for a world of socialist democracy. We must oppose wars and the system that makes them.

In warring nations, the very struggle for existence of workers involves a conflict with the conduct of war. Protests against high prices, long working hours, government control of trade-unions, suppression of civil rights, cannot be separated from opposition to the war itself, for the state turns on such protests to suppress them. The cleavage which develops between workers and the warring state is natural, and the class struggle becomes identical with the struggle against war.

For colonial peoples, war by their robber empires intensifies the exploitation of their resources. War loans drain the wealth and cripple the economy of the country. Conscription takes natives for the armies of the war. Demands for independence are met with further curtailments of liberty. Imperialist war is for their possession; for colonials, the struggle for freedom and the struggle against war are the same.

In Germany, the immediate effect of the war has been to make the work of the underground movement much more difficult. The separation of workers through their conscription in the army and factories, the unity of the people under threat of a new Allied blockade, and a new Versailles treaty, increase the difficulty of work against the regime, although the pressures of the war will, over a period of time, strengthen antagonisms against it. Defeat of Hitler will be welcomed by all antifacists. But defeat of Hitler will mean the defeat of Hitlerism and victory for the German working class only if French and British workers are sufficiently organized to stop Allied troops from overthrowing another German revolution. Already, the Allies covertly discuss restoration of the monarchy, or removal of Hitler with maintenance of domestic fascism in the Reich. The possibility of successful working-class revolution in Germany is proportionate to the strength and independence of antiwar working-class forces in France and England who are opposing all efforts to rouse hatred against the German people.

In this situation, the American working class has its responsibility. It must aid the working class in the warring powers and particularly the heroic underground movements that have carried on for years despite the terror. It can render that aid only if it remains free from dictatorship itself—by keeping America out of war and out of the conditions that create dictatorship.

Already the United States is alined economically on the Allied side of the war. The Allied Governments have no idealism in the conflict, no war aims worthy of the sacrifice of the democracy and life of their peoples, no purpose of overthrowing fascism except to replace it by a more desperate and brutal government, if need be, that would crush the economic demands of the German workers, and leave England and France free to pursue their star of profit. The American people have no stake in such a victory. We have a measure of democracy which war would take away—a democracy which must be extended if we are to solve the grave problems of poverty, unemployment, and racial oppression for which war would not even be a temporary though terrible antidote, but only a new irritant. We have the responsibility of material and moral support to antiwar forces throughout the world, which entrance into war would prevent us from fulfilling.

The United States must be kept out of this conflict. The hope of the American people for peace is not the hope of victory for either imperialism, but for victory of the masses who everywhere suffer by war. The entry of the United States did not guarantee a democratic end for the last war; indeed, American armies helped to crush the revolutions of central Europe and to keep the French workers in check. To keep America out of war is to aid the antiwar and anti-Fascist forces of Europe as well as ourselves.

Since the driving force for participation in the wars of capitalism has always been economic, the workers must oppose all economic pressures for war. We must not permit ourselves under slogans of "steps short of war" to become involved in the Allied economy and thus in the military struggle. Participation in modern war cannot be partial. If the American people once approve entering the economic war now raging more vigorously than the physical struggle, they will find that that decision has determined their participation in the military conflict. Keeping America out of war means keeping America out of the economic war as well.

American workers want to keep out of war precisely because war would cripple their organized struggle for a better world. Already the militarism of the Government is made an excuse for cutting expenditures for social welfare. Our military budget now exceeds by far the billion-dollar annual Budget concerning which the Democratic Party platform of 1932 taunted the Republicans. M-day plans which would bring dictatorship to the United States have been prepared in detail. The first duties of the American people are to oppose the militarism and war plans of their own Government; to demand security through the prosperity of consumer-goods production and work for all—and to defend civil liberties and workers' rights.

Nor is the United States at present a symbol of justice in foreign relations. Under the slogan of the "good neighbor" policy, the administration aided Cuban fascism in suppressing all working class and democratic forces under the iron heel of reaction. It has played

the game of imperialistic give and take with dictatorial regimes throughout Latin America. In Brazil it gave aid to the regime of the reactionary Vargas by official praise, by military and naval missions, and by aid in the creation of a fighting navy. With the help of a reactionary majority in Congress it went out of its way to deny aid to the legitimate Spanish Government, which was legally entitled to purchase materials, under circumstances that could not have involved us in war, while permitting the free shipment of munitions to Mussolini and Hitler and through them to Franco. In the Far East it has displayed none of the altriusm which it now professes with reference to Europe. It deliberately chose to ignore the then-existing neutrality law and with a view to profits became a virtual partner of Japan in the assault on China, while at the same time it gave every evidence of a willingness to make war in Pacific waters to protect foreign investments.

Since economic neutrality is essential if we are to preserve military neutrality, we oppose any policy that paves the way to economic aid to warring powers by the United States. We condemn America's economic participation on the side of the Allies just as we condemn Russia's economic participation on the side of Nazi Germany. At the same time, we proposed affirmative action by the workers for the achievement of the following immediate tasks:

1. Enactment of a constitutional amendment which would give the American people the right to vote on participation in war.
2. Defeat of the huge Army and Navy bills, altogether out of proportion to any defense needs.
3. Elimination of all existing M day plans and schemes for universal conscription, thus warning those who would plunge America into war that America will not tolerate involvement in another war and war dictatorship at home.
4. The abolition of military training in the public schools and colleges, and the removal of military supervision from the C. C. C. and from all other civilian institutions.
5. Abandonment by the United States of all imperialist ventures, whether of an economic, financial, or military nature, particularly in Latin America.
6. The granting by the United States of independence to its colonial possessions.
7. The defense of civil liberties and the extension of a domestic policy aimed at unemployment and insecurity; the strengthening of organized labor and farmers on the economic and political fields, especially in bringing about labor unity; and the development among those organizations of a genuine program for international peace.
8. The continuance of independent working-class action through the medium of the workers' boycott of German and Japanese goods.
9. The effecting of international cooperation for the reduction of economic friction between the nations of the world resulting from the struggle for trade, investment areas, raw materials, and the achievement of freedom of the colonies and not their redivision among the imperialist powers. America must be kept free of any alliances that will prevent the establishment of international economic cooperation, which is the only basis for peace and the elimination of fascism in Europe and the world.

Above all things, the American workers must indicate now that they will not participate in any declaration of war by our Government. The working class must now present an unqualified demand: Keep America out of war!

Texas Already Has a Hatch Law

EXTENSION OF REMARKS

OF

HON. JOHN J. DEMPSEY

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1940

EDITORIAL FROM THE EL PASO HERALD-POST

Mr. DEMPSEY. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the El Paso Herald-Post for April 18, 1940:

[From the El Paso Herald-Post of April 18, 1940]

TEXAS ALREADY HAS A HATCH LAW

Some time ago we suggested editorially that El Paso County officials observe the spirit of the Hatch law by allowing county employees to stay on their jobs instead of "pushing cards" during the coming election. Some of the officials agreed that such would be a fine thing to do, but others maintained silence.

Now there is another angle to the Hatch law—campaign contributions from public employees.

Believe it or not, that happens to be already against the law in Texas.

We refer the officials—particularly judges, attorneys, sheriffs, constables, and any other law-enforcement officers—to article 197 of the Texas Penal Code. It says:

"Any head of any of the departments of State or other public officer who shall demand or receive any money or thing of value from any clerk or other person in his office for his election expenses, or to reimburse him for money already expended, or who shall remove from office any competent clerk who declines to make such contribution, shall be fined not to exceed $500."

May we suggest that the grand jury keep its eye on this election and see that the law, which has been on the books 35 years, is obeyed. If they deem it necessary the jurors might appoint a few special investigators to keep watch.

In Fort Worth the taxation and public expenditures committee of the chamber of commerce has asked the county officials to observe the spirit of the Hatch law and obey section 197.

There county employees are said to be expected to give a month's pay toward their boss's campaign fund. We do not know what the "take" is here but it is bound to be something, and there seems little justice in making the $1,500 boys contribute anything to the $5,500 boys.

At any rate the law says it should not be done.

Smear From the Left

EXTENSION OF REMARKS

OF

HON. FRED L. CRAWFORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1940

EDITORIAL FROM THE SAGINAW DAILY NEWS

Mr. CRAWFORD. Mr. Speaker, out in the great open spaces where people can think clearly without contamination of propaganda, we get a lot of good philosophy. These people are doing clear thinking today about the war, national policy, and other important issues.

In their clear thinking they have decided they have no use for those subversive forces which are dissatisfied with our form of government and they have still less use for the repeated "smear" campaigns launched by un-American interests.

How they are thinking is voiced in a splendid editorial in my home-town paper, the Saginaw Daily News, which reminds us that havoc has been wrought in Europe behind the wild cries of "democracy" and "civil liberties." The editorial is so to the point that I present it here for the perusal of the House. It pertains to the recent smear against the Federal Bureau of Investigation.

[From the Saginaw Daily News]

SMEAR FROM THE LEFT

The campaign to smear Chief G-Man J. Edgar Hoover and perhaps force him to relinquish his post seems to be gathering strength. It was mentioned earlier in this column that the so-called liberal press had been heaping criticism on the F. B. I. head for weeks, and that Attorney General Jackson apparently had lent his name to the campaign by dismissing neutrality-law indictments against several leftists in Detroit.

Now it appears that the move to oust Hoover has gained support in both branches of Congress. Condemnatory speeches have been delivered by Senator NORRIS, of Nebraska, and Congressman VITO MARCANTONIO, of New York. NORRIS is a former Republican turned new dealer, and MARCANTONIO is an American Labor Party member.

Thus far the attacks against Hoover have been largely couched in generalities, chief among these being that he is an "enemy of civil liberties."

It is interesting to note the wide uses this phrase, "interference with civil liberties," has been put to lately. In Hoover's case it is made to cover the awful offense of investigations made without fanfare, nocturnal arrests of suspected criminals (some of which happened to be leftists), and refusal to place his office on a pro-new dealish partisan basis.

If the truth were known, it wouldn't be far wide of the mark to say that Hoover is in disfavor chiefly because he has insisted on enforcing the law honestly, capably and impartially. Some of the administration's friends do not like that kind of law enforcement. They aren't concerned with what happens to bundists, Fascists, and such. But the area left of center is sacred to them, and anything that originates there is good, no matter how badly it smells.

These pretended liberals are making much capital out of "democracy" and "civil liberties" these days, but they ought not forget the travesties that have been wrought in Europe under these same general headings.

Westminster College

EXTENSION OF REMARKS

OF

HON. CLARENCE CANNON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1940

ADDRESS BY HON. JAMES A. FARLEY

Mr. CANNON of Missouri. Mr. Speaker, Westminster College is one of the oldest institutions of learning west of the Mississippi River. It is one of the few, if not the only remaining school, exclusively for men, in the Central West. Its institute of public affairs, annually, attracts to its forum many of the most distinguished men of the Nation, and I wish to include as a part of my remarks the address of Hon. James A. Farley before the institute on April 2. In no State in the Union is Postmaster General Farley in higher favor than in Missouri. His address is most timely, and is of national interest, and followed similar addresses by Hon. John D. M. Hamilton, chairman of the Republican National Committee, and Hon. Paul V. McNutt, Administrator of the Federal Security Agency, who addressed the student body of the college on current subjects at recent sessions of the institute.

Mr. Farley's address is as follows:

There is something refreshing for a man of my experience to come face to face with you young Americans of Westminster College. From where I stand I can observe in your earnest faces not only an honesty of purpose that reflects credit upon the homes from which you came, but also a sense of appreciation of the opportunity you have here to qualify yourselves to make your way in the world.

My attention was called recently to a remark of George Bernard Shaw, a noted playwriter, upward of 80 years of age. He was quoted as saying: "Youth is a wonderful thing. What a crime to waste it upon children." The young people that Shaw had in mind were not, of course, our alert American youth of today, and were not made of the stuff that you have inherited from your people.

Every Missourian has the right to be proud of the history and heritage of this great State. The dauntless explorers of France, England, and Spain came here in the early days to make their homes. Here came also the courageous and high-spirited Germans and Irish seeking political freedom; the valiant Virginians and the strong-hearted Kentuckians, the intelligent and thrifty New Englanders, and the chivalrous and gentle sons and daughters of the South to found a truly great American Commonwealth.

Missouri was for a number of years the outpost and frontier of our national civilization. From the time of its inclusion in the United States in 1803, under the direction and foresight of Thomas Jefferson, her citizens have ever been foremost on the field and in the forum as the defenders of the liberties of the people.

Her strategic location as a frontier State in the early days, her border-line position in the days before and during the War between the States, and the solid American character of her people have always caused the citizens of Missouri to be keenly alive to every question that affected the welfare of the country.

With this background it is not difficult to understand your interest in the forthcoming election of a President of the United States. With civilization hanging in the balance, with serious social and economic problems still in the process of solution, it is obvious, if our Republic is to remain the last high hope of mankind, that every American citizen must do his part at this time in shaping the destiny of the Nation.

I congratulate my good friend, President McClure, and his associates on their foresight and success in placing before the Institute of Public Affairs of Westminster College a number of the eminent Republican and Democratic aspirants for the Presidential nomination. There is evidence that other cities in the State are imitating your good example. I saw a squib in the paper a few nights ago that Tom Dewey was in St. Louis and that other candidates have been around here and there.

I think this is a good thing. I think the people of this country should have the chance to size up all the Presidential candidates at close range. If this could be brought about, I am convinced that you could depend upon the American public to pick out the right man for the place. It has been my experience over a period of years that sooner or later our people get the true measure of every man in public life. They have a way of finding out for themselves whether a man is a human being or a jack-in-the-box, and whether he really has something under his hat or is just talking through it. For this reason I not only endorse the idea of the Westminster Institute of Public Affairs, I am heartily in favor of it.

The Presidential candidate of the Democratic Party in 1940 must base his claim for success upon the record of the Democratic administration for the past 7 years, and he must convince the public of his desire and ability to see that record through to a complete and successful conclusion.

When the Democratic Party came into power on March 4, 1933, it inherited from the Republican Party a defeated, discouraged United States, tangled in the bog of financial and economic chaos.

We inherited a prostrate banking system, 15,000,000 unemployed workers, farmers in or at the edge of bankruptcy, trade and commerce at a standstill, and a Federal Budget badly out of balance. We started—not from stratch—but from way behind it.

Under 7 years of our administration business has been revived, agriculture has been improved, the national income has been almost doubled, foreign trade has been substantially increased, and the total of unemployed reduced by millions. The spirit of the Nation has been transformed from despair to courage and hope. In a world shaken by war and conquest, the United States has become the last great bulwark of freedom and peace.

This is the Democratic record and we are proud to stand upon it. The inheritance of wreckage taken over from the Republican Party has been converted into a legacy of hope and vigor for the present and future generations.

The goal of the Democratic administration has been security—security for the Nation and security for the mass of common citizens who must find happiness and a means of livelihood in a harsh and complex industrial age. The old policy of drift and shift, of doing nothing and letting things take their course, produced only bitter fruits and tragic failure.

The constructive achievements of the Democratic administration stand unmatched in recent history. While other nations have wasted their substance on war and destruction, the United States has been conserving its natural resources and human manpower. The soil has been protected against the ravages of the wind, water power has been developed, and the benefits of time- and labor-saving electricity carried to rural homes and rural firesides. Idle hands have been given employment in the building of roads, school houses, bridges, dams, airports, landing fields, and other useful public projects. As a result of this program, undertaken in a time of economic emergency, the Nation's physical plant is in better shape today than it ever was before.

These splendid benefits are here and now; benefits that will accrue to future generations as well as to our own. A social-security law has been enacted to provide a measure of financial security for men and women workers who arrive at old age without independent means. Payments under the act are beginning this year. The law was designed to correct one of the gravest abuses in the industrial system, and, before many years have passed, it will take its place as one of the most humane pieces of legislation ever enacted by a far-seeing government.

Bank deposits are now insured, guaranteeing against a repetition of the misery and disaster caused by the wholesale collapse of the banking structure under the last Republican regime. A brake has been placed on the issuance of wildcat securities and phony stock certificates. Wholesome regulations have been adopted to curb the type of reckless speculation in security markets which did so much to bring on the last tragic depression.

Labor has had the right of collective bargaining given the sanction of the law. An excellent start has been made on the difficult task of putting a floor under wages and a ceiling over hours of toil.

A program of agricultural aid has been placed in effect, under which the prices received by farmers have risen far above the ruinous rates received in 1932.

The national defense has been strengthened and relations with Latin-American countries vastly improved by the good-neighbor policy.

The list of worth while, workable measures written into law by the Democratic administration could be extended indefinitely. It is significant that the Republican program committee, headed by Dr. Glenn Frank, found it expedient to put a reluctant stamp of approval on many of the major measures sponsored by a Democratic President and a Democratic Congress. A political party, facing a national election, could hardly do otherwise.

The critics, of course, are dissatisfied. Under the grand old American way, they have a right to fill their lungs with air and then scream until the heavens echo their plaintive cries. They still have that right because the Democratic administration has been zealous in its protection of civil liberties.

What disturbs our critics? First of all they complain about the size of the public debt, neglecting, of course, to remind the electorate that the debt rose more than five and a half billions during Mr. Hoover's regime when nothing was done to turn the tide. The Democratic administration had a choice to make in the face of a dreadful calamity—it could balance the budget or it could use the public credit to meet human needs. The latter course called for greater courage. But it was right and it was chosen.

The debt has gone up, but spending has advanced the national income and saved millions of worthy citizens from privation and want. There was no other way to do the job. The public credit has been strengthened, not weakened, and United States bonds are selling above the levels that prevailed when this administration came into power.

"Look at the unemployed." This is another favorite cry of the critics. What did the Hoover administration do to solve unemployment? Has any Republican candidate offered a single concrete suggestion for meeting the problem? I mean apart from

the usual bunkum about business improving if the Republicans are returned to power. In other words, "prosperity is just around the corner" provided the Grand Old Party gets back in the saddle—the same old medicine in a different bottle.

Senator BARKLEY, majority leader, stated the case in a recent speech summarizing the work of the Democratic administration.

"It must be remembered," he said, "that we have had only 7 years to climb the hill from the depths of the depression as it existed in 1933. If it took 12 years of political and economic folly to throw 13 million men out of work, we claim to have attained a miraculous success if we have been able to put three-fourths of them back to work in 7 years in addition to the absorption of those who have newly come upon the scene and those who have been displaced by mechanical improvements."

The Roosevelt administration, in the face of tremendous odds, has done a remarkable job of reconstruction. It has revitalized the Nation's life and it has preserved peace. It will take its place in history as one of our great constructive administrations.

The American method of procedure in providing every citizen of the Republic with a share of responsibility in the management of our national affairs is to be found, generally speaking, in our two-party system of government. In this way the party out of power, the Republican, can avail itself of the regular national and congressional elections to point out to the people what it considers to be the mistakes and the weaknesses of the administration of the party in power. But the minority party must do more, and here is where the rub comes for the Republicans in this election. It must offer a constructive program and it must offer sound sensible candidates.

To put the present situation more clearly before this assembly of college people, let me say that the picture is about the same as the one you may have seen at the annual home-coming football game, when some carping critic stands up in the crowd and yells at the top of his voice that he can run the team better and carry the ball farther than any man on the field.

In this campaign I am proud to be the spokesman of the Democratic Party for one of the world's largest business organizations, the United States Post Office. I am proud of the postal surpluses in every year of my administration save one; not because those annual surpluses are a credit to my record as a businessman but because I firmly believe that it is the duty of a Postmaster General "to serve the public more and more and tax them less and less."

If I ran a deficit as Postmaster General, it would have to come out of your pockets in taxes. That is why I have tried to live within our income in the Post Office Department and do my part toward balancing the National Budget.

I am proud to be at the head of this magnificent and universal system of communication. I am proud to be associated with the fine men and women who make up its field forces, and I am pleased to express publicly here and now my appreciation to them. I make claim to no special amount of personal credit for the present high efficiency of the Postal System. I do assert, however, that under the Democratic administration we have made decided progress.

When we came into office on March 4, 1933, we adopted policies calculated to safeguard this great public business, to improve its efficiency, to assume our full responsibility to the workers, and to save money for the taxpayers. As we have gone along with the work we have stood by those fixed policies. And the record shows that we have been successful. Let me illustrate:

The net deficit for the fiscal year 1932, which was the last full year of operation under the previous Republican administration, was a staggering deficit of more than $152,000,000.

There was a net deficit in the fiscal year 1933 of more than $50,000,000, notwithstanding that in the beginning of that year the postage rate on all first-class matter was raised from 2 to 3 cents.

The fiscal year 1934 was the first full year of the Democratic administration. As the result of my recommendations at the beginning of that year, the local rate on first-class matter was reduced from 3 to 2 cents. In spite of the loss in revenue from that reduction in the rate of postage, a net surplus was shown from our operations in 1934.

In 1935 another net surplus was shown.

In the fiscal year 1936, due to the adoption of the shorter workweek, which cost millions of dollars and put thousands of men to work, and due also to the fact that in 1936 the post office took over for the first time the custody of post-office buildings from the Treasury, we suffered a net deficit of less than $17,000,000.

Increased efficiency on the part of the postmasters and employees, coupled with increased revenues, enabled us to again show a net operating surplus in the fiscal year 1937.

The same is true of the fiscal years 1938 and 1939.

Therefore, by adopting the same methods of bookkeeping as my predecessors and by taking credit for nonpostal items, in the same manner as previous Republican administrations claimed this same credit, in 5 of the 6 full years of operation under my administration we have shown a net surplus from that part of our services which we have rendered to the public for hire.

It has been a privilege to address you this evening, and I wish to express my sincere thanks and appreciation for your attention and your very cordial hospitality.

Helping the Farmer

EXTENSION OF REMARKS
OF
HON. RICHARD J. WELCH
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Monday, April 22, 1940

EDITORIAL FROM THE WASHINGTON DAILY NEWS

Mr. WELCH. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Washington News of April 20, 1940:

[From the Washington Daily News of April 20, 1940]

"HELPING THE FARMER"

The Barden amendments to the Wage-Hour Act, now expected to be brought up in the House next week, have been represented frequently as a boon to the farmers.

That may be true—in the case of corporate farmers who operate their own canneries and packing plants.

It is certainly not true in the case of a bona fide dirt farmer. The reverse is nearer the fact.

If the Barden amendments are enacted, and the protections of the Wage-Hour Act are removed from more than a million low-paid workers, their ability to buy farm products will be diminished. That certainly will do farm prices no good.

The proposed exemptions have nothing to do with farm labor, which of course has never been covered by the Wage-Hour Act.

The pretenses of some of the cannery lobbyists, sawmill lobbyists, cheese lobbyists, tobacco lobbyists, etc., who profess to be crusading in the interests of the hard-pressed American farmer, are a little sickening.

Senator MURRAY, of Montana, said the other day, in attacking the Barden amendments:

"I come from a great agricultural State and have supported every proper farm bill of the administration, but I submit to your common sense that we cannot help the farmer by decreasing the wages of those who buy his products. Every economist knows this."

We hope most Congressmen know it.

Federal Bureau of Investigation

EXTENSION OF REMARKS
OF
HON. ALBERT L. VREELAND
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Monday, April 22, 1940

LETTER FROM THE PATROLMEN'S BENEVOLENT ASSOCIATION, OF NEWARK, N. J.

Mr. VREELAND. Mr. Speaker, with the many critical elements in our country finding fault with the exceptionally fine work the Federal Bureau of Investigation is accomplishing, it is most gratifying to receive the following commendation from the Patrolmen's Benevolent Association of Newark, N. J.:

PATROLMEN'S BENEVOLENT ASSOCIATION,
NEWARK, N. J., LOCAL NO. 3,
Newark, N. J., April 10, 1940.

Hon. ALBERT L. VREELAND,
Representative, Eleventh District,
House of Representatives, Washington, D. C.

HONORABLE SIR: The Patrolmen's Benevolent Association of the Newark Police Department, at a regular meeting held at the Labor Lyceum on April 9, 1940, unanimously adopted the following resolution, and ordered the same entered on the minutes, with instructions that a copy be forwarded to the United States Senators for the State of New Jersey and to the three Members of the House of Representatives with constituencies in the city of Newark:

"Whereas the press of the United States has recently published statements made in the Congress which attack the law-enforcement methods of the Federal Bureau of Investigation of the

United States Department of Justice and the Director of said Bureau, John Edgar Hoover, and

"Whereas, it has been the experience of our organization to receive from the Federal Bureau of Investigation the fullest of cooperation in all matters affecting the enforcement of law and the apprehension of criminals: Therefore, be it

"*Resolved*, That the Patrolmen's Benevolent Association of the police department of the city of Newark endorse unanimously the policies and practices of the Federal Bureau of Investigation, and its director, and urge upon the Congress that the Bureau be encouraged and commended in its excellent work in the field of law enforcement."

Copies to Hon. W. WARREN BARBOUR, United States Senator for New Jersey; Hon. WILLIAM H. SMATHERS, United States Senator for New Jersey; Hon. FREDERICK A. HARTLEY, Jr. Representative, Tenth District; Hon. ROBERT W. KEAN, Representative, Twelfth District.

Respectfully yours,

THOMAS E. DURKIN,
President, Patrolmen's Benevolent Association, City of Newark, N. J.

Attest:

EDWARD J. SCANLON,
Secretary.

Developing Our Inland Waterways for National Defense. Tennessee-Tombigbee; Lake Erie-Ohio; and St. Lawrence Inland Waterways. Senator McKellar's Fears Unfounded

REMARKS

OF

HON. JOHN E. RANKIN

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Friday, April 19, 1940

Mr. RANKIN. Mr. Speaker, we are spending billions of dollars on national defense. Defense of whom? Are we preparing to defend somebody abroad, or do we propose to defend our own people and our own country? Are we preparing for national defense or international defense?

If we intend to make our own country so safe and strong that she can stand against the world, we should take a portion of this money and use it for the development of our inland waterways, in order to be able to protect America in times of stress and assure ourselves that this country will never suffer the fate of Norway.

Every civilized nation under the sun that can be classed as a world power, except the United States, has developed its inland waterways to connect every section of the country; while here we are yielding to the pressure of certain selfish interests and sadly neglecting that vital phase of our national defense.

Mr. RICH. Mr. Speaker, will the gentleman yield?

Mr. RANKIN. I am sorry; I have not the time to yield.

Shall we continue to ignore the sad lessons of history? Shall we continue to ignore what is taking place in Europe today? Shall we shut our eyes to the painful truth that no country is prepared to cope with a world power, or a group of world powers, that has not properly developed its home defenses, especially its inland waterways?

No matter how large an army or navy a country may have, it does not have an adequate system of national defense until it has developed its inland waterways to serve every section of the country to which they can be extended.

If the time should ever come when it is necessary to defend our country against a foreign power, or a group of foreign powers, we are going to have to depend to a large extent on these inland waterways, just as Europe is doing today.

As has been pointed out by the Army engineers, since the latter part of the eighteenth century canal and river improvements in Europe have been located and designed for national-defense purposes as well as for peacetime benefits.

Today, while seagoing commerce is being blasted from the face of the ocean, these inland waterways are probably deciding the fate of Europe.

In Germany a system of inland waterways with a total length of over 8,000 miles connects the river system of the Rhine, Elbe, Oder, Vistula, Danube, and other streams. Berlin is connected with the Baltic Sea through central Germany to Berlin, and to the heart of the Ruhr mining and industrial area. Future plans for German waterways contemplate modernization by 1945 of the old Ludwig Canal connecting the Rhine and Main Rivers with the Danube. While we quibble over the small amount necessary to start work on the Tennessee-Tombigbee inland waterway that would give a new water connection with our nitrate plant at Muscle Shoals, on which we must depend for our explosives in case of war, and shorten its distance from the Atlantic Ocean by a thousand miles.

In France, waterborne commerce through canals and improved river systems is an established part of plans for national defense as well as an important asset to the peacetime economic life of the country. The French inland waterways have a total length of about 6,200 miles—3,200 miles of canals and 3,000 miles of rivers. Included in this system are the Seine, Rhone, Loire, and Garonne Rivers.

Extensive waterway improvements that have been executed and planned in Soviet Russia, for national defense and commercial traffic, include the recently completed Moscow-Volga Canal, which will connect Moscow with the Caspian Sea, and a completed waterway between the Baltic and White Seas in northern Russia. The contemplated waterway between the Volga and Don Rivers will provide inland navigation between Moscow and the Black Sea. Yet we permit these selfish interests to delay the construction of a project to connect the Ohio with the Great Lakes, which, together with the Tombigbee route, would give us a new through connection that could not be attacked from the sea.

In this country waterway improvements, exceeding those in Europe, have been designed primarily for the peacetime developments of a new country, but the time has arrived now when our programs for inland-waterway improvements should be expanded in the interests of national defense.

There are three great inland-waterway developments that ought to be provided for at once, and that can be constructed with a very small amount of the funds now being appropriated for national defense. They are:

First. The Tennessee-Tombigbee inland waterway connecting the Tennessee River with the Gulf of Mexico and the Atlantic Ocean down the Tombigbee River.

Second. The Ohio-Lake Erie waterway, connecting the Ohio River with the Great Lakes.

Third. The St. Lawrence inland waterway, giving us an outlet to the Atlantic Ocean down the St. Lawrence River of sufficient size and depth to carry oceangoing vessels.

Give us these and other similar developments throughout the country, and America can stand against the world. These three projects have already been approved by the Army engineers.

Who is standing in the way? Who is opposing these necessary developments? Those selfish interests that are owned and controlled by the great financial influences, that in turn are controlled by or interlocked with those international financial interests that do not want us to spend any money on the development of an internal-waterway system.

They want us to prepare, not for national defense, but for international defense, that we may defend their interests and operations abroad—even though it costs the lives of millions of our young men, bankrupts the Nation, and wrecks this Republic.

As the Army engineers have pointed out, the proposed canals from the Great Lakes to the Ohio River, and from the Tennessee River to the Gulf, are located in the interior of the country behind the natural defense line formed by the Appalachian Mountain range. In this region the Tennessee River is being improved to provide hydroelectric power, which can be used to manufacture war materials from the mineral resources of the Birmingham and the Great Lakes areas. Certainly no inland-waterway improvements that have been proposed can be so advantageous for National Defense as the Tennessee-Tombigbee and the Ohio River-Lake Erie canals.

Since the work would be spread over a period of anywhere from 7 to 10 years, the annual expense of constructing the Tennessee-Tombigbee inland waterway would be comparatively small. Besides, it would employ between 6,000 and 10,000 men, virtually absorbing the unemployment load in that area, and to a large extent diminishing the relief rolls and the expenditures through the W. P. A.

Then, too, we have the machinery necessary to do this work, now standing idle, and there is enough surplus electricity at Muscle Shoals and Pickwick Dam to supply the necessary energy. It can be constructed now at the very minimum of cost, and, as I have said, it would relieve the Government of enough burden in the reduction of relief rolls and W. P. A. employment in that area to make the cost almost negligible.

It would shorten the water distance from Paducah, Ky., and all points on the Ohio River above the mouth of the Tennessee—up to Pittsburgh, Pa.—to the Gulf of Mexico, by more than 200 miles; and to the Atlantic Ocean by about 500 miles. It would shorten the water distance from all points on the Mississippi River above Cairo to the Gulf by more than 100 miles, and to the Atlantic Ocean by more than 400 miles, and from our nitrate plant at Muscle Shoals to the Atlantic Ocean by about 1,000 miles.

It will also furnish a slack-water route for ascending traffic, practically all the way from Mobile to the Tennessee River, and then a downstream route from there to the mouth of the Ohio; which would be of inestimable benefit to the users of river traffic on all these streams, including the Mississippi, the Ohio, and the Tennessee, as well as the Tombigbee.

As I said, this whole program is being opposed by a few selfish interests. They seem to forget that our transportation system virtually broke down during the World War. They are willing to use their influence to block these great contributions to our national defense, for fear that they might give them a little competition in freight rates in the years to come.

Everyone admits that this Tennessee-Tombigbee project will be constructed sooner or later, and the sooner the better. It has already been surveyed and mapped and approved, and the Army engineers are ready to go to work on it. We have the machinery to do the work now standing idle, and we have the electricity right on the spot, you might say, to supply the necessary energy. As I have pointed out, it can be constructed now at the very minimum of cost and will relieve the Government of enough burden in the reduction of relief rolls and W. P. A. employment in that area to make the cost almost negligible.

It is one of the most important projects of internal development now before Congress and should be aprpoved at this session by all means.

SENATOR M'KELLAR'S FEARS UNFOUNDED

Senator McKELLAR, of Tennessee, has expressed the fears that this project would take enough water out of the Tennessee River to affect adversely the water level on the lower Tennessee. Those fears are entirely unfounded. The only water that would be taken from the Tennessee River at all would be just enough to operate the first lock which would not lower the water level on Pickwick Lake by one one-hundredth of an inch at any one time. Below the first lock, the Tombigbee has ample water to supply the channel and to operate all the locks.

But the benefits of this canal to the State of Tennessee would be tremendous. It will give a new outlet to her water traffic, which is now virtually bottled up, and would shorten the water distance to the Atlantic Ocean by about 1,000 miles. It would be the greatest thing that could happen at this time, so far as the State of Tennessee is concerned.

OHIO RIVER-LAKE ERIE WATERWAY AND ITS CONNECTION WITH A TENNESSEE RIVER-GULF OF MEXICO WATERWAY

The Army engineers have also pointed out that great as the estimated benefits are for a waterway connecting the Tennessee River with the Gulf, they are still greater when considered together with a waterway connecting the Ohio River with Lake Erie. The latter connection has been under consideration for many years and widespread interest in the proposal has led to investigations by the Corps of Engineers in 1881, 1896, 1898, 1911, 1921, 1923, 1925, 1934, 1936, and 1937. The Lake Erie-Ohio River waterway is an improvement of national importance which was partially and provisionally authorized by the River and Harbor Act of 1935, subject to final approval of the whole project by the Board of Engineers for Rivers and Harbors. The plans have been perfected, but due to major changes that have developed with respect to the economics of the project the Board of Engineers will probably again submit the matter to Congress. The plan contemplates a modern waterway extending from the Ohio River, about 25 miles below Pittsburgh, to Lake Erie near Ashtabula, Ohio. The 1930 population of the five counties adjacent to the route is given as about 670,000. There are 10 cities located on the planned route that have populations exceeding 10,000, of which Youngstown, Ohio, with nearly 200,000 inhabitants, New Castle, Pa., with 49,000, Warren, Ohio, with over 40,000, and Ashtabula, Ohio, with 23,000, are important manufacturing centers. The improvement would provide a direct waterway connection between ore producing and consuming areas, as well as a waterway distribution system for heavy manufactured goods between the Pittsburgh area on the Ohio River and the Detroit area on the Great Lakes. The Ohio-Lake Erie waterway and the Tennessee-Tombigbee-Gulf waterway are like bread and butter to each other. Each is highly desirable by itself, but together their individual benefits are enhanced and extended to a wider territory. Together they provide a second valuable all-water route from the Great Lakes region to the Gulf of Mexico, to supplement the existing waterway from Lake Michigan to the Gulf, from Chicago via the Illinois River and down the Mississippi by New Orleans.

In this country waterway improvements, exceeding those in Europe, have been designed primarily for the peacetime development of a new country, but the time has arrived now when our programs for inland waterway improvements should be expanded in the interests of national defense. The proposed canals from the Great Lakes to the Ohio River and from the Tennessee River to the Gulf are located in the interior of the country behind the natural defense line formed by the Appalachian Mountain range. In this region the Tennessee River is being improved to provide hydroelectric power, which can be used to manufacture war materials from the mineral resources of the Birmingham and the Great Lakes area. Certainly no inland-waterway improvements that have been proposed can be so advantageous for national defense as the Tennessee-Tombigbee and the Ohio River-Lake Erie canals—especially when developed in connection with the St. Lawrence inland waterway.

The Tennessee-Tombigbee inland waterway, which is now before the Senate, is of supreme importance from a standpoint of national defense for the reason that it would give us an additional outlet to the sea from Muscle Shoals, the source of our nitrate supply on which we must depend for our explosives in case of war. This route would not only be fully protected from attacks from the sea, or by planes released from airplane carriers, but it would facilitate the transportation of those explosives in case of emergency by shortening the water distance between Muscle Shoals and the Atlantic Ocean by approximately 1,000 miles.

We should begin construction on this project at once and not delay action as Norway did, until it can be of no avail.

Then, too, with this great inland waterway, this great addition to our transportation system, this great contribution to our national defense completed, our vast, menacing flood-control problem on the Tombigbee would be forever solved.

Reciprocal Trade Agreements Program

EXTENSION OF REMARKS

OF

HON. ALBERT GORE

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 23, 1940

QUESTIONS AND ANSWERS

Mr. GORE. Mr. Speaker, under leave to extend my remarks in the RECORD, I include certain current questions propounded to the State Department regarding American farm prosperity and the trade-agreements program, and the answers of the Department thereto:

CURRENT QUESTIONS AND ANSWERS ABOUT AMERICAN FARM PROSPERITY AND THE TRADE-ARGEEMENTS PROGRAM

Question 1. Are American farmers better off or worse off under the trade-agreements program than they were under the Hawley-Smoot tariff of 1930?

Answer. American farmers are better off under the trade-agreements program. Their cash income from marketing their products, the level of prices they receive for their total output, and the prices of the most important farm products were all higher in 1938 and 1939 under the trade-agreements program than under the Hawley-Smoot tariff in 1933, the last year before the Trade Agreements Act was passed. These increases are shown in the following table:

	1933	1938	1939
Farm cash income from marketings (millions of dollars)	5,278	7,599	7,711
Average farm price for all commodities, index (1909-14=100)	70	95	93
Average prices received by farmers for—			
Wheat (cents per bushel)	58.10	66.10	63.60
Corn (cents per bushel)	36.50	49.00	47.60
Beef cattle (dollars per 100 pounds)	3.75	6.56	7.03
Hogs (dollars per 100 pounds)	3.53	7.72	6.23
Butterfat (cents per pound)	18.80	26.30	23.90
Wool (cents per pound)	20.60	19.10	22.30
Cotton (cents per pound)	8.11	8.27	8.66
Tobacco (cents per pound)	11.60	17.20	13.60

Question 2. Why are export markets for his crops important to the American farmer?

Answer. American farmers can and do produce more of the principal crops grown in this country than can be absorbed by the American market at anything like profitable prices, and they must export these surpluses, which amount to substantial proportions of important crops—normally one-half or more of United States cotton, two-fifths of United States tobacco, one-sixth of United States wheat, one-third of United States hog products, etc. Unless these surpluses are exported they pile up on the domestic market, force down farm prices, and reduce farm income.

Question 3. How do trade agreements help to support and restore export markets for American farm products?

Answer. Trade agreements help to maintain and restore foreign markets for American farm products because, through these agreements, the United States obtains reductions and removals of foreign tariffs and other trade barriers which impede the export sales of our farm products. It is only common sense to recognize that trade tends to flow in larger volume when such barriers are reduced or removed.

Through the trade agreements this country has obtained foreign concessions on products which in 1937 (the last year for which detailed statistics are available) made up 47 percent of our total farm exports. These concessions directly improve the opportunities for foreign sales of American farm products.

Question 4. How do trade agreements affect the domestic market for American farm products?

Answer. Trade agreements help to give the American farmer a bigger and better domestic market for his products. Through these agreements the United States has obtained foreign concessions on industrial products which, in 1937, made up 25 percent of our total nonagricultural exports. Such concessions help to increase business activity and create employment among industrial workers in this country, thus increasing their power to buy American farm products in greater quantity and at prices more remunerative to American farmers. This is an indirect but important benefit to American farmers.

In the same way the concessions that the United States obtains on agricultural exports by increasing the incomes and the buying power of American farmers benefit, indirectly, American industries and the workers employed in them.

Question 5. Have farm exports actually increased under the trade-agreements program?

Answer. Yes. Trade agreements with 16 foreign countries were in effect throughout all, or practically all, of the fiscal year ended June 30, 1939. Only three agreements were in effect throughout the fiscal year ended June 30, 1936. The following table compares United States exports of farm products and of all products to the 16 agreement countries and to all other countries in the fiscal years specified:

	Years ended June 30—		Increase or decrease, fiscal year 1939 compared with fiscal year 1936	
	1936	1939		
	Millions of dollars	*Millions of dollars*	*Millions of dollars*	*Percent*
Exports of farm products:				
To 16 agreement countries	186	214	+28	+15
To all other countries	580	469	−111	−19
Exports of all products:				
To 16 agreement countries	805	1,099	+294	+37
To all other countries	1,570	1,786	+216	+14

The table shows that, in the period it covers, United States exports of all commodities to trade-agreement countries increased by more than twice the percentage of the increase that occurred in exports of all commodities to nonagreement countries. It shows that United States exports of farm products alone to trade-agreement countries increased 15 percent, while exports of farm products to all other countries declined 19 percent.

Question 6. Has the United States made wholesale reductions in its tariffs on farm products?

Answer. No. In the trade agreements in effect on January 1, 1940, the United States had granted reductions from existing tariff rates on products that comprised less than 15 percent of our total agricultural imports in 1937, and on articles that comprised 23 percent of our total nonagricultural imports in 1937. Existing tariff rates or duty-free entry had been "bound," that is, guaranteed against adverse change, on products and articles comprising 40 percent of our total agricultural, and 42 percent of our total nonagricultural, imports in 1937. Where necessary, tariff reductions on agricultural and other imports have been limited seasonally or by specified quotas too small to have any significant effect upon prices received by United States producers. The Trade Agreement Act prohibits reduction of existing tariff rates by more than 50 percent.

Question 7. Have imports of agricultural products "flooded the country" under the trade-agreements program?

Answer. No. In 1939, total United States imports of products listed as "agricultural" were valued at $1,118,000,000. Of these imports, $592,000,000 worth, or nearly 53 percent, consisted of agricultural raw materials mostly of types not grown at all in the United States—coffee, tea, crude rubber, raw silk, cacao and cacao beans, bananas, etc. The remainder consisted principally of commodities which are not ordinarily produced in this country in sufficient quantity to meet domestic requirements in spite of comparatively high rates of duty on most of them. A few specialties of foreign countries, and other goods imported because of special conditions, complete the list. Comparing 1933 with 1939, imports of products not grown at all in the United States, but consumed in large quantities by American farmers, increased by $225,000,000 or 61 percent, whereas imports to supplement domestic production increased only $161,000,000 or 44 percent.

Imposing Petition Submitted by Wellise K. Hui Urging Embargo Against Japan

EXTENSION OF REMARKS

OF

HON. LOUIS LUDLOW

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1940

Mr. LUDLOW. Mr. Speaker, I hope and pray that I may never yield to the temptation to engage in captious criticism, but I cannot refrain from expressing the opinion that we Americans are doing a perfectly atrocious thing when we furnish Japan lethal instruments of death and destruction and other war supplies that enable her to perform horrifying feats of strafing the civilian population, including innocent women and babies, in China. I read an interview not long ago with a responsible Chinese, printed in the Indianapolis Star, in which he said that if it were not for the supplies

which America sends to Japan in a steady flow, that barbarous power could not carry on its unconscionable atrocities in China.

This is not a political question. It is a great human question, touching the very heart of the humanities. Have we so far forgotten our Christian teachings that we are willing to make America the arsenal and storehouse to supply the instruments of mass murder of innocent women and children who have committed no offense and whose misfortune it is that they have been doomed by a cruel fate to be the pitiable victims of a ruthless invader?

Mr. Speaker, I have received a formidable petition from my home State, which indicates that the sentiment of sympathy and fairness toward the beleaguered and oppressed Chinese is not entirely dead and that many citizens share the feelings I have just expressed. Mr. Wellise K. Hui, of Indianapolis, an outstanding leader of the Chinese in our city and State, circulated the petition, to which 3,253 signatures are attached. The signers include many of the best people of Indiana and our adjoining State, Kentucky. I have introduced this petition in the House, and, because of the importance of the subject, I have asked for, and have secured, permission to print the text of the petition in the CONGRESSIONAL RECORD. It is as follows:

Whereas the United States of America and many other nations have indicted Japan as the violator of the Nine-Power Treaty and the Kellogg Pact in the present Sino-Japanese conflict, fomented by the Military Party of Japan, and have repeatedly protested against the bombings of undefended Chinese cities and the unnecessary slaughter of Chinese noncombatants; and

Whereas we feel put to shame that American raw materials are being used to manufacture weapons of war for Japan, American planes are being used to carry American-made bombs for the destruction of Chinese civilian population, American shells are loading Japanese guns, and America is supplying to Japan huge quantities of scrap iron, oil, trucks, and other materials used in the furtherance of the war, over and above the amounts of our normal trade of recent years; and

Whereas we sympathize with the Chinese people in their desire to build up an independent, democratic state, which is gravely threatened by the present aggression of Japan, and deplore the traffic which involves all of us, wittingly or unwittingly, in the wanton destruction of the innocent victims of Japanese aggression:

Therefore we, the undersigned, respectfully petition the President and the Congress of the United States to take every practicable means to bring to an end this traffic in war materials, whether direct or indirect, which is making our country a partner in the military conquest of the Chinese people.

Mr. Speaker, my sympathy with the viewpoint expressed in this petition is deep and sincere. Everybody knows that Japan has been engaged in a cruel warfare in China for a long time. Yet, because there has been no formal declaration of war, we do not choose to treat her as the wanton and savage belligerent that she really is. We should have levied an embargo on shipments to Japan long, long ago.

Governor Moore's Observations on Work Projects Administration

EXTENSION OF REMARKS

OF

HON. EDWARD J. HART

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 23, 1940

LETTER OF GOVERNOR OF NEW JERSEY TO CHAIRMAN OF THE HOUSE APPROPRIATIONS COMMITTEE

Mr. HART. Mr. Speaker, under leave to extend my remarks, I submit herewith the following letter from the Honorable A. Harry Moore, Governor of New Jersey, to the gentleman from Colorado, the Honorable EDWARD T. TAYLOR, chairman of the House Committee on Appropriations, relative to the pending appropriation bill for the Work Projects Administration. Governor Moore is a former United States Senator. As I have observed before in the RECORD, he is now serving his third term as Governor of the Garden State. He is the only man in all of its history to have been thus honored. He is recognized as one of the leading experts on State government and has had an unusual opportunity to appraise the needs, as well as the benefits, of the Work Projects Administration. The letter follows:

JERSEY CITY OFFICE, *April 17, 1940.*

HON. EDWARD T. TAYLOR,
Chairman, House Committee on Appropriations,
House Office Building, Washington, D. C.

DEAR CHAIRMAN: Last year I was called upon by the House Appropriations Committee to offer my suggestions regarding the Work Projects Administration. I stressed then the need for continuing this agency for the fiscal year, 1939–40. Now we draw near the time when provisions must be made for the next fiscal year, and I feel it my duty as Governor of the State of New Jersey to submit the result of my personal observations.

This is not so much an appeal as an array of facts, in support of an argument in favor of continuing the Federal appropriation to maintain the Work Projects Administration at its present level.

The facts here submitted are drawn from first-hand, inside knowledge of the workings of the W. P. A. from its beginnings in August 1935. From this first-hand knowledge I can testify that from the very outset the W. P. A. in my State has been not so much a charity as a work of necessity in keeping honest American citizens alive and in mental balance, by the simple act of giving them something to do in earning a living. From the same facts I can testify that if the Government does not maintain its contribution toward keeping these citizens sufficiently employed to give them a living, nothing can result but suffering to thousands of individuals and the whole social organization will be shot through with serious discontent.

I can testify out of my own knowledge of the people now employed by this agency that they are not on W. P. A. of their own choice, but because they have no choice between it and the hard and fast fact of starvation, or else reliance on State or local relief.

I can further testify that the vast majority of those employed on the W. P. A. have steadfastly done their utmost to obtain employment at their former occupations in private industry. A few of them succeed as times slowly improve and private enterprise finds places for them. But the great majority of W. P. A. workers have been disappointed in this endeavor. They continue to hope and to strive for their old occupations. But they have to wait for our great but retarded economic machine to get in motion again and reopen opportunities. Until this happens, nothing lies before them but W. P. A. or else physical starvation and mental despair. In the case of a single individual citizen, this is serious enough. When it happens to hundreds, to thousands, and tens of thousands, it becomes a matter of grave concern to the whole body politic. And this, please remember, is not a mere opinion; it is a statement of fact, based on observation, on personal acquaintance with hundreds of honest and able individuals once useful and respected, some of them even eminent, but now reduced to acceptance of an aid which they take, not because they want it but because it is a stride toward ultimate rehabilitation.

Let me cite a few instances of what will result if the appropriation is cut. The State of New Jersey finds seasonal employment for thousands of men and women, young and old, as pickers of fruit, cultivators of vegetables or other farm and garden crops, or in the restaurants and hotels of New Jersey's shore resorts. Many, if not most, of these people have been on the rolls of the W. P. A. They cheerfully relieve the W. P. A. of the burden of finding them employment the minute they see a chance for themselves in private enterprise, in the hope that such seasonal employment will lead to something permanent. I am sorry to have to testify that only too often the hope is in vain. A few do find the desired permanent employment, but the great majority have to come back for relief work as soon as their seasonal employment is finished.

Then, even with the Work Projects Administration financed as it is, they have a hard time and a long wait to get their old places back again. Their former assignments have been given to others among the needy. If the W. P. A. funds should be reduced, they wait and suffer that much longer. Thus, what they receive for having courage and enterprise is not a reward but a penalty. And these are but a single class among the thousands who depend on the W. P. A. to keep them alive.

May I also call your attention to another serious hardship resulting from a provision of the present act governing the W. P. A.? This is the enforced 30-day layoff for all who have been employed on it 18 months or more. From personal observation and positive acquaintance with many of the persons thus affected, I know that most of these use their mandatory furlough in seeking jobs in private enterprise. Again, a few people succeed but the rest have had their lives subjected to havoc. In many instances, not 30 but 60 and even 90 days elapse before they can be recertified and reassigned to W. P. A. jobs. Even when they are reinstated they face a period of hardship and anxiety in paying off loans incurred for food and the common necessities of life.

On one other material matter I offer practical suggestions for a change. The suggestion is that the contribution of sponsors to projects be reduced from the present rate of 25 percent, as now imposed by law, to 20 percent. The reason is that communities sponsoring work-relief projects are subject to a double burden. Besides the contributions toward projects for the material betterment of their localities, these contributions are piled on top of the burden of direct relief. Most of this direct relief is a

continuing burden, because it goes to the outright unemployables. These are to be found in every locality, in every Government enterprise. They are a fixed charge. Private enterprise has no use for them. The W. P. A. can provide them no places. This is said with no reproach to such people. Many of them are entitled to respect as well as sympathy. A widow with a number of children has no time to be seeking employment or to accept it if it comes. The community must care for her kind; but it cannot do this and be fairly taxed for so large a ratio as 25 percent on its contribution to general work relief.

The arguments here presented, practical as they are, would still be no more than an appeal for continued charity, if there was not evidence to offer which determines that the taxpayer's money expended in work relief has been returned to the taxpayer in the form of material benefits that he might never have had but for this agency. Again an instance or two must suffice to give evidence of an impressive array of practical accomplishments. One such instance is the fact that the W. P. A. in my State of New Jersey has built enough new roadway to cross the country, both east and west, and has constructed buildings enough for a fair-sized city.

And, more important than all construction accomplishments, New Jersey's W. P. A. health program is responsible for the immunization of thousands of children against such dangerous diseases as diphtheria and whooping cough. It has provided dental care and diet improvement for like numbers of undernourished children and invalids, while another project has prepared and served hundreds of hot school lunches daily—in many instances the only decent meal the children had during the particular day.

The record of accomplishment in the public interest might be long extended, but, however extended the catalog of W. P. A. achievements, the argument would remain the same: The good resulting to the country from the W. P. A. is well worth what it costs today; the money the country spends on its needy is really spent for its own salvation; and the good given and received might be greater still with a slightly greater outlay. It is one budget that is always in balance, no matter how large the figures.

Sincerely yours,

A. HARRY MOORE, *Governor.*

Dedication of Air Base at Westover Field, Chicopee, Mass.

EXTENSION OF REMARKS

OF

HON. CHARLES R. CLASON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 23, 1940

ADDRESS BY COL. JAMES VAN HORN

Mr. CLASON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following address delivered by Col. James Van Horn at Westover Field, Chicopee, Mass., on April 6, 1940:

General Yount, distinguished guests, ladies, and gentlemen, I wish you to know that the inability of Major General Woodruff to participate in these important ceremonies is to him a matter of sincere regret. His duties as commanding general of the First Corps Area, along with the many other demands on his time, will not permit of his attending some of the many functions where his presence is desired.

This 6th of April being Army Day, General Woodruff is particularly busy representing the Army at various formations given in its honor in and near the city of Boston. However, he has asked me to extend to you his greetings and to say that the progress made to date at Westover Field by Major McFadden and his assistants is most gratifying to him.

It is not difficult to realize at this time the importance of a northeast air base to the air defensive organization of the United States, and to its early completion. With this in mind, General Woodruff wishes me also to say that he is anxious to lend his support to that project in any way that the facilities at his command may be useful to those responsible for its accomplishment.

Although Westover Field is to form an important element in the air defense of the United States, its location here in western Massachusetts has special significance to all of New England.

As we know, an air base is designed and organized to control aircraft tactical operations over a prescribed area. Exactly what that organization is to be, here in New England, is, of course, a matter for the War Department to determine. However, we do know that Westover Field, located as it is, has some relation to New England's geographical center at Waterboro, Maine; its industrial center at Webster, Mass.; and its center of population near Natick, Mass.

But what we are mostly concerned with at this time is the construction of the field itself and the installation of the local communication facilities that will serve it.

Major McFadden, who is well acquainted to most of you, I am sure, is known to the Army as a constructing quartermaster, with an enviable record of outstanding accomplishments. He, with his able corps of assistants, already has the building construction project started, and well in hand.

Major Eliott, of the Signal Corps, will report here on May 1 to assume the duties of signal officer. He will take over the installation and operation of a strictly modern automatic telephone plant, radio range beacons, and fixed transmitting and receiving radio stations. He, too, has been especially selected for this work on account of his technical qualifications and experience. So Westover Field may be said to be well on its way.

It is with these latter activities that my office in Boston is primarily interested, and I cannot resist sketching them for you, at least in outline.

Not only must the field itself be provided with the most modern communication equipment, it must also be connected by the best of high-grade electrical devices to the higher-command echelons, as well as to the numerous local air fields, on which will be based the tactical units of the air force operating in this air-base area. These will be selected from the 106 public and private air fields already available in New England. Also, Westover Field will be in communication with numerous warning stations—some of them miles at sea, others along the land and coastal frontiers, and many, many more throughout all of New England. Then, too, there must be communications to the cities or communities most likely to need protection in order that they, too, may be warned of any impending attack from the air.

All of these lines of communication will be designed to provide almost instantaneous transmission of orders and information. Their transmission efficiency will be measured in seconds. Why? Because hostile bombardment aviation can now cover such a distance as that between Boston Harbor and Hartford in less than 20 minutes. Speed in meeting such a force before it reaches its objective is imperative.

From these facts alone it can be easily seen that an extensive network of communications is called for. To a large extent this is to be provided through the splendid commercial telephone and telegraph facilities normally serving the area.

This and related problems are intensely interesting from a technical standpoint. For material and practical reasons they are extremely important. When finally solved, the results should give us what we want, viz, protection.

Now, in a few words, let me answer the question, What is there in New England that calls for protection against a possible enemy attack from the air?

New England, with 2 percent of the land area of the United States, has a population which amounts to 7 percent of the one hundred and thirty some millions of people living in this country. In this comparatively small area it produces 9 percent in value of all goods manufactured in the United States.

There are some 20 manufactured items, of which New England's output is 20 percent or more of the total output for the entire United States. For example, 69 percent of the firearms, 62 percent of the wool and hair products, 62 percent of the cotton narrow goods, 56 percent of the boot and shoe findings, and 52 percent of the textile machinery are produced in New England.

New England employs 11.9 percent of the industrial workers of the United States. The density of its population per square mile is three and two-tenths times greater than in the rest of this country.

So it is that an adequate air defense for New England is fully justified.

The commanding general of this corps area welcomes Westover Field as a military installation of great value, affording, as it does, protection not alone to New England but to much of the Atlantic seaboard and many of our Eastern States.

To the citizens of New England, Westover Field will afford a feeling of protection that they, too, will welcome and fully deserve.

Peace and War Propaganda

EXTENSION OF REMARKS

OF

HON. HAMILTON FISH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 23, 1940

RADIO ADDRESS BY HON. HAMILTON FISH, OF NEW YORK, APRIL 18, 1940

Mr. FISH. Mr. Speaker, under leave granted me to extend my remarks in the RECORD, I include the following radio address delivered by me over the Mutual Broadcasting System on Thursday evening, April 18, 1940:

The invasion of Norway and Denmark by Nazi troops has given the green light to the war mongers and interventionists in America to

increase the tempo of their propaganda to involve us in the European war. The foreign propagandists have let loose a campaign of sound, fury, and atrocities that is preparing the way for another European blood bath for the youth of America as they did in 1917.

Will the mothers of America remain silent, permit our involvement in another foreign war, and let their sons be sacrificed to satisfy the vengeance and hatred of Hitler and Nazi Germany by the internationalists who insist that the Rhine is our first line of defense? Are dollars, commerce, and trade more valuable than human lives?

The American people should resolve to be steadfast and unmovable for the preservation of American neutrality and keeping America out of foreign entanglements and wars, no matter where their sentiments and sympathies may be. The sympathies of the American people are with England and France, just as they were in 1917, but they have determined not to have their sons plowed under on foreign battlefields in the eternal wars of Europe or Asia.

The boundaries of America are not on the Rhine, as the interventionists would have us believe, and our people do not want another rendezvous with death in the bloody shambles of war-torn Europe.

The old slogan of making the world safe for democracy, and the new one that our entrance into the war is inevitable in self-interest or self-defense, is resounding throughout the Nation, over the radio, impregnating the eastern press, and making a Roman holiday for the columnists, many of whom are outspoken internationalists and interventionists.

Americans in public life who dare to speak out for maintaining American neutrality and keeping out of war are viciously and maliciously attacked. No matter how sincere their motives are or how consistent their record, they are maligned and deliberately smeared, and their views distorted and misrepresented by warmongering columnists and cartoonists and denounced as being pro-Nazis or stooges for Hitler, Von Ribbentrop, or Goebbels.

Just how far these war-mongering propagandists will go is illustrated by a recent cartoon in the New York Post, to which I sent the following protest to the editor:

"My attention has just been called to a cartoon published in the Post a few days ago by Roland Kirby, entitled 'Sublime Faith,' in which he quotes an utterly misleading half sentence from a statement of mine: 'I cannot conceive that the German foreign office should fabricate or forge documents.' He omitted the balance of the sentence—'as it is certainly in the interest of the German Government to maintain peaceful relations with us.'

"This is typical of the half-truths and distortions of the facts that are being used in these days of war hysteria to inflame the passions and hatreds of the American people, and to get us into war.

"I would appreciate it if you would publish this letter in full, as I consider the cartoon to be a gross distortion of my statement and libelous."

Up to the present time I have not had the courtesy of an answer, an apology or a correction of its distortion of facts by this interventionist propaganda newspaper.

This is a deadly parallel with the foreign propaganda successfully used in 1917 to drag us into the World War. The Belgium atrocity stories, which we all believed in during the World War and passed on with their shocking details about the cutting off of young boys' wrists and women's breasts, all of which have been investigated and proven false, have their counterparts in Polish atrocity stories. Yesterday a Washington newspaper printed an article detailing the burying alive of a Polish Catholic priest, which is indicative of what is to follow.

My own Americanism has been impunged by a half dozen radio and press commentators, because I met Von Ribbentrop last summer and flew in his plane. Germany was not at war last summer, and is not at war with us today in spite of wishful thinking of the interventionists in America. Chamberlain, Daladier, and Sumner Welles all met Von Ribbentrop and either flew in his plane or rode in his private car.

It is true that I spoke with Von Ribbentrop, as I had previously with Lord Halifax, the British Foreign Minister, and with Mr. Bonnet, the French Foreign Minister. I had an hour's interview with Von Ribbentrop at his home near Salzburg the middle of last August, but could not get him to even discuss the peace issue or to suggest any peaceful solution of the onrushing European war. He never mentioned, nor did I ever discuss with him the 30-day moratorium proposal and the substitution of the principles of arbitration, mediation, and peaceful settlement of international disputes which I offered as a delegate to the Interparliamentary Union Conference held at Oslo, Norway, from August 15 to 20.

It is tragic now, looking back, to realize that the only effective voice raised against my proposal was by Mr. Hambro, the Speaker of the Norwegian Parliament, who has been driven out of Norway into Sweden by the German invasion.

If my resolution had been adopted, as it should have been, Norway and Denmark would not have been invaded and Poland and Finland would not have been crucified. The smaller nations are often the worst afflicted, like Belgium in 1914, when the big nations fall out and go to war.

I anticipate an active campaign from now on to undermine and destroy the Johnson Act, so that we may have the privilege of financing Europe's new war as we did the last. The only thanks we received for our huge loans to our former allies was to be called Uncle Shylock and to have all the nations repudiate these war loans except little honest Finland.

I predict increasing propaganda to repeal or circumvent the Johnson Act in order to make new loans to the Allies, which will destroy American neutrality and eventually involve us in war.

Instead of weakening the Johnson Act, the Congress should stop the loopholes whereby loans and credits may be extended to foreign nations by our governmental agencies.

The Congress will adjourn within 60 days. President Roosevelt will then be in the saddle and in complete control of our foreign relations and policies until the convening of the new Congress next January. It is the duty of the Congress before adjourning to take every proper precaution to prevent our involvement in war in accordance with the will of the American people.

Congress alone may declare war under the provisions of the Constitution. Unfortunately it has already surrendered vast emergency powers to the President and should take back such powers and restore representative government in the United States before adjournment.

I propose to offer at the first opportunity an amendment or resolution providing that all powers not conferred upon the Chief Executive by the Constitution of the United States are hereby repealed.

Knowing that President Roosevelt has always been an internationalist and an advocate of the League of Nations and of quarantining foreign nations, I confess I have no faith in his interventionist policies or his sincerity for American neutrality.

I am fearful that unless Congress regains these emergency powers we will be secretly committed to a war policy before Congress reconvenes.

I urge the radio listeners to write their Representatives in Congress to restore these dangerous emergency powers to the Congress and to sign petition No. 24 to bring up House Joint Resolution 408, providing for a national referendum before conscription of American citizens for service in foreign wars outside of the American continent and our possessions.

In order to try to prevent the involvement of America in the European war over Greenland, I have today filed the following bill in the House of Representatives (H. R. 9443):

"Be it enacted, etc., That the President of the United States is authorized and requested to enter into negotiations, in such manner as he may deem appropriate, with the Government of his Majesty, the King of Denmark and Iceland, for the purchase and acquisition of Greenland by the United States."

The invasion of Denmark by the German armed forces has raised a question over the sovereignty of Greenland, that huge island almost one-third the size of the United States and only 900 miles from our northern border in Maine. Greenland is 6 hours' flying time from New York, and would be a valuable base for airplanes, submarines, and for naval operations. In addition, it may have enormous mineral resources if adequately developed.

For over a hundred years little Denmark has done practically nothing with her vast colony. It is still undeveloped and its population is less than 20,000.

I do not believe in any policy of imperialism or territorial expansion by threats or force. In the case of Greenland we might well offer to pay Denmark a substantial sum of money to acquire it, as we did the Virgin Islands.

Iceland, another Danish possession, presents a different problem for us, as it is much nearer to Europe than to the United States. I am not in favor of extending American influence into European areas or establishing naval bases in those waters any more than I want European nations to encroach on American spheres of influence.

It should be the definite policy of the United States to acquire by purchase or as offsets to foreign debts owed to us all islands or other possessions of European nations, excepting Canada, within 1,000 miles of our coast. It should also be the policy of the United States to oppose the transfer or further acquisition of any islands or possessions within the American sphere of influence by any European or Asiatic power.

We could probably purchase Greenland for the price of half a modern battleship, or for $40,000,000 or less. I am no imperialist and do not favor extending our possessions either into the Far East, Europe, or Africa, but only in our own hemisphere.

I voted for the independence of the Philippines and want to get out of there at the earliest possible moment. The Philippines are 6,000 miles from our coast and are the Achilles' heel of the United States; the sooner we relinquish these possessions the better it will be for us.

I am likewise in favor of giving up voluntarily our extraterritorial rights in China and withdrawing our troops and river gunboats from a nation with which we are at peace.

Most of the American people, irrespective of party affiliations, do not want Germany to acquire Greenland, nor would they like to have Great Britain add to her already vast possessions within the American continent. We would prefer to enter into some equitable agreement to take over Bermuda and the West Indies and her other possessions in the Western Hemisphere.

The message of our distinguished Secretary of State warning the Japanese Government to keep its hands off the Dutch East Indies raises a serious issue of foreign policy. Does this mean that we are extending the American Monroe Doctrine 10,000 miles to cover the Dutch East Indies and the status quo in the Far East?

God forbid that Holland will be invaded by Germany or the Dutch East Indies by Japan. But assuming the worst, are we to back up Secretary Hull's extension of the Monroe Doctrine to the Far East with American blood and treasure?

If this new policy, a complete departure from American traditions, is to be made effective in quarantining foreign nations, why apply it only to the Dutch East Indies and not to Holland itself? This would be the logical procedure.

I have not had time to analyze Secretary Hull's note, but granting its idealistic motives, it will involve us in maintaining the status quo in the Far East and may force us into both European and Asiatic wars.

It is beginning to be more and more apparent that our huge naval appropriations are not for purposes of defense but for offense in order to carry out President Roosevelt's policy of policing and quarantining the entire world at the expense of our taxpayers and the lives of American citizens. I am in favor of the biggest navy necessary for the defense of the United States and the Monroe Doctrine, but not a dollar for aggression.

The American people and the Congress ought to have a voice in the extension of the Monroe Doctrine to Asia. I shall never vote in Congress to dig the grave of a single American soldier or sailor in Europe or Asia unless American rights have been violated or unless we are attacked by some foreign foe.

W. P. A. Employment

EXTENSION OF REMARKS
OF
HON. FRANK E. HOOK
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 23, 1940

LETTER FROM JAMES A. MYERS, OF CALUMET, MICH.

Mr. HOOK. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following letter from Mr. James A. Myers, of Calumet, Mich.:

CALUMET, MICH., *April 16, 1940.*

Hon. FRANK E. HOOK,
Twelfth District of Michigan, Washington, D. C.

MY DEAR CONGRESSMAN: I see by the papers where they are laying off men on the W. P. A. In my opinion, instead of laying off men they should add a million more men to take care of this acute situation in the unemployment crisis in our country. They are laying men off here in Houghton County every day that are on the W. P. A., and men who have been certified to go on W. P. A. are not able to get on because of there being no place for them.

Now, FRANK, I was on the W. P. A. and relief for 6½ years before the people elected me to this job of mine inspector; I know that even with a W. P. A. job it is just one door from starvation, and with relief it is slow starvation. I have been over to see some of these families who were former W. P. A. workers and now on relief and know that they are very hard up. They are going hungry and are without sufficient clothing to keep them warm, and to go into these homes and see babies and children starving is a pity. Now, nobody could go into these homes and see these children without feeling sorry for them and wanting to help them, unless they had a heart of stone. I want to do everything in my power to try to help you to make your fellow Congressmen see the light.

Is there a feeling among any important group in Congress that those people should be left to starve? Or are Congressmen and Senators ignorant of the fact that when those men are turned off the W. P. A. they actually face starvation? I myself would call this mass murder by starvation.

While I was on relief I lost a little 19-month-old girl because she did not get sufficient food because I was unable to give it to her. There was no work in private employment for me, and private employment would not hire a man of my age.

We have the richest country in the world and can raise all the food and clothing that our people could use and then have a surplus over to sell to the foreign nations.

We talk about the cruelties of the foreign nations that are practically starving their people, but, now, FRANK, if we were to come to let this pass and not take care of the unemployed men and women in this country we have no excuse outside of the greed of some people here in America.

I think that all the God that these people have is the sign on the dollar, "In God we trust," and how many dollars they can pile up in the banks, which is of no more use to them than the sand on our lake shores, and of no use to our American people unless it is put to work.

FRANK, my father answered the call of the great emancipator, Abraham Lincoln, at the age of 17. This will show you that I came from an American family and was raised as an American boy, believing in American principles, believing in our Government, believing that we are still the greatest nation on earth, and that some of the people have to wake up and make our people understand that this is the greatest nation and that we all have the same right whether we have a ragged shirt on our back or a big bank account.

I take great pleasure in listening to Kate Smith when she sings God Bless America.

We have a Statue of Liberty in our New York Harbor that one time beckoned to the foreign people of the blessings of America. Why not have our Government make it mean to the unemployed that they still have a great Government and that this Government is going to see that they are fed and clothed in a decent American standard, and that nobody is going to be left to starve and go hungry.

Don't you think that the poor workingman should feel that he should be as secure in this great Nation of ours as a man with a pack of money is? Some business is trying to help this crisis out by putting men to work and other business that maybe could hire and put men to work refuses to do so. The only thing that can be done is for the Government to take care of the slack on this unemployment which the big business cannot or will not do.

The very scarcity of employment in Houghton County makes the relief situation in Houghton County very acute. Michigan State wishes to throw the relief on to the counties, and most of these counties are poor and unable to handle it. The State of Michigan claims that they are not able to handle it either, so the only hope for the people here is that the Government of the United States take care of this.

No decent American citizen would want to be on W. P. A. if it was possible to get private employment, and no workingman or businessman wants this W. P. A. to continue any longer than is absolutely necessary. That it wants to continue unless the business in this country will furnish employment in this country. Frank, the Congress must see that the American people have work of some kind.

Yours respectfully,

JAMES A. MYERS,
Mine Inspector of Houghton County.

Russia From the American Embassy

EXTENSION OF REMARKS
OF
HON. J. THORKELSON
OF MONTANA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 23, 1940

EXCERPTS FROM BOOK BY DAVID R. FRANCIS

Mr. THORKELSON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following excerpts from a book written by a United States Ambassador to Russia under the Czar, David R. Francis:

RUSSIA FROM THE AMERICAN EMBASSY

(By David R. Francis, United States Ambassador to Russia under the Czar, the provisional government, and the Bolshevists. Commission as Ambassador to Russia March 9, 1916; no salary since April 26, 1919; resignation March 3, 1921; died in 1927)

Bolshevism began to show itself 18 months before my departure from Russia. I saw its spasmodic manifestations through the summer of 1917, its usurpation of power in the autumn of that year. I was in the midst of Lenin's experiment in government for more than a year. I have seen this monstrosity run its course, to become the world-wide danger which my observation at close hand had convinced me it would become. (Introduction vi.)

These (my) conclusions are that bolshevism, if it dominates the world, will lead us back to barbarism. (Introduction ix.)

(March 19, 1917, cable to Secretary of State.) "I request respectfully that you promptly give me authority to recognize the provisional government, as the first recognition is desirable from every viewpoint. This revolution is the practical realization of that principle of government which we have championed and advocated—I mean government by consent of the governed" (91).

(April 17, 1917, dispatch to Secretary of State.) "It has been my effort, and in such effort there has been no cessation, to impress upon all the importance of a vigorous prosecution of the war and to subordinate thereto all questions as to the rights of races or the recognition of classes.

"The Jews have undoubtedly been subjected to many injustices and unjust restrictions in Russia, and all fair-minded people are pleased that most, if not all, of such restrictions have been removed. The prejudice against the race, however, has by no means been eradicated; it pervades the peasants to a wonderful extent, and that prejudice will be fanned into flame by opponents of the present regime if any reason therefore is given or can be charged with any appearance of truth" (99).

I asked Kerensky if Lenin and Trotzky were not both Jews. Trotzky I knew was, and I had heard that Lenin's mother was of Jewish descent. Kerensky promptly replied that he went to school with Lenin and that Lenin was of pure Russian blood. He said his first recollection of political life was of being in Lenin's father's house at the age of 6 when the house was searched for Lenin's elder brother, who had made an attempt upon the life of Alexander III. The brother was afterward arrested and shot (104).

Letter of May 1, 1917, to son Perry: "An ultra-Socialist named Lenin has been doing a great deal of foolish talking and has advised his hearers to kill all people who have property and refuse

to divide. We are living somewhat in suspense. Lenin's followers are an unknown quantity" (106).

In a letter to my son David (May 4, 1917), written the same day, I said in commenting on the same events that when the ministry asserted itself it found, to their gratification if not surprise, that the overwhelming sentiment of the people of Petrograd was in favor of the new government and against the anarchistic doctrines which had been preached from every street corner by an extreme Socialist named Lenin and his followers. I am inclined to the opinion that Lenin is in the pay of the German Government, and this government thinks so, too.

This opinion formed in the early spring of 1917, when Lenin was a mere agitator who had come to Russia from Switzerland, traveling through Germany, I have held ever since, and hold today (112–113).

I then suspected, and now feel confident, that all this disastrous disintegration of Russian society was largely accomplished by Lenin and Trotzky and a host of similar agitators, liberally provided with German money. They worked, insofar as they could, through that potential but irresponsible branch of the government, the Council of Workmen's and Soldiers' Deputies, over which body they finally secured control (114).

Both (Lenin and Trotzky) believed in "direct action"; that is, they scrupled at no means by which their ends could be accomplished. In other words, they believed in force rather than argument. Plekahnov, at whose feet Lenin had imbibed the principles of socialism, also returned to Russia after the first revolution; he had championed socialism and internationalism but believed in putting them into practical operation by peaceful means, contending that if the people were educated in the principles of socialism, they would all become its supporters. Lenin claimed that the education of the masses in Russia was too slow a process (134).

Lenin was living in Switzerland when I arrived in Petrograd, but when the provisional government, soon after its installation, issued a decree pardoning all political offenders, whether in prison or in exile, he returned through Germany in a special car and immediately set to work to demoralize the Russian Army (135).

Trotzky, who had been banished from France, was eking out an impecunious existence on the East Side in New York by contributing articles to radical socialistic publications. When he attempted to return to Russia the steamer upon which he sailed touched Halifax, and Trotzky was taken ashore by force after refusing to obey the commands of the inspection officer and detained in Halifax for several weeks. He was later, at the request of the provisional government, permitted by the British Government to proceed on his way to Russia (135).

Tuesday evening (July 17, 1917), about 7:30, I received a telephone call from Frederick Holbrook, of Holbrook, Cabot & Rollins, of Boston, saying that there was going to be trouble in the city and that he was coming to the Embassy. About the time he arrived the trouble began all over the city. The fighting nearest the Embassy took place about 300 yards away on the Liteiny Prospect, when a cavalcade of Cossacks riding toward Liteiny Bridge across the Neva River, four blocks from the Embassy, with the intention of controlling the bridge and preventing communication between the different organized bands of provocateurs and agitators met with resistance. When they rushed the crowd with their horses, however, the mob broke and ran in all directions. But a new and unlooked-for factor now showed itself. An automobile truck loaded with Kronstadt sailors appeared on the scene with a machine gun on the rear, which they turned upon the Cossacks and opened fire. They poured a deadly and disastrous fire into the ranks of the Cossacks. They were mowed down without any chance to defend themselves (137).

While the July revolution showed the Bolsheviks that their time had not quite come, it showed the Government that while they were not helpless yet they still were being surely undermined; and it showed the Allied diplomats that unless conditions changed and changed radically Russia would soon be out of the war, with all of the uncertainties and dangers which that would mean, not alone for Russia but for the world.

Lenin is believed to have fled to Kronstadt disguised as a sailor. Trotzky was arrested the following day, but was soon freed upon demand of the Soviet. Soon after this temporary inconvenience he was allowed to proceed with his work of undermining the democratic government without hindrance of any kind (138).

Had the provisional government at this time arraigned Lenin and Trotzky and the other Bolshevik leaders, tried them for treason, and executed them, Russia probably would not have been compelled to go through another revolution, would have been spared the reign of terror and the loss from famine and murder of millions of her sons and daughters (141).

I am convinced in the light of subsequent events that whatever the immediate result, the consequences of executing Lenin and Trotzky would have been of benefit to Russia in the long run, and would have produced less unrest than now prevails throughout the world (141).

Furthermore, I doubt whether two more as strong characters as Lenin and Trotzky could have been found among the Bolsheviks of the entire world (142).

The Bolsheviks are now (August 17, 1917) in great disfavor, and their leaders are being arrested—one, Trotzky, who was arrested yesterday; he was an exiled Russian Jew, who returned from America 2 or 3 months ago and immediately set his mouth going, since which it has never ceased to operate. If we could keep such men in America, they could be handled much better than they can be in Russia at the present time (144).

Had Lvoff been a wise and strong man, instead of a meddlesome rattlebrain that he was, and had Kerensky been big enough to place his country's welfare above his own pride and seek some middle ground upon which he and Korniloff might have worked against the Bolsheviks—their common enemies—they might between them have rescued Russia and the world from the curse of bolshevism, and have given the constituent assembly, the time for convening of which had already been fixed, a chance to establish a government based upon the consent of the governed, instead of upon force, as was the Czar's government, and as is that of Lenin and Trotzky (157).

(Referring to John Reed's activity with the Bolsheviks in Russia.) Thus at this time (October 1, 1917) were the American Bolsheviks coming to the aid of Russian Bolsheviks in their efforts to overthrow the democratic government of Russia just as now the Russian Bolsheviks are coming to the aid of American Bolsheviks in their efforts to overthrow our democratic Government (169).

At 2:10 a. m., November 8, the palace was surrendered. The ministers were captured and compelled to walk, under guard and subject to many indignities, to the fortress 2 miles distant, where they were imprisoned. The four Socialist ministers were subsequently released, but kept under surveillance. The other ministers were said to be well treated, but their friends and relatives were in constant fear that they would be killed, which seemed to me not improbable. According to one report the ministers were stood up in line to be shot when the commander of the prison intervened (181).

Mme. Terestchenko, the mother of the young Foreign Minister, called upon me at the Embassy a few days after her son's arrest. She was obviously in deep distress of mind and told me that her son's guards, as indeed those of all the former ministers, were being changed from soldier cyclists to Kronstadt sailors by order of young Rothschild, the President of the so-called Kronstadt Republic. These Kronstadt sailors had threatened to kill all the former ministers (182).

Immediately after the Czar's abdication on March 15, 1917, the provisional government had issued its address to the "citizens" of Russia. It declared the policy to be based on principles, one of which was as follows:

"To proceed forthwith to the preparation and convocation of a constituent assembly based on universal suffrage, which will establish a stable governmental regime" (196).

When the provisional government was reorganized in May, 2 months after the first organization, six Socialists were given places in the cabinet, Price Lvoff remaining as Prime Minister. Again the provisional government issued an address promising an early assemblage of the constituent assembly:

"Leaving it to the constituent assembly to decide the question of transfer of land to the toilers and making the requisite preparation for this, the provisional government will take all necessary measures to secure the greatest production of grain, in order to satisfy the needs of the country and to regulate utilization of land in the interests of the country's economic welfare and the needs of the toiling masses. The work of introducing and strengthening the democratic organizations of self-government will be continued with all possible assistance and speed. The provisional government will in like manner make every effort to convoke the constituent assembly in Petrograd as soon as possible."

These expressions of the purposes of the provisional government and of the Soviet in the spring of 1917 seemed to justify a general feeling of hopefulness that Russia was about to create an established government of the people, but it was not until November 25 that the elections to the constituent assembly were held, and it was not until January 18 that the constituent assembly convened. In that long delay to fulfill the early promises and expectations, Russia's opportunity for a stable government by consent of the governed was lost (199–200).

The constituent assembly had been called to meet on the 12th of December (1917). Pending the plans of the Bolsheviks to overcome the majority, the meeting of the assembly was postponed until January 18, 1918. The scheme of new elections failing, the Bolshevik leaders, through their newspaper organ demanded that the Constitutional Democrats who had been elected to the assembly be arrested and brought to trial before the revolutionary tribunals. The Council of People's Commissars by a decree announced that this would be done (202).

There were stationed in and about the hall during the session sailors and Lettish soldiers armed with rifles and grenades and machine guns. Very soon after the opening of the session the Bolshevist delegates presented an ultimatum to the constituent assembly. Among other things they demanded the adoption of this decree:

"Supporting the Soviet rule and accepting the orders of the Council of People's Commissars the constituent assembly acknowledges its duty to outline a form for the reorganization of society."

The constituent assembly refused to adopt this, whereupon the Bolshevik delegates withdrew. The meeting of the assembly was attended by many disorders and much street fighting. There was violent but scattered opposition to the Bolshevik program (203).

At 1:30 a. m., January 19, 1918, following the first day's session of the constituent assembly, the Central Executive Committee of the Council of Workmen's, Soldiers', and Peasants' Deputies issued the decree referred to by Lenin disbanding the constituent assembly.

"Therefore, the Central Executive Committee resolved the constituent assembly is disbanded" (205).

On the morning of the 19th of January guards were stationed at the entrance of the palace to prevent the entrance of the deputies or delegates, and that was the end. The constituent assembly, forecasted with such promise and hope just 10 months previously, never met again. Bolshevism, although in the minority and representing only one-fourth of the votes cast for deputies, was in power by force (206).

"I have just (January 1918) been called to the phone and heard that Smolny Institute, Bolshevik headquarters, has formally announced that a revolution similar to that in Russia has begun in Germany. The Bolshevik leaders here, most of whom are Jews and 90 percent of whom are returned exiles, care little for Russia or any other country but are internationalists and they are trying to start a world-wide social revolution. If such a revolution can get a foothold in Germany, where the people are obsequious to those above them, and domineering and tyrannical to those beneath them and where organization and system has obtained such a foothold as it never had in history before, I begin to fear for the institutions not only of England but of the Republic of France, and the thought arises in my mind whether our own institutions are safe" (214).

Had it not been for the demoralization of the Russian Army by the Bolsheviks, hundreds of thousands of lives of French and British and American soldiers would have been spared. Lenin and Trotzky demoralized the Russian Army and thereby caused the war to be prolonged (225).

While I have no doubt that Lenin was a German agent from the beginning and disbursed German money, I believe, and so wired the Department, that his real purpose was promotion of world-wide social revolution. He would have taken British money, American money, and French money and used it to promote his purpose (226).

From Brest-Litovsk, on the 5th of February 1918, Karl Radek sent a long statement of the purposes of the Bolshevik delegation in the negotiations for peace with Germany, concluding, "We want to transform the war of nations into a civil war" (227).

In December 1917 the Bolsheviks in a series of decrees began to develop their strange financial policies. These decrees declared the banking business to be a "monopoly of the government," instructed all proprietors of safes in safe-deposit institutions to present themselves immediately with their keys "in order to be present at the revision of the safes," otherwise all property contained therein would be confiscated and become the property of the nation (297).

There were nine other decrees: Nationalization of land, of factories and works, of banks (including the opening of all safe-deposit boxes), the suspension of payment of all coupon bonds, taxation amounting to confiscation of buildings, whether or not belonging to foreigners, annulment of all loans, confiscation of shares of stock in former private banks, and nationalization or confiscation of every ship belonging to private individuals or corporations (297).

On the 2d of May 1918, I cabled the State Department that the time had come for the Allies to intervene in Russia, and gave my reasons in detail (298):

"Lenin is the ablest intellect in the Bolshevik Party and tyrannizes the situation. In every speech he calls the Brest-Litovsk peace only a breathing spell and predicts success of world-wide social revolution, exulting over the exhaustion of what he calls capitalistic-imperialistic governments by their bloody struggle" (301).

(December 23, 1918.) King George, who was escorting Mrs. Wilson out of the reception room, when he met me, said: "Mr. Ambassador, what do you think we ought to do about Russia?" I replied I thought the Allies should overturn the Bolshevik government. The King rejoined by telling me he thought so, too, but President Wilson differed from us (307).

(February 1919) (radio from George Washington to Secretary Lansing, General Bliss, Colonel House, and Henry White.)

"* * * Furthermore, bolshevism prevailing in Russia would extend its baneful influence to other countries and become a more potential menace than it is now, not only to organized governments but to society itself. Bolshevik doctrines destroy family relations; and if they predominate, they will mean return to barbarism" (311–312).

In accordance with Acting Secretary Polk's request, on January 22 I sent to the American Peace Commission at Paris this statement:

"Neither we nor any of the Allied governments nor any neutral have recognized (with possible exception of Persia) the Tchecherin message from Soviet Government, which message is absolutely false in its claim that it represented Russian people. In spite of the importunities of Robins and some other Americans, I refused to recommend recognition. I always maintained, as shown by the records, that world-wide social revolution was the object of the Soviet Government, and also, as subsequent developments proved, their efforts were entirely directed to that end" (314–315).

* * * * * * *

"I recommended weeks before leaving Archangel armed intervention for restoration of order, knowing that the same would involve extinction of bolshevism, which I considered not only irreparably injurious to Russia but a disgrace to civilization and a reflection on Allies. I consider bolshevism as practiced in Russia means a return of the race to barbarism if it should prevail throughout society" (318).

Mr. DeWitt C. Poole, Jr., who had been left in charge of the American Embassy at Archangel, wrote me:

"The problem is gravely complicated by the utter bad faith of the Bolsheviks. Even were it possible to disregard the virtual alliance which existed between the Imperial German Government and the Government at Moscow after conclusion of the treaties supplementary to that of Brest-Litovsk (which differed from the latter in that they were actively sought after rather than accepted under constraint) or the nauseous and destructive butchery of the terrorism and other evils—even if it were possible to overlook all these—it would still be impracticable to renew de facto relations with the Moscow Government because of the impediment of complete and proven bad faith on their part. The President found this an insuperable obstacle to peace negotiations with the German Government. The futility of Bolshevik engagements is due, not only to the dishonesty of their leaders, but to the natural disorderliness of a loose-knit government, many of whose most active members are anarchists by temperament. At the caprice of Trotzky and the Commissariat of War or the extraordinary commission against counter-revolution or of any other strong personality of the moment, the most democratic decision or engagement of the Commissariat of Foreign Affairs may be altered.

"The Czechoslovak matter has given Department evidence of Bolshevik bad faith. Unfortunately my files on this were burned.

"It is of interest to note following representative statements regarding Tchicherin's proposal. These are taken at random from The Fall Is Near of Lloyd George and Wilson, a piece of Bolshevik propaganda prepared for distribution among our troops here:

" 'Pitiless conditions which are more cruel than those of Brest-Litovsk and which are more threatening to the world's peace have been imposed by the Allies on the enemy which they have vanquished.'

" 'The League of Nations which Wilson proposes is a fake' " (319–320).

Little did the general staff of the Imperial Government (Germany) think when the fatal dose was handed to Russia that the poisoned chalice would be commended to her own lips within 12 months (332).

The Bolshevik theory strikes at the home as Americans understand it. The decrees of bolshevism made marriage and divorce so easy that they were to be had for the asking. Simply a verbal announcement to an irresponsible citizen legalized both marriage and divorce under the Lenin and Trotzky regime (333–334).

After I returned to the United States, still being Ambassador to Russia but on the inactive list, I was asked repeatedly as to the reports of the Bolshevik theories on personal or domestic relations. I replied it was true that in some part or parts of Russia local authorities had issued decrees nationalizing women. I saw nothing of the application from my own observation. I only know of such decree or decrees from having seen them in official publications of the Bolshevik Government (334).

I would call attention to the effect of bolshevism already seen on the uneducated of every European country. All of the unrest throughout Europe and in this country and in every country on the Western Hemisphere can be traced back to this Bolshevik experiment in Russia (334).

From the first I contended that bolshevism did not have followers in Russia exceeding 20 percent of the Russian people, and that following has been diminishing until it is now less than 5 percent (338).

I think it would be a grievous mistake for any government and a stultifying crime for our Government to enter into trade relations with the Bolshevik Government of Russia (340).

We owe it to ourselves, if we would preserve our institutions, to eradicate this foul monster—bolshevism—branch, trunk, and root. We owe it to society. We owe it to humanity. If we would save society from barbarism and humanity from slaughter (349).

Ambassador Francis favored the League of Nations, but that is no more than could be expected, for he evidently was not familiar with the background of this organization. Had he known that the League of Nations was purely an international scheme of world domination, I am sure that he would not have given this international government the slightest consideration.

I have asked to insert these remarks because they are pertinent at this time, coming from one of our own Ambassadors, David R. Francis.

EXTENSION OF REMARKS

OF

HON. ROBERT RAMSPECK

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 23, 1940

ARTICLE BY RALPH McGILL

Mr. RAMSPECK. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article by

Ralph McGill which appeared in the Atlanta Constitution for April 18, 1940:

[From the Atlanta Constitution of April 18, 1940]

ONE WORD MORE

(By Ralph McGill)

CHIP OFF MY SHOULDER

Tom Stokes, who is one of the Nation's great reporters, is to spend 2 days in Atlanta, his old home town, tomorrow and Saturday.

He comes to speak Friday evening at Emory University, the public being invited to the meeting at a nominal cost; and he comes also to autograph copies of his book at specified book shops.

The book is Chip Off My Shoulder. It is the accounting of the coming of age of Tom Stokes. It is not a book about the South, and yet it is a book about a southerner. In the last chapter of the book he came back to look at the South, which he loves. He did not like many things which he saw. He says so.

When he went to Washington to become a reporter for the United Press he went with a chip on his shoulder. He resented any criticism of the South. Also he found himself possessed of an attitude. He had a perpetual chip on his shoulder.

The chip came off. It was not knocked off. It came off slowly, as if done by extremely slow-motion movies. But it did come off. And stayed off.

He had lived in Atlanta's West End. He had played with Uncle Remus' grandchildren. He knew about fried chicken, grits, the personalities, and all the pride and prejudice of his section.

There isn't much of that. He goes off to become a reporter in Washington. He sees all the panorama of Harding, Coolidge, Hoover, and the revolt of the people which swept, for a time, big business and little business and all the people to the side of the one man in whom they then believed, Franklin D. Roosevelt. He not only saw it. He was a part of it.

He tells the story. He tells it with such honesty that at times the painstaking care is obvious.

Those of us who still have a chip on our shoulder will not like a part of the book. But, on reading, the chip may be felt to stir.

FROM MYTHOLOGY TO REALITY

It seemed to me, on reading his book and on rereading parts of it, that what he has done is to give to the South a great picture of the need for new bone and sinew.

There is a great need to come from mythology to reality.

I would not want to forget the old South and its traditions. But I think we ought to keep it and them in memory only. The swords and the roses may be seen in Miss Margaret Mitchell's most excellent book and the movie made from it. They truly are "gone with the wind." The old mansions were beautiful. Today garden clubs keep open many that survive. They, too, had their day.

The old South is dead. Let's treasure and keep it in our memories. But keep it there.

The South is a fabulous section. Henry Grady pictured that fabulous land as has no one else. He tried to give bone and sinew to the picture. Perhaps he might have done so had he lived.

Today the South is on the threshold of its greatest opportunity. Yet there are so many with chips on their shoulders who refuse to admit the sad truth that in the South the per capita income is the lowest; that millions are landless; that two-thirds of all southerners do not vote; that mobs, while diminishing, still find their haven in the South; that education and public health are not enough to meet the requirements of the southern people; that freight-rate differentials still serve to keep us in the state of a colony for the East.

Such statements of sad truth always arouse some who wish to disprove it by having the band play Dixie.

This is a fabulous land. We do present the greatest economic opportunity. But it cannot be done with roses and with political promises. Nor with old legends.

THE MAN WHO KNEW COOLIDGE

Mr. Stokes' story of Harding, Coolidge, and Roosevelt is worth the reading. He liked the objectives of the New Deal.

Like many others who liked those objectives, he did not like some of the misuse of power by the New Deal. Nor did he care for some of its measures.

But having seen Harding and Coolidge and Hoover, he wanted something else. Hoover does not suffer so much in this truthfully etched story as do Harding and Coolidge. I do wish that all those who admire "Careful Cal" would read Mr. Stokes' book. He was careful. So careful, indeed, he just sat on the front piazza at the White House to see the streetcars go by, and let the structure of finance, economy, and government slide downhill. "Careful Cal"!

The picture of the Roosevelt tour, viewed by a reporter; the revealing pictures of the Republicans trying to manage Alf Landon's campaign—they all are good.

Mr. Stokes' talk Friday evening ought to be interesting. It is before the Georgia Academy of Social Sciences, with the public invited. There is to be a nominal charge.

Come with the chip on your shoulder. Maybe Mr. Stokes can shake it a bit.

H. R. 9174

EXTENSION OF REMARKS

OF

HON. FRANK W. BOYKIN

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 23, 1940

Mr. BOYKIN. Mr. Speaker, in order that the Members of the House may become more fully acquainted with the purposes of H. R. 7194, introduced by my colleague the gentleman from South Carolina, HAMPTON P. FULMER, I am going to ask the indulgence of the House in order to speak on a matter of concern to the American fats and oils industry, in general, and one of vital interest to every cotton and peanut planted in the southland.

The first and primary reason for the introduction of H. R. 9174 was to benefit the American hog raiser, the cotton, the peanut, and the soy-bean planter, as well as our national livestock and dairy industries.

The second great need for its enactment is to ameliorate, if not correct, some of the injustice now being suffered by a class of agricultural producers in our country who find themselves pitted against the foreign producers of vegetable, animal oils and fats, in the matter of governmental reports. H. R. 9174 is intended particularly to protect our domestic agricultural producers in America against some of the results of the unfair competition from which they now suffer, both by virtue of the low price which they receive for their production, as well as the restrictions placed upon their markets by the huge combinations which process their raw materials.

Mr. Speaker, in the chaos which obtains in the world of today, where nations lose their liberty, their freedom, and their sovereignty overnight, it is well that we, in Congress, stop and ponder intimately on every question which might affect the safety of our own United States of America.

Our national defense, Mr. Speaker, is wrapped up in our supplies of vegetable-animal oils and fats. Let war with Japan ensue and our supply of the Philippine Islands coconut oils and the rest of the oriental oils upon which we are now dependent would immediately cease.

How much we are dependent upon that supply from month to month no man in this body knows, nor are we permitted to know. Neither is there any way provided whereby we can ascertain our dependence upon that foreign supply.

Our cottonseed-products producers are mandated by law to report the amount of their stocks each month, and they report in every detail as to the stocks on hand, and they do it under a penalty imposed by this Congress, but, Mr. Speaker, the importers, the processors, and the purchasers of the foreign oils and fats which are destroying not alone the prices of hog lard and domestically produced cottonseed oil products, do not have to report. The Fulmer bill (H. R. 9174) is designed to correct that evil, and I want to recommend to the consideration of every Member of the House the perusal of a letter which I wrote to the southern commissioners of agriculture and now ask unanimous consent to have this letter printed in the RECORD for the benefit of the Members who might not now be present.

Col. C. C. HANSON,
Secretary, Southern Commissioners of Agriculture,
Raleigh Hotel, Washington, D. C.

DEAR COLONEL HANSON: I was indeed glad to hear from the association, Southern Commissioners of Agriculture, and your own good self with reference to H. R. 9174, a bill introduced by my good friend and colleague, HAMPTON P. FULMER, Second District, South Carolina.

I was particularly glad to receive your communication because of a recent request which I received from home urging, not alone my support of the measure in behalf of the cotton producers of our South, but asking that I introduce an amendment to the same.

The amendment proposed is designed to remove some of the injustices now being suffered by our southern cotton planters,

not alone in the matter of the price which they receive for their products but from the unfair competition under which they labor by virtue of the enormous imports of foreign-produced jungle-nut oil seed and vegetable oils—oils which are now flooding our country.

Agreeable to that request, I have instituted the researches requested. These researches are now being made to the end of perfecting what will in truth be an amendment equally fair to the producers, processors, and the consumers of both foreign and domestic oils and fats, their byproducts and the derivatives therefrom.

As you know, H. R. 9174 is a bill entitled "A bill to amend an act entitled 'An act authorizing the Director of the Census to collect and publish statistics of cottonseed and cottonseed products, and for other purposes,' approved August 7, 1916."

Insofar as the bill H. R. 9174 pertains to the "oils and fats" industry in its relation to the cotton producers of our Southland, it is not greatly unlike H. R. 9659, introduced by Mr. FULMER in the Seventy-fifth Congress, third session, which opened January 3, 1938, and upon which House hearings were held by the Committee on the Census under date of March 15, 1938. Subsequently, hearings were held before the Subcommittee on Commerce of the Senate under date of May 9, 1938.

H. R. 9174 is a short and simple bill. In substance it provides that the Director of the Census be authorized and the bill makes mandatory upon the Director to do in behalf of the oils-and-fats industry with respect to certain other oils and fats what amounts to the same thing that is now imposed upon the cottonseed-oil industry under the Cottonseed Act with reference to furnishing the Federal Government with statistical data as to the amount of cottonseed crushed and on hand, the amount of cottonseed products manufactured, shipped out, and in stock.

The bill provides, in brief, to extend the authority of the Bureau of the Census with respect to the collection and dissemination of statistics concerning items such as soybeans, peanuts, flaxseed, copra, sesame seeds, kapox, rapeseed, and other oil seeds and nuts, as well as that of the oil, the oilcake, meals, and all other products of processing and byproducts of the nuts and seeds.

Now, Colonel, in my opinion H. R. 9174 (76th Cong., 3d sess.) is a highly meritorious bill which should continue to receive the active support of the association, Southern Commissioners of Agriculture. The association's endorsement to Mr. FULMER's original bill, H. R. 9659, was expressed in the following communication addressed to Mr. FULMER by the president of your association:

STATE OF LOUISIANA,
DEPARTMENT OF AGRICULTURE AND IMMIGRATION,
Baton Rouge, March 18, 1940.

Hon. H. P. FULMER,
Member of Congress, Washington, D. C.

DEAR JUDGE: Copy of your letter to B. F. Taylor, Columbia, S. C., and copy of H. R. 9659, received.

I am glad to get this information, and certainly approve of this bill.

With best wishes, I am
Sincerely yours,

HARRY D. WILSON, *Commissioner.*

This writer would now point out that among other endorsers to the "original Fulmer bill" was Mr. J. C. Holton, Commissioner of Agriculture of the State of Mississippi, the National Dairy Union, the Association of American Producers of Domestic Inedible Fats, as well as the National Cottonseed Products Association, which reads as follows:

NATIONAL COTTONSEED PRODUCTS ASSOCIATION,
Memphis, Tenn., April 15, 1937.

Hon. H. P. FULMER,
House Office Building, Washington, D. C.

DEAR CONGRESSMAN FULMER: I have yours of the 9th, with copy of your bill, No. 5813.

We, who are deeply interested in Southern vegetable oils, have needed for a long time the information called for in this bill, and I will immediately mail copy of same to various people in every cotton-producing State, and ask that they request their Representatives at Washington to support and work for its passage.

Yours very truly,

T. H. GREGORY,
Executive Vice President.

In this writer's opinion no well-founded opposition to this bill should obtain or could possibly exist. It provides for the more current publication of statistics that would render them more valuable and of real service and assistance to the producers, processors, and handlers of all vegetable, animal, fish, and other aquatic oils and fats, whether of domestic or of foreign origin or production.

There would be no duplication of activities involved in this bill. There would be a completed compilation of related data and information. Regardless of what its opponents might contend, it would not be a costly procedure and would prove of inestimable value to our national welfare.

It is this writer's opinion and in this opinion he is sustained by his economic adviser, that from the standpoint of the American oils-and-fats industry and especially the producers, the bill is neither overburdensome but rather that it is not comprehensive enough.

The factual history of the legislation in brief is as follows:

In 1916 the cottonseed-oil industry made request of Congress that monthly statistics be published by the Federal Government disclosing all factual information as to production, stocks on hand, and other pertinent items having to do with cottonseed. The Congress of the United States responded to that request.

An act entitled "An act authorizing the Director of the Census to collect and publish the statistics of cottonseed and cottonseed products, and for other purposes," was passed by Congress and approved by the President August 7, 1916.

The Cottonseed Act is a compulsory act and carries a penalty for noncompliance. You might be interested to know that in no one single instance has it been necessary to apply the penalty provision for noncompliance since its enactment.

With reference to oils other than cottonseed, all of which more or less compete with cottonseed oil, there is no Federal statute making report mandatory. It is true that a voluntary report is now being made and in fact is being published by the Bureau of the Census on a quarterly basis. I would have you note well that this is a voluntary report and that there is no penalty attached for noncompliance.

It is unnecessary for me to point out to you and to the southern commissioners of agriculture the tremendous advantage which is now enjoyed by all oil and fat producers, particularly those in foreign countries, in the use of data conveyed by the "special monthly cottonseed report."

Likewise, Colonel Hanson, it is unnecessary to point out to you and your associates the limited value and the interests to the cottonseed producers of the present quarterly report on the production, consumption, and stocks of fats and oils with respect to some 65 or 70 various vegetable, animal, fish, and other aquatic animal fats and oils.

The injustice lies in this one fact. National welfare derives vast benefit from the cottonseed reports as published on a monthly basis. The competitors of the cottonseed producers are thus able to avail themselves monthly of all the statistical trade data which it discloses, while, on the other hand, the cottonseed producers have no knowledge whatever of their competing products until 3 months have passed and even then have very meager statistics as to some competing products.

The Fulmer bill, H. R. 9174, introduced into this Congress, merely provides for "the monthly collection and release of data on certain other oil seeds and their products." These data to be such as are now published monthly by the Department of Commerce on cottonseed and which makes provision for a penalty of noncompliance similar to that provided in the Cottonseed Act for the producers, processors, and handlers of cottonseed and cottonseed products.

The public hearings on the Fulmer bill have been completed by House Committee of the Census. The only expression of opposition to the bill was that the proposal to change the present quarterly "voluntary report" to a monthly mandatory basis would cause some additional expense and inconvenience to those who appeared in opposition to its enactment. Its opponents also contended that the additional information published monthly would be of questionable benefit to the industry. That is a debatable question and a statement in which I do not concur.

The Census Bureau officials, who are purely a fact-finding and not a policy-making body, stated that the work of tabulating and releasing the statistics on a monthly instead of a quarterly basis would involve "very little additional expense," so far as the Government was concerned.

The transcript of the testimony taken at the Census Committee hearings is now in the hands of the Government Printer. Consequently it has been impossible for me to completely review the same. Inquiry, however, of various members of the committee and of the committee clerk makes this testimony of great interest by virtue of the fact that those appearing in opposition to the bill were the representatives of highly financed legislation pressure groups, including the following:

Mr. John B. Gordon, bureau of raw materials, American Oils and Vegetable Fats Industry.

Judge Ralph Lozier, general counsel, Institute of Oil Seed Products.

John F. Craig, assistant to the president, the Spencer Kellogg Co., Buffalo, N. Y.; representative of the National Linseed Oil Manufacturers Association, National Soy Bean Producers Association.

Roscoe C. Edlund, representative of the American Soap and Glycerine Producers Association.

A. W. Gilliam, Institute of American Meat Packers.

The above constitute the "Big Berthas" of the Chicago meat packers and the Soap Trust. They are representatives of the interests which oppose practically every measure brought before Congress designed to remove the overburden on domestic producers of our oils and fats, and are always on hand to oppose every suggestion of assistance which Congress might be considering to aid our domestic producers in efforts to insure a reasonable price for their products.

In discussing this clique's activities to repeal the excise tax on foreign-produced coconut oil, Senator TOM CONNALLY once said:

"They have made a regular groove in the marble floors of the Senate Office Building by walking back and forth to the Finance Committee. * * * Who is on the other side of this fight? The soap manufacturers. * * * How much was it Procter and Gamble paid their President last year? There was some testimony before the Committee on Finance as to what they paid the president of the company. I cannot recall the figure now, but I shall check on it and insert it on the record. I am sure that Procter and Gamble's representative, who is in the gallery, will be glad to tell me about it when the session is over." [Laughter.] (CONGRESSIONAL RECORD, May 31, 1939.)

To any well-informed mind, nothing could be more indicative than the statements of these "fat cats" of the Soap Trust in opposing the Fulmer bill. It is evident now that they are determined to beat down every proposal, no matter how innocuous, which might be helpful to either price or production with respect to domestically produced oils and fats, and particularly southern cottonseed and peanut oils.

Their activities at this hearing, when viewed in the light of the onslaught which they made last year to do away with the excise tax on coconut oil, greatly discloses the fact that they are determined to impede the enactment of any helpful legislation.

I am myself convinced of their desire to obtain destructive changes, if not the repeal of statutes, which at present afford some limited measure of protection to the American producers of our oils and fats.

It was in the light of the foregoing that the services of a local economist well versed in the oils and fats industry has been engaged. He is now making researches and determinations as to the factual merits and economic soundness of the bill introduced by Congressman FULMER. These studies will include analysis and research into:

1. The original bills as introduced both in the House and in the Senate.
2. The hearings held on these bills in the House and the Senate.
3. The present Fulmer bill, H. R. 9174.
4. The committee hearings on that bill as to the evidence offered and the statements made at the hearing.

One thing is now certain. The association, Southern Commissioners of Agriculture, should make request in behalf of southern agriculture and ask that the Committee on the Census reopen the hearings on H. R. 9174. I have already discussed the matter of the reopening of these hearings, as well as the question of filing a brief in support of that bill with both Congressman FULMER and the committee itself.

I am myself disposed to feel that it is about high time the insidious activities of the "soapers" were disclosed to the American people. Furthermore, I am personally disposed to press the Members of the House, not alone for the passage of a bill designed to accompany the purposes outlined by Congressman FULMER and endorsed by the Southern Commissioners of Agriculture and other interested producer groups, but I might possibly move for an investigation of the activities in the control of the market of both the raw materials as well as the finished production of the entire soap industry.

Let me now point out to you, Colonel Hanson, that the entire American cottonseed industry is laboring under a terrific disadvantage at the present time in the matter of statistical data as to competing products. They are suffering this disadvantage while the importers and processors of the vast quantity of foreign oils which flood our domestic markets are each month placed in possession of every fact pertinent to the cottonseed-oil industry.

The cottonseed-oil industry, on the other hand, can obtain practically no knowledge whatever as to the production, the consumption, and the stocks on hand of competing products, except such as is contributed voluntarily to the Government every 3 months.

The records of every line of industry allied to cottonseed oil will support the fact that the publication and dissemination of statistics as to the cottonseed received, crushed, and on hand, as well as the cottonseed products moved, shipped out, and in stock each month constitutes data valuable and necessary to the proper conduction of their business and the general public, while they have no knowledge whatever as to the doings of their competitors.

They should take note that the opponents of the Fulmer bill, rather than disclose equivalent and similar data on other oil-bearing nuts and seeds as well as on oils and fats competitive with cottonseed, have actually had the boldness to suggest that the cottonseed facts should be suppressed and made available to the public only on a quarterly basis rather than that they, like the cottonseed-oil industry, should be compelled likewise to report on a monthly basis.

The southern cottonseed industry should resent that suggestion with every force at hand. They should at the same time present to their respective Members of Congress information as to the benefits that would accrue to the American people if our citizenship were only permitted to know monthly and currently all facts pertinent to oils and fats, the production of the tenth greatest industry of the United States of America.

This is not alone important from the standpoint of commerce but it is economically important from the standpoint of national defense. Almost daily we read in the press of the importance of the oils and fats industry to the national-defense program. Daily the press records the apparent lack of fats and oils in the German Reich. News commentators and military observers both at home and abroad have gone so far as to suggest that Germany will lose the present World War, if for no reason than because of her ability to acquire a sufficient supply of fats and oils to support her civil population and military operations.

A mere child would realize that if those things are true, that if fats and oils are so necessary to the operation of German military system and machines, that they are equally needful and necessary to the defense of our country at the present time, despite our ability to become economically self-sufficient in the production of its oils and fats.

Vegetable, animal, and aquatic oils and fats are daily imported by the boat load from almost every quarter of the globe into the United States of America in order to make up our national deficiency. At the same time we have cut down the production of our cottonseed oil; we have restricted our southern planters from the production of peanuts and of castor beans. We have reduced our supply of corn oil.

It is entirely unthinkable that this country should remain dependent upon coconut oil imported from the Philippine Islands, and upon babassu, palm kernel, palm oil, peanut, corn, rape seed, perilla, sesame, fish, whale, and a host of other fats and oils, all of which could and would probably be shut off by the cutting of our lines of water transportation with the other side of the world in the event of war.

Still more unthinkable is the fact that the American Soap Trust and its paid lobbyists in Washington should stand like "dogs in the manger" and refuse to permit the American people currently to know the truth as to the supply on hand of essential and strategic materials necessary both to a peacetime as well as a wartime economy.

Colonel Hanson, I find it almost impossible to reconcile the fact that with hog lard selling, as it is, at the lowest price in decades and that with hundreds of our cottonseed oil mills shut down, the president of one "shortening company" using raw materials gathered in the jungles of the Far East should enjoy an income of nearly $500,000 a year, while our own cotton planters and producers of our seed are compelled to live on the very borderline of poverty.

As for myself, I am resolved either to introduce a new bill altogether or to propose an amendment to the present Fulmer bill. This will ask that the present quarterly report on the production, consumption, and stocks of oils and fats, in the future, inclusive of data on all soap products, shall be published monthly by the United States Department of Commerce. Furthermore, I am seriously considering a proposal to introduce a resolution calling for congressional investigation of the entire Soap Trust, in respect to its purchasing as well as marketing and lobbying activities.

My action in that matter will be wholly dependent upon the studies now being made, although I have ample evidence on hand to warrant such an investigation at the present time.

It is high time that we in this United States should ascertain exactly to what extent this industry is exploiting both the producers and consumers of American vegetable oils and fats. Not alone do they control domestic prices through the imports of foreign oils, but their present system of pricing and of marketing both their foodstuffs and soap and the combinations which they have effected are apparently mulcting the American people of hundreds of millions of dollars annually in their purchase of lard shortenings, soaps, and other fatty products.

You will find enclosed several documents which may be of interest to you:

1. Copy of H. R. 9174, the bill introduced by Congressman FULMER.
2. Copy of preliminary report issued by Director of the Census, announcing the preliminary statistics as to the factory production and consumption, imports, exports, and stocks of animal vegetable fats and oils for the 3-month period ending December 31, 1939.
3. Copy of preliminary monthly report issued by the Bureau of the Census, 10 a. m., April 12, 1940, on the cottonseed received, crushed, and on hand, and the cottonseed products manufactured, shipped out, and on hand for 8 months ending March 31, 1940 and 1939.

Thanking you for your help in this matter, believe me,

Very sincerely yours,

FRANK W. BOYKIN.

What of Unemployment and One Over-All Tax?

EXTENSION OF REMARKS

OF

HON. J. FRANCIS HARTER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 23, 1940

COMMUNICATION FROM A CONSTITUENT

Mr. HARTER of New York. Mr. Speaker, to prove that our shamefully unsolved domestic problems are the subject of much individual, as well as collective, thought throughout the country, under leave to extend my remarks in the RECORD, I include the considered suggestion of one of my constituents.

His suggestion is set up in petition form and to my knowledge now has hundreds of signatures representing labor, business, property owners, and ordinary "run of the mine" citizens attached to it. The author of the thought behind the petition is Mr. Otto E. Grupp, 942 Humboldt Parkway, Buffalo, N. Y. He is for elimination of real-estate and all other hidden and open taxes. He is for substituting an open, unconcealed transaction tax. I repeat, much individual, as well as collective, thought is required to make some progress. Mr. Grupp requested me to bring his consolidated

ideas to the attention of Congress. They are embodied in the following petition:

We, the undersigned American citizens, exercising our constitutional right, petition your honorable bodies to pass legislation necessary to repeal present system of taxing real estate on an assessed valuation confiscate basis and also all forms of open and concealed taxes and substitute one open, unconcealed transaction tax (rate of tax adjusted to pay as we go) to be collected by each State with the Federal Government cooperating and to be refunded to local government on wealth valuation basis, the Federal Government costs, the States governments costs, and an old-age pension for all citizens to be included in this one open, unconcealed tax.

We present the following reasons why such legislation is necessary:

First. To eliminate duplication in Federal, State, and local government costs. To remove the hidden cost of government now pyramiding in the production, distribution, and servicing of wealth.

Second. To save the dollar values deposited in business and savings banks, these values being principally represented by the dollar, of real estate and real estate securities which should not be subject to confiscation by a system of yearly pyramiding tax liens.

Third. This revision of the present tax structure would revive the national purchasing power, create the incentive to invest idle capital in the production of new industries, new projects, and the rebuilding of obsolete buildings and homes, thus employment would be stimulated and the unnecessary Government employees would find more desirable positions in private industry.

Amendment of National Labor Relations Act

EXTENSION OF REMARKS

OF

HON. ARTHUR D. HEALEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 23, 1940

EDITORIAL FROM THE BOSTON EVENING TRANSCRIPT OF MARCH 15, 1940

Mr. HEALEY. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Boston Evening Transcript of March 15, 1940:

[From the Boston Evening Transcript of March 15, 1940]

SMITH REPORT—AN APPRAISAL

Senator WAGNER's charge that the Smith committee has proposed "ripper" legislation is unfortunately justified. After a careful study of recommendations of the Smith body which investigated the National Labor Relations Board, we are tempted to go even further than Senator WAGNER has gone and to suggest that from labor's point of view it would be better that the workers be thrown back upon the protection their own unions can give them than that these proposed amendments be enacted. That, presumably, is what Senator WAGNER meant when he said that the Smith amendments were worse than repeal.

It requires only a few changes to convert a law from a protective to a suppressive device. The Wagner law, which was drafted to protect labor in its right to organize and to bargain collectively free from any interference, could become a statute restrictive of labor's rights with only a few shrewd amendments. Even hostile administration could achieve this end, as has been demonstrated in Wisconsin and Pennsylvania where so-called baby Wagner Acts have been in the hands of men out of step with the purpose of the legislation.

An examination of the Smith recommendations reveals dangerous traps.

The proposal to delete the wording which calls the denial of collective bargaining a cause of strikes and a threat to interstate commerce could easily destroy the legal basis of the entire act, leaving the Federal Government without any constitutional authorization for intervention in the labor picture.

The proposal to split the judicial and administrative function between a new Labor Board and a single administrator would, as we have previously said, destroy the unity of the administrative process as it is applied to labor. Labor is entitled to the same prompt and efficient attention to its needs as are petitioners before the Interstate Commerce Commission, the Federal Trade Commission, or the Communications Commission. If the Labor Board abuses its powers as a prosecuting, fact-finding, and enforcement agency, the courts can overrule and reprimand it as it does with the administrative bodies.

The proposal to free employers from any necessity for arriving at an agreement could reduce collective bargaining to a mere gesture. Industry should not, of course, be obliged to reach an accord each time it sits down to bargain, but if the Wagner Act is to have any meaning, all parties should be required to bargain in "good faith" in an honest effort to reach an agreement.

The proposal to deny the protection of the Wagner Law to a striker willfully violating any law could readily be used to break a picket line or to put labor leaders out of the way. It would be a simple matter to incite a picketing striker or a labor organizer to violence and thus deprive him of all rights under the act. As Senator WAGNER said, this provision would be the same as depriving an employer of his corporate franchise for all time if he were convicted of willful infraction of any law.

The proposal to require the same "rules of evidence" that obtain in the courts might work out but it could conceivably bog the operation of the labor act in time-consuming minutiae of legal hairsplitting. Certainly if these rules of evidence are to be applied to the Labor Board, they should be applied to all the other agencies.

The proposal to permit the courts to review clearly "erroneous findings of fact" as well as of evidence could open the door to full court review, not only delaying the administration of the act but swamping the courts, unless it is proposed to make labor the sole object of this special safeguard.

These proposals and many others convince us that the Smith committee is recommending not fair improvement but emasculation of the Labor Act. We therefore urge that the Smith report yield to a more constructive approach to this vital problem.

Of course, the Wagner Act can be improved. The Smith committee proposal to limit appeals to 30 days could accelerate procedure; the proposal that no fewer than 20 percent of employees could evoke the act would eliminate many useless hearings and the proposal to make a Labor Board decision binding for a year would save industry much wrangling and disruption.

The recommendation that employers be permitted to discuss labor problems with their employees represents a desirable remedy, provided an employer is required to demonstrate that his discussions are not designed or have not operated to intimidate labor in the exercise of its legitimate union activities.

It would have been better if the Smith committee had devised a remedy for the chief abuse it uncovered—the incompetence and antiemployer bias of some of the trial examiners. A worth-while amendment would be one that assured a better grade of examiner. His selection, for instance, might be made by the Department of Justice.

Another really helpful amendment would be the establishment of an intermediary clearing house between the examiner and the Board to eliminate many run-of-the-mill cases and relieve the overworked Board.

We believe the whole provocative question of industrial peace will be greatly appeased when collective bargaining is accepted in spirit and in fact. When that time comes, the need of the Wagner Act will have disappeared. But while that act is on the books, it should remain what it was intended to be, a protection for trade-unions and a support of collective bargaining in the United States.

Let us amend the law to make it just and more workable but not to emasculate it.

The Trade-Agreements Program

EXTENSION OF REMARKS

OF

HON. HOMER D. ANGELL

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 23, 1940

EDITORIAL FROM THE PORTLAND OREGONIAN OF APRIL 16, 1940

Mr. ANGELL. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following editorial from the Portland Oregonian of April 16, 1940:

[From the Portland Oregonian of April 16, 1940]

NOBODY HURT?

The cheeriness of the President's statement on the bill extending the trade-treaty policy will not bring responsive smiles to the faces of western lumbermen or wool growers and some others of our producers. The agreements program, said the President, has brought demonstrable benefits to our Nation as a whole, and has not inflicted injury on any group of producers.

Yet the fact remains that in the face of Empire trade agreements which virtually excluded northwest lumber from British markets, the Canadian mills that had run our mill lumber out of the United Kingdom, were given more favorable entrance to our home market.

There has been printed in this space the text of a letter from New York quoting a prospective buyer of 2,000,000 feet of lumber as insisting he could buy Canadian lumber for at least $2.50 a thousand less than he would have to pay for United States stock. Whether the Canadian price was met in this instance was not disclosed, but it is a demonstrable fact that the ability of the foreigner to deliver at lower prices than the domestic producer depresses the price of the domestic product whether the foreigner

actually enters the market or not. But Canadian lumber has entered the United States market to the serious injury of labor that would have been employed had domestic stock been sold instead.

Imports of wool products from Great Britain increased from 168 to 1,000 percent in the first 8 months of 1939. The imported manufactured yardage represented an annual employment of 4,000 to 5,000 persons, and the American consumer did not obtain either cheaper or better garments.

Moreover, whatever advantage we might have gained from the trade agreements has been impaired, if not upset, by war conditions. Depreciated currencies have made our products more expensive in terms of the money with which some foreigners buy, and war restrictions have further obstructed the sales of our products that had been given tariff concessions by the warring countries.

It is true that the war, which has upset prior calculations, brings further trade negotiations to a halt, and there is probability that when the war is over the purchasing power of our principal customers will have almost vanished. Trade is not reciprocal unless both parties to the agreement both buy and sell. There is a good deal of "face saving" in the administration's insistence on continuance of the policy and not much of substantial prospect, even if it be conceded that the agreements program was once a good thing. And the injury done to the lumber industry by the concessions granted to a contiguous competitor still exists.

Capital Parade

EXTENSION OF REMARKS

OF

HON. CLIFTON A. WOODRUM

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 23, 1940

ARTICLE BY JOSEPH ALSOP AND ROBERT KINTNER

Mr. WOODRUM of Virginia. Mr. Speaker, under leave granted I herewith insert for the RECORD an article, Capital Parade, by Joseph Alsop and Robert Kintner, appearing in the Washington Evening Star of April 22, 1940:

[From the Washington Evening Star of April 22, 1940]

CAPITAL PARADE

(By Joseph Alsop and Robert Kintner)

TYPICAL ECONOMIZER

WASHINGTON.—In the present congressional session, two striking facts have been successfully demonstrated—that governmental economy is still feasible, but that it is not feasible without the cooperation of the White House. The demonstration has been chiefly made by a small group of Democratic moderates and conservatives, among whom the House leader is Representative CLIFTON A. WOODRUM of Virginia.

At the moment, WOODRUM is grimly fighting the President's demand to be allowed to spend all the $975,000,000 relief appropriation in 8 months. The battle, to judge by present appearances, is no more than a rear-guard action, yet WOODRUM is a decidedly significant figure. He is of the type of those conservative chieftains whose rebellion in the ranks of his own party has given the President so much more trouble than the frontal attacks of the Republicans.

THE OFFICE OF EDUCATION

Like most of the Democratic conservatives, WOODRUM is a southerner and a political veteran. He was born in Roanoke, Va., 53 years ago. His formal education was brief, for when he was 13 family financial troubles forced him to leave school and go to work, first as an errand boy and then as a "soda jerker." While dispensing sundaes, he studied pharmacy, and became a licensed pharmacist. Then, while compounding prescriptions he studied law (his father was a lawyer) and got himself admitted to the bar.

His break came before he was 30, when a judge assigned him to defend a Syrian immigrant guilty of fratricide. Syrian brother killers have small appeal for Virginia juries, but young WOODRUM got his client off with a jail sentence by finding a character witness who described the Syrian rescuing young children in a flood. He was thereupon elected Roanoke's public prosecutor. In the prosecutor's office he made a good reputation, and in 1922 he was elected to Congress. He has been there ever since.

Tall and pleasant looking, with a sonorous voice and a rather solemn manner, he was a good companion. He was also an able man, industrious in the study of legislation, impressive on the floor, and shrewd in committee. Before long he was accepted as a Member in good standing by the small inner circle of Representatives who really run the House. Back in the days of the "office of education," he was always one of those who got the nod when Nicholas Longworth or JOHN N. GARNER came on the floor about 5 p. m. to summon the afternoon's company to their little retreat.

Indeed, his first emergence as an economy leader was traceable to his membership in the Longworth-Garner group. John McDuffie also belonged to it, and when McDuffie ran for the Speakership against Henry Rainey, WOODRUM was his chief supporter. Consequently, when the President sent his economy message to Congress in the wild spring of 1933, Rainey sought to punish McDuffie and WOODRUM by giving them the politically dangerous task of leading the economy fight. The President changed his tack long ago, but WOODRUM, who seems to have taken his punishment lightly, is still fighting it out along the same line.

CURIOUS PHENOMENON

Although WOODRUM is only the third senior Democrat on the House Appropriations Committee, he is the most influential member, and the undoubted economy leader. It was to him and to LINDSAY WARREN, of North Carolina, that Senators PAT HARRISON and JAMES F. BYRNES turned for help, when they decided that it would be better to cut the President's Budget than to raise taxes or increase the debt limit. Owing to the President's nonsupport, and the Senate's break on the farm bill, the economy effort has failed. Next year the debt limit will certainly have to be increased. Yet the fight has shown that economy is certainly possible.

WOODRUM really feels deeply about economy, and harangues doubters about it interminably. Once he asked a doubter, "How in hell do you expect to go on back to an intelligent constituency and explain this situation?"

"That don't bother me," replied the doubter, "because my constituency isn't intelligent."

The doubter's implied agreement with WOODRUM's argument suggests one of the two reasons why the economizer's fight has been so surprisingly effective. The majority of Members of Congress, however they vote, are with the economizers at heart. The other reason is that the economizers are far more experienced and more respected leaders than the CLAUDE PEPPERS and JERRY VOORHISES who captain the other side. Indeed, it is one of the really curious and inexplicable phenomena of our times that the great and powerful New Deal movement, after 7 continuous years of power, has produced no congressional chieftains of comparable stature with the hard-shelled conservatives like WOODRUM and the moderates like BYRNES.

Importation of Refined Sugar

EXTENSION OF REMARKS

OF

HON. CHARLES A. EATON

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 23, 1940

LETTER FROM A CONSTITUENT

Mr. EATON. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following letter from a Democratic constituent, together with the resolution referred to therein:

FEDERATION OF POLISH-AMERICAN
DEMOCRATIC CLUBS OF NEW JERSEY,
Perth Amboy, N. J., April 19, 1940.

Hon. CHARLES A. EATON,
Washington, D. C.

DEAR CONGRESSMAN EATON: At a meeting held on Sunday, April 14, 1940, the State organization passed a resolution asking your support in safeguarding the cane sugar refining industry in New Jersey. You will note the contents of the resolution asking for protective Federal legislation on the subject. I believe the enclosed resolution is self-explanatory and should receive your attention and sincere cooperation.

Sincerely,

WALTER A. ULIASE,
Recording Secretary.

Inasmuch as a large number of Americans now have jobs in the cane sugar refining industry in New Jersey; and

Inasmuch as that industry's pay roll of $2,000,000 goes to support more than 1,200 families, with more than 4,500 men, women, and children, a great many of whom are of Polish-American blood; and

Inasmuch as the jobs of cane sugar refining workmen in New Jersey and other States have been lost and pay rolls slashed because of the importation, since 1925, of refined sugar produced in Cuba, Mexico, Java, the Philippines, Puerto Rico, and other areas; and

Inasmuch as these sugar-producing localities employ labor of an extremely low-wage basis, against which American organized labor cannot attempt to compete; and

Inasmuch as there will be a further loss of jobs and pay rolls and further distress to American families after 1940, unless there is proper Federal legislation to limit both this importation of refined sugar from the Tropics and the marketings of beet sugar: Therefore be it

Resolved, That we go on record as opposing the importation of refined sugar made by cheap, tropical, unorganized labor, and recommend that when Congress considers sugar legislation in 1940 there be written into such legislation provisions which will place an effective limitation upon the amount of refined sugar which can be brought into the United States and the amount of beet sugar to be marketed in the United States; and be it further

Resolved, That we send copies of this resolution to our Senators and Representatives in Washington.

FEDERATION OF POLISH-AMERICAN DEMOCRATIC CLUBS OF NEW JERSEY,
ANTHONY S. GADEK,
State President.
WALTER A. ULIASE,
Recording Secretary.

The Alien Problem in the United States

EXTENSION OF REMARKS
OF
HON. GEORGE A. DONDERO
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 23, 1940

STATEMENT BY THE SENTINELS OF NEW AMERICA

Mr. DONDERO. Mr. Speaker, under leave to extend my remarks, I insert herein the statement issued by the Sentinels of New America in its open letter and supplement thereto:

When just 1 short year ago the Sentinels of New America issued the Open Letter, a copy of which is attached, many were inclined to scoff at the statements contained therein and to conclude them to have emanated from a fear-filled mind. Since then the daily revelations have more than vindicated the author and have shown the need for immediate measures to cope with the situation.

In the October 22, 1938, issue of the magazine Liberty the publisher in his editorial boldly charges, among other things, that:

"The immigration statistics, for example, show that fully 200,000 aliens have come to this country yearly by bribery and fraud since Mme. Perkins assumed her duties.

"Last year 4,000 criminal aliens were ordered deported by the courts, and they have not been deported. Some of them, it is claimed, have been out on bail since 1933. Last year more than 1,000,000 aliens were on relief; and, according to the cost per unit estimated by Harry Hopkins, the expense of supporting these aliens totals nearly a billion dollars.

"There has apparently been a decrease of approximately 50 percent in deportation of alien criminals and undesirables since 1933. In 1933, 9,000 aliens were deported for entering the country without valid permits. In 1937 only 3,294 aliens were deported for this reason.

"In 1933, 3,000 aliens were deported for overstaying their permits. Last year only 702 such cases were deported."

If these things be true, then America is in a dangerous position, not alone because these aliens, many of them criminally inclined, are here illegally, but more so because it is an indication that public officials are ignoring their most sacred oath of office and that the principles of the Constitution of the United States are no longer upheld, and the court's decrees not always enforced by some of the officials sworn to do so.

When such a state exists, then if the Government of the United States is to continue in harmony with the principles upon which it was founded, it becomes necessary for the voters of these United States to demand of the members of the various legislative bodies the application of more or less drastic remedial measures.

THE CLEAR-CUT REMEDY

This remedy is not difficult once the issue is clear, inertia cast off, and proper responsibility assumed.

1. The further reduction of immigration and the absolute exclusion of all aliens whose entry would be undesirable in America.
2. The tightening of exclusion restrictions without delay.
3. To provide for the preferred employment of American citizens in all Government jobs, and to prohibit the employment of other than American citizens in any department of the Army and Navy.
4. To provide a means for the immediate registration of every alien now in America, and to further provide that all aliens entering America so register on landing on American soil; all aliens so registered compelled to report periodically their whereabouts and means of livelihood.
5. To provide that all aliens now in America, or who shall hereafter enter America, signify their willingness to assume the responsibilities of citizenship and uphold American institutions by applying for their first citizenship papers within 6 months after their arrival. Those failing to do so within a period of 11 months and 20 days to be deported without the formality and expense of a trial.
6. To provide that any alien in America being found guilty of a major offense committed before he has applied for his first papers shall be refused such papers and deported as undesirable.
7. To provide that all aliens now in America or entering America after such provisions are made shall be taxed equally with citizens and assume all responsibilities of citizenship, but without right of vote, until after they become citizens.
8. To provide that all aliens in America shall be refused equal rights with citizens, nor shall they be entitled to all the privileges citizens enjoy under American law, including all relief, until such time as they become American citizens.
9. To provide that aliens shall not be permitted to hold office of any nature whatsoever, nor be allowed by labor unions or corporations to become executive members, directors, or executives thereof, and be refused all vote of whatever nature in the affairs thereof.
10. To provide for the banning of all secret organizations which advocate the use of force or violence in any form whatsoever.
11. To provide, with heavy penalties and the immediate deportation of all aliens connected therewith, for the proscription and disbanding of all schools, movements, societies, publications, camps, and congregations of men where is inculcated the disruption of the Union and the American form of government by violence or other than the orderly means of voting for such change, as guaranteed to all citizens by the Constitution.
12. To provide for the thorough investigation, by every lawful means, of nihilism, nazi-ism, fascism, and communism and every other subversive movement.
13. To provide for all necessary increase of the border patrols to prevent the smuggling in of aliens and contraband of whatever nature.
14. To provide for adequate national defense and mandatory neutrality.
15. To immediately provide for adequate tribunals for the prompt trial of aliens who are offenders against law and order, and for the immediate enforcement, without interference from any source, of the decrees issued by such tribunals.
16. To provide for the apprehension and swift trial of public officials who fail to live up to their oath of office and thus set an example for citizens not in office.

Our sympathies are with our fellow man of whatever color, creed, or country, but we hold it as a self-evident fact that there is not even a semblance of injustice in requiring those of foreign birth within our borders to comply with the same laws and assume the responsibilities which are thrust upon us because of our birth under the banner of a free country and a protecting Constitution, and I (we) whose name(s) is (are) appended hereto, as a voter (or voters) demand that you as a representative of the people take action as herein outlined, thereby to correct the evils so rampant at the present time and which threaten to disrupt our form of government.

Sincerely yours,

CLYDE L. BARR,
Secretary, North Kansas City, Mo.

The Sales Tax

EXTENSION OF REMARKS
OF
HON. JOSEPH W. BYRNS, JR.
OF TENNESSEE
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 23, 1940

EXCERPTS FROM ADDRESS BY THE LATE JOSEPH W. BYRNS

Mr. BYRNS of Tennessee. Mr. Speaker, under leave heretofore given to extend my remarks, I include certain excerpts from a speech made by my late father, the Speaker of the House of Representatives of the Seventy-fourth Congress, on March 24, 1932, as found in volume 75, part 6, page 6810, with reference to a proposed sales tax pending at that time before the House, in explanation of my vote against this or any other sales tax.

In the excerpts from my late father's speech which I will insert at the close of my remarks I feel that he summed up in unanswerable terms the undesirable features of a sales tax in that, as he said, "it promotes extravagance in appropriations."

To my mind, the sales tax puts an extra burden upon the poor man, and for that reason, and because I agree with my late father's reasoning heartily, I voted against the passage of this bill.

[From the CONGRESSIONAL RECORD for March 24, 1932]

HON. JOSEPH W. BYRNS' SPEECH (IN PART) AGAINST THE SALES TAX

Mr. BYRNS. Mr. Chairman, I did not expect to have anything to say on this subject. I regret very much that I am unable to agree with the distinguished gentlemen upon the Ways and Means Committee who have reported this bill, but I cannot surrender the convictions of a lifetime [applause], nor can I forget that the Democratic Party has consistently throughout its career, except in a wartime emergency, opposed anything like a sales tax. [Applause.] It so declared in 1924, and the party to which I belong has always stood for taxation upon those who are best able to bear it.

I am opposed to the sales tax on principle. I am opposed to it, because it promotes extravagance in appropriations. [Applause.] It is too easily imposed; it is too easily collected; it is too easily and cheaply collected not to promote extravagance in our legislative bodies, and for that reason I am against it.

* * * * * * *

I want to tell you, gentlemen, if you impose this sales tax, you will be confronted with the proposal to repeal the income tax and the Federal corporation tax in a very few years. [Applause.] Put the nose of this camel under the tent, even for a small period of time, and the same arguments will be used here a year from now or 2 years from now in order to retain it upon our statute books.

Let me read to you a paragraph from a letter which I received from the Philadelphia Board of Trade, in which an officer of that board frankly expresses his position and the position of the board with reference to the income tax. He says:

"On the question of a final sales tax, so specified to avoid duplication or pyramiding of taxes, it is conceded, as we understand it, that in the event Congress does—and we sincerely hope it will—enact the sales-tax legislation, that automatically Congress will repeal the Federal income and the Federal corporation taxes."

Let me say to you gentlemen who have stood on Democratic platforms, if you please, you gentlemen who have advocated an income tax upon every stump in your districts and in your States and throughout the country, that in undertaking to impose a sales tax as a policy of this Nation you are lending yourselves, unintentionally, of course, to the schemes of those who have it in their minds to repeal the income tax, the most equitable and just tax ever imposed. [Applause.]

* * * * * * *

Someone has said that the action of the committee has brought us nearer to communism than any other nation except Russia. Let me say that communism will never result from the taxing of wealth even though it is made higher than it should be. If communism gains a serious hold in this country, it will be because of the continual piling up of burdens upon the backs of those so little able to bear them. But lest I be misunderstood, let me say that I do not fear communism at any time in this country. Our people are too loyal and too much imbued with the spirit of liberty to ever yield to any such pernicious doctrine.

Edwin Markham

EXTENSION OF REMARKS

OF

HON. WILLIAM A. PITTENGER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 23, 1940

Mr. PITTENGER. Mr. Speaker, today marks the birthday of Edwin Markham. He was born on April 23, 1852. All recognize him as one of the greatest poets of our day and generation. His outstanding contribution to literature is The Man With the Hoe. This poem can be read and reread by all of us with benefit. It sets forth the problems of humanity in the language that commands and deserves attention.

Throughout the centuries civilization has had to contend with greed and oppression. This poem points out these facts, and challenges the intelligence of the world to find a way for the economic betterment of mankind. The poem demands action based upon the experience of the ages and is a plea for justice, probably the most powerful ever made. It is as much needed today as ever in the world's history.

There is a constant battle of mankind to prevent enslavement and tyranny, and this poem points out the fate of civilization when such events take place. The poem is as follows:

THE MAN WITH THE HOE

(Written after seeing Millet's world-famous painting of a brutalized toiler)

"God made man in His own image in the image of God made He him."—Genesis.

Bowed by the weight of centuries he leans
Upon his hoe and gazes on the ground,
The emptiness of ages in his face,
And on his back the burden of the world.
Who made him dead to rapture and despair,
A thing that grieves not and that never hopes,
Stolid and stunned, a brother to the ox?
Who loosened and let down this brutal jaw?
Whose was the hand that slanted back this brow?
Whose breath blew out the light within this brain?

Is this the Thing the Lord God made and gave
To have dominion over sea and land;
To trace the stars and search the heavens for power;
To feel the passion of Eternity?
Is this the dream He dreamed who shaped the suns
And markt their ways upon the ancient deep?
Down all the caverns of Hell to their last gulf
There is no shape more terrible than this—
More tongued with censure of the world's blind greed—
More filled with signs and portents for the soul—
More packt with danger to the universe.

What gulfs between him and the seraphim!
Slave of the wheel of labor, what to him
Are Plato and the swing of Pleiades?
What the long reaches of the peaks of song,
The rift of dawn, the reddening of the rose?
Through this dread shape the suffering ages look;
Time's tragedy is in that aching stoop;
Through this dread shape humanity betrayed,
Plundered, profaned, and disinherited,
Cries protest to the Powers that made the world,
A protest that is also prophecy.

O masters, lords, and rulers in all lands,
Is this the handiwork you give to God,
This monstrous thing distorted and soul-quencht?
How will you ever straighten up this shape;
Touch it again with immortality;
Give back the upward looking and the light;
Rebuild in it the music and the dream;
Make right the immemorial infamies,
Perfidious wrongs, immedicable woes?

O masters, lords, and rulers in all lands,
How will the future reckon with this man?
How answer his brute question in that hour
When whirlwinds of rebellion shake all shores?
How will it be with kingdoms and with kings—
With those who shaped him to the thing he is—
When this dumb Terror shall rise to judge the world,
After the silence of the centuries?

We Have Reason To Be Frightened

EXTENSION OF REMARKS

OF

HON. CLARE E. HOFFMAN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 23, 1940

Mr. HOFFMAN. Mr. Speaker, sometimes Mr. Roosevelt seeks to perpetuate himself in power by frightening us.

In times past, he has told us the country was threatened with a revolution, which could not be averted unless we gave him a blank check and unlimited authority to spend it. On other occasions, he has seen, so he said, submarines off the coast, leaving the impression that some foreign power was about to bomb our harbors at New York or some other Atlantic port.

On other occasions, he has indulged in blustering, arrogant, provocative talk toward other nations and their rulers and intimated that he was the only man in the United States who was capable of keeping us out of war, while much of the time he was doing the very things which would involve us in controversies with foreign nations.

And whenever it was pointed out that his conduct was ruinous to us as a nation, destructive to business, was in-

creasing unemployment, destroying our civil rights, he usually replied with the statement that someone, for ulterior purposes, was trying to frighten the American people.

Not long ago he stated, in substance, that his political opponents were engaged in such a course and that all was well here in America and that no one need worry about the future.

Being mentally competent, he cannot be wholly unaware of the untruthfulness of his statements. He just chooses to ignore the facts and still thinks that the people believe his absurdities, as they once did his campaign promises, or that a sufficiently large number of voters have received Government subsidies and, in the hope of future benefits, will still vote for him, so that he may continue in power.

It is regrettable that he will not read and profit by the editorial from the Chicago Tribune of April 22, 1940, which is as follows:

MR. ROOSEVELT AND THE FACTS

Mr. Roosevelt's address from Warm Springs to the Young Democratic clubs established something of a record, even for him. Over the last 7 or 8 years, the public has learned to discount heavily not only his promises but his statements of fact. On Saturday, his habit of misstatement was running at its strongest.

The Republicans, he said, are seeking to frighten the country by telling people the present administration is trying to get the United States into the war. His answer to the charge was the statement that "you know better than that," some generalities about a better world, and some references to sticky flypaper.

Naturally Mr. Roosevelt did not review the record of his warlike speeches and acts. They establish the charges against him. What other meaning than involvement in the war is to be read in his acts and utterances beginning with the speech he made here at the dedication of the Outer Bridge, the speech in which he announced his intention to "quarantine" certain nations?

In Mr. Roosevelt's formative years as a politician he served as Assistant Secretary of the Navy under President Wilson who "kept us out of war." Mr. Wilson sent Colonel House to Europe and permitted him to commit this country to war in a secret conversation with the British Foreign Secretary. A memorandum was made of the conversation; Mr. Wilson accepted it with the single—and, as events proved, unimportant—addition of the word "probably." Mr. Roosevelt sent Mr. Welles on a similar tour of the capitals. Why?

Mr. Wilson in 1914 cautioned the Nation to preserve neutrality in thought and deed. Mr. Roosevelt started in 1939 by declaring he could not be neutral in thought. Neither could he be neutral in deed, as he soon showed. He demanded the repeal of the arms embargo so that he might make this country an arsenal for the side he favored. What will he do if this help proves insufficient? Is it likely that he will or can stop there, having announced that the world's hopes rest with the side he favors?

He delayed the sailing of the *Bremen* for no reason which anyone has been able to discover except a desire that it be captured at sea. He ordered the Army to change its rules to permit the sale of new-model airplanes to the French and British, and only a fatal accident brought this unneutral act to public attention. He countenanced reports that German submarines were operating off the Florida coast for no better purpose, so far as anyone knows, than to frighten the American people. His military preparations foreshadow another expeditionary force.

Undoubtedly with Mr. Roosevelt's sanction, the Navy Department has been encouraged to demand the fortification of the island of Guam off the Japanese coast, a highly provocative act. Only the other day his State Department declared the intention of this country to safeguard the Dutch East Indies if Holland should be attacked and unable to protect them, a declaration which the Netherlands Government has denounced as meddlesome, embarrassing, and unsolicited; but it gives Mr. Roosevelt another opportunity to get into war.

The documents from the Polish archives have been denounced as forgeries, but the record of Mr. Bullitt's speeches as Ambassador to France, of Mr. Kennedy's action in London, of the withdrawal of our Ambassador from Germany, of the hasty departure of Mr. Bullitt from this country when an investigation was imminent, of Mr. "Doris Duke" Cromwell's speech as our diplomatic representative in Canada prove that the attitude disclosed in the documents, whether they are forgeries or not, is a fair representation of Mr. Roosevelt's policy. The documents show Mr. Roosevelt determined to repeal the arms embargo, and he did it. They show him determined to bring victory to the side he favors, and all that has happened subsequently is confirmatory of the purpose.

All of this evidence, and much more, of a design to involve this country in war, Mr. Roosevelt sought to bury with a phrase. In somewhat the same way he sought to divert attention from the scandals of his administration. "Virtually every serious Government scandal since the Civil War has occurred under Republican leadership," he said. Somebody ought to introduce Mr. Roosevelt to his son, Jimmy. Somebody ought to let the White House know that Mr. Roosevelt's political lieutenant in New York, a Mr. Hines, is in the penitentiary for grafting. The President ought to be told how Senator BARKLEY, his hand-picked leader in the upper House, won his last election; about Senator SLATTERY's strong box; about the second Louisiana purchase; about Secretary Wallace's interest in the hybrid-corn business; about T. V. A., Grand Coulee, and Passamaquoddy just as a starter.

Just as under Republican administrations there never were expenditures and deficits on the present scale, so there never have been scandalous abuse of power and misappropriation of money on the present scale. To complete the record, Mr. Roosevelt should have added that since the Civil War no depression has lasted as long as the Roosevelt depression. And in addition, he should have observed that since the Civil War only one President—so far—has involved us in a European war and he, too, was a Democrat.

If Mr. Roosevelt was an ordinary man, one who knew that always certain causes gave certain results; and if his perceptions were not beclouded by his own confidence in his infallibility, he would realize that the only thing that his countrymen have to fear is Roosevelt, his policies and those advisers who surround him and who long ago based their activities on the theory that America needed remaking.

Fifty Years of Banking

REMARKS

OF

HON. FRANCIS H. CASE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 23, 1940

Mr. CASE of South Dakota. Mr. Speaker, few subjects are more important to the Congress than that of money and banking. The other day, April 17, 1940, in my home town of Custer, S. Dak., a bank rounded 50 years of service to our community. Fifty-year-old banks are not many, but there are others. This particular institution, however, has completed 50 years under the leadership of one man, T. W. Delicate. I doubt if that record can be matched in the United States today.

It is hard to realize that the life span of that institution, the Custer County Bank, under the leadership of one man, reaches back half a century into an utterly different world. When Tom Delicate came to Custer City, mother city of the Black Hills, the white settlement was only 15 years old. Indeed, 14 years earlier, the hills were a part of the great Sioux Reservation, and white men were outlaws in the region. The last of the frontier battles was yet to be fought, and volunteers from Custer City were to spend the next winter at the mouth of Spring Creek, only a day's ride below town. The Wounded Knee massacre was yet to take place, not many miles beyond, in the closing days of 1890.

Tom Delicate started his bank in Custer in "horse and buggy" days—yes, earlier than that, for Custer's main street was made 120 feet wide to accommodate the turns of the bull trains that brought in the freight from Sidney and Cheyenne.

Today, Custer Ave., still 120 feet wide, is a part of the Nation's main street, United States Highway 16, hard-surfaced from coast to coast. But when Tom Delicate started in, there were no automobiles on the road, and no hard roads for them to travel on.

The bank's first books were started with pen and ink. There were no adding machines, no modern bookkeeping equipment, no typewriters. Legal instruments were written in longhand. Books were balanced at night by the light from a kerosene lamp. The phonograph and the dictaphone had not been perfected. The radio was undreamed of, and the movies and talkies were unknown.

This bank has seen 14 depressions come and go. It has seen the population of Custer fluctuate with the fortunes of frontier mining towns and coast with the currents of changing times. The bank has not been a part of the past 50 years and escaped its times of testing and trial, but each crisis has been taken in stride and the Custer County Bank has carried on, giving to the community a steadying influence of immeasurable value. It has served fathers, sons, and grandsons. It

has witnessed a complete transformation in the economic, social, and business life of the Nation—in manners, customs, clothes, foods, even in ways of thinking.

To be sure, during those 50 years, Tom Delicate has had chances to go elsewhere, and many a larger community would have welcomed his institution. He and his bank, however, have remained in the community where their lot was cast. I saw him at his desk last month. His office is not in the back of the bank but out near the front, where he continues to give a nod to customers as they come in and personal attention to such items as they care to take up individually with him.

Fifty years of continuous service under the leadership of one man in a western community is an inspiring thing. I am sure that it will be reassuring to those who believe that character and courage are important attributes in American life, and therefore I have called attention to this unusual record in this way.

Wage and Hour Act—Farm Incomes and Industrial Incomes Rise Together

---

EXTENSION OF REMARKS

OF

HON. JOHN J. COCHRAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 23, 1940

RADIO DIALOG BY SECRETARY OF AGRICULTURE WALLACE AND WAGE AND HOUR ADMINISTRATOR FLEMING

Mr. COCHRAN. Mr. Speaker, a most interesting radio dialog on agriculture and the wage and hour law was delivered last night by Secretary of Agriculture Wallace and Administrator Fleming.

The point made by Secretary Wallace—and I hope a great many of the Members in this body heard him—was that farm incomes and incomes of industrial workers rise together.

In 1939, for instance, when the wage and hour law was in effect, farmers received approximately 10 percent more for their fruit and vegetables than in the crop season of 1938 before the law became effective.

The Secretary added:

Farmers and wage earners are among the low-income groups of our population. Both have benefited from the progressive legislation of the last few years. Recent legislation for the protection of farmers could not have been enacted had not congressional representatives of the city workers joined in supporting it. For example, 63 percent of the city representatives voted for the original A. A. A. legislation in 1933. Sixty-three percent of them voted for the revised A. A. A. program of 1938. I regret to say that the Congressmen from the rural areas seem less disposed to support measures for industrial workers. While 84 percent of the urban Congressmen approved the wage and hour law in 1938, only 39 percent of the rural Congressmen voted for it. I hope that farmers come to realize the necessity for increased cooperation with labor, so that labor will continue to cooperate with farmers. I do not like to think of the consequences if farmers and city workers were to pursue an independent course, determined to get all they could for themselves without regard to the effect on the other fellow.

Certainly no one can quarrel with the reasonableness of Administrator Fleming's attitude. He said:

We are certain, Mr. Secretary, that the operation of the wage and hour law to date has not resulted in any general increase of farm marketing costs. We realize that most farmers and wage earners receive only small incomes, and that to help labor by taking money away from the farmer certainly is no gain in our economic situation as a whole. Labor costs in the canning industry are so small that 30 cents an hour would add only an imperceptible amount to the price of the product. However, right now we are reinvestigating to see whether any employees of canning factories and the like are receiving the 30-cents-an-hour minimum wage to the disadvantage of farmers.

And he added:

Neither the wage and hour law, nor any of the amendments to it so far proposed, contemplates including farm labor in the act. At no time has farm labor been included. I should like to emphasize that. Neither the farmer's hired man, nor his harvest hands, nor his berry pickers, nor anybody employed by the farmer to work on the farm, is in anyway affected by the wage and hour law.

The full text of the radio exchange follows:

ANNOUNCER. Your Government attempts on many fronts to assist the people of the country in finding a solution to their problems. The Department of Agriculture, for example, is concerned with the advancement of agriculture and the promotion of the economic welfare of the millions of farmers in the United States, and with the welfare of consumers. The Wage and Hour Division of the Department of Labor is equally concerned in advancing the welfare of America's millions of industrial workers. Today we are fortunate in having here together the heads of these two great agencies. Their presence here this evening symbolizes the important unity of interest between the Nation's farmers and the Nation's industrial workers. It is my great privilege to introduce to you two native sons of Iowa and farmer neighbors in that State, the Honorable Henry A. Wallace, Secretary of Agriculture, and Col. Philip B. Fleming, Administrator of the Wage and Hour Division. Colonel Fleming.

Colonel FLEMING. There is a community of interest between the farmer and the industrial worker. In our highly integrated society, the welfare of each of us is dependent in some degree upon the welfare of everyone else. Thus, the merchant is dependent upon the welfare of his customers, and the manufacturer upon the prosperity of the merchant. I know, Mr. Wallace, you've been preaching this for a long time.

Secretary WALLACE. We are dependent upon each other more than is generally realized. When the dry skies and hot winds of 1934 seared the Corn Belt, few city people thought that of any concern to them. But without enough corn to feed, many farmers had to sacrifice their livestock. A year or two later city people paid higher prices for beef and pork—and, as a result, learned that the size of the corn crop did mean a lot to them. Since then we've developed our ever-normal granary, which has resulted in the storage of lots of corn on farms, against other possible bad years. This corn is just as much a protection to the city people as to the farmers who produce it.

Colonel FLEMING. Just as consumers are affected by farm happenings, farmers are affected by what happens to city labor. A young woman—let us say her name is Mary Smith—works in a New York garment factory. If she loses her job, she must be taken care of by friends or relatives or go on relief. She is no longer a good customer for farm products.

Secretary WALLACE. If only one person lost a job, it would make little difference, but when one Mary Smith is multiplied by millions of jobless workers, the effect of the reduced buying power upon everybody is very great. City workers are consumers of farm products. Farmers raise wheat and vegetables and fruit to feed them, and cotton and wool to clothe them. The price the farmer receives for his products and the quantity he sells, is directly affected by the ability of city workers to buy. How much farmers would gain if city labor were more fully employed at better wages was shown recently by Milo Perkins, head of our Federal Surplus Commodities Corporation, in a speech on the challenge of underconsumption. He showed that two-fifths of our families live on less than $100 a month. They spend, on the average, not much more than 5 cents a person a meal on food. If incomes were increased so these families had $100 a month to spend, they could spend 10 cents a person a meal. This 5-cents-per-meal increase would add up to nearly a billion dollars more for farmers each year.

Colonel FLEMING. That level of $100 a month is far above the minimum the wage and hour law sets. The present minimum—30 cents an hour for a 42-hour week—means only $12.60 a week at full time, or $650 a year—even if the worker is able to get employment clear through the year, which is not always the case.

Secretary WALLACE. The economic bond between farmers and city workers is shown also by the relationship between total incomes for all farmers and all city workers. Back in 1929, when pay rolls were $12,000,000,000 a year, farmers' incomes also were about $12,000,000,000. Then, during the depression, they went down together, until in 1932 both farmers' incomes and factory pay rolls were down to about five billions a year. Now they have both climbed up again to where they're around eight to nine billion dollars. The farmer's welfare is dependent upon the ability of city people to buy his products, just as the welfare of city people is dependent upon the ability of the farmers to buy their products.

Colonel FLEMING. It is evident, then, that the poorer the city worker, the poorer the farmer. As you know, the Fair Labor Standards Act of 1938—usually called the wage and hour law—is an effort to prevent people being employed at sweatshop wages. If Mary Smith had been paid $6 a week, for example, her pay, under the act, has been raised to $12.60, if she works the full 42 hours a week. Do you think that would benefit farmers?

Secretary WALLACE. Certainly I do; I think the Wage and Hour Act is a decided benefit to farmers. Not all farmers, unfortunately, understand how the law works. Certain groups have been able, apparently, to convince some farmers that the wage and hour law will injure them. For instance, reports came to me recently that some Corn Belt producers had been told they were going to have to pay more for plows, harrows, and other farm machinery because of higher labor costs under the wage and hour law. There are only three things wrong with those reports. First, there were practically no workers at all getting less than 30 cents an hour—the current minimum—in the farm-machinery industry or in the steel industry, even before the law went into effect. Second, there were no signifi-

cant changes in average pay per hour in either the steel industry or the farm-machinery industry during the past 12 months, a period in which the wage and hour law was in effect. Third, the prices of farm machinery have not been increased in this period; in fact, the prices of some machines have come down slightly.

Colonel FLEMING. You are quite right, Mr. Secretary. In most industries the payment of better wages to those poorly paid workers at the bottom has had no appreciable effect on the level of labor costs or on selling prices. But the attack of some farm organizations against the act has been on the grounds that it might increase marketing or processing costs. Are those objections justified?

Secretary WALLACE. No; but I can see why farmers might be concerned. Some farmers object to higher wages or shorter hours for workers in creameries, canning plants, packing plants, and sometimes even in flour mills, bakeries, groceries, or other concerns engaged in processing or marketing farm products. They argue that higher wages will mean a larger merchandising spread between producer and consumer, and thus lower prices to farmers or result in smaller demand at retail. This argument fails to recognize that the farmers' income from sales is affected not only by marketing and processing costs but also by consumer demand. And they also fail to realize that changes in the ability of consumers to buy have much greater effects on farm prices than do marketing costs. For example, processing and marketing costs on the food bought by an average city workingman's family increased 12 percent during the recovery from the depression, from $172 in 1933 to $193 in 1937. But over the same period the income of the average city family increased by 40 percent, and its expenditures for food at retail went up from $264 to $353. This increase in city buying power, from 1933 to 1937, much more than offset the increase in marketing costs, and the farmer's income from the food products bought by this average family almost doubled, going up from $92 in 1933 to $160 in 1937.

Colonel FLEMING. How then do you account for the alarm of some farmers over the wage and hour law, which, of course, is designed to raise wages for the low-paid workers, thereby increasing consumer demand?

Secretary WALLACE. Many of these objectors, I think, are quite sincere, but they have simply been misled. Some of those who want cheap labor want to make their profits out of the hide of labor. If profits are increased at the expense of pay rolls, farmers suffer along with labor. A very large share of the pay received by those with low incomes goes to buy food and clothing. Workers receiving 30 cents an hour or less spend almost half their income for food and clothing. If their pay is cut, half of that cut must come out of their expenditures for farm products. The well to do spend much less for food and clothing—only about one-eighth of their incomes. Every transfer of $10 from wage payments to excessive profits reduces retail expenditures for food and clothing by $4.

Colonel FLEMING. Some business interests have gone pretty far in attacking the Wage and Hour Act. For example, some of them have recommended that all city workers engaged in marketing, transporting, or processing materials derived from farm products should be excluded from the act. That means that not only people who handle foodstuffs, but all those who are handling fibers or any other farm products, would be excluded.

Secretary WALLACE. That would exclude workers in the packing plants of Chicago and Omaha, workers in the great flour mills of Minneapolis and Buffalo, workers handling cotton in tire factories or automobile plants and cotton mills, and workers manufacturing shoes. If every factory using farm products in any way were exempted. nearly half of all factory workers would be taken out from under the Wage and Hour Act.

Colonel FLEMING. Some persons argue that only "a few thousand" workers would be affected if all those engaged in processing farm products were eliminated. That is absurd. Our computations show that there are at least a million and a half men and women engaged at some stage in the processing or marketing of farm products.

Secretary WALLACE. And farmers would lose, rather than gain, if wages were cut in those industries. It seems to me the Wage and Hour Act is just an attempt to put a floor under wages in order to prevent exploitation of labor by paying such low wages that workers can hardly exist.

Colonel FLEMING. That's right. The wage and hour law is not concerned with the minimum wage of persons who are already getting high wages. Just as you, Mr. Secretary, through the farm programs, are attempting to put a floor under farmers' incomes, the wage and hour law is attempting to put a floor under the income of the poorest paid industrial workers.

You remember after N. R. A., some industries began to cut wage rates very sharply. In some industries, such as cotton clothing, the wage cutters began to get most of the business. Other manufacturers had to cut wages in turn. This went on until wages in some areas were forced down to where mill hands were getting only $5 a week. The wage floor established by the wage and hour law forces manufacturers to stop this kind of thing.

Secretary WALLACE. One fact you have just brought out is of particular interest to farmers; that is, the wage and hour law does not affect the minimum wages of workers already getting high pay, but aims at raising the pay for workers at the very bottom of the income scale. Unorganized workers, almost all of them. These city workers have had to pay city rents and city food and clothing costs from a few nickels a day. These are the workers who would buy more farm products if they could only get a little more money to buy with. That is one reason why many farmers should be interested in the success of the Wage and Hour Act.

Colonel FLEMING. Some of the recent agitation against the Wage and Hour Act originated either with the canning industry or with those large corporations who run packing plants and food-distribution lines and call themselves farmers because they grow farm products which they pack or merchandise. The Department of Labor made a recent careful study of vegetable canning in seven important States. It showed that almost half of the employees were paid less than 30 cents an hour last season; 15 percent were paid less than 25 cents an hour. But the study also showed that if all these workers were brought up to the 30-cent minimum, the total labor costs would be increased only 6½ percent. Labor is a relatively small item in running a cannery—under 12 percent of the total cost—much less than the cost of the tin cans in which the fruit or vegetables are packed. So this 6½-percent increase in labor cost would mean only three-fourths of 1 percent increase in the canners' total cost—certainly not enough to injure, generally speaking, either farmers or consumers. And to the extent that inability to exploit cheap labor forced the managers to adopt more efficient methods of operation, as it always has done heretofore, the effect on costs would be even smaller.

Secretary WALLACE. Your facts there check pretty closely with our figures on farm income, especially of those farmers who produce fruits and vegetables—the very products where most of the wage and hour argument seems to center. Returns from fruits and vegetables were hardly affected by the Wage and Hour Act in 1938, as it was not until October 1938 that even the 25-cent minimum wage went into effect. In 1939, on the contrary, that minimum was in effect most of the year, and in October 1939 the 30-cent minimum became effective. Yet in 1938 farmers received $909,000,000 from the sale of fruits and vegetables, while in 1939 they received $995,000,000—almost exactly 10 percent more. With a rising level of employment and business activity, farmers gained much more from higher demand than they paid in higher marketing costs.

Colonel FLEMING. We are certain, Mr. Secretary, that the operation of the wage and hour law to date has not resulted in any general increase of farm marketing costs. We realize that most farmers and wage earners receive only small incomes, and that to help labor by taking money away from the farmer certainly is no gain in our economic situation as a whole. Labor costs in the canning industry are so small that 30 cents an hour would add only an imperceptible amount to the price of the product. However, right now we are reinvestigating to see whether any employees of canning factories and the like are receiving the 30-cents-an-hour minimum wage to the disadvantage of the farmers.

Secretary WALLACE. I am sure that will be reassuring to farmers. But a good many of the complaints directed at the law seem to be concerned with the overtime provisions of the act. The necessity of paying time-and-a-half for hours worked over 42 a week, they say, inflicts a real hardship, especially at harvest time, when processing and packing are at the seasonal peaks.

Colonel FLEMING. That argument is based on a misunderstanding of the way the act works. It permits overtime work during seasonal operations without paying the extra time-and-a-half rate, and there is ample flexibility to make that apply in any case where farmers might be hurt by limiting the hours. As it now stands the act provides that operations in cheese factories (except process cheese), cotton gins and compresses, milk plants, and many similar industries, are completely exempt from the hours limitations. In addition, packing and canning of perishable or seasonal fruits and vegetables, and slaughtering and handling of livestock and poultry, are exempted from the maximum hours for 14 weeks, during which time only the minimum wage per hour applies. The act also provides that any other industry can have its maximum hours raised up to 56 a week for a period of 14 weeks, if it shows that it is of a seasonal character. As a result of these provisions, either throughout the year for some industries, or in other industries during the 14-week period, which is long enough to take care of the harvest period, the hours provisions of the act do not apply at all, or else permit the 56-hour work-week maximum. I suspect that a good many people who are complaining that the act makes it impossible for them to get enough labor, would find if they inquired that they are already allowed to have their people work a longer week than the 42-hour maximum without overtime pay, at least for the period of rush work at the peak of the harvest.

Secretary WALLACE. One other thing that worries some farmers, I believe, is the fear that wage and hour legislation either applies now, or will soon apply, to their own hired man. You know that farm income is so low that most farmers would find it impossible to pay city wages under anything like present economic conditions. Do you feel this fear is justified?

Colonel FLEMING. Neither the wage and hour law, nor any of the amendments to it so far proposed, contemplate including farm labor in the act. At no time has farm labor been included. I should like to emphasize that. Neither the farmer's hired man, nor his harvest hands, nor his berry pickers, nor anybody employed by the farmer to work on the farm, is in any way affected by the wage and hour law.

Secretary WALLACE. This fact, together with your earlier statement of your present policy, indicates that the wage and hour law will not increase farmers' costs. But there are other reasons why farmers should support the law.

Farmers and wage earners are among the low-income groups of our population. Both have benefited from the progressive legislation of the last few years. Recent legislation for the protection of farmers could not have been enacted had not congressional representatives of the city workers joined in supporting it. For example, 63 percent of the city representatives voted for the original A. A. A.

legislation in 1933. Sixty-three percent of them voted for the revised A. A. A. program of 1938. I regret to say that the Congressmen from farm areas seem less disposed to support measures for industrial workers. While 84 percent of the urban Congressmen approved the wage and hour law in 1938, only 39 percent of the rural Congressmen voted for it. I hope that farmers come to realize the necessity for increased cooperation with labor, so that labor will continue to cooperate with farmers. I do not like to think of the consequences if farmers and city workers were to pursue an independent course, determined to get all they could for themselves without regard to the effect on the other fellow. Perhaps you would say this is a purely political consideration. Yet mere selfishness, if nothing more, urges that the farmer should support measures for the protection of labor, and cooperate with labor in social steps to the advantage of both.

Colonel FLEMING. I was interested in what you had to say about the efforts of those who are trying to bias farmers against the wage and hour law. Would you consider that attitude typical or representative of the Nation's businessmen in general?

Secretary WALLACE. No; I would not. I believe that most businessmen, as well as most farmers and most industrial laborers, recognize that real prosperity for all can come only from a steadily increasing and balanced production of goods of the kinds people want both in cities and on farms. I believe also that we can continue such a steady rise in production and employment only if buying power of consumers will rise fast enough for sales to keep pace with the expanding output. While farm and labor programs try to put a floor under farm prices and city wages, they must not make us lose sight of the fact that in the end it is increased and balanced production that we must work for. There is always the danger that farmers will get so concerned with high prices per bushel, or labor with high wages per hour, or business with high profit per unit that they will lose sight of the fact that what counts in income is not only how much you get per unit, but also how many units you sell. It is not prices or wage rates that are the real things but men at work and useful goods and services produced and consumed.

Both farm groups and labor groups have urged repeatedly that an effort be made to get all economic groups together on a program of increased employment and increased production. When industrialists can see their way clear to work with farmers and labor for increased and balanced output, that will prove the biggest single thing that can be done to increase the welfare of all.

Colonel FLEMING. I am sure that we in the Department of Labor are grateful to you, Mr. Secretary, for what you have contributed to this discussion. Amendments to the wage and hour law are being proposed that would deprive about a million and a half workers of the protection which Congress obviously intended to extend to them. Regardless of what political spokesmen for certain interests may say, I cannot believe that the pitiless exploitation of any group of our people can work out to the advantage of another group. We are still, all of us, citizens of America. We are all pretty much in the same boat. I am glad you feel that farmers and workers profit together and should stand together. And I hope the time will soon come when labor, agriculture, and business will all work together for more employment and more production as you have described.

Dr. Joseph F. Thorning on "Attorney General Jackson and the Recruits for Leftist Spain"

EXTENSION OF REMARKS

OF

HON. ALBERT J. ENGEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 23, 1940

ARTICLE FROM THE CATHOLIC REVIEW OF APRIL 19, 1940

Mr. ENGEL. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following article published in the Catholic Review April 19, 1940, reporting an address by Dr. Joseph F. Thorning, professor of sociology, on the dismissal of indictments against 16 men charged with recruiting men for leftist army in Spain:

[From the Catholic Review of April 19, 1940]

DR. THORNING PUTS FORTH SOME QUERIES—HE ASKS WHY ATTORNEY GENERAL JACKSON DISMISSED DETROIT INDICTMENTS—CHARGES HAD TO DO WITH LEFT RECRUITING—MOUNT ST. MARY'S PROFESSOR SPEAKS AT WESTERN MARYLAND COLLEGE

Addressing the International Relations Club of Western Maryland College, Dr. Joseph F. Thorning, professor of sociology and social history at Mount St. Mary's College, Emmittsburg, Md., declared that in his judgment the reasons alleged by Attorney General Robert H. Jackson in dismissing the indictments against 16 persons in Detroit, charged with conspiring to recruit men for the Leftist army during the Spanish civil war, were flimsy and illogical.

DENIES PARTISAN TREATMENT

Disclaiming any desire to discuss the case from a partisan or personal viewpoint, Dr. Thorning analyzed every phase of Attorney General Jackson's reasoning in the premises. To this end, the Mount St. Mary's professor first stated the language of Mr. Jackson in dismissing the indictments and then stated his own observations.

"(1) Attorney General Jackson said: 'No public injury seems to have been suffered from the fact that individual Spanish sympathizers, who had become so heated over that foreign conflict as to want to fight, left this country to do so.'

"This allegation misrepresents the character of the recruiting carried on in the United States by the Third International, a recognized branch of the Government of the Union of Soviet Socialist Republics.

"The Comintern is lodged in sumptuous, Government-built offices on the outskirts of Moscow. It reports to Josef Stalin, the dictator and war-lord. Everybody knows that the agents of the Third International in the United States are subsidized for their work against our Constitution and laws.

SAYS "REDS" RECRUITED AMERICANS

"It is one thing for individual, perfervid citizens to volunteer for service in foreign wars. It is an altogether different proposition for an acknowledged arm of an alien power systematically to recruit American boys to carry out the ruthless, selfish policy of the despot of the Kremlin.

"It is the organized, allegedly conspiratorial character of this Nation-wide movement which ought to be investigated to the bottom. This is especially needful when the father of one of the recruited American boys testifies to the tragic fate of his son in leftist Spain.

"Suppose that Generalissimo Francisco Franco had undertaken a recruiting job in the United States! Does anyone imagine that the laws against recruiting would have been allowed to stand in abeyance? Or that indictments once lodged against Franco agents would have been dismissed by the Attorney General of the United States?

"Chairman MARTIN DIES, of the House committee investigating subversive activities, believes that five or six thousand young men were recruited for the leftist cause in Spain. Every detail of their enlistment, transportation, and entrance into Spain was elaborated by agents of the Third International.

MARXIST AGENTS, AMERICAN PASSPORTS

"Numerous members of these international brigades have testified that on the border their American passports were seized and tossed into a basket under the eyes of Moscow commissars. Ex-comrade W. G. Krivitsky has charged that the majority of these passports, 'valuable documents,' as they are described by the United States Department of State, found their way to the headquarters of the secret police in Soviet Russia. * * *

"One of our most respected prelates, returning from South America, reported that many Marxist agents below the equator traveled with impunity upon American passports. The whole smelly mess should be the subject of investigation. Obviously, there was wholesale, flagrant violation of this country's passport laws. Why does not the first law officer of the country make a serious effort to discover the key men in this organization, capable of inducing 5,000 citizens to break the laws of this country?

"There are a good many unsavory items in this situation which ought to be brought into the open.

SHOWS CONSIDERABLE DIFFERENCE

"(2) Attorney General Jackson claims that since the statute was not invoked against those who engaged in similar activity during the Sino-Japanese and Italo-Ethiopian conflicts, neither reason nor justice requires that it be invoked against the 16 persons in Detroit.

"A simple question may clarify this comparison: Did organized brigades of five or six thousand men leave this country under the aegis of the Third International in the two above-mentioned wars? The fact is that the recruiting for the Spanish leftist cause was a systematic effort on a large scale. Nor was there the wholesale fraud with respect to passports in the Sino-Japanese and Italo-Ethiopian conflicts.

"(3) Attorney General Jackson cites the nonprosecution of alleged violators of the same law in cities other than Detroit as another reason why the indictments were dismissed against persons in the latter city.

"Does this mean that, if violation of a statute can be shown to be multiple, a specific prosecution may be dismissed? Both reason and justice suggest that, if the charges can be thoroughly probed in one locality, they will inevitably in the case of a Nation-wide movement disclose evidence that can be utilized to vindicate the law in every section of the United States. The prosecution in Detroit was the spearhead of a legal effort to secure the truth and to uphold the statute throughout the country.

SEES ATTEMPT TO OBSCURE ISSUES

"Millions of dollars were expended to obscure the Spanish issue in America; those millions were not spent by Franco supporters. Finally, thanks to the treachery of the Soviet Union both to the Allies and to its friends in America, the faint traces of light are beginning to appear on the horizon. The law in Detroit promised to initiate a long series of prosecutions, all of which would have traced the roots of the propaganda campaign that bore bitter fruit in the death and murder of American boys in Leftist Spain. American Leftists don't relish the prospect of being revealed as the dupes and puppets of Dictator Stalin.

"(4) Attorney General Jackson contends that since 'these acts were not prosecuted when they were new or current, it seems inappropriate to begin prosecution for activities so long known to the Government.'

"The Detroit indictments were drawn up, it should be noted, after August 23, 1939. This is a fateful day in modern history. It is the date on which Herod made friends with Pilate, when Hitler shook hands with Stalin.

WHY THE SILENCE, MR. ICKES?

"The whole public opinion in America, if not in the world, has undergone a vast transformation since the revelation of the Nazi-Soviet pact. It has persuaded the French people to chase the Communist traitors out of the Chamber of Deputies; it has made the British wonder why they sent a military and naval mission to Moscow; it has induced high United States Government officials, with the possible exception of the Honorable Harold Ickes, to launch repeated denunciations of the aggressions of the Soviet Union.

"The Stalinist attack on Finland completed the revulsion of public sentiment. When Soviet Russia invaded Finland in December 1939 every open-minded man and woman in America knew that Utopia had exploded. The indictments in Detroit were returned shortly after these tragic events. Needless to say, it would have been preferable to have lodged the indictments at the time of the alleged violations of the law."

The Postal Service

EXTENSION OF REMARKS

OF

HON. LOUIS LUDLOW

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1940

ADDRESS BY HON. JAMES A. FARLEY

Mr. LUDLOW. Mr. Speaker, Postmaster General James A. Farley delivered a very interesting and informative address at the convention of the Indiana chapter, National Association of Postmasters, held at the Claypool Hotel, Indianapolis, on Saturday, March 30, and by unanimous consent of the House I submit this address for publication in the CONGRESSIONAL RECORD, as follows:

It is a pleasure to be here today with the Indiana chapter of the National Association of Postmasters. Indiana is a great State. In business, industry, and agriculture it keeps its place well up among the progressive States of the Union, and I congratulate you most heartily on the progress you have made in recent years.

I am happy, too, to be in the home district of LOUIS LUDLOW. LOUIS LUDLOW is an extremely efficient and capable Congressman, and as a member of the Appropriations Committee and chairman of its subcommittee in charge of appropriations for the Post Office and Treasury Departments he has been of great assistance to me and to those who are associated with me in the Department in making possible the passage of legislation helpful to the Postal Service.

We go to him frequently and lay our problems on his doorstep, and there has never been a time he has not responded very generously in rendering substantial assistance.

I am sure you will be interested to know that the Postal Service is continuing to show marked increases in business. Each month shows more revenue and more mail volume than the corresponding month in the previous year, and I feel that the revenues of the Postal Establishment this year will set another all-time high, amounting to at least $755,000,000. You know, and I know, that when business is good in the post office, business is good everywhere. It is an accepted fact that the postal revenues are an accurate barometer of the Nation's business.

The post office is the outstanding example of a business organization in Government. It is the No. 1 agency of the Federal establishment affecting directly the life of every individual in the Nation. Its representatives are found performing their daily tasks in every city, town, and hamlet. Their daily rounds carry them over all of the city streets, all of the important highways, and many of the unimportant highways in the rural areas. Its benefits and facilities are made available to rich and poor alike. Its officials and employees are trained to function efficiently under all conditions at all times. It is a public utility so large that the average citizen finds it difficult to visualize its far-flung organization and operation, and has simply come to accept the well-known fact that if he writes a letter or prepares a parcel and places the necessary postage on it, and deposits it in the nearest mail box, he can do so with full confidence that it will reach the addressee quickly and in good order.

Obviously there is no reason for the public to be concerned about the operation of the Postal Service. It is and should always be carried on with such certainty and efficiency that public concern and discussion are unnecessary. But to you and to me who are directly connected with the management of its affairs it becomes a duty to give careful thought every hour of the day to its successful operation and to service improvements. That is the principal reason why you maintain this splendid organization of postmasters, and that is why I am always happy to attend meetings of this kind.

The organization of the Post Office Department in its headquarters at Washington is well set up. In each of the bureaus there are men and women who have devoted their lives to the service, who are intensely interested in their work, and who have followed this business as a career, and who can be counted upon to safeguard its reputation. During my service as Postmaster General I have taken advantage of every opportunity to improve this organization. I have surrounded myself with men in the policy-determining positions who are well known to you and in whom you have every confidence. I have backed up these men by selecting administrative officials with long experience in the field services, and I am happy to say that at this time we have the finest headquarters staff in the Post Office Department that it is possible to bring together for the effective operation of this vitally important business. We have gone further than that.

We have given more attention and more careful consideration to the selection of postmasters, with the result that we have men and women in those positions who are devoting their best efforts to adequately serving the people in their communities. We have fostered legislation which does away with the short term for postmasters, granting them appointments for indefinite periods during good behavior, which unquestionably will result in better service and better morale of postal employees.

We have approved and have urged Congress to pass legislation liberalizing the hours of labor and the working conditions of the employees generally. I am quite sure that we are the largest business organization in the world that guarantees life tenure to such a great majority of its employees with a guaranteed income, and with the assurance to the employees that their hours of service will be regulated on a reasonable basis that leaves them ample time for recreation and rest. We shall continue to give first consideration to the matter of service to the public, and second only to that we shall be alert and take advantage of every opportunity to provide better working conditions for the employees.

Of course, we must always keep in mind our obligation to the taxpayers, for I know it must be obvious to you that whatever money we spend over and above the actual revenues of the Service must be taken from the general funds of the Treasury, which means the pockets of the taxpayers of the Nation.

I am definitely of the opinion that the post office renders the character of service that should enable it, under wise and careful management, to pay its own way; and, as you know, in all of but 1 year of full operation under my administration as Postmaster General the Department has more than paid its way from that part of its operations which it renders to the public for hire. This is a fine record, and I am, indeed, grateful to each and every one of you who are connected with the Postal Service for this fine spirit of cooperation which has made this possible. With the continued increase in mail volume, it is, of course, necessary to increase our expenditures, but I am quite sure that the efficiency of the organization is improving with this increase in business to the extent that we can confidently expect even better results in the future. I have no doubt of this.

Since I have been Postmaster General I have had an opportunity to associate with and observe postmasters and postal employees. I am pleased to say that the personnel of this Department for loyalty, industry, and efficiency is not excelled by any other group in America. I know that the people of this Nation appreciate the fine work you are doing, and that is another reason why I take advantage of these opportunities to attend your meetings, so that I can tell you about these things and thank you for your wholehearted cooperation. Postmasters are doing good work, and postal employees are doing a fine job because they are good people, carefully selected, and happy in their jobs.

We have somewhat rigid disciplinary policies in the post office. If it were otherwise, such a large organization could not be so well timed and so serviceable to the people. We avoid, however, any harsh or unfriendly attitude toward our own people or to the public. We have a friendly organization that is eager to serve. I am sure that the postmasters of the State of Indiana understand and appreciate the importance of their positions and that they will do their part in maintaining the high standards set for them by the Department. If this is to be accomplished, however, no one can assume a self-satisfied air and take it for granted that everything is all right. On the contrary, eternal vigilance is required if we are to maintain efficiency and service which is so important. We dare not relax in the matter of supervision even for a day.

In the headquarters at Washington we formulate policies, make regulations, and from the executive standpoint manage the affairs of the entire Postal Establishment, but you folks in the field who are facing the everyday problems are the ones who actually make and maintain the Department's record for service. Some of you may at times feel that possibly your part is not of great importance; but let me assure you that the postmaster or employee in the smallest post office, or the person in the most exalted position in the service, is important in his place, and without his sincere cooperation and vigilance, the efficiency of the whole organization would be impaired.

You know that while millions of pieces of mail matter are deposited in the post offices in the principal cities of the Nation every

day much of it so deposited is intended for delivery in the smaller communities and on the rural routes. The large post offices would not be so large if they handled only local business. Likewise, the small post offices would not be so successful if their activities were limited to local communities. You must keep before you always the fact that the Postal Service of the United States is an efficient organization because it is made up of thousands of small organizations and units maintained within the system itself. You should be proud of the part you play in this great business, and you may be assured that I personally appreciate everything you do to make it function so smoothly.

It is most encouraging to find so many postmasters in attendance at this meeting. By coming here you show that you have more than a passing interest in your job; that you are anxious and willing to join with others associated in the same business for the exchange of ideas that will help you in the solution of your local problems. This establishment has been in existence for a long, long time, and I doubt that any condition could or would develop in any section of Indiana that has not existed before in some other section of the State.

Therefore, when you come to these annual meetings you are almost sure to find help in the solution of your local difficulties either by general discussion in the meeting itself or by private discussion with fellow postmasters, post-office inspectors, or the officials of the Department. Aside from that, it gives you an opportunity to know your fellow workers, to cultivate friendships which are lasting, and to have a better understanding of the people with whom you interchange mails and contact in the transaction of other postal business. Where there is a general understanding among men and women there is good will, success, and happiness.

These meetings also give me and the staff of the Department an opportunity of meeting you and securing from you first-hand your viewpoint on the things we are doing in Washington. I greatly appreciate this opportunity and look forward to these meetings each spring with genuine pleasure. May I again congratulate you on this fine State chapter of the National Association of Postmasters and wish you continued success.

Elect a Strong Congress

EXTENSION OF REMARKS

OF

HON. FRANK B. KEEFE

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 23, 1940

RADIO ADDRESS BY HON. SAMUEL B. PETTENGILL

Mr. KEEFE. Mr. Speaker, I listened with a great deal of interest on Saturday to an address by a former colleague, Hon. Samuel B. Pettengill, delivered under the auspices of the National Grange through the facilities of the National Broadcasting Co.

The address is entitled, "Elect a Strong Congress." Under leave granted I am pleased to incorporate it in the RECORD:

The National Committee To Uphold Constitutional Government is calling the attention of the citizens of this country to the great need for a strong Congress. By a "strong Congress" is meant Senators and Representatives of character, courage, and loyalty to free institutions—men and women who will fight to preserve our constitutional form of government and our system of free enterprise.

This effort will be wholly nonpartisan. The real division today is not between the Democratic and Republican Parties, as history knows them. It is between the men and women of both the great parties, on the one hand, who believe in the free institutions which have made this the greatest Nation in the world; and, on the other hand, those who are willing to confess that our great effort to be free has failed, and we must now submit our fate to a government which, whatever its name, will be a species of national socialism.

It is an issue upon which Democrats and Republicans can stand together, and must stand together, if what Lincoln called "this last best hope of earth" is to be the legacy of our children.

We hope that this effort can be made a continuing one, not with reference to the primary and general elections in 1940 alone but the elections in the years ahead.

The election of strong men to House and Senate this year is, of course, of extraordinary importance, but 2 years from now and 4 years from now, and thereafter, the importance will not be less.

In the face of the totalitarian tide that is now sweeping over the world, the necessity, as was said at Gettysburg, "that this Nation under God shall have a new birth of freedom" is greater today than it was then. That need is probably greater today than it was even when Washington lived.

If we are to have this new birth of freedom it seems beyond question that we must strengthen and support the Congress of the United States. We should retain in Congress Senators and Representatives, Republican and Democrat, who have demonstrated under fire their loyalty to fundamental principles and the courage to defend them. We have an especial obligation to the men in Congress of both parties who have made a brave fight for the independence of Congress and the independence of the courts.

While retaining these men we should give earnest thought to replacing those Senators and Representatives who have not demonstrated this loyalty nor this courage.

We cannot disregard the human factor in government. All government is necessarily administered by men. The strength of free institutions depends upon the strength of the men who administer free institutions.

The necessity for a strong Congress is greater today than it has ever been, for two reasons at least:

First. Because the Supreme Court of the United States is no longer a predictable body. A majority of the Court has agreed to the transfer of power to the executive branch of the Federal Government which has always heretofore been reserved to Congress and to the States and to you the people.

Second. What has occurred in the past few years has been in effect the equivalent of an amendment of the Constitution of the United States by judicial interpretation of the most far-reaching consequences.

For example, only the other day one of these newly constituted courts held that the practice of medicine is trade and commerce within the meaning of the Sherman Antitrust Act, written more than 50 years ago. Under any such interpretation as this, it is hard to conceive what activities of business, trade, or the professions that have not now fallen under the jurisdiction of Congress. Agriculture, mining, transportation, labor relations, wages and hours, and other matters of vast importance—these have now been turned over to Congress to deal with according to its courage, wisdom, and character.

I shall not now discuss whether this transfer of power was good or bad. On that opinions differ. It is enough today to say that the transfer has taken place and from that fact to call your attention to the importance of a strong Congress composed of strong men. The greater the power the greater the necessity that it be exercised wisely and courageously, in the same way that the selection of a general to command an army is more important than that of a sergeant to command a platoon.

At the present time the attention of the Nation is largely centered upon the question of who will be nominated and elected President of the United States during the next 4 years. You have your candidate and I have mine, but the nomination and election of your candidate or mine is not going to pay the national debt. It is not automatically going to cure unemployment either of idle dollars or idle men. It is not going to balance the Budget. It is not going to stop deficits. It will not reduce taxes. It will not of itself keep us out of war. It will not prevent the threat some day in the future of inflation, repudiation, or national bankruptcy.

Any man who is President of the United States, by virtue of his commanding position, may greatly aid in these matters, but he cannot accomplish them. If legislation is wise, there is a good chance it will be wisely administered; but if the legislation is bad, even the best administration cannot cure the evil.

With a strong Congress an ambitious President can do little harm, and with a weak Congress a strong President can do little good.

The courts can interpret only such laws as Congress enacts, and the Executive can administer only such laws as Congress enacts. Congress is the originating body both in legislation, taxation, and the appropriation of public funds.

It is an old custom among Americans to poke fun at Congress. It does no harm to poke fun at an individual Congressman; it keeps him human. But Congress itself is no joke. It is the seat of your representative democracy. It is the chief place where you have a direct opportunity to help determine the public policies under which you wish to live. If you are opposed to converting our Government into a Nazi or Fascist America, you can make that opposition count in your selection of candidates for Congress, both in the primary and general elections. And that is the chief place where you can make your opposition felt. You can make it felt if you will. And you will if you see the necessity of it.

The fact is that your beliefs can be translated into political action far more effectively by your vote for Congressman and Senator than for President of the United States. In the average congressional district about 100,000 votes are cast in the fall election, and 50,000 in the primary election. But for President of the United States about 45,000,000 votes are cast. Your vote, therefore, for Congressman in the fall election is about 450 times as important as your vote for President; and your vote in a primary election for Congressman is about 900 times as important as your vote for President.

There is another point I wish to call to your attention. Many people seem to think that in a body as large as Congress, 435 Members of the House, 96 in the Senate, 531 in all, that their vote is lost and that the vote of the individual Congressman or Senator is submerged by the number. What people do not generally realize is that the work of Congress is chiefly done by its committees. For example, the House of Representatives is divided into 44 committees to which all legislation is referred. These committees consist of from 7 or 9 up to 25 members. Legislation is first considered in committee. It is there rewritten. It is the committee that determines whether bills should be reported favorably or not. In the smaller group of the congressional committee the importance of a strong Congressman increases greatly.

In short, all legislation goes through the bottle necks of congressional committees. The personnel of these committees is therefore of vital importance. What the committees do, Congress generally does. Although bills are modified on the floor of the House and Senate, nevertheless it is a fair statement to say that what happens on the floor of the House or Senate is in effect a ratification or rejection of what the committee has done.

This can be illustrated by the struggle over the bill to pack the Supreme Court of the United States. That was referred to the Senate Committee of the Judiciary of 18 members. That bill met its death blow by the adverse report of that committee of 10 to 8; in other words, a change of 2 votes would have changed the result. It was fortunate for the Republic that there were enough strong men on that particular committee.

This case which I have used as an illustration could be repeated over and over with respect to one important bill after another. I could point out from historical facts how the presence or absence of one or two strong men on a congressional committee has changed the whole course of legislation.

But not only in the committees, but in the whole body of Congress, men—not rubber stamps—are important. On the floor it is often the case that the result is determined by a very few men giving not only votes but leadership to one side or the other. For example, in 1938 the executive reorganization bill was defeated in the House by a margin of only 11 votes, where a change of 6 votes in over 400 would change the result.

Without making a false hero of anyone, the fact remains that the legislative branch is the heart of free institutions. Freedom has always risen or declined with the strength of weakness of the legislative body. It can be safely stated that no legislature ever destroyed the liberty of its constituents so long as it retained the powers given it by them. As Thomas Jefferson said, "The authority of Congress can never be weakened without injury to the Union." We have seen this proved in the last few years.

Lincoln saw our danger and voiced it when he said, "If destruction be our lot, we must ourselves be the authors and finishers. As a nation of free men, we must live free men all the time or die by suicide."

Dutch East Indies

EXTENSION OF REMARKS
OF
HON. J. THORKELSON
OF MONTANA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 23, 1940

Mr. THORKELSON. Mr. Speaker, I regret to note that Rear Admiral Joseph K. Taussig committed himself by a statement: "That War With Japan Is Certain." The admiral should at least give Congress an opportunity to aid him in declaring this imaginary war with Japan, and he should, after having declared such war, give a more definite reason for it than he did in the article I now quote:

PLAN TO SEIZE PHILIPPINES

Admiral Taussig, now commandant of the fifth naval district at Norfolk, Va., said he believed Japan intends to try to conquer the Philippines, French Indo-China, the Dutch East Indies, and other sections of the Far East.

The Japanese program of world conquest, he said, was detailed in a memorial from Premier Tanako to the Emperor of Japan on July 25, 1927. Admiral Taussig testified he believed it without reservations, despite Japanese insistence that the purported program is fictitious.

"I cannot see," he said, "how we can ultimately prevent being drawn into war on account of the far eastern situation."

If the admiral believes that war is inevitable he should at least keep it to himself, so that it will not be headlined in the press throughout the United States. It is indeed discouraging to have high officials in our armed forces join the British war chorus, when the majority of Members in Congress and the people of the United States are opposed to such participation. The Dutch East Indies is surely no concern of ours, and we should learn to mind our own business.

It is the administration's blundering in Europe and aid to Great Britain that are now responsible for the Polish war and the invasion of Denmark and Norway. Germany would never have gone into any one of those countries had Great Britain attended to her own business. For Great Britain to make a battlefield of Norway at this time can only end in complete destruction of that little country, and I may say an unnecessary destruction at that. I am somewhat familiar with Europe, and I cannot ever recall hearing that one of the smaller European states is particularly friendly toward England. She has always been looked upon as a meddler, and for this the English people are not to be blamed, but instead the same internationalists who are meddling in the United States.

The admiral should read the release from the Washington Post, April 22, 1940, which I now quote:

DUTCH BLAME INDIES ISSUE ON BRITISH—AGITATION OVER JAPAN IS CALLED ATTEMPT TO GET UNITED STATES INTO WAR

(By Frazier Hunt)

AMSTERDAM, April 21.—A high government official tonight completely punctured for me the bubble of possible Japanese intervention in the Dutch East Indies.

"We are victims of our own busybody friends," he told me. "England would like nothing better than to drag America into war through the back door.

"If the Allies are able to involve America in the Far East against Japan, it would remove from the Allies the responsibility for checking Japan in China and fighting her in the event she should decide to join up with Germany.

"Feeding America the idea that Japan is planning an invasion of the Dutch East Indies fans bitterness which might break out into flames."

With astonishing candor this important official also restated the Netherlands' determination to run her own affairs.

"Even if we are invaded by Germany," he said, "and Britain and France were to become our allies, we would not permit them to have anything to do with our islands.

"We would help them fight Germany, but we always make our own decisions on where and how. We would not permit the British to inject themselves into the East Indies."

The article then goes on to state that Holland has 70,000 soldiers in the East Indies, with modern coast defenses at all important harbors; that she has 3 cruisers, 24 submarines, a large number of destroyers, several excellent squadrons of Martin bombers, and more than 200 seaplanes. The article then ends in the following manner:

"I insist that Holland isn't going to be bullied or thrown off balance. Everybody looks the same to us. We are determined to look after our own destiny."

Then he slyly added:

"Of course, if the situation regarding Japan should be dangerous—which we do not look for at present—then America, by a total two-way embargo, alone could bring tremendous pressure against Japan.

"But we are not telling America her business. She is quite able to take care of herself, but she must understand how much the Allies would like to involve her in a Japanese war and thus into the European war by way of the back door."

It should be clear from this that Holland wants us to mind our own business as she is well able to care of her own, and this is the viewpoint of the majority of neutral European states.

I, of course, sympathize with the admiral and the administration because of the attitude taken by Holland. But after all, when she requests to be left alone by both England and the United States, she is asking for nothing but her just rights.

As a Member of the House, I have expressed myself in favor of fortifying the Philippine Islands, and I still maintain that is the proper thing to do. If these islands were fortified with facilities for naval and air bases, protection to our west coast and to our interests in the Orient would be assured. With the islands properly fortified, neither Japan's nor any other Oriental fleet would dare to attack the west coast of the United States. This is particularly true of Japan because of her proximity to these islands.

The Philippine Islands would also provide a most valuable trading post in the Orient from which we could supply the markets of China, Siam, and India. However, this is not to be, for Congress, in spite of the admiral and high water, has decided to set the Philippine Islands free in 1946. In view of this foolish attitude of Congress, I can see no good reason why we should not shove off from the Philippine Islands in 1940.

Colonies have been profitable to all nations except the United States, and I may say will never be profitable to us so long as they are used as political footballs. The administrators of the Philippine Islands appear to have been quite incompetent to run anything larger than a peanut stand, and the result is self-evident.

This, therefore, explodes the second reason why we should go to war with Japan. Now what about China?

I may say that no nation except England has done more harm to China than Russia, for she now owns and controls about one-third of that country. Yet nothing has been said about that by anyone in the United States. I am, of course, bitterly opposed to the partition of China; yet I realize that nothing can be done until China decides to help herself. The greatest enemy of China is the many factions of Chinese that are fighting among themselves. They are, in such procedure, aiding both Japan and Russia to conquer China.

My attitude toward Japan is hands off, for I favor her fight against communism, but I oppose her destructive war of aggression in China. With this viewpoint in mind, I shall remain neutral toward Japan, for I will be wrong no matter what position I take.

We have nothing at stake in China, and we were of little aid to that country when we had an opportunity to help her. Recalling this, I cannot for the life of me understand why we should now go into fits over her plight when war has been raging there for nearly 3 years. I therefore disagree with Admiral Taussig, for I can see no reason why we should ever become involved in war in the Orient except as an ally of England. The fact is, this Japanese question is agitated by British propaganda to pull the United States into her war, a situation which arises from the fact that both Governments are overloaded with internationalists.

This situation does not only exist in Federal departments but is entirely too prevalent in the Army and Navy. It is my opinion that both military branches should be purely American and not pro-European, no matter what country is at war. This attitude is, I believe, clearly expressed by the Scandinavians at this time, for they are not clamoring for war in spite of the fact that Denmark and Norway have been invaded. They are, instead, advising hands off by England and the United States.

Who is agitating for war as a result of the invasion of the Scandinavian countries? The same people—the internationalists—who are not interested in Scandinavia but are simply interested in their own plan of world domination. It is these people that agitate war in Japan, in Europe, and even in countries where they have no particular interests. It is simply impossible for them to be neutral; and when a person cannot be neutral he cannot be loyal to the flag he serves.

In order to show how far-reaching this attitude is, I shall quote from the American Hebrew of January 26, 1940:

INVENTOR

The radio and signal officer on duty that historic afternoon when the U. S. S. *Tuscaloosa*, 400 miles off the Virginia Capes, came upon the German luxury liner *Columbus* about a mile away, was also Jewish. And he is an inventor.

Young Ensign Norman Bennett, who, like his commanding officer, Capt. Harry A. Badt, lives in Washington, in fact, was born here, is loath to talk about his thrilling experience when the *Tuscaloosa* rescued the 577 passengers and crew of the *Columbus* after it had been scuttled at sea to escape capture by the British. Naval regulations and that sort of thing, you know.

What are the facts in this case? The facts are that the *Tuscaloosa* committed a very unneutral act 100 miles outside the silly 300-mile neutral zone, or 400 miles offshore. This act was to report in plain English the position of the *Columbus*, which I grant was to inform Washington, but a message which, of course, was picked up by the British destroyer, enabling it to arrive very promptly upon the scene.

What difference does it make whether the captain and the radio and signal officer were Jewish, as this paper states? The fact is they are officers in the United States Navy, and as such they should be American and not Jewish.

No one regrets such an incident more than myself, for it casts a pall of suspicion upon a service that the American people have always looked upon as 100-percent American. The fact is our neutrality patrol is not neutral, and was never intended to be when it was placed in service. This patrol is costing the taxpayers of the United States millions and millions of dollars that could be spent in the care of our own unemployed and our neglected farm industry. No one would even contend that the patrol is necessary for ourselves. We have nothing to watch 300 miles offshore. What is the purpose of the patrol? It is to report German merchant ships and their positions in plain English to our own departments in Washington, which appears to be within the law. The underlying purpose, however, lies in the fact that such messages can be picked up by the British patrol as easily as they can be picked up in Washington. This simply means that our patroling fleet is a scouting fleet for the British Navy, and should be recalled in justice to ourselves and in fairness to every neutral power in the world.

There is another good reason why the patrol should be recalled, and that is the wear and tear on the machinery in these ships. No one can deny that a patrol in constant service, as this fleet has been, will be of little use should necessity demand that it be placed in active service. Broken-down machinery and burnt-out boilers are of little value to a fleet at war. If for no other reason than that, the fleet should be withdrawn from this silly, stupid patrol about which no one is fooled except those who ordered it in service.

There are no German ships in the Atlantic. As a matter of fact, Germany has never had a navy in the last 20 years sufficiently large to be watched, and submarines cannot operate successfully 3,000 miles from their bases. So the patrol is not for that. And the patrol is not for the British, because they come and go in and out of every port from Cape Horn to Cape Barrow. British merchantmen also leave our ports armed or unarmed as they please, and this, if nothing else, should be sufficient evidence that the Atlantic patrol is the most unneutral patrol any nation could place in operation.

The agents of propaganda are becoming very active, for they are now striking to bring about our entrance into the war. We should be equally firm in our resolve to remain at peace. Let us not forget it was the international financiers and bankers in New York that promoted and financed communism in Russia in conjunction with their brethren across the water, and it is the same crowd which is now intent upon involving the United States in war. I quote one of them from the Washington Times-Herald, April 23, 1940:

"UNITED STATES MUST FIGHT" CANADIANS TOLD—HUNT, EX-N. L. R. B. AIDE, SPEAKS AT OTTAWA

TORONTO, ONT., April 22.—Before 500 Toronto Canadian Club members—the same forum at which J. R. H. Cromwell, United States Minister to Canada, made a pro-Ally speech—Lawrence Hunt, New York city lawyer and former senior litigation attorney for the United States National Labor Relations Board, today declared that if the Allies cannot put down Hitler and Stalin in short order, "then, for our own peace and safety, we (Americans) must lend a hand."

Speaking as "a plain American citizen, a neighbor, and a friend," Hunt lashed out at "our muddy thinking, isolationist politicians, and pseudo-intellectuals, who, quite unconsciously are frantically fighting the battles of Hitler and Stalin inside America."

He reasoned that America's moral sense, her Christian ideals, and her common sense as dictated by business interests all pointed the way to United States participation in the war.

"Despite the scribblings of our literary scoffers," he said, "we Americans are a religious people and by and large a Christian Nation. Many of our religious leaders have already awakened to the Nazi-Communist peril to Christianity and to our need to gird up our loins for righteousness sake.

"Canada," he said, "kept faith." He added, "My final word to you today—and no matter what happens, don't forget it—my final word is simply this: In our own time and in our own way, we, the people of the United States of America—your neighbors and your friends—we will also keep the faith."

This article needs no comment. I can only say, if war is to be fought, let us put all these mouthpieces of the internationalists in the front-line trenches or on the first ships to cross the Atlantic.

I shall now quote an article from the New Yorker of April 20, 1940, which is also self-explanatory:

It's nice now and then to hear a man speak his mind, and we are, therefore, grateful to Mr. Jules Bache, the banker and director of the Bache collection. According to a United Press dispatch, Mr. Bache, who is 78 and sonless, in a recent address at the annual meeting of a Canadian mining company of which he is president, denounced "professional isolationists" in this country for being "simply after the votes of parents who do not want their sons to go to war," and stated that we should back the Allies "if for no other reason than that of good business." This is a forthright remark and should be widely broadcast. Mothers reluctant to

take a chance on having their sons killed or maimed for some remote ideological or spiritual reason will surely change their tune when they realize that the boys are really fighting for the Ann Arbor Railroad Co., the American Indemnity Co., the Cuba Distilling Co., the Empire Trust Co., the New Amsterdam Casualty Co., the New River Collieries Co., the United States Industrial Alcohol Co., the Tennessee Corporation, the Manhattan Elevated Railroad Co., the Chrysler Corporation, the Dome Mines Co., the Motor Products Corporation, Julius Kayser & Co., the Tennessee Copper & Chemical Corporation, and the Interborough Rapid Transit Co., of all of which Mr. Bache is a director or trustee. If this doesn't bring the obstructionist parents of America to their senses, and their boys to attention, they might bear in mind that in the absense of "good business" it may prove difficult for Mr. Bache to keep up his dues in the New York, Lotos, Bankers, Sentry, Country, Pilgrims, Economic, City Midday, Hudson River Country, Oakland Golf, Sands Point, Bath and Tennis, and Seminole Golf Clubs in this State and Florida. It will be an ugly day for the peacemongers when Mr. Bache gets posted at Sands Point.

To this article I can only add that we should conscript for war the officials in the companies enumerated and send them, with other warmongers, to the battlefields of Europe, so they can aid in the protection of their own industries. Personally, I am willing to give them the opportunity to fight in their own defense, and to protect their own millions.

I shall now quote from Propaganda for the Next War, a book published under the auspices of the British Government, written by Sidney Rogerson and edited by Capt. Liddell Hart, an English war expert:

It will need a definite threat to America, a threat, moreover, which will have to be brought home by propaganda to every citizen, before the Republic will again take arms in an external quarrel. The position will naturally be considerably eased if Japan were involved, and this might and probably would bring America in without further ado. At any rate, it would be a natural and obvious object of our propagandists to achieve this, just as during the Great War they succeeded in embroiling the United States with Germany (p. 148).

I have inserted these articles in the RECORD in order to inform the people of the real facts behind the scenes. We should not be interested in this war, and there is no reason in the world why we should give the present European war the slightest consideration.

Let us not be confused about this Hitler antagonism. Nobody likes Hitler, but no one man is entitled to the notoriety that he is receiving today. The point for us to bear in mind is that neither Hitler nor anyone else can successfully attack the United States now or at any future time, and let no one tell you anything to the contrary.

Eugenio María de Hostos: His International Significance as Educator

EXTENSION OF REMARKS

OF

HON. BOLÍVAR PAGÁN

RESIDENT COMMISSIONER FROM PUERTO RICO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 23, 1940

ADDRESS BY MUNA LEE, UNIVERSITY OF PUERTO RICO

Mr. PAGÁN. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include an address delivered August 23, 1939, at the statue of Eugenio María de Hostos on the campus of the University of Puerto Rico in Rio Piedras, before the delegates to the biennial congress of the World Federation of Education Associations by Muna Lee, University of Puerto Rico, upon the occasion of the unveiling of the bronze plaque commemorating the centenary of Eugenio María de Hostos, in accordance with a resolution, by unanimous vote, of the Eighth Pan American Conference in its convention at Lima, as follows:

The eighth conference of the Pan American States which met in Lima in January of this year, paid tribute to the memory of the Puerto Rican patriot and educator, Eugenio María de Hostos, and authorized the casting in bronze of a tablet commemorating the centenary of his birth.

It is by a series of most appropriate circumstances that we have come to unveil that tablet today, here on this campus, and in the presence of these distinguished representatives of the educational associations of the world.

It is appropriate that the Pan American Conference should recognize thus officially the greatness of de Hostos, whose life was dedicated to enriching and extending educational opportunities among so many of the peoples of America; the more appropriate still, in that our presiding officer this afternoon, the Honorable Emilio del Toro, Chief Justice of the Supreme Court of Puerto Rico, was a member of the United States delegation to the eighth conference, and has been chairman of the Hostos committee of Puerto Rico since its inception, as well as founder and for a number of years director in the University of Puerto Rico of a course based on de Hostos' Moral Social. It is further appropriate that the tablet should be affixed to this statue of de Hostos, work of the Spanish sculptor Victorio Macho and tribute of the people of Puerto Rico to the memory of the patriot educator. It is appropriate that statue and tablet should stand upon the campus of the University of Puerto Rico, a constant inspiration to its students, where the College of Education bears Hostos' name. There are indeed many bonds great and small uniting the University of Puerto Rico to Eugenio María de Hostos, although he never saw the university whose establishment he had longed for, but died in 1903, the year in which it was founded. It is not out of place to name a few of those bonds: Dr. Antonio S. Pedreira, author of the definitive biography, Hostos: Ciudadano de America, is head of the university's department of Spanish studies, and he and other members of the faculty have long been active on the Hostos committee to which reference has been made, and which was founded in Puerto Rico 6 years ago at the instance of the university's then visiting professor of Spanish, the Chilean poet Gabriela Mistral. Dr. Concha Melendez, also of the department of studies, was awarded this year by the Eugenio María de Hostos round table, the medal awarded to the Puerto Rican woman of most distinguished achievement and the one who has most contributed to Puerto Rican prestige abroad. The distinguished sons of Eugenio María de Hostos have more than once delivered addresses in these halls; and the young grandson who inherits his name was graduated from the University of Puerto Rico 2 years ago. A still younger grandson has just unveiled this memorial tablet. The university's new auditorium was inaugurated officially on January 11 of the present year, by exercises in celebration of the centenary of Hostos' birth, with participation of the insular government and of official representatives of other countries. Finally, and above all, it is appropriate that this commemorative tablet to a great educator, the seed of whose sowing still springs green and fertile in many countries, should be received solemnly and gratefully in the presence of these other educators from the four corners of the earth, who, in this world of our epoch, shaken with present violence and threats of violence to come, find, as Eugenio María de Hostos found in the troubled world of his time, that only through education can inward peace and outward security be attained.

For indeed, 100 years ago, in 1839, although the world in external seeming was much more stable than our present world of 1939, subterranean murmurs and occasional surface fissures hinted at the volcanoes boiling up underneath.

In 1839 in the United States, Van Buren was in the last year of his unpopular Presidency and the turbulent political campaign of 1840 was brewing; so that it is highly improbable that it occurred to anyone that the really significant event of that year in the States was the first application of the screw propeller to an ocean steamer. In 1839 in England, the 20-year-old Queen Victoria announced her engagement to Prince Albert and seemed not overly concerned with the proletarian riots and violence all over the country, greater that year than ever before or since. In 1839 in Prussia, Frederick William the Third, a sick old man, was ending the forty-third and ultimate year of his reign and nearing the close of his life. In Spain in 1839, General Espartero quelled the Carlists, and through the Treaty of Vergara, became the most powerful figure of the peninsula, in opposition to the Queen Mother, Maria Cristina. In 1839 in France, Molé, puppet Prime Minister of Louis Philippe, went down to defeat in the elections. In 1839 Brazil, restless and dissatisfied, was being governed by a regency for the 14-year-old Prince Pedro. Juan Manuel Rosas was still absolute dictator of Argentina in 1839; General Páez ruled Venezuela with a firm hand; and Joaquín Priet was the strong conservative President of Chile. Santa Anna continued to dominate Mexico; but the dictatorship of General Santa Cruz over Peru was ended in 1839 when he tried to unite that country and Bolivia under his control. In Colombia—or New Granada—uprisings which began in 1839 soon acquired the proportions of civil war. Boyer was the military dictator of Haiti and Santo Domingo in 1839; although the spirit of revolution and liberty which ultimately would make Santo Domingo a republic, already was stirring. In 1839 the ill-starred Federation of Central American States finally disintegrated after a troubled existence of some two decades, and the five States assumed complete independence. In Cuba in 1839, the notorious O'Donnell had just been installed as captain general. In Russia in 1839, Nicholas I, who had limited and censored education, was beginning to feel the effects of university reaction toward the very freedom of thought and extension of learning which he pretended to control. The first war of China with Great Britain broke out in 1839; and in Japan, where there was a famine, feeling ran high against the food monopolies of the merchants' guilds. In Italy in 1839, Mazzini entered into relations with the revolutionary committees in Malta and Paris, in his aim to liberate the Italian people from foreign and domestic tyranny.

And in 1839 in Puerto Rico Eugenio Maria de Hostos was born in the little city of Mayaguez on the western coast.

At the time nothing could have seemed more unlikely than that 100 years later the republics of the Western Hemisphere should unite in honoring that birth date in recognition of the multiple service of Eugenio María de Hostos in many countries to the universal cause of freedom and the development of the human spirit.

If the year of birth seemed unpropitious, the place was apparently even more so. In Puerto Rico, during the preceding year, the conspiracy of 1838 to proclaim the constitution of Cádiz had been put down with an iron hand, and martial law was to remain in effect on the island for the succeeding 30 years. The Spanish poet Salas Quiroga, who held a Government post here, summed up his impressions of Puerto Rico for that very year, 1839, in one devastating line:

"Puerto Rico es el cadáver de una sociedad que no ha nacido."

(Puerto Rico is the corpse of a society which has not been born.)

There was little contact of the island with the outer world, not even direct communication with the mother country, Spain; shipping and mails went irregularly to Habana and thence to Cádiz. Indeed, the Puerto Rican poet and dramatist, Alejandro Tapia, a contemporary of De Hostos, goes so far as to say that Puerto Rico in 1839 was still in the sixteenth century.

Padraic Colum, president of the Poetry Society of America, an Irishman and therefore himself island born, asks in one of the most caustic of his poems:

"Can it be that never more
Men will grow on islands?
Ithaka and Eriskey,
Iceland and Tahiti!
Must the engines he has forged
Raven so for spaces
That the islands dwindle down,
Dwindle down—
Pots that shelve the tap root's growth?
Must it be that never more
Men will flower on islands?
Crete and Corsica, Mitylene,
Aran and Iona!

The life of Eugenio María de Hostos, born on this isolated tropical peak in the Caribbean a century ago amid every disheartening outward circumstance, answers Colum with shattering completeness.

Hostos' first schooling was in Puerto Rico. He received his secondary instruction in Spain, in Bilbao; and at the age of 18 entered the law school of the Central University of Madrid. In the capital, Hostos was friend and companion of that brilliant group which included Giner de los Ríos, Salmerón, Azcárate, Castelar, Pí y Margall, Ruiz Zorrilla, Velera, and Leopoldo Alas. Pérez Galdós has perpetuated in one of his most vivid Episodios Nacionales an early and characteristic appearance of de Hostos as the champion of academic liberty and free speech. Galdós, a youth of 20 at the time, himself witnessed the incident which he later recorded in his novel, Prim, and which took place on St. Daniel's night in 1865. There was bloodshed that night in the streets of Madrid. The university students were up in arms against the government's attempt to suppress the free speech of university professors. "Long after midnight," says Galdós, "in the main hallway of the Athenaeum, two flocks of nighthawks still hovered. The largest and noisiest was in a huddle in the corner next to the Senate door. There an Antillean named Hostos, a brilliant and forceful young man of very radical opinions, analyzed the earsplitting racket."

The young man of radical opinions was to expend his brilliance and his force during the remaining years of his life in threefold dedication to the ideals of humanitarianism, education, and liberty. Hostos had long since been a prophet honored in his own country and abroad when in 1908, 5 years after his death, upon publication in Paris of the second edition of his Lessons in Constitutional Law, that same Athenaeum in Madrid hung his portrait upon its walls; the Scientific Society of Chile held a memorial session in his memory; and the legislature of his native Puerto Rico authorized the publication of his complete works at Government expense; a project held up then by executive veto but since again passed unanimously and put into effect by the present legislature, and the 11 volumes of the complete works now in press. Meanwhile, the League of Nations has published the Selected Essays of de Hostas in French translation as one of the volumes in the Ibero American collection sponsored by its Committee on Intellectual Cooperation; a collection designed for distribution among the great libraries of the world in order to make known the vigorous new literature of Ibero America. In further tribute, the expenses of printing the Hostos' volume were defrayed by the Governments of Chile,. Venezuela, and the Dominican Republic, and by the admirers of de Hostos in Puerto Rico.

And what had Eugenio María de Hostos done, between that first dramatic appearance as a young man of 25 on the streets of Madrid during a night of turmoil and his death 38 years later, on August 11, 1903, in Santo Domingo, in order to merit such remarkable international recognition? The record of his achievements during those years is so packed that it can be given only briefly, and in outline; but it is so fruitful that even the briefest outline indicates its importance.

Primarily, Hostos had a deep sense of the responsibilities of citizenship. Because of this he not only devoted his energies and his talent to bettering the condition of his own country but to improving that of every other country where he resided, however briefly. His nature being what it was, he could not have done otherwise. His initial public appearance on behalf of academic freedom is doubly significant, for his ardent belief in the dual necessity of liberty and education ruled his life.

Throughout his life, indeed, Hostos advocated the establishment of a Federated Antillean Republic to be composed of Cuba, Haiti, Santo Domingo, and Puerto Rico. Never an enemy of Spain, though detesting the Spanish colonial policy, Hostos "traced a vast plan of Hispanic union within which should be included the islands, the peninsula, and the Hispanic portions of the continent." In preparation for this federated republic he wished to secure the judicial and economic autonomy of the three Antilles, to be succeeded duly by a democratic confederation representative in form.

Believing that a free Cuba would be followed inevitably by a free Puerto Rico, and that, in turn, by federation, Hostos began, in 1863, the work for Cuban independence which was to continue without pause until 1898. When, in 1870, a law was passed by the Congress of the Republic of Colombia giving the bases of a working alliance between the Spanish-American republics for furthering the independence of Cuba and Puerto Rico, Hostos undertook his great trip to the southern republics on behalf of independence—a trip which, encircling South America, was to take half a lifetime and leave its record permanently inscribed in the laws and the educational systems of the countries wherein he labored.

In Santo Domingo, Hostos founded and directed the first normal school, wrote textbooks, and drew up school legislation. The Dominican historian Américo Lugo declares that what deserves to be called a national literature did not begin in Santo Domingo until after the fructifying presence there of Eugenio María de Hostos.

In Peru he founded a newspaper which as its primary purpose advocated Cuban independence. Its scope was not limited to a single theme, however, and through its columns de Hostos wages for Peruvian workers, and also roused public opinion against the exploitation of Chinese laborers in the mines. When the Peruvian Government had the project for the Oroya railroad under consideration, editorials by de Hostos pointed out clauses contrary to the public interest; and he had the satisfaction of refusing $200,000 offered him by the would-be incorporators ostensibly "for the Cubans," as well as of seeing the offending clauses deleted.

In Chile, through another newspaper campaign incidental to his major theme of independence but none the less forceful for that, de Hostos won for Chilean women full recognition of their right to enter the university and to obtain professional training in law and medicine.

In Argentina, de Hostos defended energetically in the press the idea of the Transandine Railway, an idea which he had been first to propose. And when the railway did come into existence, the first locomotive that crossed the Andes bore the name of Eugenio María de Hostos.

In Venezuela, in Chile, in his native Puerto Rico, he contributed to raising the standards and developing the systems of public education.

Brazil, Colombia, Peru, Argentina, and Chile knew him also as a brilliant journalist, never swerving from his campaign for Cuban and Puerto Rican independence, and always conscious of the responsibility, as of the power of the press.

In view of this tremendously productive and inspiring life, it is not too much to say of Eugenio María de Hostos, as he himself said of Hamlet in his famous essay on the play, that he was "a moment of the human spirit"; not a moment of gloom and doubt and indecision, but a moment of resolution and high-hearted courage and faith not to be extinguished even by the hazard of birth in an impoverished sea-girt Caribbean colony, in that harassed and threatening period which was the year 1839.

Shipment of Raw Materials to Japan

EXTENSION OF REMARKS

OF

HON. JAMES M. BARNES

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 23, 1940

LETTER FROM THE CENTRAL CHRISTIAN CHURCH, JACKSONVILLE, ILL.

Mr. BARNES. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following letter:

CENTRAL CHRISTIAN CHURCH,
Jacksonville, Ill., April 16, 1940.

The President and Congress of the United States:

We, the members and friends of Central Christian Church, Jacksonville, Ill., assembled for public worship on Sunday, April 14, 1940, after careful consideration of facts, urgently request you to use all your power in procuring legislation which will pre-

vent shipment of raw materials to Japan by the United States of America. We refer to raw materials from which munitions may be manufactured to continue the war in China.

Very sincerely yours,

V. V. GLASSNER,
Chairman of the Joint Board, Central Christian Church.

Gold and Its Power, Part 9

EXTENSION OF REMARKS
OF
HON. J. THORKELSON
OF MONTANA
IN THE HOUSE OF REPRESENTATIVES
Friday, April 19, 1940

Mr. THORKELSON. Mr. Speaker, in this, my ninth article on Gold and Its Power, it is my desire to call attention to the preceding discussions and ask those who are interested in this international gold conspiracy to read all of them. Gold, of course, is the power which has been and which will be used to establish world domination, for it alone is the international standard medium representing all values. We hear much expression of fear, or let me say speculation, as to whether or not gold may be abandoned as a world standard for currency, and to that I can only reply by stating that there is not the slightest possibility of such departure. This is particularly true if you can only realize that the gold mines in South Africa, the largest gold-producing field in the world, are owned or controlled by the internationalists, and that the same Shylocks through the power of gold maintain a position in the English Government which dominates the British Empire.

Recorded profits in 38 of these South African mines are huge, and many of them are listed close to 100 percent, 1 of them reaching as high as 170 percent. In 1935, 1 of these mines produced gold valued at £6,117,316, and in 1936 the same mine paid a dividend of 110 percent.

In 1936 the Crown Mines, Ltd., paid a dividend of 100 percent and produced 1,022,626 ounces of gold. The standard value of this production amounts to $21,137,679.42 at $20.67 per ounce, the price we paid for the gold prior to the adoption of the Gold Reserve Act. Since President Roosevelt took office in 1933, the Gold Reserve Act has been passed, and the price of gold raised from $20.67 to $35 per ounce. The 1,022,626 ounces of gold, therefore, represents $35,791,910, and is in actual dollars $14,654,230.58 more than it would have cost us in 1932.

These $14,654,230.58 are, therefore, a Roosevelt gift to the British Empire, taken from the taxpayers of the United States. I have already called attention to the fact that this loss to date amounts to over five and one-half billion dollars, and accumulates at the rate of $14.33 for every ounce of gold recorded on the Treasury's daily balance sheet. This $14.33 represents a loss to us of 69 percent, which the Government borrows from the Federal Reserve banks on the credit of the United States.

Our international banking houses pay $35 for every listed ounce of gold and this credit pays for merchandise bought by foreign governments in the United States. The gold is shipped to the Treasury, and for this the Secretary of the Treasury issues a disclaimer in the form of gold certificates, which are issued to the governors of the Federal Reserve banks and to the international bankers.

From this we may understand that the Treasury Department, the Federal Reserve Board, and the Federal Reserve banks work hand in glove with the international money changers, whom this administration set up in business in 1934. The Federal Reserve and its associate banks is in conjunction with the international banks the largest monopoly in the world. The next largest monopoly is our own Government and its many departments and bureaus. These monopolies are very much alike, for they are parasitical and destructive to their host. Let us not forget that the international Federal Reserve banks are using gold money and credit as they please and that this money and currency in the larger central banks is used to build up their own power. Deposit money in the larger banking institutions is now used to destroy the value of property by strikes, boycotts, and other subversive activities, so that this property may be bought for even less than the now devaluated international dollar.

This in a sense is the same thing that happened in Germany, differing only in that gold is not withdrawn from the United States as it was in Germany. It is similar in that gold has been withdrawn from public use and set aside as the property of the international bankers. It is also comparable with the German inflation in that property and business values have been reduced 69 percent as a result of the reduced value of the dollar, without increase in the prices of real estate, merchandise, or balanced reduction in dollar credit. In other words, real estate, industry, and business are taken over by the international money changers, in a sort of painless procedure. But do not be fooled; the result will be exactly the same as it was in Germany when the people found they had lost all to the internationalists. We will awaken and find ourselves in the same position.

As a matter of fact, nearly all large industries except the Ford Motor Co. are now owned or controlled by the international bankers. Do not forget that the money changers own or control the national press, movies, radio, news service, bookstands, and news-distribution agencies. Do not overlook the fact that ownership and control of these properties has been accomplished by using bank-deposit money, placed in the banks for safekeeping or check accounts. The most important part of this extraordinary transaction is: This steal of gold, our own property, industries and business by the internationalists has been accomplished by illegal use of money that belongs to the people of the United States. In other words, we, the people, have been robbed and sold out with our own money. I shall now quote the Daily Balance Sheet, so that you may understand that we do not own the gold in the Treasury:

[Office of the Secretary of the Treasury]

DAILY STATEMENT OF THE UNITED STATES TREASURY, APRIL 16, 1940

(Compiled from latest proved reports from Treasury offices and depositaries)

CURRENT ASSETS AND LIABILITIES

Gold

ASSETS

Gold (oz. 531,745,447.5)		$18,611,090,663.94
Total		18,611,090,663.94

LIABILITIES

Gold certificates:		
Outstanding (outside of Treasury)		2,883,125,559.00
Gold certificate fund—Board of Governors Federal Reserve System		13,450,532,390.77
Redemption fund—Federal Reserve notes		8,670,751.14
Gold reserve		156,039,430.93
NOTE.—Reserve against $346,681,016 of United States notes and $1,163,222 of Treasury notes of 1890 outstanding. Treasury notes of 1890 are also secured by silver dollars in the Treasury.		
Exchange stabilization fund		1,800,000,000.00
Total		18,298,368,131.84
Gold in general fund:		
Balance of increment resulting from reduction in the weight of the gold dollar	$142,702,970.72	
In working balance	170,019,561.38	
		312,722,532.10
Total		18,611,090,663.94

I have inserted the Daily Balance Sheet so that there will be no dispute as to my statement. The gold certificates outstanding, outside of Treasury, and in the gold-certificate fund amounts to $16,333,657,949.77 and is as the statement shows, a liability against the gold held in the United States Treasury. This gold is therefore the property of the international money changers.

The remaining items on the Daily Balance Sheet are self-explanatory, except that which is called increment, and that represents the administration's imaginary profit.

The item to which I wish to call your attention is one I have inserted in the RECORD before, which I shall now repeat, so that you will know that the gold now in the Treasury is not owned by the people or by the Government. I refer to a statement by the Department of Commerce in which it reveals that foreign nations, probably England and France, are credited with $7,883,000,000 at 25.8 grains nine-tenths fine. These industrial securities represent an issue that existed before 1933 and are, therefore, in the old gold-standard dollar. When this dollar is converted into the same dollar as is listed on the Daily Balance Sheet, the investment amounts to $13,348,088,985, and will reduce the gold assets by this amount. It should now be clear that when this amount is added to the outstanding gold certificates, the liabilities against the gold in the Treasury vaults exceed $29,000,000,000. We are, therefore, as I have said before, a debtor Nation, in spite of the fact that most people believe we are buried in tons of gold.

The exchange stabilization fund was originally $2,000,000,000 in gold, which the President and the Secretary of the Treasury obtained in a highly questionable manner from a new crop of liberal Congressmen. These public servants were indeed liberal with the property of the people who elected them to office, and they were also liberal in other legislation that has been enacted in the last 8 years. The Gold Reserve Act and other legislation have robbed the people of property, rights, and liberties.

The $2,000,000,000 gold-stabilization fund is a sop which the internationalists handed to the President and to the Secretary of the Treasury to distract the Executive's attention while the international bankers by an act of Congress secured possession of the gold.

The truth is that there never has been the slightest need for a stabilization fund, because the international dollar contains 13.7142+ grains of fine gold. The 200,000,000 gold dollars missing from the $2,000,000,000 stabilization fund, which is listed on the daily balance sheet as $1,800,000,000, is used by the Secretary of the Treasury as he directs. This $200,000,000, is not used to stabilize our money or bonds, for currency is secured upon the gold in the international dollar. This money is instead employed in gambling or speculation to sustain or support English and French bonds, for they are not secured by gold. This act in itself is unneutral and may be considered as direct military aid to England and France.

In view of all this, it is foolish for business to mark time, for nothing but bankruptcy lies ahead of all industries which are not secured by gold or gold certificates.

That we cannot go on should be evident, as we realize that the national debt will be $45,000,000,000 at the end of next June and that only $3,000,000,000 may be collected of the $13,000,000,000 contingent foolish Federal transactions. The end of this fiscal year may therefore leave us with an actual indebtedness of over $55,000,000,000, a sum that I am sure even the most optimistic financial expert will admit cannot be paid off under the present administration's mismanagement. This should be evident, for we have now reached the point where increase in taxes will reduce earnings of private business and therefore Federal income. Catastrophe cannot be averted unless an administration is elected which will restore our Government to its original form as given to us by the founders of this Republic.

It should be clear from this, even to the deluded American millionaires who are afraid to call their souls their own, that the legal-tender money we are now using will leave them dead broke when our currency is repudiated. No one is protected except those who are holding gold certificates, and even they are not fully protected when we bear in mind what may happen to our gold reserve should foreign governments begin to cash in American industrial securities. I can only say what a sad awakening it will be to some of our wishy-washy millionaires who are short on nationalism but long on internationalism.

It is also a misfortune that both major political parties are financed, directed, and controlled by the same money changers, and a calamity that both parties when in power are advised by the same unseen rulers of the invisible government.

Our greatest need today is a political party free from internationalistic control or domination by those who now control gold, money, and credit. If this cannot be accomplished, safety of the Republic may be found by sending only such men to Congress as will bind themselves to support the Constitution of the United States as it is written, and to repeal all laws which are now in conflict with that document.

The powers of the international bankers must be destroyed and this can only be accomplished by placing an embargo on the gold, by repudiation of gold certificates, and by suspension of all foreign payments in gold. Gold should then be set aside as security for our own people, with export prohibited until all nations are back on the gold standard. The United States Government should own gold and all other money, and bankers should be placed on exactly the same basis as an individual who goes to the bank to borrow money. The Federal Reserve and all other banks should be permitted to operate under private ownership, but they should, like individuals, be compelled to leave sufficient securities for money or credit obtained from the Treasury of the United States.

The Nation's wealth was never intended to be owned and monopolized by a select few, but was instead to be left in various depositories throughout the United States as an aid to the people to develop their own communities. It was in such manner this Nation prospered.

Congress should, for the welfare of the United States, dissolve all bank corporations and banking chains, for they are not only harmful but will, if not curbed, eventually acquire ownership and control of all our Nation's industries and business. When you realize that this is accomplished not by skill, not by intelligence, but by the very fact that we allow to this crew of international wreckers the unrestricted use of gold, money, and credit that rightfully belongs to the people of the United States, you also realize the need to look after your own Government.

Administrative Procedure

EXTENSION OF REMARKS

OF

HON. CARL A. HATCH

OF NEW MEXICO

IN THE SENATE OF THE UNITED STATES

Wednesday, April 24, 1940

ARTICLES FROM THE WASHINGTON DAILY NEWS AND THE WASHINGTON POST

Mr. HATCH. Mr. President, pursuant to the permission granted me, I present for printing in the Appendix of the RECORD an editorial from the Washington Daily News of April 22, 1940, entitled "Bureaucracy and the Courts"; from the same issue an article by Hugh S. Johnson entitled "One Man's Opinion", and an article from the Washington Post, by Ernest K. Lindley, discussing the Walter-Logan bill, under the headline "Less Than Perfect."

The editorial and articles are as follows:

[From the Washington Daily News of April 22, 1940]

BUREAUCRACY AND THE COURTS

Just before the Logan-Walter bill was passed overwhelmingly by the House last week, the veteran Representative HATTON W. SUMNERS, of Texas, spoke in support of it.

A speech by Mr. SUMNERS always commands attention in Congress. This one commanded unusual attention. For he is chairman of the Judiciary Committee, which had approved the bill. He is an authority on constitutional law. And for many years, under Republican administrations as well as since his own party came to power, he has warned against the menace of an uncontrolled bureaucracy. Discussing the Logan-Walter bill, Mr. SUMNERS said, in part:

"In the executive branch of the Government now there are nearly a million people. The President of the United States cannot

know who those million people are. He cannot know what they are doing with the governmental powers trusted to them.

"Contrary to all our philosophy of government, we have placed in one appointed personnel all three powers of government. They make the rules, which have the force of law; they construe the rules; they enforce the rules.

"You are elected by the people, but you know that as Members of Congress you cannot supervise the bureaus, and you do not know what they are doing. You know the President cannot supervise them. That means that those in whom we have placed all three powers of government, an appointed personnel, are operating without supervision in America today. That is all there is to it. There is nobody who can supervise them.

"Now, where can we put the power to supervise? Gentlemen get up here and talk about how many judges we must have (if the Logan-Walter bill becomes law). There is no use creating a condition that makes it necessary to have judges and then complaining because you have the judges. If anybody is to sit in judgment between these employees and the people, you must have judges to do it. If you do not want the judges, you ought not to have created the condition.

"This bill is subject to all sorts of criticism. It is pioneer legislation. But we have only this choice—either to turn the American people loose, subject to the power of an appointed personnel who have all three powers of government under their control, or we have got to make it possible for the citizen to resort to the only place under the Anglo-Saxon system of government that an aggrieved person can go to, and that is the courts of the country.

"That is what this bill attempts to do."

There was the best possible answer to those who have argued that the Logan-Walter bill would burden the Federal courts with new work. If more work for judges is necessary to control bureaucracy, well and good. But the fact is, we believe, that the bill would put bureaucracy on notice to use its powers so carefully, with such regard for the rights of citizens and such determination to avoid abuses that could be appealed to the courts, that eventually there would be much less work for judges.

[From the Washington Daily News, April 22, 1940]

ONE MAN'S OPINION

(By Hugh S. Johnson)

The vote—almost 3 to 1—in the House in favor of the Walter-Logan bill to check our rush in the direction of Nazi bureaucracy certainly reflects a public opinion both that the rush exists and that the people want it stopped.

Naturally the bureaucrats don't like that. Naturally they have called in their pet columnists and fed them their documented arguments against it. That happens frequently, on both sides, in Washington as issues arise. For the columnist it saves a lot of leg work. But it's just as easy to get the other side's documented case, too.

If any kibitzer omits to do that and gets his neck far enough out, it is perfectly civilized warfare for adversary advocates to crack it. But is it so kosher to admit incapacity to grasp the problem yourself and then, on the basis of testimonials for one side alone of a legislative case, to accuse advocates of the other of being so derelict in their duty to the public as to preach without even knowing what the bill is about?

This is the janissariat line of New Deal columnar attack on this bill. It starts: "There are problems too intricate readily to be grasped by newspaper columnists." In this admitted self-emasculation the commentator wheels into line a battery of "experts" to substitute their dicta for the alleged columnar and editorial incapacity.

Most of these self-serving "experts" are the bureaucrats themselves or their lawyers—exponents of centralized, personalized, and self-perpetuating Presidential power. Another "expert" is the Lawyers Guild. That is the radical rump of secessionists from the American Bar Association. It is mainly made up of pinkish New Deal lawyers. It got so stinking with communism that even such "progressive" members as Ferdinand Pecora and Morris Ernst threatened to lead mass resignations because the guild refused to condemn Communist as well as other dictatorships. No wonder it fights this bill to curb our trend toward pinkish dictatorship. Finally, there is a small interlocking group of Wall Street lawyers whose attitude and opinion I don't yet pretend to understand.

But the blatant unfairness of this approach is that no mention whatever is made of the fact that contrary to these, who are mostly exponents of a radical political formula rather than a legal opinion, stands the overwhelming weight of American professional judgment—the American Bar Association, the Judiciary Committees of both House and Senate, almost a 3-to-1 majority in the House and a great potential Senate majority most of whom are lawyers, 22 State and city bar associations, and such leading scholars of the law as Roscoe Pound, and such governmental experts as Frank Lowden and James R. Garfield, not to mention some of the greatest labor, trade, and agricultural organizations in the country.

Maybe this radical minority array convinces a commentator who finds this subject "too intricate to be grasped." The array isn't important to me—on either side. I have lived with administrative law, organization, and practice almost to the extent of Billy Baxter's dachshund, which got that way—so low and long—because it was "brought up under a bureau." I have studied and read and written about the Walter-Logan bill for more than a year. There isn't anything about it "too intricate to grasp," even by a columnist. A thing that is easier to grasp is that it is human nature for men who have grabbed personal power never to want to give up any of it or to have its use regulated, supervised, or even scrutinized.

This bill has had plenty of debate and study. It goes to the Senate, which once favored it unanimously. The tactics of the opposition is not to enter debate or voting on it but just to stall and strangle it by the dilatory tactics of a small minority legislative bloc which may have power to frustrate majority rule by a parliamentary trick. That is not democracy. It is legislative Hitlerism. It is the very kind of things in Congress which this bill is designed to check in the executive department. Yet it is the kind of thing in respect to which these strong-arm goose-steppers and their columnist claquers call themselves "liberals." They are the worst reactionaries in the country.

[From the Washington Post of April 24, 1940]

LESS THAN PERFECT

(By Ernest K. Lindley)

A REPLY TO CRITICS

This column's recent comments on the Walter-Logan bill have been jumped upon by Col. O. R. McGuire, chairman of the special committee on administrative law of the American Bar Association, and Gen. Hugh S. Johnson.

Let's take first the reply of the colonel, who has made it his job to lobby this bill through Congress. He begins by listing organizations which have approved the bill. They include the National Grange, the A. F. of L., the National Retail Druggists' Association, the Master Plumbers' Association, and the National Electrical Contractors' Association. Do the members of these organizations, or their executive bodies, claim to be experts on the machinery of government? In the whole lot of them there are probably not a dozen men, including their general counsels, who have more than the foggiest notion how the Walter-Logan bill would work in practice.

The colonel also lists numerous endorsements from bar associations. Judging from the few samples I have examined, the bar associations haven't a clear idea about the actual effect of the bill. They are really for it "in principle."

Colonel McGuire goes on to boast about the backing of the American Coalition of Patriotic Societies, and to do a bit of "red" baiting of his own at the expense of the National Lawyers' Guild, which has disapproved the bill. He finally gets around to a few experts. But whether they all are for the bill in detail is open to doubt. The colonel himself admits that the bill may not be "perfect."

The general is more fervid than the colonel in his "red" baiting. He also scorns my remark that "there are problems too intricate readily to be grasped even by newspaper columnists." He assures us that he is fully acquainted with the administrative law, organization, and practice. He ought to be. But when I read what he writes about the Walter-Logan bill, I can find no reason for excluding him from commentators who are over their heads. The main difference between us is that I know I am not equipped to write on this subject without consulting experts.

Neither the colonel nor the general is more heartily in favor than I am of the avowed purpose of this bill to protect the citizen from administrative absolutism. In fact, it was what General Johnson put over as N. R. A. Administrator which made me really anxious about the dangers of a power-grabbing bureaucracy. The N. R. A. was the nearest thing to a Nazi-Fascist set-up we have had in this country. However, unlike some observers, I never thought that the general, despite his cavalry training, had the inclination or the capacity to develop into "the man on horseback."

It is fair, I think, to regard the impressive backing for the Walter-Logan bill cited by Colonel McGuire as backing for the principle or purpose of the bill. The vote for the bill in the House, and earlier for its companion in the Senate, can only be regarded as a vote for its objectives. The confusion of the Members of the House as to its practical effects can be seen readily by anybody who will take the time to read the CONGRESSIONAL RECORD.

The Walter-Logan bill is condemned not only by experts throughout the Federal Government but by distinguished private practitioners who have taken the time to study it. In the January issue of the Louisiana Law Review it was ripped to pieces by Alfred Jaretzki, Jr. Mr. Jaretzki is not a member of the "janissariat" but a member of the highly conservative Wall Street firm of Sullivan & Cromwell. After examining the bill, Mr. Jaretzki expresses the opinion that it cannot have been carefully studied by the American Bar Association committee on administrative law, headed by Colonel McGuire, or by numerous other distinguished lawyers who have lent their support.

There isn't room here even to detail Mr. Jaretzki's criticisms of the bill. But he concludes that the bill is "vitally defective" and that a thorough study of the operations of many Federal administrative agencies is needed before a suitable bill can be drawn.

The bill has been condemned by highly conservative leaders of the New York City bar, headed by John Foster Dulles, one of Thomas E. Dewey's official advisers. The basic flaws found by Mr. Dulles and his colleagues have not been effectively answered in any columns, committee reports, or speeches I have seen.

On April 18 Representative WALTER, coauthor of the bill, cited Louis Caldwell, formerly General Counsel for the Radio Commission, now a private practitioner in Chicago and Washington, as one of the distinguished gentlemen who contributed to the drafting of the

original bill. This is on page 4733. In the Appendix of the RECORD, page 2122, begins a long memorandum by Mr. Caldwell tearing the bill into ribbons.

One of the main faults in the bill is that it tries to force a single formula on almost all the administrative agencies of the Government. The unanimous verdict of the experts is that there must be variations according to the type of power exercised by the agency.

There has been plenty of half-baked legislation in Congress during the last several years. A decent administrative agency, with a little help from the courts, often can make sense out of an ambiguous or half-baked law. But this bill deals with the machinery of administration itself. It is a case where good intentions will have a ruinous effect unless they are implemented by intelligence and detailed expert knowledge.

Antialien Legislation

EXTENSION OF REMARKS

OF

HON. LEWIS B. SCHWELLENBACH

OF WASHINGTON

IN THE SENATE OF THE UNITED STATES

Wednesday, April 24, 1940

RADIO ADDRESS BY HON. JAMES E. MURRAY, OF MONTANA

Mr. SCHWELLENBACH. Mr. President, on last Monday night the junior Senator from Montana [Mr. MURRAY] delivered a very interesting address over the Mutual Broadcasting System on the subject of antialien legislation. I ask consent that the address may be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

First, I wish to thank the Mutual network for this opportunity to discuss a problem of paramount importance to all Americans.

My subject relates to the danger threatening our country through the flood of antialien legislation now being presented in the Congress of the United States. These proposed laws, ostensibly directed against the foreign-born in our country, are in reality leveled against all American civil liberties. They present a problem of vital concern to every American citizen, whether born in this great democratic Nation or on foreign soil. They present a question affecting the welfare, the liberties, and the living and working standards of every person under the American flag.

It is particularly fitting that this question should be considered while we are celebrating the anniversary of Thomas Jefferson, one of the fathers of our American democratic system. Therefore, at the outset, I will take just a little time to remind you of the things that Jefferson and his fellow patriots fought to establish in this country more than 150 years ago.

First among the things that Jefferson and his compatriots struggled to establish in this Republic was the ideal of equal rights for all, the ideal of fair and equal treatment of all people who live in this country of ours. Nothing was said in the Declaration of Independence, in the Articles of Confederation, or in the Constitution of the United States about special privileges for any group, no matter how large; nothing about special disabilities or penalties on any group, no matter how small. All were to have the same rights and privileges, all the same restraints and duties, none to be singled out for special treatment of any kind. This was a great and compelling ideal. Jefferson was able to gather thousands of men—workers and farmers of his time and scores of devoted leaders—around him in the struggle to establish this ideal as a real and living thing. He was able to lead the people through years of suffering and privation and finally establish in America the proposition that all men have equal rights and duties under the law—none greater, none less.

Today there is a well-organized, shrewdly directed, powerfully backed plan afoot in the Congress of the United States to rob not only minority groups of their rights and duties under the Constitution but to actually invade the rights and privileges—and the duties—of all people who live in this Republic. If this program is allowed to proceed, they may seek to set up a regime of concentration camps, of universal registration, or search and seizure without warrant, such as has not been paralleled in this country since the time of George the Third.

It is always well to go back into American history and review the lessons which that early period taught us. In Jefferson's time the young Republic was affected by this same antialien menace, a revival of which has developed recently. In 1798 there was enacted in the Congress a set of four measures, which have been referred to ever since as the alien and sedition laws, creating a most dangerous period of unrest and reaction and seriously threatening our democratic institutions. That movement in our early history almost wrecked the Nation, but through the wisdom, the courage, and the integrity of the leaders of our country during that grave period we survived the menace.

But history again is repeating itself. Scores of bills have been introduced in Congress at this session precipitating the same problems that threatened the foundations of our Government in its early life. These bills are known as antialien bills, and they are uniformly based on principles and ideas which are thoroughly alien and un-American. Some of these bills are designed to deport, without cause, all aliens; to fingerprint all the foreign-born; to hold without trial all aliens who cannot be sent back to their own countries; to discharge summarily, without cause, all foreign-born workers in industry. Some of these bills propose to exclude all noncitizens from receiving any of the benefits of our social-security legislation, enacted by Congress under the Constitution without any intention or purpose of discriminating along lines of racial or national origin. This antialien program is taking direct form today in these bills presented in Congress, to the tune of 60 or 70, and are intended to accomplish the harsh results I have just mentioned. I cannot, of course, take the time to analyze in detail these proposed measures, but I do wish to call the attention of my listeners tonight to the dangers they present to our liberties and our rights, and to urge most solemnly careful study and opposition to the enactment of such un-American legislation.

The men like Jefferson and Washington, who made our country a democracy, did not do so simply in order to create something that would look good on paper. They struggled and sacrificed to create a democracy because they knew that only under such a system of government could men hope to preserve their liberties and establish a better way of life. When our Revolutionary ancestors wrote the Declaration of Independence, the Articles of Confederation, and the Constitution of the United States they saw to it that those documents contained no discrimination against any people, against any race, or against any creed. They saw to it that all people in the United States were guaranteed equal rights and equal duties under the basic laws of the nation they were founding.

The United States was settled by immigrants. We are indeed a Nation of immigrants. Many came to this country to improve their economic condition, but a larger number came to escape the religious and political persecutions visited upon them by despotic rulers in their native lands. Following the earliest American explorers from Europe came refugees from the various countries across the ocean. These immigrants sacrificed their worldly possessions and risked their lives in flimsy craft on a dangerous and uncharted ocean to reach a land of freedom. These early immigrants soon became the advanced thinkers and citizens of this country. They expressed their appreciation of their new-found freedom by adopting this new land as their own and by spending their strength and lives in fostering its growth and preservation. As a result, we find today in America traces of the influence of nearly every civilized race and every nation of the Old World.

These immigrants hewed our forests, erected their primitive homes here, cleared and cultivated our fields, and year by year pushed the frontier westward. They cut roads through the wilderness, dug the first canals, built our railroads, and constructed and developed our early industrial life. They developed our vast mineral deposits and wrested from the ground great natural wealth which has made the United States the richest nation on earth. In the past century and a quarter 38,000,000 aliens have landed on American shores and have contributed to the building of one of the greatest and most unique nations on earth.

Every citizen welcomes appropriate laws to protect our country from subversive activities carried on by any group, whether alien or otherwise. People who engage in criminal acts or conspiracies against our Government should be effectively dealt with. But now, in a period of industrial distress and unrest, there are certain people who would have us believe that the alien constitutes some sort of a special menace and that we should take immediate steps to punish him or remove him from our midst. They want to make him the scapegoat for all the ills that infest the Nation. There are three and a half million persons in the United States today who are not citizens, according to the estimates of the Department of Labor. Statistics show that they average up with any other group in the country. Records establish that they have, in fact, a lower crime ratio than any other group. These aliens are becoming citizens as rapidly as their conditions permit.

A short time ago there was introduced in Congress a bill which would make possible the naturalization of a quarter of a million aliens who served in the armed forces of the United States during the World War—aliens who were willing to offer their lives for the preservation and defense of our country. But, in contradistinction to that sort of legislation, we now have a whole flood of bills based on an entirely different ideology. Today a group of men in Congress would tell us that America is in danger of destruction unless we pounce on the foreign-born, the noncitizen, and deport him, imprison him, fingerprint him, and deprive him of rights and duties that all people living in America have heretofore enjoyed.

There is not the slightest justification for this violent un-American crusade against the so-called aliens in this country. For one thing, there are not enough noncitizens in this country to constitute the slightest menace to anything. The Federal Government, through the Department of Labor, tells us in official figures that the number of noncitizens in the United States is decreasing by scores of thousands each year. Immigration has been practically at a standstill since the beginning of the depression. My information from the Department of Labor is to the effect that there is no truth to the propaganda that aliens are flooding into this country at the present time. In truth, less than half the permissible quota are being admitted. From 1931 to 1938, as shown by the United States Government figures, 227,000 more people left the United States than came into it. Our population now is practically stationary. As a matter of fact, the cutting off of immigration plus the fall in the

birth rate of this country will soon bring about an actual decline in our population if present conditions continue.

In no sense is America in danger through the presence of a small minority of foreign-born or noncitizens in our midst. The real danger to America comes today from those who would seek to create dissension and develop racial bitterness and animosity among our people. The actual danger which confronts us is the danger that these threatened attacks on aliens and noncitizens may lead to a general assault on American democracy. Attacks on the rights of foreign-born people in this country will surely lead to a break-down of all American civil liberties.

I am opposed to this antialien legislation because I think it is altogether un-American and will lead to the dangerous results described if not stopped. This proposed legislation is certainly not in accordance with American tradition or with the spirit of the early emigrants to America, who were the real founders of the Nation. This legislation generally is sponsored by reactionary political groups and will, without the slightest doubt, lay the foundation for further reactionary legislation designed to discriminate against minority groups generally. There is no benefit to come to this country in attempting to make scapegoats of our foreign-born people who have committed no wrongs and are abiding peacefully by the laws of the land. No good can come from such an unjust and inhuman program.

We are living in difficult times. Devastating wars and racial conflicts have spread a fearful menace over the entire world. It behooves the American people not to permit these racial and national upheavals and animosities of Europe to be transplanted on this side of the Atlantic. Let us on this hemisphere hope that the light of liberty, which inspired millions of our people to cross the seas, may not be extinguished; that through the action of the Congress it may be maintained strong and effulgent for all the children of men throughout the world, guiding their footsteps to freedom and to justice.

Opinion of Circuit Court of Appeals in Opp Cotton Mills Against Administrator of Wage and Hour Division

EXTENSION OF REMARKS

OF

HON. JAMES M. MEAD

OF NEW YORK

IN THE SENATE OF THE UNITED STATES

Wednesday, April 24, 1940

OPINION BY JUDGE McCORD

Mr. MEAD. Mr. President, I ask to have printed in the RECORD the opinion of the Fifth Federal Circuit Court of Appeals, at New Orleans, upholding the validity of the 32½-cent-an-hour textile wage order.

I think the Members of this body may well take into account how far we have come since the days when legislation barring the products of children from interstate commerce was repeatedly held unconstitutional by the courts.

The case is called Opp Cotton Mills, Inc., against the Administrator of the Wage and Hour Division of the Department of Labor. The opinion, written by an Alabama member of the court and concurred in by the two Mississippi members sitting with him, is one of the last rites in the burial of Hammer against Dagenhart, the 1918 decision of the Supreme Court which set aside the first Child Labor Act. It is also one of the final steps in giving the imprimatur of the guardians of the law to the dissenting opinion of Mr. Justice Holmes in that case. This is the opinion, one of his most famous, in which he said:

> Instead of being encountered by a prohibitive tariff at her boundaries, the State encounters the public policy of the United States, which it is for Congress to express.

One of the paradoxes which make American public life so interesting and so difficult occurred to the Administrator of the Wage and Hour Division in the first week of April. A high court gave him the constitutional green light to carry out the direction of Congress that—

> The Administrator shall, as soon as practicable, appoint an industry committee for each industry engaged in commerce or in the production of goods for commerce.

And Congress cut the wage-and-hour appropriation recommended by the Budget Bureau $1,355,000.

I ask permission to have this opinion inserted in the RECORD.

There being no objection, the opinion was ordered to be printed in the RECORD, as follows:

[In the United States Circuit Court of Appeals for the Fifth Circuit. *Opp Cotton Mills, Inc., petitioner,* v. *Administrator of the Wage and Hour Division of the Department of Labor, respondent.* No. 9313. April 2, 1940. On petition to review a wage order of the Administrator of the Wage and Hour Division, United States Department of Labor]

Before Holmes and McCord, circuit judges, and Mize, district judge.

McCord, circuit judge: The Administrator of the Wage and Hour Division of the Department of Labor issued a wage order on September 29, 1939, providing that effective October 24, 1939, wages at a rate of not less than 32½ cents an hour be paid to all employees in the textile industry. The wage order was issued pursuant to the provisions of the Fair Labor Standards Act of 1938 (52 Stat., p. 1060).

Opp Cotton Mills, Inc., operator of a small cotton mill at Opp, Ala., petitioned this court to review and set aside the uniform minimum wage order. Southern Cotton Manufacturers' Association, an unincorporated group representing small cotton mills in Texas and other southern States, and 15 concerns operating cotton mills in Georgia, Alabama, Mississippi, and Louisiana filed intervention petitions. This proceeding is before us under the provisions of section 10 (a) of the act.

The petitioners contend that the act is unconstitutional; that the Administrator did not give consideration to the factors required by the statute; and that his order fixing a uniform minimum wage of 32½ cents an hour for the textile industry is illegal and void.

It is provided by section 6 of the act that every employer engaged in interstate commerce or in the production of goods for interstate commerce shall pay wages of (1) not less than 25 cents an hour during the first year after the effective date of the section; (2) not less than 30 cents an hour during the next 6 years; and (3) after 7 years "not less than 40 cents an hour, or the rate (not less than 30 cents an hour) prescribed in the applicable order of the Administrator." Sections 5 and 8 provide administrative machinery for establishing hourly wage rates in excess of the statutory minimum of 30 cents, but not in excess of 40 cents an hour. The 25-cent minimum hourly wage provided for by section 6 (a) (1) was in effect for 1 year, and on the day the 30-cent hourly minimum provided for by section 6 (a) (2) was to take effect the wage order here attacked raised the minimum to 32½ cents.

A further provision made it the duty of the Administrator to appoint industry committees, and on September 13, 1938, acting pursuant to section 5, the Administrator appointed Industry Committee No. 1 for the textile industry. This committee consisted of 21 members, 7 representing the public, 7 representing employers, and 7 representing employees. Section 5 (b) provides that those representing each group of the industry committees be appointed with "due regard to the geographical regions in which the industry is carried on." The Administrator appointed three members of the public group, four members of the employers group, and two members of the employees group from Southern States, but the petitioners contend that the South was not given full and proper representation. The provisions of the act requiring the Administrator to give "due regard" to geographical regions in the appointment of committee members did not require him to apportion membership on the committee with mathematical precision. It was the duty of the Administrator to exercise sound discretion in this regard and we do not find that he abused that discretion. Cf. *Balston Steel Car Co.* v. *Commissioner,* 53 F. (2d) 948, 950; *United States* v. *Interstate Commerce Commission,* 88 F. (2d) 780, 783.

The duty of Industry Committee No. 1 was to investigate conditions in the textile industry and "recommend to the Administrator the highest minimum wage rates which it determines, having due regard to economic and competitive conditions, will not substantially curtail employment in the industry." Section 8 (c) further provides that the industry committee recommend such reasonable classifications within an industry as it determines to be necessary, and that in determining such classifications "the industry committee and the Administrator shall consider among other relevant factors the following: (1) competitive conditions as affected by transportation, living, and production costs; (2) the wages established * * * by collective labor agreements; and (3) the wages paid for work of like or comparable character by employers who voluntarily maintain minimum-wage standards in the industry." The committee functions in an investigatory and advisory capacity and the act makes no provision for a court review of the proceedings before it. The record shows, however, that for several months Industry Committee No. 1 made a detailed and exhaustive study of the problems confronting the textile industry, and heard many witnesses, and considered many briefs, exhibits, letters, and statistical and economic studies. Petitioners' complaint that the committee did not proceed in accordance with the provisions of the act is not well founded. Cf. *United States* v. *Los Angeles R. R.,* 273 U. S. 299, 310; *United States* v. *Atlanta B. & C. R. Co.,* 282 U. S. 522, 527–528.

On May 22, 1939, Industry Committee No. 1, by a vote of 13 to 6, adopted a resolution recommending a uniform minimum wage of 32½ cents an hour for the textile industry. On the coming in of the committee's report and recommendations the Administrator published notice of a public hearing in the Federal Register, trade journals, and newspapers, as provided by the act. The notice advised that any interested person might appear at the hearing to

offer evidence "either on his own behalf or on behalf of any other persons * * *." The Administrator's hearing was opened in Washington on June 19, 1939, adjourned to Atlanta on June 26, reconvened in Washington on July 10, and on July 11 the hearing was concluded. At the hearing the Administrator heard over 100 witnesses, including employers, employer representatives, labor representatives, freight experts, Government economists, and economic experts. The testimony taken at the hearing measured to more than 3,000 pages, and many volumes of exhibits were received and made a part of the record. Thereafter the Administrator prepared extensive findings based upon the evidence taken at the hearing. After reviewing all the evidence he found that the recommendations of Industry Committee No. 1 were made in accordance with law and supported by the evidence. On the basis of these findings he issued the order fixing a uniform minimum wage for the industry.

The record before us consists of more than 10,000 pages of testimony and exhibits. Much acrimony and bitterness is exhibited in the testimony of several of the witnesses. No good purpose could be served by setting out the evidence at length, and we only attempt to point out the trend and weight of the evidence as reflected by a careful reading of the voluminous record. From the testimony of the long line of witnesses favorable to petitioners we quote only a few excerpts:

Clarence Miller, of Dallas, Tex., connected with several cotton mills, testified: "If the Fair Labor Standards Act is enforced according to the recommendations of the majority of the committee, without a differential, and the freight discriminations are not removed, there will not be a cotton mill operating in Texas at the end of 5 years." M. M. Bryan, president and general manager of the Jefferson, Ga., mills, testified: "Regardless of what effect the increase in minimum wages may have upon the company I represent, I believe any minimum-wage law will ultimately prove to be unwise and a serious detriment to the industrial progress of our country." J. F. Ames, Selma, Ala., with over 50 years' experience in the cotton mill manufacturing business, testified: "Great disaster will overtake the small mills in the event the proposed rate of 32½ cents an hour goes through." Gov. Hugh White, of Mississippi, and Gov. Frank Dixon, of Alabama, offered strong evidence favorable to petitioners. Dr. Gus W. Dyer, of Vanderbilt University, testified: "Now, if you believe in this principle of making the strong stronger and the weak weaker, and that the function of government is to look after the strong and let the weak go to hell, then I can see some reason for it; but otherwise, I can't." Donald Comer, of Birmingham, Ala., connected with the Avondale Cotton Mills, with clarity and without prejudice, offered quite the strongest evidence for the petitioners that is to be found in the record. On the question of transportation and freight rates L. O. Kimberly, Jr., of Atlanta, who had 18 years' experience in freight traffic work and who had spent much time studying textile freight rates, testified that he had made "a study of the rate levels in the North and in the South and between the territories. * * * I believe I am fairly well familiar with the rate structure on these products. * * * The combination of these in-bound rates on cotton and the out-bound rates on manufactured cotton products gives the eastern mills a substantial advantage." Using Boston and Atlanta as focal points from which to base his estimate, he placed the southern base group mill points as having a rate disadvantage of 17.5 per cent. P. H. Johansen, Washington, D. C., who had 13 years' experience in freight rates, 6 years of which were with textile rates, testified: "The average rate from New England to all points, however, is 100.90 cents, and the average rate from the South is 114.06 cents, or an average of 13.04 percent against the southern mills. * * * I would like to remark here that is a simple mathematical average. Later I believe I can show the disadvantage is much greater than that * * *."

In opposition to the testimony of the witnesses favorable to petitioners was the testimony of experts of the National Association of Cotton Manufacturers, the American Cotton Manufacturers Association, and several State trade associations. Also many exhibits and statistical studies were introduced to show living and production costs and freight rates on raw materials, mill supplies, and textile products from more than 300 representative destinations and shipping points throughout the country.

Much of the evidence before the Administrator is in sharp conflict. We are constrained to believe, however, that a preponderance of the evidence discloses that there is a decided rate disadvantage as against the southern and southwestern mills. However, this may be, a majority of industry committee No. 1, after an exhaustive investigation lasting several months, recommended to the Administrator a uniform minimum wage of 32½ cents an hour for the textile industry. The Administrator gave notice and held a public hearing as provided by the act. After taking much testimony and considering it along with the committee report and various statistical studies, including a comprehensive wage study known as bulletin 663, prepared by the Bureau of Labor Statistics, he confirmed the report of the committee, holding: "I conclude, therefore, that the South is at least in a position of equality with the North as far as production costs are concerned and that with respect to production, transportation, and living costs considered together there is also substantial equality between the regions. I find, too, that competitive conditions as affected by transportation, living, and production costs do not justify a differential in minimum wage rates." He also found that "the proposed minimum will not substantially curtail employment in the cotton-textile industry or in any definable group of plants or regions of the industry."

Under section 10 (a) of the act, the review of this court is limited to questions of law, and the findings of fact by the Administrator are conclusive if supported by substantial evidence. Whatever discrimination may be pointed out in the conflicting evidence, labor should not be called upon to equalize the discrimination by bearing all the load. The minimum wage fixed by the order of the Administrator provides a weekly earning of approximately $13. When one takes into consideration living expenses scaled down to the necessities of life it can readily be seen that the minimum fixed by the Administrator's wage order provides at most a meager living. Substantial evidence can be found in the record to support the findings of the Administrator and we are not willing, therefore, to overturn his order (*Consolidated Edison Co.* v. *Labor Board*, 305 U. S. 197; *Labor Board* v. *Brown Paper Mill Co.*, 5th circuit, Jan. 17, 1940, — F. (2d) —; *Florida* v. *United States*, 292 U. S. 1; *Labor Board* v. *Waterman Steamship Corp.*, Feb. 12, 1940, — U. S. —).

In passing upon the constitutionality of the act it is not necessary to determine whether all provisions are within the power of Congress. Section 19 provides for separability of provisions, and only those provisions affecting this proceeding are passed upon. If other provisions in the act exceed the power of Congress they are clearly separable and do not vitiate the act (*Electric Bond & Share Co.* v. *Securities and Exchange Commission*, 303 U. S. 419, 433).

The power of Congress to regulate commerce "is complete in itself, may be exercised to its utmost extent, and acknowledges no limitations, other than are prescribed in the Constitution" (*Gibbons* v. *Ogden*, 9 Wheat. 1, 196, 6 L. Ed. 23).

In enacting the Fair Labor Standards Act of 1938 Congress sought to conserve interstate commerce and protect it from the burdens and obstructions incident to the transportation of goods produced under substandard working conditions. Any doubts that may have existed heretofore as to the constitutionality of such legislation have been dispelled by recent decisions of the Supreme Court. We are of opinion and so hold that the enactment of the Fair Labor Standards Act was a valid exercise of the power given to Congress by the commerce clause of the Federal Constitution, article I, section 8, clause 1 (*Mulford* v. *Smith*, 307 U. S. 38; *Kentucky Whip & Collar Co.* v. *Illinois Central Railroad Co.*, 299 U. S. 334; *Labor Board* v. *Jones & Laughlin Steel Corp.*, 301 U. S. 1; *Currin* v. *Wallace*, 306 U. S. 1; *Santa Cruz Co.* v. *Labor Board*, 303 U. S. 453; *Brooks* v. *United States*, 267 U. S. 432; *Champion* v. *Ames*, 188 U. S. 321; see *Hammer* v. *Dagenhart*, 247 U. S. 251).

The policy of Congress is precisely defined in the act. It prescribes definite standards for the guidance of administrative action and indicates in detail the considerations which are to be held in view in promulgating wage orders. To protect against arbitrary action Congress "has afforded both administrative and judicial review to correct errors. This is not to confer unrestrained arbitrary power on an executive officer." We are of opinion that the delegation of power to the Administrator was not unconstitutional (*Currin* v. *Wallace*, 306 U. S. 1; *Mulford* v. *Smith*, 307 U. S. 38; *United States* v. *Rock Royal Cooperative, Inc.*, 307 U. S. 533; *Panama Refining Co.* v. *Ryan*, 293 U. S. 388, 421; *Hampton & Co.* v. *United States*, 276 U. S. 394).

The procedure followed by the Administrator in adopting the recommendations of the industry committee was in accord with the due-process requirements of the Constitution. Proper notice was given of the public hearing before the Administrator and the petitioners were given full opportunity to be heard. The administrative proceedings met the "rudimentary requirements of fair play" held to be essential to due process (*Morgan* v. *United States*, 298 U. S. 468; *Morgan* v. *United States*, 304 U. S. 1). The Fair Labor Standards Act of 1938 as applied to these petitioners is constitutional.

The wage order of the Administrator measures to the requirements of the act.

The wage order is affirmed.

Air Safety Board

EXTENSION OF REMARKS

OF

HON. WARREN R. AUSTIN

OF VERMONT

IN THE SENATE OF THE UNITED STATES

Wednesday, April 24, 1940

ARTICLES FROM THE NEW YORK HERALD TRIBUNE AND THE WASHINGTON STAR

Mr. AUSTIN. Mr. President, former Representative LaGuardia, of New York, who is now mayor of the city of New York, at the laying of the cornerstone of the new air terminal in New York City delivered an address, a portion of which is reported in the New York Herald Tribune, of Tuesday, April 23, 1940, under the heading: "Mayor Assails Roosevelt Plan To Shift C. A. A.—Laying Air Terminal Stone, He Declares It Would Be Calamity to Drop Agency."

I ask unanimous consent to have a portion of this article printed in the RECORD at this place; and I join with that another request, to print Washington Observations, by Frederic William Wile, the well-known and respected columnist, published in the Washington Star of April 22, 1940, entitled: "Reorganization Plan, Hitting C. A. A. and Air Safety Board, Arouses Bitterness."

There being no objection, the matters referred to were ordered to be printed in the RECORD as follows:

[From the New York Herald Tribune of April 23, 1940]

MAYOR ASSAILS ROOSEVELT PLAN TO SHIFT C. A. A.—LAYING AIR TERMINAL STONE, HE DECLARES IT WOULD BE CALAMITY TO DROP AGENCY

Mayor F. H. LaGuardia laid the cornerstone of the new Air Lines Terminal Building on the southwest corner of Forty-second Street and Park Avenue yesterday after delivering a speech in which he said it would be a "calamity" to abolish the Civil Aeronautics Authority. The mayor was referring to President Roosevelt's proposal to place the C. A. A. under the control of the Department of Commerce.

"It would be a calamity to abolish the C. A. A. at this time," Mayor LaGuardia said. "Someone may say this statement is out of place here today. Well, of course it is out of place, but I am making it here because I am interested in air progress and am appreciative of the contribution the C. A. A. is making to aviation and the people of the country.

"It has been the best agency we have known for coordinating the work in aviation. It has done so much for aviation, for progress, convenience, and safety. I know of no Federal board in Washington that has been more successful or has rendered so much service."

[From the Washington Evening Star of April 22, 1940]

WASHINGTON OBSERVATIONS—REORGANIZATION PLAN, HITTING C. A. A. AND AIR SAFETY BOARD, AROUSES BITTERNESS

(By Frederic William Wile)

Reorganization Plan No. IV, with proposed emasculation of the Civil Aeronautics Authority and abolition of the Air Safety Board, has flared into one of the bitterest controversies of the tempestuous New Deal. As on the occasion of other "reforms" advocated by the President, his project to sabotage C. A. A. has aroused strong bipartisan opposition. It threatens as fierce a feud with Congress as the original reorganization program, which House and Senate finally tore to pieces. Plan No. IV will go into effect June 11 by Executive order, unless meantime defeated by concurrent congressional action.

Leaders in the effort to preserve C. A. A. and the Air Safety Board in their present efficient state are confident of killing the plan before Mr. Roosevelt is empowered to enforce it. Senator AUSTIN, of Vermont, ranking minority member of the Senate Military Affairs Committee and a member of the Interstate Commerce Committee, heads vigorous Republican opposition. Equally determined Democratic hostility is led by Senator PAT MCCARRAN, of Nevada, sponsor of the law which created the independent agency which the administration would reconvert now into a puppet subdivision of the Department of Commerce.

F. D. R.'S MOTIVE A MYSTERY

Exactly what inspired the President suddenly to pronounce the death sentence of C. A. A. is a deep-dyed mystery. To spring it, he chose about as inauspicious a moment as could be imagined. It had just been announced that the United States air lines had completed 1 year of perfect flying security—2,028,817 passengers flown for a total of 87,325,145 miles without a single fatality among pilots, crews, or passengers. This stainless world record, compared to the casualty lists recorded in pre-C. A. A. days, beginning with the killing of 11 air-mail pilots in 1934, is little short of miraculous. Why the White House, on the heels of such a showing, chose to undermine the organization which made that achievement possible baffles all concerned, including the country at large.

To get to the bottom of it all is the determination of both Democrats and Republicans in Congress. Senator MCCARRAN declares resentment is growing, in consequence of "waves of protest," arriving from all parts of the Union. Senator AUSTIN assails the scheme as an "attack on public safety and a challenge to the constructive forces of democracy." The Vermonter "will oppose the project with every ounce of strength I possess." AUSTIN says the plan is evidence of an attempt "again to subject aviation to the destructive forces of political domination." Another powerful Senate opponent of it is BURT WHEELER, Democrat, of Montana, chairman of the Senate Interstate Commerce Commitee.

HOUSE SPONSOR ALSO OPPOSED

Objections are no less manifest in the House of Representatives. Representative LEA, Democrat, of California, coauthor of the 1938 C. A. A. and Air Safety Board law, refused at first to commit himself on the President's inexplicable recommendations, but at the end of last week Mr. LEA, strong supporter of many New Deal measures and one of the best-informed men in Congress on flying affairs, told Ansel E. Talbert, aviation editor of the New York Herald Tribune, who spent 5 days in Washington exploring the administration's motives, that the Californian has finally concluded it "would be unfortunate at this time to transfer C. A. A. to the Department of Commerce, because it would be against the best interests of aviation."

Representative WOODRUM of Virginia, leader of the House economy bloc, joined Representative JENNINGS RANDOLPH, Democrat, of West Virginia, in voicing opposition to the proposed move, as did Representative BRADLEY, Republican, of Michigan, a former pilot, Representative HALLECK, Republican, of Indiana, another opponent, links the thrust at C. A. A. with the administration's fight against proposals to remodel the National Labor Relations Board. HALLECK suggests the unexplained drive against air safety is just another cockeyed brain wave of Harry Hopkins' New Deal satellites. Three late senatorial opposition recruits are VANDENBERG, Republican, of Michigan; and Democrats CLARK of Idaho, and TRUMAN, of Missouri. So far JIMMY BYRNES, of South Carolina, is the only notable Senator publicly to espouse plan No. IV's uppercut at the aviation regulation. Some of his colleagues think it is the potent Jimmy who sold the idea to F. D. R. Civil Aeronautics Chairman Hinckley is said to be ready to resign if the authority is reduced to a spineless Department of Commerce bureau.

POSSIBLE EXPLANATION

While confessing themselves in the dark as to what inspired Mr. Roosevelt's proposal to hamstring C. A. A., opposition leaders think it may have been the result of certain grapevine reports of alleged differences within the body over control of funds. The Air Safety Board, contrary to popular belief, is virtually independent of C. A. A. Its sole function is to investigate accidents and recommend means to prevent recurrence. Though there is no evidence of lack of harmony among Chairman Hinckley and his four colleagues, elements at both ends of Pennsylvania Avenue may feel there is an absence of leadership, or what Secretary Ickes might call "iron in the blood," in C. A. A., and that faith in the Authority may be shaken in consequence, despite its fine regulatory record.

Other guesses ventured on Capitol Hill are that the aviation lines are not as enthusiastic as they profess to be over rigid control of their operations and seek more freedom. Some politicians, too, are suspected of panting to refasten their grip on an industry which has become an important factor in the Nation's life, and of not shrinking from wrecking the supervision which plan No. IV would vitally weaken. A vehement opponent of the program is David Behncke, president of the Air Line Pilots Association. He considers it dangerous and undesirable to upset aviation at the very moment things are running so smoothly.

The Walter-Logan Bill

EXTENSION OF REMARKS

OF

HON. SHERMAN MINTON

OF INDIANA

IN THE SENATE OF THE UNITED STATES

Wednesday, April 24, 1940

EDITORIAL FROM THE WASHINGTON TIMES-HERALD

Mr. MINTON. Mr. President, I ask unanimous consent to have inserted in the Appendix of the RECORD an editorial appearing in this morning's Washington Times-Herald entitled "The Walter-Logan Bill."

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Times-Herald]

The Walter-Logan bill does not look so good to us.

This is the bill which passed the House of Representatives last week by the heavy majority of 282 to 97, and on which a showdown in the Senate is expected within the next few days.

"RIPPER" BILL

The bill has had considerable publicity, but it should have a lot more before the Senate votes on it, and if the Senate passes it we hope the President will veto it.

The Walter-Logan bill, backed by a combination of Republicans and conservative southern Democrats, is a bill to hamstring a large part of the New Deal.

The background of the story is this:

Ever since there was a Federal Government, Congress has been setting up administrative boards, bureaus, and agencies to handle various branches of the Government's business.

ONE HUNDRED AND THIRTY BOARDS AND BUREAUS

There are, to mention a few of the best known of these boards, the Interstate Commerce Commission, the Federal Reserve Board, the Federal Trade Commission, the Securities and Exchange Commission (S. E. C.), and the National Labor Relations Board.

The number of these agencies has now passed 130. Some of them are useless and outworn. Some others are tyrannical and Pecksniffish—the Federal Communications Commissions (radio) being an example. Most of them perform necessary Government work.

The Walter-Logan bill seeks to bring these agencies under the control of the courts.

It would do so by permitting appeals from these boards' decisions to any United States Circuit Court of Appeals.

DUTY OF CONGRESS

It would also make the rules and procedure used by these boards subject to review and approval of the District of Columbia Court of Appeals.

A few long-established Government boards and bureaus are exempted; among them the Interstate Commerce and Federal Trade Commissions. Practically all the New Deal's new administrative agencies are covered by the bill.

The bill looks bad to us because we believe this is the wrong way to cure what bureaucratic evils there may be in our Government. They should not be remedied by the judicial branch; that is a job for the legislative branch. The courts should not be empowered to supervise these agencies; Congress should perform its plain duty in proper cases by abolishing the board or by firing or disciplining the bureaucrats who run it.

To repeat, we think the Walter-Logan bill is a bad one, and we hope it loses out somewhere along the line from the House to the President's desk.

Far Eastern Problems

EXTENSION OF REMARKS

OF

HON. LEWIS B. SCHWELLENBACH

OF WASHINGTON

IN THE SENATE OF THE UNITED STATES

Wednesday, April 24, 1940

ARTICLE BY SAMUEL GRAFTON

Mr. SCHWELLENBACH. Mr. President, I ask consent to have inserted in the RECORD an article by Samuel Grafton, published in the New York Post of April 17, 1940. It very clearly presents the problems confronting our Nation in the Far East.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Post of April 17, 1940]

I'D RATHER BE RIGHT

(By Samuel Grafton)

By one of those brisk coincidences which challenge admiration, the word is spread in Washington, on the eve of hearings on the Navy bill, that Japan has secretly been building a superfleet. The timing could not be better for letting the word slip that Japan has built 3 (or is it 300?) secret superdreadnaughts of 45,000 tons each.

This will frighten the Senators into passing any Navy bill that is placed before them; they will sign on the dotted line with shaking hands. We are menaced, no doubt. Our American Navy fears nothing afloat 11 months in the year. In the month before a new Navy bill it shrinks; from the chatter in the Capital one might suppose it consisted of four rowboats and an outboard motor. Anybody could beat us a month before a new Navy bill; we are then humble, poor, and weak on the seas.

If Japan's Navy is really a menace to us now, however, we have an easy way of pulling its teeth. It is reliably reported that modern battleships are built of steel. I have it on good authority, too, that they are fueled with oil. There is no question but that Japan gets its steel and oil from "us."

I put "us" in quotation marks because I don't mean "us"; I mean a few Americans in the scrap steel business and the other war materials trades who are building and powering Japan's Navy.

So with one hand "we" send supplies across the Pacific which enable Japan to build a navy to menace us, and with the other hand "we" build a two-ocean navy with which to meet the menace. There are two different kinds of "we" involved, and perhaps the time has come to make the interests of one kind subordinate to the other. This crazy thing cannot go on. It is the most ingenious device ever invented to permit a nation to hit itself squarely in its own eye.

If the process marches to its logical conclusion, some day a Japanese fleet built of American steel and powered with American oil will lock in battle with an American fleet built of steel from the same mills and powered with oil from the same wells, and somebody looking down on the bodies of American boys floating in the ocean will scratch his chin and wonder if we didn't make a mistake somewhere.

It is a question of which "we" is going to run the show, the "we" that makes a little profit on selling Japan $30,000,000 of scrapped and junked metal each year, or the "we" that will now have to spend $75,000,000 on each of four or more new capital ships to meet the menace which is the end product of this trade. In the second "we" are also the sailors mentioned somewhat grimly in the paragraph above.

We now ship 90 percent of Japan's imported war materials. Without these goods she would utter one final squawk in China and perish. With them she is taking China, and menacing us, and conquering the great iron-ore mines at Lungyen and Tayeh and Wuhu. The gun she points at China was made in America, and out of China's resources she will build a larger gun and point it at us, with a bland oriental snicker.

There is no war danger in embargoing essential materials to Japan; the war danger clearly lies in not embargoing Japan. But this kind of talk is too realistic for Washington at this time of year. Remarks about the war-materials trade are considered catty and unsporting. The thing is to face our destiny with a smile; build the big ships which the American boys will man and in which they will sail off to a rendezvous of heroes. They died for the sake of the American junk business; this may be their epitaph.

Subsidies to Certain Forms of Transportation

EXTENSION OF REMARKS

OF

HON. HARRY S. TRUMAN

OF MISSOURI

IN THE SENATE OF THE UNITED STATES

Wednesday, April 24, 1940

ARTICLE FROM THE NEW YORK TIMES OF APRIL 15, 1940

Mr. TRUMAN. Mr. President, I ask unanimous consent to have printed in the RECORD an article from the New York Times of April 15, 1940, by John H. Crider, condensing certain parts of Commissioner Eastman's elaborate report on subsidies to certain forms of transportation. This article refers particularly to highway subsidies.

There being no objection the article was ordered to be printed in the RECORD, as follows:

[From the New York Times of April 15, 1940]

HIGHWAY USERS PAY THEIR WAY—RAILS' RIVALS FAIR, EASTMAN ASSERTS—FORMER COORDINATOR, IN REPORT ON PUBLIC AID TO ALL TRANSPORT, HITS ROADS' CONTENTIONS—SURVEY FIRST OF ITS KIND—SIX-YEAR ANALYSIS OF INTERSTATE COMMERCE COMMISSION CHAIRMAN FILLS FOUR VOLUMES

(By John H. Crider)

WASHINGTON, April 14.—The results of a 6-year study of the extent to which the Federal and local governments subsidize various forms of transportation in the United States, the first comprehensive and scientific analysis of the question ever made, were published today by Joseph B. Eastman, Chairman of the Interstate Commerce Commission, in his former capacity as Federal Coordinator of Transportation.

Contradicting the contention of the railroads that their competitors on the highways have an undue advantage by virtue of the aids which the public freely provides, the report concludes that highway users, as a class, have paid their way in taxes, at least since 1927.

While Mr. Eastman ceased being Federal Coordinator in 1936, the project of "an impartial and authoritative investigation" of the subsidy question which he started while serving in that capacity was carried on in the intervening years by Dr. Charles S. Morgan, now assistant director of the Interstate Commerce Commision's Bureau of Motor Carriers, who started the technical study of the subsidy problem as Director of the Coordinator's Research Department in 1933.

STUDY FILLS FOUR VOLUMES

The four-volume study, entitled "Public Aids to Transportation," goes far beyond the mere question of how much net aid each branch of transportation has received from the various tiers of government and goes into the question of the basic surplus of transportation facilities existing in the country and what to do about them.

Since it estimated about $6,000,000,000 of further transportation investments by 1950, the summary stressed the need for deliberate national transportation planning.

The report, undoubtedly, will provide basic material for the work of Owen D. Young, retired chairman of the board of the General Electric Co., when he undertakes a coordinated study of the Nation's transportation problems as head of a committee to be named by President Roosevelt. The acceptance by Mr. Young of the committee leadership was announced at the White House last week.

Mr. Eastman recommends in his report the setting up of a three-man board by the President for research activities and investigation of the whole problem of inequities in public contributions to the various transportation agencies revealed by the newly published data.

TRIBUNAL SURVEY SUGGESTED

Because of the highly controversial nature of the subjects treated in the report, Mr. Eastman suggested that the proposed board might sit as a sort of tribunal and hear rebuttal of various of the study's findings from experts who disagree with its conclusions.

Mr. Eastman declared he "makes no claim of 100-percent validity for all of the conclusions" but "it seems to me that they are well

supported in the reports and that I have as yet seen no criticisms which convince me that they are wrong."

One of the reasons for many delays in publication of the report was Mr. Eastman's insistence that its conclusions and methods of analysis be checked by parties of interest in each of the several branches of transportation and in the regulatory agencies.

In an effort to measure on a comparative basis the net extent to which the different modes of transportation benefited from public aids, it was necessary to take the most recent year for which cumulative data was available and prorate the value of the total benefits from the beginning on an annual basis.

MATHEMATICAL MEANS USED

Thus it was determined by mathematical methods that the value to the railroads in 1936 of the land grants given to the railroads in the construction era was $6,785,000. And again, the aggregate of loans by the Reconstruction Finance Corporation and the Public Works Administration to the railroads over recent years were of benefit to the railroads in the amount of $28,850,000 in 1936.

Omitting further reference to method and qualifications, the report concluded that in 1936 the subsidy to all forms of transportation had a value of $193,173,000, of which 66.6 percent went to water transportation, 18.5 percent to steam railroads, 10.8 percent to air transportation, and 4.1 percent to motor-vehicle transportation.

These subsidies, called public aids in the report, are any funds or façilities given by the Federal or local governments to the transportation mediums "for ends deemed productive of public benefit, without direct recompense therefor." In other words, these public aids were the public's gifts to the carriers.

FORMS OF AID CATEGORIZED

With this terminology in mind, the following chart giving detailed conclusions of the values of the gifts in 1936 can be better understood:

Agency and form of aid	Amount	Percent
Steam railroads, 1936:		
Reconstruction Finance Corporation and Public Works Agency loans	$26,000,000	13.5
Use of waterway improvements	2,850,000	1.5
Use of public domain	6,785,000	3.5
Total	35,635,000	18.5
Water transportation:		
General waterway improvements, less $2,850,000 assigned to railroads, 1935	126,150,000	65.3
Loss of operations of Inland Waterways Corporation, 1935	400,000	.2
Loss on operations of Panama Canal, 1936	665,000	.3
Loans to and mail contracts of domestic shipping lines, 1936	500,000	.2
Less duplication between first and second items	187,000	
Total	128,528,000	66.6
Air transportation:		
Scheduled air transportation, 1936	14,433,000	7.2
Domestic civil air transportation other than scheduled air transportation, 1936	7,020,000	3.6
Total	21,453,000	10.8
Motor-vehicle transportation, operators of certain groups of vehicles, 1937	8,000,000	4.1
Grand total	193,616,000	100.8

While generally agreeing with the report's conclusions, Mr. Eastman said he had "a lingering doubt" regarding its statement that "it appears entirely reasonable to conclude that the net benefit now derived by the railroads as a whole from the construction aids is small and probably negligible."

To June 30, 1933, the report indicated the railroads had received from the Federal and State Governments a total of 183,187,040 acres or 286,230 square miles, "which is equivalent to forty-six one-hundredths percent of the area of the continental United States." Of the total acreage, 4,000,000 acres were still scheduled to be received as of the 1933 date, but had not actually changed title.

AID ALMOST BILLION AND A HALF

The value of all Government aids to railroads to 1936 was given as $1,443,000,000, of which 89 percent was aids for the most part during the construction period and 11 percent aids received from the R. F. C. and the P. W. A.

Total waterway aids on an annual-cost basis was found to be $145,000,000, of which $129,000,000 was for domestic transportation.

The report found that from 1921 through 1937 total State, Federal, and local highway expenditures were $31,000,000,000. The report then went into the controversial question whether highway users pay their way through payments of taxes on gasoline, oil, motor vehicles, and other State and Federal taxes allocatable to the highway user.

"After making all necessary adjustments, payments are found to have exceeded assigned costs by $108,000,000 in 1921–32 and by $22,000,000 in 1933–37, or by $385,000,000 in the entire period 1921–37. Payments first exceeded assigned costs in 1927. In terms of costs assigned to motor-vehicle users the excesses were 0.6 percent in 1921–33 and 3.1 percent in 1933–37. These percentages are negligible and are well within the limits of error present in the basic data used and the assumptions employed. For all practical purposes it may be said that motor-vehicle users as a class have paid their way since 1927."

PER VEHICLE FIGURES GIVEN

Then follows a table, in which the report shows for 1932 the public aids per vehicle on an annual-cost basis, the payments made through taxes by each vehicle, and the excess or deficits of payments against costs:

Class of motor vehicle and rated capacity	Cost per vehicle	Payments per vehicle	Payments minus assignable costs
Passenger cars	$26	$26	
Taxicabs and other for-hire cars	61	81	$20
School busses	82	77	−5
Contract busses (seats):			
7 and less	41	56	15
8 to 20	46	113	67
Over 20	59	178	119
Common-carrier busses (seats):			
7 and less	126	143	17
8 to 20	142	19	148
Over 20	188	437	249
Trucks (capacities in tons):			
Private: farm	20	25	5
Other private:			
1½ and less	53	48	−5
Over 1½ and less than 3, single	67	92	25
Over 1½ and less than 3, combination	104	133	29
3 and less than 5, single	151	185	34
3 and less than 5, combination	129	206	77
5, single	287	256	−31
5, combination	311	277	−34
Over 5, single	316	358	42
Over 5, combination	372	457	85
For hire:			
1½ and less	102	105	3
Over 1½ and less than 3, single	152	178	26
Over 1½ and less than 3, combination	157	226	69
3 and less than 5, single	251	282	31
3 and less than 5, combination	193	349	156
5, single	457	403	−57
5, combination	457	465	8
Over 5, single	499	594	95
Over5, combination	545	832	287

The minus signs that appear denote excess cost over payments. The table shows that in 1932 only five types of vehicles received more Government aid by way of public expenditures for highways than they paid in taxes.

The railroads have maintained, persistently, that highway users, particularly heavy trucks, do not pay their proportionate share of highway costs.

Mr. Eastman called the railroad theory that heavy trucks should bear a greater part of the highway burden "patently unsound" from his viewpoint "as a mere lay observer who has had some opportunity to note the demands which private automobiles make upon the highways and the standards which have been followed in the construction of some which are devoted to their use exclusively."

HINTS EXCESS IN COMPLAINTS

"I may add," he wrote at another point, "that the railroads have had the opportunity to express to me, both orally and in writing, their views on the highway carriers. Their contentions impress me as being carried to extreme limits."

Dr. Morgan wrote in the report that "the terms of carrier competition, the processes of regulation and, as the end result, the economic sphere of each agency of transportation, cannot be properly defined, or the rate-cutting, hostility, and recriminations which characterize transportation today abated in any substantial degree, until there has been a clarification of the facts respecting the 'subsidy' question."

Senator REED, of Kansas, speaking tonight on the Columbia network from this city, urged early congressional action on the Wheeler-Lea omnibus transportation bill which is now in conference, stating that it represents a beginning of "a sound national transportation policy." Like the Eastman report, he pointed out that the country suffers from "a surplus of commercial transportation facilities."

The Late Walter J. Kohler

EXTENSION OF REMARKS

OF

HON. ALEXANDER WILEY

OF WISCONSIN

IN THE SENATE OF THE UNITED STATES

Wednesday, April 24, 1940

EDITORIAL FROM THE MILWAUKEE JOURNAL

Mr. WILEY. Mr. President, I ask unanimous consent to have printed in the RECORD an editorial from a recent issue of

the Milwaukee Journal relative to the late Walter J. Kohler, former Governor of Wisconsin.

Governor Kohler was Wisconsin's foremost citizen. He was a builder—a builder not only of jobs and material wealth but a builder in statecraft; a man who always squared performance with his promise; a man whose word was as good as his bond.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Milwaukee Journal]

WALTER J. KOHLER

Wisconsin feels deeply, keenly, in a way that words are inadequate to express, the death of Walter J. Kohler, former Governor. The State has lost a leader in whom it had confidence, of whom citizens knew that his heart was in the right place, that he was intensely devoted to Wisconsin and that he wanted very much to be of service.

Wisconsin also has lost a citizen who in private life played a great part in developing the State and making it a better place in which to live. Walter J. Kohler's record of public and semipublic service reaches far back of the governorship to the struggle he went through to build a successful business on this soil, through his accomplishment in creating the model village of Kohler, through his efforts on behalf of education and sound social work, through a thousand and one unnamed acts that had the stamp of citizenship.

There is the loss to a family whose relationships were very close. We do not wish to cross the threshold in this hour, except to assure the family that Wisconsin feels sincere sympathy. For the State, knowing of this relationship, respects its sanctity as the priceless thing it was.

The life of Governor Kohler in its larger aspects was an example of what can be accomplished in America. It was an example of a life that was used rightly, for the benefit of itself and others. Governor Kohler did not come up the political road. He came up as a builder and a citizen. That is the way consistent with the spirit of democracy.

When Governor Kohler went to Madison they said he was a "novice in politics." He was, but that did not worry him. He had, so far as we can read in any of his utterances, no idea of playing politics. If he had known more of the inside game of politics he might have obtained the enactment of more measures in which he was interested when he was Governor. But between political astuteness and an ideal of service it is not difficult to choose.

It will be written indelibly on the pages of Wisconsin's history that it was during his regime that the children's code was enacted, thus giving the unfortunates among our children a fairer chance in life.

Wisconsin bows its head with those who loved Walter Kohler as father, brother, friend, and neighbor.

Financial Reports of Certain Railroad and Other Corporations

EXTENSION OF REMARKS

OF

HON. LEWIS B. SCHWELLENBACH

OF WASHINGTON

IN THE SENATE OF THE UNITED STATES

Wednesday, April 24, 1940

ARTICLE FROM THE WASHINGTON POST

Mr. SCHWELLENBACH. Mr. President, in the light of the series of complaints which prominent Republicans are making to the effect that the New Deal is strangling business by depriving them of profits, the article in this morning's edition of the Washington Post is of particular interest. I ask that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

JONES-LAUGHLIN EARNINGS RISE OVER QUARTER—NORFOLK & WESTERN REPORTS $5.31 A SHARE AS AGAINST $3.67

PITTSBURGH, April 23.—Jones & Laughlin Steel Corporation and subsidiaries today reported a consolidated net profit of $1,134,611 for the quarter ended March 31, 1940, as compared with a loss of $376,525 in the corresponding quarter last year.

NORFOLK & WESTERN

Norfolk & Western Railway reported today for the March quarter net income of $7,705,057, equal after preferred dividend requirements to $5.31 a share on the common stock. This compared with $5,396,826, or $3.67 a share, in the 1939 March quarter.

T. W. A. LOSS INCREASES

Transcontinental & Western Air, Inc., reported March quarter net loss of $391,458 against net loss of $364,841 in the same period last year.

HERCULES POWDER

Hercules Powder Co. March quarter net profit amounted to $1,742,573, equal to $1.22 a share on common stock, compared with $1,087,322, or 73 cents a share, in the 1939 March quarter.

BRIDGEPORT BRASS

Bridgeport Brass Co., excluding unconsolidated subsidiaries, reported net profit for the March quarter of $361,374, equal to 38 cents a share, compared with $7,159 in the 1939 quarter.

AMERICAN BRAKE SHOE

New business for American Brake Shoe & Foundry Co. is coming in this month at about the same rate as in the first 3 months of this year, William B. Given, Jr., president, reported to stockholders at the annual meeting today.

MAYTAG WASHERS

Maytag Co., maker of washing machines, reported net profit for the March quarter of $356,384, or 6 cents a common share, compared with $390,928, or 7 cents a share, in the like 1939 period.

C. I. T. INCREASES

P. W. Haberman, vice president of Commercial Investment Trust Corporation, said at the annual meeting that the unaudited net profit, including subsidiaries, for the March quarter was $3,783,407, or $1.04 a common share, compared with $3,545,964, or 98 cents a share.

INTERNATIONAL SILVER

International Silver Co. and wholly owned Canadian subsidiary reported March quarter estimated net profit of $92,975, equal to $1.72 a share on the 7-percent preferred stock.

REVERE COPPER & BRASS

Revere Copper & Brass, Inc., reported net profit of $720,196 for the March quarter, equal after dividend requirements on the preferred and class A stocks to 61 cents a share on common stock. In the March quarter last year profit was $156,210, equal to $1.64 a share.

PITTSBURGH STEEL

Pittsburgh Steel Co. March quarter net profit was $203,008, equal after dividend requirements on the 5½-percent prior preferred and 5-percent A preferred to $1.34 a share, on the 7-percent B preferred stock. In 1939 the company had a net loss of $377,159.

TEXAS CORPORATION

Texas Corporation earned a net profit of about $12,800,000 in the first 3 months this year, equal to $1.18 a share on capital stock, T. Reiber, chairman, reported. This compared with per share earnings of 12 cents in the first quarter of 1939.

BOSTON EDISON

The Boston Edison Co. announced an income balance for the year ended March 31 of $5,631,172, equal to $9.12 on each of 617,164 shares outstanding. This compares with an income balance of $5,453,363, or $8.84 a share, for the previous year.

AMERICAN SMELTING

American Smelting & Refining Co. earned $1.27 a share on common stock after all charges in the March quarter, F. H. Brownell, chairman, reported. This compared with 94 cents in 1939.

INGERSOLL RAND

Ingersoll Rand Co. business thus far in the year has been a little better than the corresponding period of 1939, D. C. Keefe, president, told stockholders. Total sales for 1939 were 8 to 9 percent ahead of 1938.

NATIONAL BISCUIT

National Biscuit Co. reported for the March quarter net profit of $2,803,101, equal to 38 cents a share on the common stock, compared with $2,969,333, or 40 cents a share, in the March quarter last year.

M'KESSON & ROBBINS

McKesson & Robbins, Inc., drug makers, and consolidated subsidiaries, earned net profit of $963,186 in the March quarter, compared with $638,565 in the corresponding 1939 period.

TEXAS GULF SULPHUR

Texas Gulf Sulphur Co. reported today for the March quarter net earnings of $2,043,007, equal to 53 cents a capital share, compared with $1,434,466, or 37 cents a share in the first 1939 quarter.

Decision of Supreme Court on Picketing Cases

EXTENSION OF REMARKS
OF
HON. ROBERT F. WAGNER
OF NEW YORK
IN THE SENATE OF THE UNITED STATES
Wednesday, April 24, 1940

OPINION BY MR. JUSTICE MURPHY

Mr. WAGNER. Mr. President, I ask unanimous consent to have printed in the RECORD the very important and learned opinion delivered by Mr. Justice Murphy in the Supreme Court of the United States on Monday last in the so-called picketing cases.

There being no objection, the opinion was ordered to be printed in the RECORD, as follows:

[Supreme Court of the United States. *Thornhill* v. *State of Alabama*, No. 514, Apr. 22, 1940. On writ of certiorari to the Court of Appeals of the State of Alabama. Reversed]

James J. Mayfield and Joseph A. Padway for petitioner; William H. Loeb, Assistant Attorney General of Alabama (Thomas S. Lawson, Attorney General of Alabama, with him on the brief) for the respondent.

Mr. Justice Murphy delivered the opinion of the Court.

Petitioner, Byron Thornhill, was convicted in the Circuit Court of Tuscaloosa County, Ala., of the violation of section 3448 of the State Code of 1923.[1] The code section reads as follows:

"SEC. 3448. Loitering or picketing forbidden: Any person or persons who, without a just cause or legal excuse therefor, go near to or loiter about the premises or place of business of any other person, firm, corporation, or association of people engaged in a lawful business for the purpose or with the intent of influencing or inducing other persons not to trade with, buy from, sell to, have business dealings with, or be employed by such persons, firm, corporation, or association, or who picket the works or place of business of such other persons, firms, corporations, or associations of persons for the purpose of hindering, delaying, or interfering with or injuring any lawful business or enterprise of another, shall be guilty of a misdemeanor; but nothing herein shall prevent any person from soliciting trade or business for a competitive business."

The complaint against petitioner, which is set out in the margin,[2] is phrased substantially in the very words of the statute. The first and second counts charge that petitioner, without just cause or legal excuse, did "go near to or loiter about the premises" of the Brown Wood Preserving Co. with the intent or purpose of influencing others to adopt one of enumerated courses of conduct. In the third count, the charge is that petitioner "did picket" the works of the company "for the purpose of hindering, delaying, or interfering with or injuring [its] lawful business." Petitioner demurred to the complaint on the grounds, among others, that section 3448 was repugnant to the Constitution of the United States in that it deprived him of "the right of peaceful assemblage," "the right of freedom of speech," and "the right to petition for redress." The demurrer, so far as the record shows, was not ruled upon, and petitioner pleaded not guilty. The circuit court then proceeded to try the case without a jury, one not being asked for or demanded. At the close of the case for the State, petitioner moved to exclude all the testimony taken at the trial on the grounds that section 3448 was violative of the Constitution of the United States.[3] The circuit court overruled the motion, found petitioner "guilty of loitering and picketing as charged in the complaint," and entered judgment accordingly. The judgment was affirmed by the court of appeals, which considered the constitutional question and sustained the section on the authority of two previous decisions in the Alabama courts[4] (*O'Rourke* v. *City of Birmingham*, 27 Ala. App. 133, 168 So. 206, certiorari denied, 232 Ala. 355, 168 So. 209; *Hardie-Tynes Manufacturing Co.* v. *Cruise*, 189 Ala. 66, 66 So. 657). A petition for certiorari was denied by the supreme court of the State. The case is here on certiorari granted because of the importance of the questions presented. December 11, 1939.

The proofs consist of the testimony of two witnesses for the prosecution.[5] It appears that petitioner on the morning of his arrest was seen "in company with 6 or 8 other men" "on the picket line" at the plant of the Brown Wood Preserving Co. Some weeks previously a strike order had been issued by a union, apparently affiliated with the American Federation of Labor, which had as members all but 4 of the approximately 100 employees of the plant. Since that time a picket line with 2 picket posts of 6 to 8 men each had been maintained around the plant 24 hours a day. The picket posts appear to have been on company property, "on a private entrance for employees, and not on any public road." One witness explained that practically all of the employees live on company property and get their mail from a post office on company property and that the union holds its meetings on company property. No demand was ever made upon the men not to come on the property. There is no testimony indicating the nature of the dispute between the union and the preserving company, or the course of events which led to the issuance of the strike order, or the nature of the efforts for conciliation.

The company scheduled a day for the plant to resume operations. One of the witnesses, Clarence Simpson, who was not a member of the union, on reporting to the plant on the day indicated, was approached by petitioner who told him that "they were on strike and did not want anybody to go up there to work." None of the other employees said anything to Simpson, who testified: "Neither Mr. Thornhill nor any other employee threatened me on the occasion testified to. Mr. Thornhill approached me in a peaceful manner, and did not put me in fear; he did not appear to be mad." "I then turned and went back to the house, and did not go to work." The other witness, J. M. Walden, testified: "At the time Mr. Thornhill and Clarence Simpson were talking to each other, there was no one else present, and I heard no harsh words and saw nothing threatening in the manner of either man."[6] For engaging in some or all of these activities, petitioner was arrested, charged, and convicted as described.

First. The freedom of speech and of the press, which are secured by the first amendment against abridgment by the United States, are among the fundamental personal rights and liberties which are secured to all persons by the fourteenth amendment against abridgment by a State.[7]

The safeguarding of these rights to the ends that men may speak as they think on matters vital to them and that falsehoods may be exposed through the processes of education and discussion is essential to free government. Those who won our independence had

---

[1] Petitioner was first charged and convicted in the inferior court of Tuscaloosa County and sentenced to imprisonment for 59 days in default of payment of a fine of $100 and costs. Upon appeal to the circuit court, another complaint was filed and a trial de novo was had pursuant to the local practice. The circuit court sentenced petitioner, upon his conviction, to imprisonment for 73 days in default of payment of a fine of $100 and costs.

[2] "1. The State of Alabama, by its solicitor, complains of Byron Thornhill, that within 12 months before the commencement of this prosecution he did, without just cause or legal excuse therefor, go near to or loiter about the premises or place of business of another person, firm, corporation, or association of people, to wit, the Brown Wood Preserving Co., Inc., a corporation, engaged in a lawful business, for the purpose or with the intent of influencing or inducing other persons not to trade with, buy from, sell to, have business dealings with, or be employed by the said Brown Wood Preserving Co., Inc., a corporation, for the purpose of hindering, delaying, or interfering with or injuring the lawful business or enterprise of the said Brown Wood Preserving Co., Inc., a corporation.

"2. [The second count is identical with the first, except that the last clause, charging a purpose to hinder, delay, or interfere, etc., with the lawful business of the preserving company, is omitted].

"3. The State of Alabama, by its solicitor, complains of Byron Thornhill, that within 12 months before the commencement of this prosecution he did picket the works or place of business of another person, firm, corporation, or association of people, to wit, the Brown Wood Preserving Co., Inc., a corporation, for the purpose of hindering, delaying, or interfering with or injuring the lawful business or enterprise of the said Brown Wood Preserving Co., Inc., a corporation."

[3] The petitioner also moved to exclude the testimony on the ground that it was insufficient to sustain a conviction. Upon being asked by the court whether he insisted on this ground, however, counsel for petitioner stated that the only question he wanted to raise was the constitutionality of the statute.

[4] The court of appeals stated: "It seems clear enough that the evidence adduced upon the trial was sufficient to bring appellant's actions, for which he was being prosecuted, within the purview of the prohibition implied in said statute.

"So, as conceded by able counsel here representing appellant, 'the only question involved in this appeal is the constitutionality vel non of section 3448 of the Code of Alabama of 1923.'"

[5] No evidence was offered on behalf of petitioner.

[6] Simpson and Walden are not in entire accord with respect to the number of persons present during the conversation between Simpson and petitioner. A possible inference from Simpson's testimony, considered by itself, is that petitioner was in the company of six or eight others when the conversation took place. This difference is not material in our view of the case.

[7] *Schneider* v. *State*, 308 U. S. 147, 160 (5 L. R. R. 332); *Lovell* v. *Griffin*, 303 U. S. 444, 450; *De Jonge* v. *Oregon*, 299 U. S. 353; *Grosjean* v. *American Press Co.*, 297 U. S. 233, 244; *Near* v. *Minnesota*, 283 U. S. 697, 707; *Stromberg* v. *California*, 283 U. S. 359, 368; *Gitlow* v. *New York*, 268 U. S. 652, 666. See *Palko* v. *Connecticut*, 302 U. S. 319, 326–327.

confidence in the power of free and fearless reasoning and communication of ideas to discover and spread political and economic truth. Noxious doctrines in those fields may be refuted and their evil averted by the courageous exercise of the right of free discussion. Abridgement of freedom of speech and of the press, however, impairs those opportunities for public education that are essential to effective exercise of the power of correcting error through the processes of popular government. Compare *United States* v. *Carolene Products* (304 U. S. 144, 152–153n). Mere legislative preference for one rather than another means for combatting substantive evils, therefore, may well prove an inadequate foundation on which to rest regulations which are aimed at or in their operation diminish the effective exercise of rights so necessary to the maintenance of democratic institutions. It is imperative that, when the effective exercise of these rights is claimed to be abridged, the courts should "weigh the circumstances" and "appraise the substantiality of the reasons advanced" in support of the challenged regulations. *Schneider* v. *State* (308 U. S. 147, 161, 162 (5 L. R. R. 332)).

Second. The section in question must be judged upon its face.

The finding against petitioner was a general one. It did not specify the testimony upon which it rested.[8] The charges were framed in the words of the statute and so must be given a like construction. The courts below expressed no intention of narrowing the construction put upon the statute by prior State decisions.[9] In these circumstances there is no occasion to go behind the face of the statute or of the complaint for the purpose of determining whether the evidence, together with the permissible inferences to be drawn from it, could ever support a conviction founded upon different and more precise charges. "Conviction upon a charge not made would be a sheer denial of due process" (*De Jonge* v. *Oregon*, 299 U. S. 353, 362; *Stromberg* v. *California*, 283 U. S. 359, 367–368). The State urges that petitioner may not complain of the deprivation of any rights but his own. It would not follow that on this record petitioner could not complain of the sweeping regulations here challenged.

There is a further reason for testing the section on its face. Proof of an abuse of power in the particular case has never been deemed a requisite for attack on the constitutionality of a statute purporting to license the dissemination of ideas (*Schneider* v. *State*, 308 U. S. 147, 162–165 (5 L. R. R. 332); *Hague* v. *C. I. O.*, 307 U. S. 496, 516 (4 L. R. R. Man. 501); *Lovell* v. *Griffin*, 303 U. S. 444, 451). The cases when interpreted in the light of their facts indicate that the rule is not based upon any assumption that application for the license would be refused or would result in the imposition of other unlawful regulations.[10] Rather it derives from an appreciation of the character of the evil inherent in a licensing system. The power of the licensor against which John Milton directed his assault by his Appeal for the Liberty of Unlicensed Printing is pernicious not merely by reason of the censure of particular comments but by reason of the threat to censure comments on matters of public concern. It is not the sporadic abuse of power by the censor but the pervasive threat inherent in its very existence that constitutes the danger to freedom of discussion. See *Near* v. *Minnesota* (283 U. S. 697, 713.) One who might have had a license merely for the asking may therefore call into question the whole scheme of licensing when he is prosecuted for failure to procure it (*Lovell* v. *Griffin*, 303 U. S. 444; *Hague* v. *C. I. O.*, 307 U. S. 496 (4 L. R. R. Man. 501)).

A like threat is inherent in a penal statute, like that in question here, which does not aim specifically at evils within the allowable area of State control but, on the contrary, sweeps within its ambit other activities that in ordinary circumstances constitute an exercise of freedom of speech or of the press. The existence of such a statute, which readily lends itself to harsh and discriminatory enforcement by local prosecuting officials, against particular groups deemed to merit their displeasure, results in a continuous and pervasive restraint on all freedom of discussion that might reasonably be regarded as within its purview.[11] It is not any less effective or, if the restraint is not permissible, less pernicious than the restraint on freedom of discussion imposed by the threat of censorship.[12] An accused, after arrest and conviction under such a statute, does not have to sustain the burden of demonstrating that the State could not constitutionally have written a different and specific statute covering his activities as disclosed by the evidence introduced against him (*Schneider* v. *State*, 308 U. S. 147, 155, 162–163 (5 L. R. R. 332)). Where regulations of the liberty of free discussion are concerned, there are special reasons for observing the rule that it is the statute, and not the accusation or the evidence under it, which prescribes the limits of permissible conduct and warns against transgression (*Stromberg* v. *California*, 283 U. S. 359, 368; *Schneider* v. *State*, 308 U. S. 147, 155, 162–163 (5 L. R. R. 332)). Compare *Lanzetta* v. *New Jersey* (306 U. S. 451).

Third. Section 3448 has been applied by the State courts so as to prohibit a single individual from walking slowly and peacefully back and forth on the public sidewalk in front of the premises of an employer, without speaking to anyone, carrying a sign or placard on a staff above his head stating only the fact that the employer did not employ union men affiliated with the American Federation of Labor; [13] the purpose of the described activity was concededly to advise customers and prospective customers of the relationship existing between the employer and its employees and thereby to induce such customers not to patronize the employer (*O'Rourke* v. *City of Birmingham*, 27 Ala. App. 133, 168 So. 206, cert. denied, 232 Ala. 355, 168 So. 209).[14] The statute as thus authoritatively construed and applied leaves room for no exceptions based upon either the number of persons engaged in the proscribed activity, the peaceful character of their demeanor, the nature of their dispute with an employer, or the restrained character, and the accurateness of the terminology used in notifying the public of the facts of the dispute.

The numerous forms of conduct proscribed by section 3448 are subsumed under two offenses: the first embraces the activities of all who "without just cause or legal excuse" "go near to or loiter about the premises" of any person engaged in a lawful business for the purpose of influencing or inducing others to adopt any of certain enumerated courses of action; the second, all who picket the place of business of any such person "for the purpose of hindering, delaying, or interfering with or injuring any lawful business or enterprise of another." [15] It is apparent that one or the other of the offenses comprehends every practicable method whereby the facts of a labor dispute may be publicized in the vicinity of the place of business of an employer. The phrase "without just cause or legal excuse" does not in any effective manner restrict the breadth of the regulation; the words themselves have no ascertainable meaning either inherent or historical. Compare *Lanzetta* v. *New Jersey*, 306 U. S. 451, 453–455.[16] The courses of action, listed under the first offense, which an accused—including an employee—may not urge others to take, comprehends those which in many instances would normally result from merely publicizing, without annoyance or threat of any kind, the facts of a labor dispute. An intention to hinder, delay, or interfere with a lawful business, which is an element of the second offense, likewise can be proved merely by showing that others reacted in a way normally expectable of some upon learning the facts of a dispute.[17] The vague contours of the term "picket" are nowhere delineated.[18] Employees or others, accord-

---

[8] The trial court merely found petitioner "guilty of loitering and picketing as charged in the complaint."

[9] The court of appeals determined merely that the evidence was sufficient to support the conviction under sec. 3448. See note 4, supra, p. 2. It then sustained the judgment in reliance upon *O'Rourke* v. *City of Birmingham*, 27 Ala. App. 133, 168 So. 206, cert. denied, 232 Ala. 355, 168 So. 209; and *Hardie-Tynes Mfg. Co.* v. *Cruise*, 189 Ala. 66, 66 So. 657.

[10] Compare *Electric Bond Co.* v. *Comm'n*, 303 U. S. 419; *Smith* v. *Cahoon*, 283 U. S. 553, 562; *Gundling* v. *Chicago*, 177 U. S. 183, 186; *Lehon* v. *Atlanta*, 242 U. S. 53, 55, 56; *Hall* v. *Geiger-Jones Co.*, 242 U. S. 539, 553, 554.

[11] The record in the case at bar permits the inference that while picketing had been carried on for several weeks, with six to eight men at each of two picket posts, sec. 3448 was not enforced against anyone other than petitioner, the union president, and then only after his conversation with Simpson, who thereupon returned home rather than report for work.

[12] A distinguished commentator has observed that "the liberty of the press might be rendered a mockery and a delusion and the phrase itself a byword if, while every man was at liberty to publish what he pleased, the public authorities might nevertheless punish him for harmless publications," 2 Cooley, Const. Lim. 8th ed., p. 885. See Madison's Report on the Virginia Resolutions, 4 Ell. Deb., 2d ed., 1876, p. 569; Address on the Conduct of the Maryland Convention of 1788, 2 id., p. 552.

[13] The employer in fact had locked out its union stage hands and was working others not regularly employed as stage hands in admitted violation of the National Industrial Recovery Act.

[14] Accused there asserted that the application of section 3448 to the particular facts of his case deprived him of rights guaranteed to him by the fourteenth amendment. The court of appeals passed upon this constitutional question and decided it adversely to the contentions of accused.

[15] There is a proviso that "nothing herein shall prevent any person from soliciting trade or business for a competitive business."

[16] So far as the phrase may have been given meaning by the State courts it apparently grants authority to the court and the jury to consider defensive matter brought forward by the accused, depending for its sufficiency not upon rules of general application but upon the peculiar facts of each case. See *Owens* v. *State*, 74 Ala. 401; *Bailey* v. *State*, 161 Ala. 75, 49 So. 886; *Folmar* v. *State*, 19 Ala. App. 435, 97 So. 768. Compare *O'Rourke* v. *City of Birmingham*, 27 Ala. App. 133, 168 So. 206, cert. denied, 232 Ala. 355, 168 So. 209.

[17] The only direct evidence in the case at bar to show that the activity of petitioner was accompanied by the necessary intent or purpose is the fact that one other employee, after talking with petitioner, refrained from reporting for work as planned. There is evidence here that the other employee was acquainted with the facts prior to his conversation with petitioner. The State concedes, however, that under section 3448 everyone must be deemed to intend the natural and probable consequences of his acts. See *Jacobs* v. *State*, 17 Ala. App. 396, 85 So. 837; *Reid* v. *State*, 18 Ala. App. 371, 92 So. 513; *Weeks* v. *State*, 24 Ala. App. 198, 132 So. 870, cert. denied, 222 Ala. 442, 132 So. 871; *Worrell* v. *State*, 24 Ala. App. 313, 136 So. 737, cert. denied, 223 Ala. 425, 136 So. 738.

[18] See Hellerstein, Picketing Legislation and the Courts (1931), 10 No. Car. L. Rev. 158, 186n: "A picketer may (1) Merely observe workers or customers. (2) Communicate information, e. g., that a strike is in progress, making either true, untrue, or libelous statements. (3) Persuade employees or customers not to engage in relations with the employer (a) through the use of banners, without speaking, carrying true, untrue, or libelous legends; (b) by speaking (i) in a calm, dispassionate manner, (ii) in a heated, hostile man-

ingly, may be found to be within the purview of the term and convicted for engaging in activities identical with those proscribed by the first offense. In sum, whatever the means used to publicize the facts of a labor dispute, whether by printed sign, by pamphlet, by word of mouth or otherwise, all such activity without exception is within the inclusive prohibition of the statute so long as it occurs in the vicinity of the scene of the dispute.

Fourth. We think that section 3448 is invalid on its face.

The freedom of speech and of the press guaranteed by the Constitution embraces at the least the liberty to discuss publicly and truthfully all matters of public concern without previous restraint or fear of subsequent punishment.[19] The exigencies of the colonial period and the efforts to secure freedom from oppressive administration developed a broadened conception of these liberties as adequate to supply the public need for information and education with respect to the significant issues of the times.[20] The Continental Congress in its letter sent to the inhabitants of Quebec (October 26, 1774) referred to the "five great rights," and said, "The last right we shall mention regards the freedom of the press. The importance of this consists, besides the advancement of truth, science, morality, and arts in general, in its diffusion of liberal sentiments on the administration of government, its ready communication of thoughts between subjects and its consequential promotion of union among them, whereby oppressive officers are shamed or intimidated, into more honourable and just modes of conducting affairs" (Journal of the Continental Congress, 1904 ed., vol. 1, pp. 104, 108). Freedom of discussion, if it would fulfill its historic function in this Nation, must embrace all issues about which information is needed or appropriate to enable the members of society to cope with the exigencies of their period.

In the circumstances of our times the dissemination of information concerning the facts of a labor-union dispute must be regarded as within that area of free discussion that is guaranteed by the Constitution (*Hague* v. *C. I. O.*, 307 U. S. 496 (4 L. R. R. Man. 501); *Schneider* v. *State*, 308 U. S. 147, 155, 162–63) (5 L. R. R. 332); see *Senn* v. *Tile Layers Union*, 301 U. S. 468, 478). It is recognized now that satisfactory hours and wages and working conditions in industry and a bargaining position which makes these possible have an importance which is not less than the interests of those in the business or industry directly concerned. The health of the present generation and of those as yet unborn may depend on these matters, and the practices in a single factory may have economic repercussions upon a whole region and affect widespread systems of marketing. The merest glance at State and Federal legislation on the subject demonstrates the force of the argument that labor relations are not matters of mere local or private concern. Free discussion concerning the conditions in industry and the causes of labor disputes appear to us indispensable to the effective and intelligent use of the processes of popular government to shape the destiny of modern industrial society. The issues raised by regulations, such as are challenged here, infringing upon the right of employees effectively to inform the public of the facts of a labor dispute are part of this larger problem. We concur in the observation of Mr. Justice Brandeis, speaking for the Court in *Senn's case* (301 U. S. at 478): "Members of a union might, without special statutory authorization by a State, make known the facts of a labor dispute, for freedom of speech is guaranteed by the Federal Constitution."

It is true that the rights of employers and employees to conduct their economic affairs and to compete with others for a share in the products of industry are subject to modification or qualification in the interests of the society in which they exist.[21] This is but an instance of the power of the State to set the limits of permissible contest open to industrial combatants. See Mr. Justice Brandeis in 254 U. S. at 488. It does not follow that the State in dealing with the evils arising from industrial disputes may impair the effective exercise of the right to discuss freely industrial relations which are matters of public concern. A contrary conclusion could be used to support abridgment of freedom of speech and of the press concerning almost every matter of importance to society.

The range of activities proscribed by section 3448, whether characterized as picketing or loitering or otherwise, embraces nearly every practicable, effective means whereby those interested—including the employees directly affected—may enlighten the public on the nature and causes of a labor dispute. The safeguarding of these means is essential to the securing of an informed and educated public opinion with respect to a matter which is of public concern. It may be that effective exercise of the means of advancing public knowledge may persuade some of those reached to refrain from entering into advantageous relations with the business establishment which is the scene of the dispute. Every expression of opinion on matters that are important has the potentiality of inducing action in the interests of one rather than another group in society. But the group in power at any moment may not impose penal sanctions on peaceful and truthful discussion of matters of public interest merely on a showing that others may thereby be persuaded to take action inconsistent with its interests. Abridgment of the liberty of such discussion can be justified only where the clear danger of substantive evils arises under circumstances affording no opportunity to test the merits of ideas by competition for acceptance in the market of public opinion.[22] We hold that the danger of injury to an industrial concern is neither so serious nor so imminent as to justify the sweeping proscription of freedom of discussion embodied in section 3448.

The State urges that the purpose of the challenged statute is the protection of the community from the violence and breaches of the peace, which, it asserts, are the concomitants of picketing. The power and the duty of the State to take adequate steps to preserve the peace and to protect the privacy, the lives, and the property of its residents cannot be doubted. But no clear and present danger of destruction of life or property, or invasion of the right of privacy, or breach of the peace can be thought to be inherent in the activities of every person who approaches the premises of an employer and publicizes the facts of a labor dispute involving the latter. We are not now concerned with picketing en masse or otherwise conducted which might occasion such imminent and aggravated danger to these interests as to justify a statute narrowly drawn to cover the precise situation giving rise to the danger. Compare *American Foundries* v. *Tri-City Council* (257 U. S. 184, 205). Section 3448 in question here does not aim specifically at serious encroachments on these interests and does not evidence any such care in balancing these interests against the interest of the community and that of the individual in freedom of discussion on matters of public concern.

It is not enough to say that section 3448 is limited or restricted in its application to such activity as takes place at the scene of the labor dispute. "[The] streets are natural and proper places for the dissemination of information and opinion; and one is not to have the exercise of his liberty of expression in appropriate places abridged on the plea that it may be exercised in some other place." *Schneider* v. *State* (308 U. S. 147, 161; 5 L. R. R. 332); *Hague* v. *C. I. O.* (307 U. S. 496, 515–516; 4 L. R. R. Man. 501.)[23] The danger of breach of the peace or serious invasion of rights of property or privacy at the scene of a labor dispute is not sufficiently imminent in all cases to warrant the legislature in determining that such place is not appropriate for the range of activities outlawed by section 3448.

Reversed.

Mr. Justice McReynolds is of opinion that the judgment below should be affirmed.

[Supreme Court of the United States, *Carlson* v. *People of the State of California*, No. 667, April 22, 1940. Appeal from the Superior Court of the State of California. Reversed]

Lee Pressman (Joseph Kovner, Anthony Wayne Smith, Richard Gladstein, Aubrey Grossman, and Benjamin Margolis with him on the brief) for appellant; Lawrence W. Carr for appellee; Osmond K. Fraenkel filed brief of American Civil Liberties Union as amicus curiae. Myer N. Rosengard and Samuel A. Rinella filed brief of Ross W. Swing as amicus curiae.

Mr. Justice Murphy delivered the opinion of the court.

This case presents the question whether regulations embodied in a municipal ordinance abridge the freedom of speech or of the press secured against State invasion by the Fourteenth Amendment.[24]

---

ner, (iii) using abusive epithets and profanity, (iv) yelling loudly, (v) by persisting in making arguments when employees or customers refuse to listen; (c) by offering money or similar inducements to strikebreakers. (4) Threaten employees or customers (a) by the mere presence of the picketer; the presence may be a threat of (i) physical violence, (ii) social ostracism, being branded in the community as a 'scab,' (iii) a trade or employees' boycott, i. e., preventing workers from securing employment and refusing to trade with customers, (iv) threatening injury to property; (b) by verbal threats. (5) Assaults and use of violence. (6) Destruction of property. (7) Blocking of entrances and interference with traffic.

"The picketer may engage in a combination of any of the types of conduct enumerated above. The picketing may be carried on singly or in groups; it may be directed to employees alone or to customers alone or to both. It may involve persons who have contracts with the employer or those who have not or both."

[22] See Mr. Justice Holmes in 249 U. S. at 52, 250 U. S. 630.

[23] The fact that the activities for which petitioner was arrested and convicted took place on the private property of the preserving company is without significance. Petitioner and the other employees were never treated as trespassers, assuming that they could be where the company owns such a substantial part of the town. See p. 3, supra. And section 3448, in any event, must be tested upon its face.

[24] "It is well settled that municipal ordinances adopted under State authority constitute State action and are within the prohibition of the amendment." (*Lovell* v. *Griffin*, 303 U. S. 444, 450; *Schneider* v. *State*, 308 U. S. 147 (5 L. R. R. 332).)

Section 2 of an ordinance of Shasta County, Calif., provides:

"It shall be unlawful for any person, in or upon any public street, highway, sidewalk, alley, or other public place in the County of Shasta, State of California, to loiter in front of, or in the vicinity of, or to picket in front of, or in the vicinity of, or to carry, show, or display any banner, transparency, badge, or sign in front of or in the vicinity of, any works, or factory, or any place of business, or employment for the purpose of inducing or influencing, or attempting to induce or influence, any person to refrain from entering any such works, or factory, or place of business, or employment, or for the purpose of inducing or influencing, or attempting to induce or influence, any person to refrain from purchasing or using any goods, wares, merchandise, or other articles, manufactured, made, or kept for sale therein, or for the purpose of inducing or influencing, or attempting to induce or influence, any person to refrain from doing or performing any service or labor in any works, factory, place of business, or employment, or for the purpose of intimidating, threatening, or coercing, or attempting to intimidate, threaten, or coerce any person who is performing, seeking, or obtaining service or labor in any such works, factory, place of business, or employment." [25]

Appellant was one of a group of 29 men engaged in picketing on United States Highway 99 in front of the Delta Tunnel project in Shasta County. "The picketing consisted of walking [on the edge of the highway nearest the project] a distance of 50 to 100 feet in a general northerly direction, then turning around and retracing steps and continuing as before * * * all of the walking in connection with the picketing * * * was done off the paved portion of the highway and on the graveled portion of the right-of-way; that is, on public property." Some of the pickets carried signs, similar to those described in the margin,[26] in such a manner that workers on the project and persons going along the highway in either direction could read them. The sign carried by appellant bore the legend: "This job is unfair to C. I. O." These activities occurred between the hours of 7:30 and 9 a. m. During this period vehicles and persons passed freely without any molestation or interference through the picket line from the highway to the project and from the project to the highway, and the traffic of persons and automobiles along the highway was not obstructed. Appellant did not threaten or intimidate or coerce anyone; did not make any loud noises at any time, and was peaceful and orderly in his demeanor. The pickets committed no acts of violence, and there was no breach of the peace.

The county officers arrested appellant and charged that he did "loiter, picket, and display signs and banners in a public place and in and upon a public highway in front of, and in the vicinity of, the Delta Tunnel project * * * for the purpose of inducing and influencing persons to refrain from doing and performing services and labor" at the project in violation of the ordinance. The justice's court of Township No. 9 found him "guilty of violating the Shasta County antipicketing law," rendered judgment accordingly, and imposed sentence. The superior court of Shasta County affirmed the judgment. That court upheld the ordinance over appellant's claim of unconstitutionality, on the authority of a prior decision.[27] The case comes here on appeal.[28]

Our decision in *Thornhill* v. *Alabama*, No. 514, decided this day, goes far toward settling the issues presented here. Under that decision, section 2 of the ordinance in question is to be judged upon its face.[29]

Section 2 on its face declares it unlawful for any person to carry or display any sign or banner or badge in the vicinity of any place of business for the purpose of inducing or attempting to induce any person to refrain from purchasing merchandise or performing services or labor. It likewise makes it unlawful for any person to loiter or picket in the vicinity of any place of business for a similar purpose. The terms "loiter" and "picket" are not defined either in the ordinance or in authoritative State decisions. Therefore, they must be judged as covering all the activities embraced by the prohibition against the carrying of signs in the vicinity of a labor dispute for the purpose mentioned.[30] The ordinance does not prescribe the carrying of signs in other places or for the purpose of inducing or attempting to induce others to adopt courses of action not related to labor disputes. It contains no exceptions with respect to the truthfulness and restraint of the information conveyed or the number of persons engaged in the activity. It is true that the ordinance requires proof of a purpose to persuade others not to buy merchandise or perform services. Such a purpose could be found in the case of nearly every person engaged in publicizing the facts of a labor dispute; every employee or member of a union who engaged in such activity in the vicinity of a place of business could be found desirous of accomplishing such objectives; disinterested persons (who might be hired to carry signs) appear to be a possible, but unlikely, exception.[31] In brief, the ordinance does not regulate all carrying of signs, but, on the contrary, prescribes the carrying of signs only if by persons directly interested who approach the vicinity of a labor dispute to convey information about the dispute.

The sweeping and inexact terms of the ordinance disclose the threat to freedom of speech inherent in its existence. It cannot be thought to differ in any material respect from the statute held void in Thornhill's case. The carrying of signs and banners, no less than the raising of a flag, is a natural and appropriate means of conveying information on matters of public concern. *Stromberg* v. *California* (283 U. S. 359). For the reasons set forth in our opinion in *Thornhill* v. *Alabama*, supra, publicizing the facts of a labor dispute in a peaceful way through appropriate means, whether by pamphlet, by word of mouth, or by banner, must now be regarded as within that liberty of communication which is secured to every person by the fourteenth amendment against abridgment by a State.

The power and duty of the State to take adequate steps to preserve the peace and protect the privacy, the lives, and the property of its residents cannot be doubted. But the ordinance in question here abridges liberty of discussion under circumstances presenting no clear and present danger of substantive evils within the allowable area of State control.

Reversed.

Mr. Justice McReynolds is of opinion that the judgment below should be affirmed.

[25] Section 1 declares that it shall be unlawful for any person "to make any loud or unusual noise, or to speak in a loud or unusual tone, or to cry out or proclaim, for the purposes of inducing or influencing, or attempting to induce or influence, any person" to refrain from enteriang, or purchasing merchandise from, or performing any service in any place of business. The State did not charge that this section was violated.

[26] Four signs were admitted in evidence as typical. They were of white cardboard, approximately 14 by 22 inches in size, and were tacked upon a stick some 34 inches long, 1½ inches wide, and ¼ inch thick. Black painted letters, ranging in size from 1½ inches to 5 inches in height, spelled out one of the following legends on each sign: "Don't be a scab," "Shasta Tunnel and Construction Workers Local No. 260," "C. I. O. Picket Line," "This job unfair to C. I. O."

[27] Appellant, prior to trial, moved to dismiss the complaint upon a number of grounds, among which was the contention that section 2 of the ordinance violated the fourteenth amendment in abridging his "freedom of speech, freedom of press, and freedom of assembly." The same objections were raised by demurrer, by further motions to dismiss the complaint, and by motion in arrest of judgment.

[28] There is no further appeal allowed in the State courts.

[29] We do not decide whether, in view of the separability provision (sec. 3), the State courts might cull out from section 2 particular clauses which, standing alone, could be sustained.

[30] See *Thornhill* v. *Alabama* (No. 514, p. 2, n. 18).

[31] Even they would be covered under a construction making purpose synonymous with intent. See *Thornhill* v. *Alabama* (No. 514, p. 2, n. 17).

Tax Exemption and Social Security

EXTENSION OF REMARKS

OF

HON. DAVID I. WALSH

OF MASSACHUSETTS

IN THE SENATE OF THE UNITED STATES

Wednesday, April 24, 1940

ARTICLE BY WILLIAM F. MONTAVON

Mr. WALSH. Mr. President, I ask unanimous consent to have printed in the Appendix of the CONGRESSIONAL RECORD an article by William F. Montavon, K. S. G., director of the legal department of the National Catholic Welfare Conference, entitled "Tax Exemption and Social Security," being a brief discussion of proposed amendments extending the coverage of the old-age benefits system as contemplated in the provisions of a bill I introduced known as Senate bill 3579.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Catholic Action for April 1940]

TAX EXEMPTION AND SOCIAL SECURITY—A BRIEF DISCUSSION OF PROPOSED AMENDMENTS EXTENDING THE COVERAGE OF THE OLD-AGE-BENEFITS SYSTEM

(By William F. Montavon, K. S. G., director, N. C. W. C. legal department)

The Social Security Act of 1935 excluded from the coverage of the old-age-benefits system persons employed in the tax-exempt, nonprofit educational, religious, and charitable agencies. By amendment the value of coverage in the old-age-benefits system was substantially enhanced in 1939. The benefits to the taxpayer were increased by these amendments, and the aged wife of the taxpayer was made a participant, as were also the surviving widow and other surviving dependents of the taxpayer.

To exclude from a system of benefits provided by legislation a large group of wage earners for no other reason than their being employed in the service of an educational, religious, or charitable

agency customarily exempt from the payment of taxes was manifestly an injustice in 1935. That injustice was substantially aggravated by the amendment of the Social Security Act by Congress in 1939 when the benefits of the act were made to extend to the wife and surviving dependents of the wage earner.

The old-age-benefits system as provided for in the Social Security Act of 1935, as amended, is financed through revenue derived from a tax on pay roll, which may be as high as 3 percent of the pay roll paid by the employer and 3 percent paid by the wage earner. At present the rate is 1 percent of the pay roll paid by the employer and 1 percent of wages received paid by the wage earner.

The advisory council which assisted in the drafting of the original economic security bill, out of which the Social Security Act grew, believed that no method within the framework of the Constitution existed whereby these employees of tax-exempt agencies could be included within the coverage of the old-age-benefits system without impinging on the tax-exempt status of the employing agency. The religious, charitable, and educational groups, therefore, to defend the tax-exempt status upon which stands in great measure their freedom of action, were forced into a position where they seemed to protest against and oppose the extension of the coverage of old-age benefits to their employees. This was not the true position of these groups. Their true position was probably best stated by a joint committee representing the three national hospital associations of the United States which in 1935 appeared before the Committee on Ways and Means and pleaded with that committee to find a way to extend to the employees of the hospitals the coverage of old-age benefits and at the same time to recognize and respect the customary tax-exempt status of the charitable hospitals. The committee seemed unable to find a solution for the problem, and the employees of the charitable hospitals and other tax-exempt agencies were excluded from the benefits of the act.

Since 1935, after much discussion and frequent conferences, the interested nonprofit, charitable, educational, and religious agencies have convinced legislative and administrative authorities of the Federal Government that it is possible within the framework of the Constitution to extend the coverage of the old-age-benefits system to the employees of these agencies and at the same time to recognize and respect their customary tax-exempt status. What is required to do this is that the revenue derived from the tax for the support of the old-age-benefits system be earmarked from the time of its collection and made payable directly into the Federal old-age and survivors' insurance trust fund. In this way revenue derived from this tax cannot become available for appropriation for any purpose other than that for which it is earmarked, and the tax itself is inseparably associated with and legally connected with the benefit. It is a payment for a quid pro quo, and thus truly a contribution. It does not, however, cease to be a tax because it remains compulsory and there is a penalty for nonpayment. It is analogous to a special assessment.

S. 3579, introduced by Senator WALSH on March 14, 1940, and referred to the Senate Committee on Finance, proposes to amend the Social Security Act along the lines indicated in this discussion and thus to extend the coverage of the old-age benefits system to the employees of religious, educational, and charitable agencies without impinging upon their customary tax-exempt status.

This proposed bill would amend section 201 of the Social Security Act. This section of the Social Security Act creates on the books of the Treasury of the United States a trust fund known as the Federal old-age and survivors' insurance trust fund and provides that for each fiscal year "out of any moneys in the Treasury not otherwise appropriated amounts equivalent to 100 percent of the taxes received under the Federal Insurance Contributions Act and covered into the Treasury" are appropriated to the above trust fund. S. 3579 would add to section 201 of the Social Security Act the following language: "The trust fund shall also consist of the taxes referred to in section 1420 (e) of the Internal Revenue Code," and would then add a new section, 1420 (e), to the Internal Revenue Code.

Section 1420 of the Internal Revenue Code refers to the collection and payment of taxes and provides that taxes imposed in connection with the old-age benefits system "shall be collected by the Bureau of Internal Revenue under the direction of the Secretary and shall be paid into the Treasury of the United States as internal-revenue collections." Thus the taxes for the support of the old-age-benefits system under the Social Security Act at present are general taxes subject to appropriation by Congress.

The new section 1420 (e), which S. 3579 would add, would safeguard the tax-exempt status of the religious and charitable agency paying the tax by requiring that all revenues collected from such tax-exempt agencies "shall be paid directly into the Federal old-age and survivors' insurance trust fund." In this way the proposed amendment would in reality convert what otherwise would be a general tax into a true contribution to a trust fund available only for the payment of old-age benefits and not subject to appropriation by Congress for any other purpose.

The proposed bill, S. 3579, would also amend section 209 (b) (8) of the Social Security Act. This section of the Social Security Act excludes from the old-age and survivors' benefits system persons who receive remuneration for service performed "in the employ of a corporation, community chest, fund, or foundation, organized and operated exclusively for religious, charitable, scientific, literary, or educational purposes, or for the prevention of cruelty to children or animals, no part of the net earnings of which inures to the benefit of any private shareholder or individual, and no substantial part of the activities of which is carrying on propaganda, or otherwise attempting to influence legislation." S. 3579 would omit this language from the Social Security Act, section 209 (b) (8), and would substitute for it the following: "Service performed by a duly ordained or duly commissioned or licensed minister of any church in the regular exercise of his ministry and service performed by regular members of religious orders in the exercise of duties required by such orders." This S. 3579 would extend the coverage of the old-age and survivors' insurance benefits to all the lay employees of the tax-exempt charitable, religious, and educational agencies now excluded by the Social Security Act and would exclude from these benefits only duly ordained or duly commissioned or licensed ministers of any church and members of religious orders.

The great diversity of agencies in the fields of education, benevolence, and religion that have indicated their desire to have this bill enacted is evidence that the project is receiving the wide-spread popular support which it merits.

Ways, Means, and Money to Put Over Wheeler-Lea Bill, and What Happens

EXTENSION OF REMARKS

OF

HON. WADE H. KITCHENS

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 22, 1940

Mr. KITCHENS. Mr. Speaker, in this morning's mail I received from El Dorado, Ark., a copy of a Postal telegram sent out by a man of the name of Smith, a representative of National Conference of Railroad Investors, lobbyist of railroads, to chairman of Texas unit, urging railroad security holders to bring pressure on their Congressmen to vote for "satisfactory" bill S. 2009, the Wheeler-Lea transportation bill. That telegram was sent from Washington, now and heretofore honeycombed with lobbyists for that bill. That telegram was sent to Josh R. Morriss, of Texarkana, Ark. In pursuance of that telegram, Morriss seems to have sent out letters to all railroad investors in Texas and surrounding territory, a copy of which I received this morning. I ask that the telegram and letter be inserted in the RECORD.

Mr. Morriss advises that several Texas Congressmen are in the doubtful column, and, of course, they should be looked after, and that all holders of railroad securities in the State of Texas should be contacted. He also requests contributions of 5 cents or more for each $1,000 railroad bond in their portfolio, and he says this is a customary contribution. He also encloses a form letter indicating how to transmit funds. A little mathematics will show that such contributions from railroad investors would bring in a total lobbying fund of over $100,000,000, and this clearly justifies the recent statement of Congressman CULKIN, of New York, as to such a slush fund.

Mr. Speaker, we are being lobbied, railroaded, and legislated to set back this country for 50 years. No sooner than we begin to avoid discriminations in freight rates and to obtain cheaper transportation an effort immediately is made to destroy it. Our automobiles, inland and coastal waterways, and airplanes will help bring about equality of treatment and cheaper transportation. Our coffee comes from South America; our tea comes from India, China, or Japan; our tin and rubber from Malay states; our cocoa from the Tropics; our breadstuff, dairy products, and meat from the West, Australia, or Argentina; our fish come from the rivers, lakes, and oceans; our fruit from Florida, California, and the Tropics; our cotton is barged along our rivers, coasts, and across the ocean. Where food is difficult to obtain, it is necessarily expensive regardless of wages. Our breadstuff is raised mostly in the West, 1,500 or 2,000 miles from the cities on the Atlantic coast, and our farmers and consumers cannot afford to pay the price the railroad management, by their desired monopoly and attitude of "all the traffic will bear" and "the public be damned," will insist upon asking and taking. All of us are consumers of farm products, and the Wheeler-Lea bill will increase the cost, reduce consumption, curtail and lessen the wages of labor, and increase our surpluses.

The railroads use the harbors of this country free of charge, harbors upon which $720,000,000 have been expended. The Wheeler-Lea bill will destroy the waterway expenditure for our rivers and harbors. If we want to encourage our farmers, we must give them water-transportation rates for their crops in comparison with prices paid by others for ocean transportation. Farmers are engaged in a strictly competitive business. Grains they grow are produced all over the world and reach European markets by oceangoing vessels. From Australia they go to the channel ports of England, a distance of 15,000 miles, at a cost of 16 cents per bushel. From Yankton, S. Dak., to Duluth, Minn., a distance of 424 miles, the railroads charge 15.9 cents per bushel. This is 30 times the waterway charge per mile. What possible chance have American farmers to compete for the markets of Europe?

As a member of the Flood Control Committee of the House, I find this Government has spent millions upon millions of dollars in construction of walls, levees, and other protective works for railroads against floods. The record shows that the railroads have some 2,200 steamboats, tugs, barges, car floats, canal boats, and other kinds of floating equipment representing an investment of many millions of dollars. Have they paid any part of the $720,000,000 spent by the Government on the coast and channels, or of the large sums spent on the Great Lakes to permit their car ferries to operate?

It is well known that several canals have been built in the United States by the people in order to obtain reasonable transportation rates, but those canals have been put out of existence. Take the Delaware and Raritan Canal, which the Pennsylvania Railroad leased in the State of New Jersey for 99 years. Take the Delaware and Hudson and Morris and Essex. All of those canals were put out of business, with a result that the freight rate for hauling coal from mines to tidewater increased from 75 cents per ton to $2.49 now charged per ton. The record shows the Erie Canal is still in use and has been constantly improved during the past 100 years. That canal enables the transportation of—and railroads do transport—grain at 4 cents per bushel across the State of New York—a distance of 436 miles. Elsewhere in this country where there is no waterway competition the railroads charge farmers and shippers 15.9 cents per bushel, on an average, for the same distance.

I am opposed to the placing of our waterways under the jurisdiction of the Interstate Commerce Commission because that Commission is archaic, fossilized, one-track, sidetrack, and railroad-minded. It has not had two new ideas in a generation. I lack confidence in that Commission. It does not function in the interest of the whole people. I know that Commission desires this extra authority. It wants the power to justify its existence for the railroads. We know for years and years it has permitted glaring discriminations against various sections of our country. They grade us by zones and penalize us by classes and sections.

Today we have most serious problems confronting us, and one of the most important is lack of distribution of our products. A few moments ago we passed a resolution creating a committee of this House to investigate migratory problems now imminently confronting us. Over 20,000 families are in migration. We have thousands upon thousands of our people leaving certain sections of the country, roaming about, and we do not stop to think of the cause.

I will tell you one of the main causes. It is discrimination and favoritism in freight rates. It is making the laboring man of the South, consumers of the South, and employers of the South, and particularly in the States of Texas, Oklahoma, and Arkansas—the so-called southwestern zone—pay a third more for transportation of their freight than other sections of the country. It is no wonder we have a migratory problem. Industry is prevented from coming to that section of the country and at the same time its natural resources are being exhausted. Some of you try to deceive the laboring man of that section of the country, when you well know neither he nor his employer can compete, exist, or live decently if required to pay a higher freight rate than his competitor. He will naturally seek a place alongside his neighbor, and to do so will migrate with his family, congest your cities, and increase your problems.

After all, Mr. Speaker, what can we do when we see the railroads and their owners contributing millions upon millions in support of a bill such as the Wheeler-Lea bill now in conference, and find their shrewd lobbyists here all about us? I warn the people of this country, of the North and East, that so long as we have these discriminations, these feudal zones, these unfair and discriminatory freight rates, and prospective and imminent destruction of our waterways for the transportation and distribution of the products of this country, we will continue to have not only migratory problems but more serious ones.

The railroads of any section cannot be more prosperous than the people they serve in that section. Their rates materially affect all wages, prices, employment, and educational opportunities.

Is there need or demand by the people for regulation of inland waterways? Only railroad investors, railroad management, and those who speculate in the securities of railroads are demanding regulation and destruction of our water transportation. I am tired of so much regulation and favor regulating the regulators. Speculators by manipulation of securities on the exchanges have bankrupted our railroads for about every 20 years. They are in their present plight while for 50 years under the eye and regulatory control of Interstate Commerce Commission. Why now jeopardize, bankrupt, and destroy our other means of transportation? Why not profit by experience and use common sense?

Mr. Speaker, the Interstate Commerce Commission has permitted to be built up in this country a system of freight rates so complex, technical, voluminous, and confusing that "it is lost in a jungle of rates." I ask in all sincerity for any sound reason to justify the destruction of our inland water transportation by strangulation at the hands of the Interstate Commerce Commission. Why give up our only weapon of defense and of protection for future reasonable rates? Imagine the intricacies, the maze, the confusion worse confounded, in placing all rates under that agency, the port-to-port rates, regulation of services, schedules, distribution, and exchange of equipment; control over establishment of new services; extension or abandonment of existing services and control over accounting and financing of water carriers.

What guide will the Commission use for its work? Only railroad rates as a guide will be used, because it has no other experience. Will the Commission lower the waterway rate? Not at all. Will the Commission lower the railroad rate to conform to water rates? Certainly not. What will happen? The waterway rate will be raised to the railroad rate, or to such a level as to destroy competition. Then the railroad will get the business because of a faster service, and the inland waterways will dry up; the inland sections and cities of the country will retrograde; the coasts and their cities will build up and prosper for a while; and California, the home of the able Representative and House sponsor of this bill, and other coast sections will double and treble in population, and a much greater migrant problem will exist than now. But, Mr. Speaker, what can the people do? How can we defeat a lobby of $100,000,000? That is a question that the people can and will solve in time, but it may be too late for our generation.

THE TEXAS STATE UNIT OF THE
NATIONAL CONFERENCE OF INVESTORS,
Texarkana, Tex., March 30, 1940.

DEAR MR. ———: You will be interested in the enclosed copy of telegram which reports status of our most important railroad bill, S. 2009, the Wheeler-Truman-Lea bill. I am sure it is needless for me to suggest that you again write your Congressman regarding this matter.

Several Texas Congressmen are in the doubtful column, and therefore we should contact all holders of railroad securities residing in our State. However, the extent of our circularization will depend upon available funds.

I trust you will make a contribution for this specific purpose. Although 5 cents for each $1,000 railroad bond in your portfolio is customary, any contribution you may make will be extremely helpful and appreciated.

Every dollar so received will be expended exclusively for mailing costs directly connected with the passage of this bill. I hope you will cooperate and enclose an appropriate blank.

Sincerely yours,

JOSH R. MORRISS.

The chairman of the Texas unit of the National Conference of Investors seeks a lobby fund of the "customary" 5 cents per $1,000 bond from railroad security holders to cover costs "directly connected with the passage of this bill" (S. 2009, Wheeler-Lea transportation bill).

[Telegram from Washington representative of National Conference of Investors to chairman of Texas unit urging railroad security holders to bring pressure on their Congressmen to vote for satisfactory bill—S. 2009, Wheeler-Lea transportation bill]

MARCH 28, 1940.

JOSH R. MORRISS,
F. W. Offenhauser & Co., Texarkana, Tex.:

Conference committee S. 2009 will report shortly. Some provisions of Senate and House drafts may be dropped but its main provision for regulation all forms transportation will undoubtedly be retained in satisfactory form. Water carriers, particularly barge-line operators and users, conducting vigorous campaign. In addition to powerful lobby here they have organized intensive letter-writing campaign. Feel reasonably sure we can pass bill in Senate but certain hard fight in House. In addition to urging your members to wire or write their Congressmen, believe it vital you contact all railroad investors in your State and urge them use their personal influence with their Congressman.

SMITH.

THE COLLECTION CARD WHICH ACCOMPANIED MR. MORRISS' URGENT APPEAL FOR FUNDS TO USE IN OBTAINING ENACTMENT OF S. 2009

————, TEX., ————, *1940.*

JOSH R. MORRIS,
Chairman, F. W. Offenhauser & Co., Texarkana, Tex.

Herewith check for $————.

This contribution is made with the specific understanding that it shall be used exclusively for mailing costs directly connected with advising railroad investors of the provisions and status of Senate bill 2009 and urging them to use their personal influence in its behalf.

A Real American

MEMORIAL ADDRESS
OF
HON. CLARENCE CANNON
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL E. MAPES, late a Representative from the State of Michigan

Mr. CANNON of Missouri. Mr. Speaker, one of the privileges of membership in the House is the opportunity afforded for association with men from so many sections of the country, and of such varied talent and interests. And one of the tragic experiences of our service here is the last farewell to a colleague whom we have learned through many hard-fought battles on the floor to love and cherish as a comrade on this side of the aisle or to respect and admire as a generous antagonist on the other side of the aisle. In the last few sessions there has been a long list of both—most of them fallen before their time—dropping beneath the growing load which has steadily increased in the last strenuous years through which the country and the world have been passing.

Since I have been on this floor—from the Sixty-second to the Seventy-sixth Congresses—1,888 Members have been elected to the House. Of these I have seen the flag drop to half mast for more than 200, among them some of the greatest men of the Nation. With few of them have I been so closely associated or enjoyed such intimate friendship as with CARL MAPES, of Michigan. For many years his office adjoined mine in the old office building. And when we moved across the street together we again found offices on the same floor. Daily I had the opportunity for a social word or for conference on some of the more serious problems with which the Congress has had to deal. Our last trip together on the pioneer flight of the *Yankee Clipper*, when through the night, suspended between sea and stars, we crossed the Atlantic, further cemented our friendship and strengthened my warm regard for him. And while we were not of the same political faith, we frequently found common ground and mutual interests, and always a better understanding of our problems through frank discussion of points of variance.

More and more I came to value his calm, dispassionate appraisal of conflicting issues, his deep and unerring insight into the motives underlying legislative strategy, his keen power of analysis of economic problems, and especially his unswerving integrity in his dealings with his colleagues, his constituency, and his country. He was by nature a conservative. He was never swept from his moorings; never hurried; never stampeded; never vindictive. It was inevitable that he should become one of the pillars around which the members of his party gathered in times of stress. His exhaustive study of procedure and his wide knowledge of parliamentary law made him particularly valuable, and his decisions as Speaker pro tempore and as Chairman of the Committee of the Whole, over which he frequently presided, are among the most scholarly and authoritative in the precedents of the House. At the same time, when conditions warranted, he was one of the most progressive leaders of the House.

He held his place—
Held the long purpose like a growing tree—
Held on through blame and faltered not at praise.
And when he fell, he went down
As when a lordly cedar, green with boughs,
Goes down with a great shout upon the hills,
And leaves a lonesome place against the sky.

His service to his district and his constituents cannot be measured in words. No task was too great; no request too small; no obstacle too discouraging when the interest of his district or a constituent was to be served. When a request came he did not wait to learn the affiliations of the applicant. It mattered not whether they had been friend or foe, whether they had supported or opposed him; high or low, influential or unknown—he served them all without fear or favor. It is not to be wondered that he had the devoted affection and support of all who really knew him, regardless of party affiliation or condition in life. And in the fateful election of 1932, when every State save two overwhelmed his party in a landslide unprecedented in the political history of the Nation—when his own State was swept by a political storm of such proportions as to leave only a solitary landmark here and there, he was returned to the House by voters who singled him out on opposing tickets—one of the political miracles of that memorable election.

I viewed their last tribute to him. As his cortege passed slowly through the streets of his beloved city, the vast and silent concourse of people—his people—who lined the streets and filled to overflowing every point of vantage along the route of the procession, evidenced an affection and appreciation more eloquent than any eulogy of press or pulpit. And as I watched them in that solemn hour of exalted abnegation, I thought with them:

He was a man, take him for all in all,
We shall not look upon his like again.

Mr. Speaker, under the leave granted me to extend my remarks in the RECORD, I desire to include the following editorial from the Grand Rapids Press of December 13, 1939:

A REAL AMERICAN

Death has ended the quiet, able, and courageous influence of Representative CARL E. MAPES in the conduct of the Nation's affairs and in the service of his district—a service which has extended without break, either in its continuity or its usefulness, since his first election to Congress in November 1912.

No praise for the people of Kent and Ottawa Counties can exceed the accolade they have conferred upon themselves in holding quiet worth above more sensational qualities, and standing by CARL MAPES through 27 years. With a sound intuition the district came to appreciate that if CARL MAPES spoke seldom, he spoke always from conviction and intelligence; that if he did not move easily with popular whim, it was because his mind and character rebelled against mere expediency, and insisted upon plumbing down to truth. Something only the best men in politics acquire was his—the innate and deep respect of his constituents, a respect stronger than any differences of the day.

Politics to CARL MAPES was the science of good government, never a means to any selfish or unpatriotic end. If there is hope in representative government, it is in the existence of a leaven of such straight men as this at Washington, who answer in the best sense to the definition of patriots.

Beginning as assistant prosecutor and State legislator from this county, Mr. MAPES devoted almost his entire adult life to the public service. His colleagues at Washington took his measure soon after he had begun his congressional career. They turned his earnestness and his excellent mind to good account in the all-important committee work behind the scenes. As chairman of the District Committee he was the "uncrowned mayor of Washington," and served ably in the reorganizing of the Capital's administration and its laws. As a parliamentarian of first rank he came to be indispensable in the floor leadership of successive administrations. By 1932 he shared with his good friend, the late Bert Snell, the party's favor for the Speakership; and it was well known last year that if he had cared to abandon his place as ranking Republican on the powerful Rules and Interstate and Foreign Commerce Committees he could have taken the Republican House leadership. The faith of voters at home gave him seniority; but the quality of the man turned seniority into a far greater power than time alone could have made it.

Mr. MAPES was a strong believer in party government but never was in any sense subservient to the machine or the boss. He stood by his party in the broad major outlines of its policy but never hesitated to break with it when conscience or a sense of the public welfare dictated rebellion. He campaigned vigorously at every election, but no fear of personal fortunes controlled him. Those who recall the 1934 and 1936 elections, and the part his vigorous opposition to the liquor traffic played in his near-defeats in primaries or finals, know that when Mr. MAPES voted in Congress on the liquor referendum he was fully aware that he probably was signing his own political death warrant. But somehow a majority looked at the man and his courage instead of the immediate issue and stood with him while most of the district disagreed with his action.

Among his true friends were men of the Democratic Party who loved him for his human worth and did not hesitate to call upon his great ability. Major credit went to him from Congressman SAM RAYBURN for the drafting of the new securities and exchange law, which Mr. MAPES insisted in regarding as so important that it transcended all party lines.

But his best friends were humble people in every corner of his district, who knew how genuine was his interest in them and their work and their families. The greatness of simplicity was his; the simplicity of a man who was real to the core, and needed no pomp nor fine words to make others aware of his quality.

It will be a long search before Kent and Ottawa Counties find such another. In CARL MAPES they had as their spokesman one of the recognized 10 ablest men in Congress. The one great hope is that both parties, in seeking his successor, will apply as their rules of choice the qualities of CARL MAPES himself, and will attempt as well as they can to procure these high merits of patriotism, industriousness, and integrity in the individual who is to fill his place. That is a real challenge. The people have known CARL MAPES too long to be satisfied with a self-serving or small man as their servant at Washington. They have known a man to whom they could direct their sons for an example of fine Americanism; a man who honored politics and government by his association with them.

Cassius Clay Dowell

MEMORIAL ADDRESS

OF

HON. KARL M. LECOMPTE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 24, 1940

On the life, character, and public service of Hon. CASSIUS CLAY DOWELL, late a Representative from the State of Iowa

Mr. LECOMPTE. Mr. Speaker, I wish to add a word of tribute to our lamented colleague and my friend the late Honorable CASSIUS C. DOWELL, of Iowa.

Representative DOWELL was a plain man of the plain people. If he could have his way, any tributes paid him by his colleagues would be simple tributes, in keeping with the character of the man.

His passing ended a work covering 12 years in the Iowa Legislature and 23 years in the Congress of the United States. In those 35 years of public service I am sure that no act was performed, no position was taken, no cause was advocated by CASSIUS C. DOWELL that did not square with his profound sense of patriotism, integrity, and good government.

He was a quiet man who went his way and performed his service without any dramatic show or publicity, but he always sought to perform those duties fully and faithfully. The people of Iowa—those who knew him best—knew his worth, and they retained him in the United States Congress for 23 years, after having kept him in the State legislature for 12 years.

Like most quiet individuals, CASSIUS DOWELL was a careful and consistent student of legislation. He had a much broader grasp of public affairs than even his colleagues realized, because he was not much given to words, and because he was a great believer in the truth that he who would conquer a city or rule a country must first conquer and rule himself. CASSIUS DOWELL therefore went about his work of ruling himself and of legislating for his Nation with that quiet confidence, that modest earnestness, which mark the truly great.

The work of which he was proudest, I think, was the work he did while chairman of the House Committee on Roads, when he secured the enactment of legislation providing Federal aid for the building of our modern highway system. To him, I think, as an individual legislator, more than to any other, is due the credit for inspiring the progressive program which he sponsored for the present marvelous system of highways throughout the country.

The Nation and the State, as well as his friends and family, lost an able legislator, a sincere patriot, an intelligent student of affairs, an affectionate relative, and a sincere friend when CASSIUS C. DOWELL laid down his earthly tasks.

It is comforting to feel that his work is not forgotten, that his spirit marches on. He was typical of the great statesmen of a generation ago, and we will not soon see his like again.

William Edgar Borah

MEMORIAL ADDRESS

OF

HON. ALFRED L. BULWINKLE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 24, 1940

On the life, character, and public service of Hon. WILLIAM EDGAR BORAH, late a Senator from the State of Idaho

Mr. BULWINKLE. Mr. Speaker, as chairman of the Committee on Memorials, I wish to extend my remarks upon the life, character, and public services of the Honorable WILLIAM E. BORAH, senior Senator from the State of Idaho, by inserting in the RECORD the address of the Honorable JOSH LEE, Senator from the State of Oklahoma, and a letter addressed to me as chairman of the committee.

UNITED STATES SENATE,
COMMITTEE ON MILITARY AFFAIRS,
April 15, 1940.

Hon. ALFRED L. BULWINKLE,
Chairman, Committee on Memorials,
House of Representatives, Washington, D. C.

DEAR CONGRESSMAN BULWINKLE: In response to your letter of March 29, I am enclosing a copy of my address made in tribute to the late Senator Borah.

I would appreciate very much having this included among those extended in the RECORD in connection with the memorial service April 24.

Many thanks for this courtesy.

Sincerely yours,

JOSH LEE,
United States Senator.

TRIBUTE TO THE LATE SENATOR BORAH

[Remarks of Hon. JOSH LEE, of Oklahoma, in the Senate of the United States, January 23, 1940]

Mr. LEE. Mr. President, today for the first time in one-third of a century the clerk who called the roll omitted the name of Senator BORAH. It is difficult to think of the United States Senate without him. How often have the Senate pages rushed into the anterooms and whispered to us, "Senator BORAH is speaking"? And always we hurried in to hear him. We listened to him; and I am glad that we did, for he was a great man.

But now his eloquent tongue is stilled forever. His clear voice will never again fill this Chamber, but his clear thinking will, down through the years, I am sure, continue to influence this body.

Today his seat is vacant. Later it will be occupied, but it may never be filled, for Senator BORAH was a great man. He lived for

America as nobly as others have died for her. He fought valiantly for the causes in which he believed. He walked with kings all right, but he never lost the common touch.

He was courageous but not foolhardy. He was liberal but not radical. He was conservative but not reactionary. He was progressive and yet he was cautious—suspicious of the untried and slow to relinquish the proven.

He debated, but he never quibbled. He was determined but never contentious. He was always courteous. The fairness of his manner often disarmed his opponent. He differed without offending. He disagreed without antagonizing. I never heard him use ridicule or abuse. He never resorted to sarcasm, but relied solely upon the soundness of his arguments. There was little escape from the compelling logic of his conclusions, and the very simplicity of his language was its eloquence.

I well remember the last great speech he made in this Chamber. He spoke on the neutrality bill. You remember it, too. The Senate and the galleries were breathless. His eyes blazed with the light of battle as he denounced war profiteering, and his whole frame shook with emotion as he urged that we not take one step toward war.

No one ever questioned his sincerity and few have ever matched his patriotism.

And now he is gone. He has been a part of the United States Senate so long that we will find ourselves expecting him to come in—but he will not come. We will unconsciously glance toward the desk which he has occupied so long, expecting there to see his benign countenance, only to be reminded of our great loss. We shall miss him; we shall miss him so much that it will be exceedingly difficult to reconcile ourselves to his absence.

We who knew him are fortunate because in the years to come when we read his precepts, they will have a richer meaning because we knew Senator BORAH, the man.

He was kindly and personable. He loved children, and they loved him. Last year during the special sesson, he was accustomed to sit on a bench in a little park which is just in front of the apartment house where we live. Our little girl, Mary Louise, used to play in that park. They became fast friends. The last time I talked to Senator BORAH he asked to be remembered to his little playmate.

Mr. President, I admired Senator BORAH at long range even before I met him. I admired him more at closer range as merely an acquaintance, but as that acquaintance became more intimate, my admiration warmed into friendship.

Although he had been here over 30 years, he never forgot to encourage a newcomer. His was the first friendly hand laid upon my shoulder when I first became a Member of this body. My seat was the one just next behind his. Many times during those first months I whispered to him for advice. He always gave it so kindly and so encouragingly that I was drawn to him by the sheer warmth of his great heart.

And now he is gone. He has been called to sit in that celestial gallery to which many of his colleagues before him have already been summoned. But he leaves to us the thrilling inspiration that comes from the great life of a great American.

Chester Castle Bolton

MEMORIAL ADDRESS
OF
HON. THOMAS A. JENKINS
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CHESTER CASTLE BOLTON, late a Representative from the State of Ohio

Mr. JENKINS of Ohio. Mr. Speaker, under leave to extend my remarks, I include the following address of Hon. ROBERT A. TAFT, Senator from Ohio, on the life, character, and public service of Hon. CHESTER CASTLE BOLTON, late a Representative from the State of Ohio:

REMARKS BY HON. ROBERT A. TAFT, OF OHIO

Those who knew CHESTER C. BOLTON have suffered an irreparable personal loss in his death. The community in which he lived, the State of Ohio, and the Nation can ill afford to lose a man so vigorous in thought and action, so experienced in governmental affairs, and so unselfish in public service. With every right to look forward to many years of useful work, he literally sacrificed his life for his country, for his illness resulted directly from the intensity with which he labored in Congress and in the campaign of 1936.

CHESTER C. BOLTON was born in Ohio, and lived in Cleveland throughout his life. He was educated in the Cleveland public schools and at Harvard University, and had a long career in private business and in local and State government. He early demonstrated his ability and capacity by a steady rise in the business in which he was employed. He served with distinction in the United States Army during the World War. After the war he started his public career as a member of the Lyndhurst Village Council, and was elected a member of the senate from Cuyahoga County in 1922, serving there for 9 years. I was in the House of Representatives when he was the leader of the senate, and I know how competent and fair and honest was his leadership. He became an authority on State taxation and many other matters related to the State and local governments of Ohio. It was eminently fitting that he should go on from this service to the Seventy-first Congress, where he served continuously, except for one term, until his death on October 29, 1939. In 1936 he served as chairman of the Republican congressional campaign committee. He threw himself into the campaign with all his energy and enthusiasm, and it was the terrific political work, combined with that in Congress, which brought about his illness.

With a wide and unselfish interest in community and national affairs, Mr. BOLTON did more than give mere lip service to the maintenance and improvement of the American way of life. He gave freely to charity of his own resources. During his congressional service, he constantly supported welfare and relief measures; he advocated the extension of the merit system; he actively supported the conservation of natural resources, and he was especially concerned with unemployment problems.

In community affairs he displayed unusual leadership. He was instrumental in the original organization of the Cleveland Community Fund Council, and he has been active in numerous charitable and health organizations throughout Ohio.

On September 14, 1907, CHESTER BOLTON married Frances Bingham, and they have three children, Charles B., Kenyon C., and Oliver P. Bolton.

Mr. and Mrs. Bolton were both known widely for their kindly generosity, which brought health and hope to many. It is indeed fitting that in public affairs, as in private charity, their work should be taken over by Mr. BOLTON'S widow, who sympathized so deeply with all his ideals.

In the Congress, where he represented one of the largest congressional districts in the country, he was the warm friend of many of his colleagues, and they considered him to be one of its most capable, best informed, and painstaking members, upon whose judgment and integrity they could always rely. Not only from his public record, but from my own personal association with him for many years in the Ohio General Assembly and since that time, I can testify that he exemplified the best traditions of the statesman, that he was a man of good judgment, honesty of purpose, marked ability, strict and unswerving integrity, and, above all, simplicity of character.

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. CLARENCE J. BROWN
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. BROWN of Ohio. Mr. Speaker, I rise to pay tribute to the memory of one of the finest gentlemen ever to serve in the Congress of the United States. I refer to Hon. CARL E. MAPES, late Representative from Michigan.

CARL E. MAPES was a quiet, unassuming man. He did not use the clash of cymbals or the blare of brass to herald his coming or to call attention to his deeds. Yet perhaps no man in recent years has had a greater influence in the Congress of the United States than CARL E. MAPES. Those who served with him knew when the legislative storms came the gentleman from Michigan, calm and collected, always facing the future with a serene courage, was one to whom all could turn for inspiration and leadership in the hour of need.

He will be missed by all of his colleagues, regardless of partisanship; but to the younger Members of Congress—those serving their apprenticeship in the House—the passing of CARL MAPES was a real tragedy. Out of the bigness of his soul and the kindliness of his heart CARL MAPES took a special interest in the welfare of the men coming into the House of Representatives for their first service. He extended to these neophytes his warm friendship, his helpful advice, and his encouragement. They in turn gave to him their respect and deep appreciation.

CARL E. MAPES was a Christian gentleman. He was a true patriot. His passing came, as I believe he would have wanted it, while in the active service of his country. CARL MAPES has gone from these legislative halls, but he lives on in the memories of his colleagues, who loved and honored him, and in the great contributions he has made to his beloved America as a Member of Congress.

Marvel Mills Logan

MEMORIAL ADDRESS
OF
HON. ALFRED L. BULWINKLE
OF NORTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of the Honorable MARVEL MILLS LOGAN, late a Senator from the State of Kentucky

Mr. BULWINKLE. Mr. Speaker, as chairman of the Committee on Memorials, I wish to extend my remarks upon the life, character, and public services of the Honorable MARVEL MILLS LOGAN, Senator from the State of Kentucky, by inserting in the RECORD the address of the Honorable JAMES J. DAVIS, senior Senator from the State of Pennsylvania.

ADDRESS BY HON. JAMES J. DAVIS, SENIOR SENATOR FROM THE STATE OF PENNSYLVANIA

I speak with deep feeling when I say Senator MARVEL MILLS LOGAN was a Christian statesman, a wonderful friend, and a jurist of rare abilities. During our days together in the Senate I had more than the usual opportunity to know him because we had a general pair which provided for such times as we were compelled to be absent from our places. And this gave me frequent occasion to consult with him. Thus I learned the fine qualities of his mind and spirit.

Senator LOGAN began to show an interest in politics from the time he began practicing law in his home town in Brownsville, Ky., at the age of 22. He held his first political office at the age of 28, when he became county attorney, and by 1912 he had become first assistant attorney general of Kentucky. Four years later he was attorney general of the State.

In 1931 Judge LOGAN, a massive man, 6 feet, 4 inches in height, with heavy graying hair, was elected to the United States Senate. After only a few months in the Senate he said that he had never held an office that did not compel him to resign and go back to work to make a living and try to pay back debts. Nevertheless, he remained on in the Senate and stood successfully for reelection in 1936.

Senator LOGAN showed an early interest in Odd Fellowship and was a member of all the branches of that great fraternal order. In his capacity as grand sire of the order throughout the world in 1930, he proved to be one of the most conscientious, hard working, and loyal men to ever grace that office. It came to him in recognition of his outstanding devotion to all of the fine ideals which the great fraternity over which he presided has proclaimed to the world. He practiced in his daily life the doctrines of friendship and love and truth.

Senator LOGAN'S private and official life was characterized by deep sincerity and high purpose. He was a sound thinker, a prodigious worker, and he lived true to the courage of his convictions. He dedicated his efforts to tireless and unflinching championing of representative government. He was ever loyal to his State of Kentucky and to the people of this Nation. We who knew him well mourn his passing. He was judicial in his approach to contemporary problems and thoroughly independent in his points of view. I appreciated especially his fine Christian spirit of toleration and his genial good will. Senator LOGAN was one of the most conscientious, industrious, loyal men who ever graced the Senate of the United States. We have not lost our friend for he continues to abide in spirit with us. As Francis Thompson has said:

"There is nothing lives but something dies,
And there is nothing dies but something lives.
Till skies be fugitives,
Till time, the hidden root of change, updrives,
Are birth and death inseparable on earth,
For they are twain, yet one, and death is birth."

Chester Castle Bolton

MEMORIAL ADDRESS
OF
HON. FRANCIS D. CULKIN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CHESTER CASTLE BOLTON, late a Representative from the State of Ohio

Mr. CULKIN. Mr. Speaker, the untimely death of CHESTER C. BOLTON was in large part due to his heroic efforts to preserve the American system of government. If he willed he could have stood idly by and watched the destruction of constitutional government in these United States. This was not his way and despite ill health he bent his every energy and gave unsparingly of his strength to preserve free institutions.

I served with him on the Rivers and Harbors Committee and ever noted his keen knowledge of transportation problems. He brought for consideration of those problems a well-stored mind and a thorough knowledge of the particular subject matter under discussion. In every phase of his service he was modest, tolerant, and brave. His passing is a grave loss to his district and to the whole country.

Samuel Davis McReynolds

MEMORIAL ADDRESS
OF
HON. JAMES P. RICHARDS
OF SOUTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. SAMUEL DAVIS MCREYNOLDS, late a Representative from the State of Tennessee

Mr. RICHARDS. Mr. Speaker, when God in His wisdom called from among us SAMUEL D. MCREYNOLDS, one of His own noblemen, I felt a deep sense of personal loss. He was able, straightforward, and clean and will be sadly missed by his Nation, his district, and his colleagues here who in service with him had found him to be one of the outstanding Members of the House. As chairman of the Foreign Affairs Committee of the House he endeared himself to both Republican and Democratic members of that committee. He came to the chairmanship of that important committee to find a world around him girding for war, with grave danger of his own beloved country becoming involved; and he steered through this House legislation of momentous importance, legislation which did much to prevent our involvement in foreign disputes. His wholehearted loyalty to his country, his President, and to his party taught us all a lesson in constancy and fidelity. Though walking with kings, he never lost the common touch and never ceased to remember his obligations to the humblest man or woman in his district.

Born on a farm near Pikesville, Tenn., he attended the rural schools of Tennessee and was educated at Cumberland University. He was a successful lawyer and served with distinction for many years as judge of the sixth circuit of Tennessee. When he came to Congress it was expected even then that he would make a valuable Member here, and he fulfilled the fond expectations of his friends. The State of Tennessee, which has given so many rugged, outstanding men to our country, has added another name to the scroll in its hall of fame.

Judge, as we knew him, was always willing and ready to help a new Member of Congress. I shall never forget his kindness to me when I first came here, and then when I became a member of his committee in 1934, I began more and more to lean on his sound advice and wisdom. Almost daily contact with him only increased my admiration for the sterling qualities of mind and heart that made him such an outstanding man. He was a fighter first and always, once he enlisted in any cause, but he never enlisted until he was satisfied of the justice of that cause. Withal, he had the heart and tenderness of a child, and on more than one occasion I have seen him touched by little things that the ordinary man would have passed by unnoticed. His love for his wife, his daughter, and grandchildren was of the mold that makes true family life America's greatest institution; and this devotion was returned by his loved ones. I never saw him happier, I think, than during his last illness when he watched the ministrations of his devoted and unselfish wife.

It was my sad privilege last year to follow his remains to Chattanooga, Tenn., and to look upon the saddened faces of the thousands gathered there to mourn. I saw his remains laid to rest in the shadows of the eternal hills he loved so well, and there came to my mind words of the poet—

A prince once said of a king struck down:
"Taller he seems in death."
And the word holds good for now, as then,
It is after death that we measure men.

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. PAUL W. SHAFER
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. SHAFER of Michigan. Mr. Speaker, I want to thank you and the Members of the House for the privilege of extending my remarks, through the courteous assistance of Hon. ROY O. WOODRUFF, in order that I might pay a tribute to my late friend and colleague, the Honorable CARL E. MAPES, on the occasion of this memorial service.

To those who knew the able and distinguished Member who passed out of this life on December 12, 1939, no word of mine is needed to add to their esteem for him, or to his stature in the history of the House of Representatives in which he so long and so ably served.

Perhaps in these tributes to our departed colleagues we serve the cause of our own hearts more than we do their memory. It is too difficult to let pass this occasion on which I may voice a deep and sincere tribute to the ability, the integrity, the worth of a man who was my friend; one who gave me much valuable assistance when I first became a Member of this House; a coworker from my home State of Michigan; and a man whose sincerity, whose sterling character, whose rugged integrity, whose courage, endeared him to those who knew him and worked with him, while at the same time, commanding the respect, not only of his colleagues but of all those who had occasion to know anything about his work as a representative of his people in the House.

Nothing his friends can say about him could create a monument to the memory of CARL MAPES equal to that which he created for himself by his work in the National Legislature. He came to Congress back in 1913, and during his years here he saw a vast amount of world history made. He saw changes take place not alone in other countries, but in his own country. In all those years I think it is accurate to say that CARL MAPES never compromised his own conscience. He was absolutely steadfast in his course as he saw his duty. He never temporized with injustice or political expediency. His sense of right and wrong, his concept of his duty as a Representative, his convictions as to the requirements of good citizenship, were his guiding lights both in his private life and in his public career. The result was that whether or not one agreed with CARL MAPES' viewpoint, or his votes, there was never any question about his earnest and sincere honesty in the stand he took and the vote he cast.

He was a quiet, cautious legislator who never permitted his emotions to sweep him off his feet or to move him from a position of sound and honest judgment.

As someone well said of him:

In the tumult of strange ideas and extreme passions, in the face of threatening rumblings of sinister things, CARL MAPES, with enviable wisdom and poise, could not be perplexed or frightened, but went on, in fortune and misfortune, at his own pace.

Mr. Speaker, always an occasion of this sort brings to the thought of all of us the great question of what may be the real meaning of this vast enigma which we call human existence; of what change really takes place when we pass from the earthly scene. But always when those thoughts come, there must come, too, a deep sense that an all-wise, all-powerful, ever-present, all-loving, infinite Creator could not and would not bring into being one with such fidelity to principle, to truth as he saw it, one who so earnestly endeavored over the years to serve his people well and faithfully, only to snuff out all of that character and effort in an instant by that which we call death.

No, Mr. Speaker; it must be that the CARL MAPES we knew goes on. It must be that in another state of consciousness he pursues his work and his way, and it must be that sometime, somewhere, we will meet our beloved colleague face to face again.

William Irving Sirovich

MEMORIAL ADDRESS
OF
HON. FRANCIS D. CULKIN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. WILLIAM IRVING SIROVICH, late a Representative from the State of New York

Mr. CULKIN. Mr. Speaker, the passing of Congressman WILLIAM I. SIROVICH, of the Fourteenth District of New York was a great shock to the Congress. During my service here in Congress I had come to know him intimately. I had served with him on the Merchant Marine Committee of the House and had come to know and respect and admire his splendid qualities of mind and heart.

Dr. SIROVICH was a true humanitarian. His outstanding trait was an unfailing devotion to the cause of the underprivileged. He knew and understood the economic handicaps of the man in the street. His service in the House was marked by a devotion to the underprivileged. Economic injustice always roused his ire, and he fought a continuing battle for those whose lives are not cast along happy lines. This was his outstanding characteristic. May his soul rest in peace.

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. FRED BRADLEY
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL E. MAPES, late a Representative from the State of Michigan

Mr. BRADLEY of Michigan. Mr. Speaker, it has been my observation that our greatest leaders have been extremely modest in claiming for themselves the accomplishments recognized by their contemporaries, and recorded in our histories. CARL E. MAPES was that character of a man. He made no pretense of greatness, yet we who knew him recognized in him qualities possessed by only too few of us.

In the Congressional Directory my Michigan colleague permitted only this brief biography:

CARL E. MAPES, Republican, of Grand Rapids; born December 26, 1874; lawyer; married; has three children; elected to Sixty-third and succeeding Congresses.

Modest and humble, he never boasted.

Yet here was a leader who identified himself with every constructive piece of legislation proposed or enacted into law during more than a quarter of a century. CARL MAPES was courageous, a hard worker, a clear thinker, a man of principles who placed the welfare of our Nation above personal

and partisan considerations. He asked not, "How will this affect me?" but rather, "How will it benefit my fellow men?"

He worked and voted in accordance with his high principles, never wavering, and the people of his Fifth District in Michigan admired and respected him and reelected him to 13 succeeding Congresses.

The death of CARL MAPES was a loss to me. To him I went as a freshman Congressman, seeking counsel and advice, and this he gave generously according to his sincere convictions, without thought of self but again in the interests of our State and Nation.

CARL MAPES died as he had lived, serving his people. His service record stands as an inspiration and a challenge to all of us.

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. ROY O. WOODRUFF
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. WOODRUFF of Michigan. Mr. Speaker, the Nation, our own State of Michigan, and the Congress have all suffered a loss in the passing of the Honorable CARL E. MAPES, a loss which in some respects is irreplaceable.

The highest tribute to his rugged and steadfast integrity is best attested by the fact that those of his colleagues who had known and served with him longest loved him best, had for him the highest respect, and will feel in the years to come a sense of loss that to them cannot be alleviated.

Just as his own immediate family can find solace in the kind of a man he was, the kind of life he lived, and the fine, unselfish service he rendered his country, so the Michigan delegation in the Congress will always remember with pride the character of service he gave and the example he set for younger and less experienced legislators.

CARL MAPES was a man of deep, quiet, and undemonstrative temperament, but just as his nature was deep and quiet, it moved toward what he conceived to be right as a great, deep river moves resistlessly to the sea. One of the most beautiful things that can truly be said of our colleague was that when he was convinced he was right nothing could move him from this position. As a legislator, he was cautious without being slow. He was firm without being obstinate, and when he gave his friendship its roots went to the depths of his soul.

CARL MAPES was among the truly great men who have been in the United States Congress, because he was so unassuming, plain, sincere, and unpretentious. He was a tower of strength through the troubled years of the depression when he refused to be swept from his ideals of government by either political expediency or emotionalism. He meditated long upon his course, he pondered well his decisions, and when convinced that he was right no amount of organized opposition or persuasion could cause him for a moment to abandon or to compromise with a position which he felt was dictated by stern integrity and duty.

In his quiet way he had a great influence upon his country and his time, particularly in the latter years of his service. In those years when emotionalism and, at times, hysteria, seemed to sway lawmakers as well as the citizens generally, in those times when faith in the future grew dim and faith in constitutional government seemed worn to a slender thread, CARL MAPES made his imprint and exerted his influence on the side of coolness and sanity. The people will never know and history will not record for posterity the great amount of good he accomplished and the great service he rendered the Nation, but his colleagues always will remember, because they know, and so long as they live his friendship, association, and memory will be cherished by them.

I express the heartfelt sentiment of every member of the Michigan delegation in saying that his life and service have entitled our colleague to all that we would have awaiting him in that realm of mystery through which he has passed and from which no word comes back. His colleagues, the Congress, his State, and his country can ill afford to lose him.

Wallace Edgar Pierce

MEMORIAL ADDRESS
OF
HON. JOHN W. GWYNNE
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. WALLACE EDGAR PIERCE, late a Representative from the State of New York

Mr. GWYNNE. Mr. Speaker, the Honorable WALLACE E. PIERCE came to the House of Representatives at the beginning of the Seventy-sixth Congress. Shortly thereafter he was made a member of the Judiciary Committee. Both in this committee and in the House he displayed an understanding of his duties which soon made him a valuable member. He was a lawyer of ability and considered legislation from the practical standpoint of a man who had actually made law function. The strength of his own views in no way, however, hampered his careful consideration of the viewpoints of others. He was extremely friendly and courteous and in his short career in Congress made many friends who mourn his untimely death.

Cassius Clay Dowell

MEMORIAL ADDRESS
OF
HON. FRED C. GILCHRIST
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CASSIUS CLAY DOWELL, late a Representative from the State of Iowa

Mr. GILCHRIST. Mr. Speaker, CASSIUS C. DOWELL was born on February 29, 1864, in a log cabin on a farm near Somerset, Iowa, in Warren County, where his Quaker parents had settled in their covered-wagon trek across the country. He attended the country school there and after completing the work through the grammar grades, entered Simpson College at Indianola, Iowa. He was determined to further his education and from early boyhood earned his own way. Mathematical problems which give most boys much trouble were enjoyable mental gymnastics to him. "CASH" DOWELL, in his youth, was a great lover of outdoor sports, and baseball furnished many a thrill to the young country lad who was always a member of the community "nine." Later on when he attended college at Indianola, he was interested in debating and forensic activities and was usually a member of the debating teams. He later graduated from the liberal arts college and the law college of Drake University at Des Moines, Iowa, where he was admitted to the bar in 1888 and practiced law until March 4, 1915, when he was seated in the House of Representatives in Washington.

In 1894 Mr. DOWELL was elected to the Iowa House of Representatives and served until 1898. In 1902 he was elected to and served in the Iowa State Senate until 1912. In 1914 he was elected to Congress and served his district, comprising Dallas, Madison, Marion, Polk, Story, and Warren Counties,

for 20 years, when in 1934 the Democratic tide swept him aside for one term only; and in 1936 CASSIUS DOWELL came back to his old seat in Washington where he served his constituency until the day he died on Sunday, February 4, 1940.

He was appointed chairman of the House Elections Committee No. 3, of which he became a member after the Republicans took control of the House in 1918. A number of particularly heated election contests resulted from the Harding landslide in 1920, and Mr. DOWELL was enlisted to handle them.

A pioneer in the good-roads movement, Mr. DOWELL was appointed chairman of the House Committee on Roads on December 17, 1923, during the first session of the Sixty-eighth Congress and was responsible for much of the early aid for the Federal highways system. He was a moving factor for farm-to-market roads appropriations and also favored the development of a national defense highway. He served as a delegate to the International Roads Congress in 1930 and in that same year started a movement to increase Federal aid for highways by $50,000,000 per year. At that time he declared that "highway building is one of the most effective means of providing additional employment under present circumstances."

His efforts helped to increase Iowa's primary road fund by $1,332,000 a year for the years 1931, 1932, and 1933, when President Hoover signed the Dowell bill increasing Federal highway aid from seventy-five million to one hundred and twenty-five million. His prime thought when running for reelection in 1936 was a renewal of his campaign for more good roads.

I am for good roads always,

He said:

I think we have the finest system anywhere. * * * My going back [to Congress] is just taking up the work where I left off.

Best known on the House floor as a parliamentarian, Mr. DOWELL did not relinquish this distinction even during the days of the Democratic ascendancy, when Republican points of order did not always carry the most weight. He was known as a Congressman who was able to satisfy his own district and represent its interests in the hurly-burly of capital political life.

He was ever diligent in his duties, and at a time when attendance at House sessions was often sporadic, Mr. DOWELL never failed to occupy his seat.

He was a supporter, on the whole, of agricultural legislation, and as a parliamentarian he helped to steer the original McNary-Haugen bill through its tortuous course, which resulted in congressional adoption but a Presidential veto. During the last regular session he actively supported the $225,000,000 appropriation for farm parity payments and an increased appropriation to permit Federal Surplus Commodities Corporation to buy more farm products.

Mr. DOWELL was successful in his efforts to obtain appropriations for his district. He was instrumental in having Camp Dodge chosen as a site for the great military cantonment during the World War. He successfully sponsored the $1,300,000 veterans' hospital built in Des Moines in 1933, as well as the $125,000 addition now being started.

The veterans' hospital at Knoxville, Iowa, was the result of his labors for his district. He secured the appropriation for the new $800,000 Federal building on the Dest Moines river front and introduced and obtained passage of a bill providing for the retention of the old Federal building at Fifth and Court Avenues, in Des Moines, for the Government. The $345,000 addition to the post office in Des Moines, completed in 1935, also was a result of Mr. DOWELL's efforts.

Mr. DOWELL voted for the soldiers' bonus in 1924, the 50-percent bonus loan in 1931, restrictive immigration law in 1924, Boulder Dam in 1928, the Tariff Act of 1930, and the Reconstruction Finance Corporation in 1932.

He voted April 17, 1918, for the resolution declaring that a state of war existed between the United States and Germany. Later he went to France with other Congressmen "to see what kind of treatment our soldiers were getting." A few days after the battle of Chateau-Thierry the group came upon the One Hundred and Sixty-eighth Infantry, which included then the old Fifty-fifth Iowa National Guard regiment. Mr. DOWELL was in Paris during its bombardment by Big Bertha, Germany's super-long-range artillery piece.

A bachelor until 1928, Mr. DOWELL then married his secretary, Miss Belle I. Riddle, the ceremony being performed by the late Rev. Charles Medbury, of Des Moines, pastor of University Church of Christ. Miss Riddle had served as the Iowan's secretary during the time he was in the Iowa State Senate, in his law office in Des Moines, and during the time he had been in Washington. The only other immediate survivor is a sister, Sidna Dowell, of Des Moines.

In 1931 Mr. and Mrs. Dowell sailed on a Pacific cruise, stopping at Hawaii, the Philippines, Guam, China, and Japan. During this trip Mr. DOWELL had two objects in mind—the road systems of these countries, and the value of these colonies to the United States. The material he gathered in this regard was valuable for the use of the Roads Committee and of the Territories Committee, of which he was a member. Mr. and Mrs. Dowell brought back vivid pictures and stories of war-torn China and the constant struggle of a vast population for the necessities of life.

In 1935, the Dowells toured 14 countries in Europe, Asia Minor, and Africa, including the Holy Land, Arabia, and Egypt. On his return, Mr. DOWELL predicted a European war of cataclysmic proportions. Always when returning from a foreign country he would say, "America for me," and above all he loved his native State of Iowa.

Congressman DOWELL was not born to title or coronet, but he was one of God's noblemen. He was quiet and unassuming in all his activities and relationships. He was of the people. The people trusted him, and so called him to service in high places for the greater part of his life. Lincoln said that God must have loved the common man because he made so many of them. And in this spirit we leave the memory of CASSIUS DOWELL as one who loved his fellow men.

The burial service was attended by the congressional and senatorial delegations from Washington and by an escort of honorary pallbearers who represented the most prominent men of the State of Iowa. The church was crowded with lifelong friends. At this time his pastor, Rev. Clarence N. Bigelow, at the University Church of Christ, eloquently told of his life, and taking the text from Timothy ii, 4:7, "I have fought a good fight, I have finished my course, I have kept the faith," said:

There have gathered in this church people from all walks and various interests in life. The imaginary lines of social, economic, and political life have been forgotten. Men have come because of the memory of a personality which endeared itself to them in other than material ways.

It would be a feeble effort on the part of any man to recite the historic points of a life and feel that he had measured that life's influence. It is always interesting to recall dates and activities, but more helpful to think of ideals which have brought about certain events.

CASSIUS DOWELL, to the people of Iowa, the United States, and the world, was more than just a man whose material existence extended over a 76-year period. Not perfect, none of us are, but I believe we can truthfully say of him that in the words of the writer of our text "he fought a good fight." One in public life certainly does not have it too easy—often criticized, misunderstood, and falsely accused. Those of us who knew this man knew him to be modest, cautious, and honest. His caution was often interpreted as fear, but I think of him as courageously cautious. It took fortitude and strength of character, plus an undaunted honesty, to withhold a statement of opinion upon a controversial subject until after he was satisfied that he had at least recognized in his thinking all the facts in the case. Some said that this trait was a weakness, but to me it was a sign of honesty and sincere desire to serve in the American way all interests of the American public.

His activity in Congress and public life was just the result of conscientious effort, persistent fighting, and constant growth. The path of life of his human existence led from a little community in Warren County, Iowa, to the National Capitol of our United States of America. Upon every hand evidence of service is to be found, a service that recognized all individuals, and it can be said that he finished the course. At no place did he rest upon the oars but always manifested even in that brief period when not in office a keen interest in National and State affairs.

In this service one characteristic stands out so clearly in the minds of those who knew him, namely, his faith in his fellow men. A genuine friendship for laborer and employer, for farmer and man of

the city, in fact for every individual, has found expression from many different angles. For a man to remain so active in world affairs, to maintain a personal interest in an individual only shows too clearly that his is a strong faith in a divine power.

So long as we have the memory, the great struggle to bring Iowa from the mud roads to our modern paved highways, to recognize the problem of agriculture, and how there was needed someone in authority to recognize rehabilitation of the veterans of our wars, we will see again CASSIUS DOWELL stepping into that place of leadership, and he will live in our memories. And living in the memories of those whom he befriended he lives in the world. A great, good, and kind man never dies. Again I say men are not perfect, but a nation was built not upon worshipping with personal satisfaction the mistakes of great statesmen but by forgetting their weaknesses and flaming the fires of memory recalling the best of their thought, the highest motives of their lives, and their unselfish ideals of service. May Iowa pay her tribute to the unselfish and honest service of CASSIUS C. DOWELL by ever recalling the modesty, the humility, and the courageous cautiousness of this man's life.

Wallace Edgar Pierce

MEMORIAL ADDRESS
OF
HON. FRANCIS D. CULKIN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. WALLACE EDGAR PIERCE, late a Representative from the State of New York

Mr. CULKIN. Mr. Speaker, the untimely taking away of the Honorable WALLACE E. PIERCE, of the Thirty-first Congressional District of New York, caused universal grief, not only in Congress but throughout the whole State of New York.

Measured by time, his service in Congress was all too brief, but during the period of his service he made his way into the hearts of his colleagues. Blessed by a charming personality, a thorough knowledge of public affairs, and an intense loyalty to his constituents, he was rapidly making a place for himself in the councils of his party and the whole Congress.

Congressman PIERCE's district abuts on the district that I have the honor to represent, and problems of the two districts are more or less similar. From the beginning of his service we collaborated together continually as to the problems of our districts. I was impressed from the beginning with the clarity of his viewpoint and his effective grasp of all public questions. He was a trained and able lawyer, and his service on the Judiciary Committee was marked with outstanding contributions to sound legislation and adherence to constitutional forms.

I had the honor to attend his funeral at his home city of Plattsburg, N. Y. Never have I seen such overwhelming demonstration of universal grief. People in every walk of life, the rich and poor, paid tribute to WALLY PIERCE's memory and to his splendid qualities of mind and heart.

Thomas Sanders McMillan

MEMORIAL ADDRESS
OF
HON. ALFRED L. BULWINKLE
OF NORTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. THOMAS SANDERS MCMILLAN, late a Representative from the State of South Carolina

Mr. BULWINKLE. Mr. Speaker, as chairman of the Committee on Memorials, I wish to extend my remarks upon the life, character, and public services of the Honorable THOMAS S. MCMILLAN, Congressman from the State of South Carolina, by inserting in the RECORD the address of the Honorable JAMES F. BYRNES, Senator from the State of South Carolina, and a letter addressed to me as chairman of the committee.

UNITED STATES SENATE,
COMMITTEE ON APPROPRIATIONS,
April 23, 1940.

Hon. A. L. BULWINKLE,
House of Representatives, Washington, D. C.

DEAR CONGRESSMAN: I am enclosing to you a statement with reference to the late THOMAS S. MCMILLAN to be included in the CONGRESSIONAL RECORD under House Resolution No. 437.

Sincerely yours,

JAMES F. BYRNES.

THOMAS SANDERS MCMILLAN'S long service in the House of Representatives was characterized by exceptional fidelity to duty and an earnestness of effort that earned for him the plaudits of his fellow men. Yet it was not his chief purpose to receive the approbation of those whom he served. Rather it was the conscientious discharge of his duties as he saw them that endeared him to his constituents and those with whom he served in the National Capitol.

Beginning his legislative service with the Sixty-ninth Congress, Mr. MCMILLAN labored with such distinction that the First District of South Carolina conferred upon him the same honors for each succeeding session of Congress. His death during the second session of the Seventy-sixth Congress came suddenly, in the prime of a career that had brought deserved honors to himself, his family, and his State.

Mr. MCMILLAN'S legislative experience, coupled with his ever-evident desire to serve the interests of his State and Nation, enabled him to perform many arduous tasks with skill which was deeply impressive. He was energetic, tireless, and judicious. He regarded his legislative post as a sacred trust, and he laid aside no task until he knew it had been finished.

He dedicated himself and his talents to a high purpose, and he could have left no more treasured heritage to his family and to his friends.

TOM MCMILLAN was a man of convictions. He was a man of courage. Those of us whose privilege it was to work beside him knew and appreciated his worth. His innate modesty could not conceal from his fellow workers his marked ability, and those best qualified to appraise his long years of faithful service to his country know that he richly merited the epitaph every man cherishes, "Well done, thou good and faithful servant."

Chester Castle Bolton

MEMORIAL ADDRESS
OF
HON. WILLIAM E. HESS
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CHESTER CASTLE BOLTON, late a Representative from the State of Ohio

Mr. HESS. Mr. Speaker, for a number of years, before I became a Member of the House of Representatives, I had heard of CHESTER C. BOLTON as a most active member of our State legislative bodies. I therefore looked forward with pleasure to meeting and serving with him in the Congress. Until the untimely moment of his death I served a concurrent term with him beginning in the Seventy-first Congress, when each of us was first honored to sit in the House of Representatives. As we proceeded throughout those subsequent sessions, I found CHESTER C. BOLTON to be an earnest legislator of high ability and purpose and a steadfast Republican of undiminished loyalty.

My heart is heavy, for I have lost a very dear and loyal friend, and his State and Nation has lost an outstanding citizen and statesman. Ohio, which has had many illustrious sons, can well be proud of him. His life touched on many fields of endeavor, and in each he made his mark.

CHESTER C. BOLTON has relinquished his public trust only at the hand of death itself. He served his district and his Nation well and was rewarded with the genuine esteem of all of us who saw his good works. He has set an example in his persistent efforts for what he deemed to be the best interests of those whom he represented.

My fullest sympathy goes out to his courageous widow and devoted sons.

Cassius Clay Dowell

MEMORIAL ADDRESS
OF
HON. ROBERT K. GOODWIN
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CASSIUS CLAY DOWELL, late a Representative from the State of Iowa

Mr. GOODWIN. Mr. Speaker, it is in the most humble spirit that I take part in this memorial for the late CASSIUS CLAY DOWELL, who was my distinguished predecessor in this body from the Sixth Congressional District of Iowa.

Mr. DOWELL was a commanding figure in the Nation and in Iowa when, as a high-school student, I first began to take an interest in public affairs.

In college as well as in high school it was justly and properly impressed upon us that in Mr. DOWELL were to be found the fine qualities of American statesmanship—character, courage, ability, and, finally, the willingness to work and work hard for the good of the country.

Mr. DOWELL came to this body well prepared to take his place as the representative of the people of the great agricultural, business, and industrial section of central Iowa.

Mr. DOWELL's parents were Quakers who came to Iowa in a covered wagon and settled on a farm in Warren County near the village of Summerset. It was here in a log cabin that Mr. DOWELL was born on February 29, 1864.

After attending the public schools Mr. DOWELL was graduated in 1886 from the liberal arts department at Drake University in Des Moines, and from the law college of the same institution in 1887. In the meantime he had taken some college work at the Baptist College in Des Moines and at Simpson College in Indianola.

At Drake University, Mr. DOWELL was active in debating, and it was at this time that he laid the groundwork for his later acknowledged leadership as a parliamentarian. Here Mr. DOWELL was a member of Phi Beta Kappa and Delta Theta Pi.

Mr. DOWELL was admitted to the bar in 1888 and built up a highly successful law practice which he relinquished in 1915 upon his election to the House of Representatives.

His service in Washington was preceded by a distinguished record in the legislative halls of Iowa. He was a member of the Iowa House of Representatives from 1894 until 1898 and was elected speaker pro tempore of the house. He served in the Iowa State Senate from 1902 until 1912. This successful service was a deciding factor in his election for the congressional post which he held so long and so ably.

Following his election to the Sixty-fourth Congress, Mr. DOWELL was reelected to each succeeding Congress, including the Seventy-third; and he was again elected to the Seventy-fifth Congress and Seventy-sixth Congress.

Iowa has had many devoted sons who have espoused the cause of agriculture in Washington, but none has excelled Mr. DOWELL. He knew that the prosperity, the well-being, and the high standards of living which have been so much in evidence in America were dependent upon the prosperity of the farm. Year in and year out Mr. DOWELL could be depended upon by the farmers of his district, his State, and his Nation. That Mr. DOWELL performed great service in behalf of agriculture is well attested by the faith which his agricultural constituents expressed in him year after year.

Mr. DOWELL was, too, a true and good friend of labor and of business. He was one man who excelled in the ability to work out the problems of labor and of business upon the basis of mutual understanding with consequent profit to all concerned. In this Mr. DOWELL set a fine example for those who now and in the future may engage in public service.

As the friend of the war veterans and as the friend of good roads, Mr. DOWELL left a record of service and accomplishment of which we of his district are justly proud.

Mr. DOWELL was one of the pioneers in good-roads work. He early saw the great advantages of good roads. The very conditions which make Iowa the garden spot of the world contribute to our problem of roads. Mr. DOWELL took the lead with the result that Iowa today has one of the outstanding road systems of the country. This is due in no small part to the foresight and the work of Mr. DOWELL.

While the Great War was on Mr. DOWELL visioned the price, the increasing price, which those who took up arms for their country would be called upon to pay, particularly in health. We of the Sixth Iowa District have long been confident that in Mr. DOWELL we had a champion for the veterans who was without a peer. Mr. DOWELL took the keenest interest in the veteran problems, whether they were the problems of an individual or of a group. The results of Mr. DOWELL's work are of greater testimonial than any words which I might utter.

During the present period of economic uncertainty he went the extra mile with our needy aged; he was a good Samaritan.

CASSIUS C. DOWELL loved his God and his fellow men. He was a devoted member of the University Church of Christ in Des Moines and a loyal son of Drake University. His lifetime of service is a beacon light to those who follow him, and especially to those who, like myself, are called upon to take up the work which he performed with such outstanding ability.

As I close these remarks upon the life of this son of Scotch-American parentage, there come to mind the words of Robert Burns, that—

> From scenes like these, Old Scotia's grandeur springs,
> That makes her loved at home, revered abroad:
> Princes and lords are but the breath of kings,
> "An honest man's the noblest work of God."

John Andrew Martin

MEMORIAL ADDRESS
OF
HON. ALFRED L. BULWINKLE
OF NORTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. JOHN ANDREW MARTIN, late a Representative from the State of Colorado

Mr. BULWINKLE. Mr. Speaker, as chairman of the Committee on Memorials, I wish to extend my remarks upon the life, character, and public services of the Honorable JOHN A. MARTIN, Congressman from the State of Colorado, by inserting in the RECORD the address of the Honorable ALVA B. ADAMS, Senator from the State of Colorado, and a letter addressed to me as chairman of the committee.

UNITED STATES SENATE,
COMMITTEE ON PUBLIC LANDS AND SURVEYS,
April 23, 1940.

The Honorable A. L. BULWINKLE,
Chairman, Committee on Memorials,
House of Representatives, Washington, D. C.

MY DEAR CONGRESSMAN: With further reference to the memorial services to be held in the House of Representatives on Wednesday morning, April 24, I herewith send you for filing, my remarks on the life, character, and public service of the late JOHN A. MARTIN, Congressman from the Third Congressional District, Colorado.

Yours very truly,

ALVA B. ADAMS.

REMARKS BY HON. ALVA B. ADAMS, OF COLORADO

The record of the life of JOHN A. MARTIN is one of service to mankind in many fields of earnest struggle to improve the lot of others, especially those upon whom the hand of fate rested heavily.

As a young man he joined with fellow workmen in a great battle to improve the wage and working conditions of workers in the great

railroad industry. His efforts cost him his job. Undaunted, he turned to other fields. With struggle and sacrifice he qualified himself for admission to the bar. He was a good lawyer, but his talents were most happily and most generally engaged as the advocate and defender of the oppressed and the unfortunate.

Called into political service by his fellow citizens, JOHN A. MARTIN distinguished himself in the State legislature by consistent and usually successful fighting against economic wrong and oppression and against abuses of the elective franchise which in some communities denied to many their just and constitutional rights.

When the World War came, inspired by devotion to his country and to the principles of liberty and democracy for which it was fighting, though over the age for enforced military service, JOHN MARTIN abandoned his profitable legal business and not only enlisted as a private in the Army but recruited a regiment for war service. He was commissioned a major. To his great regret, he was denied an opportunity to see active service with the American forces in Europe. He was ever in both private and public life a friend and supporter of every measure for the welfare of his comrades in arms.

JOHN MARTIN served in Congress from 1909 to 1913, declining to be a candidate for reelection. His constituents again drafted him for their Representative in the House of Representatives in 1932, where he continued until called to higher service on December 23, 1939.

In Congress, as in all his life, JOHN MARTIN continued to battle for the less fortunate and for the cause of the weak and oppressed. He was an orator of power and persuasiveness. Whether on the floor of Congress, in conference, or on the platform, his earnestness, his frank integrity, his well-stored and logical mind always held the interest of and secured consideration from all who heard him.

He never rested in the pursuit of the welfare of his constituents. There were no vacations for him from his efforts on behalf of those who had entrusted their interests to his care.

His constituents are constructing in his home city a memorial in his honor. Most appropriately this memorial to a man who ever battled for the unfortunate will provide needed care and medical attention for children who are victims of sickness and misfortune.

However, JOHN MARTIN did not restrict his interests or his efforts to his congressional district. He was a loyal, devoted citizen of the entire country.

He was my Congressman. For 40 years he had been my neighbor and dear friend.

JOHN A. MARTIN was a true patriot, and I join with you, his colleagues, in sorrow and regret at his passing.

Carl E. Mapes

MEMORIAL ADDRESS
OF
HON. WILLIAM W. BLACKNEY
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL E. MAPES, late a Representative from the State of Michigan

Mr. BLACKNEY. Mr. Speaker, the 30th of May, by custom and by legislation, has been designated as Memorial Day, at which time we pay tribute to our departed dead, whose services to their country have endeared their memories to State and Nation. It is a fine tribute for a nation to pause in the midst of its business strife and worries to pay tribute to these heroes, because it shows that the heart of the Nation is fundamentally sound and appreciative.

Likewise, Congress, by long custom, has established a Memorial Day, on which occasion tribute is paid to those departed members, who have endeared themselves, not only to the Members of the House and Senate, but to their constituents at home.

Since the last memorial roll call, 2 Senators and 17 Representatives have departed this life, leaving their memories embedded in the hearts of their surviving colleagues.

On this memorial-service day, I wish to pay tribute to the memory of my former colleague and long-time friend, CARL EDGAR MAPES, who, for 27 years, represented the Fifth Congressional District of Michigan faithfully and well. Since the first day that I met my departed colleague I have felt the impress of his splendid character and outstanding virtues.

CARL MAPES was fundamentally a real American, a great constitutionalist, a fine parliamentarian, an earnest, devoted worker in the public service, and a friend in time of need. On December 12, 1939, when his death was announced, a wave of sorrow swept over the State of Michigan, and over the Nation at the loss of this fine public servant. America, in these days, particularly, needs men of the type of CARL MAPES—

> Men whom the lust of office does not kill,
> Men whom the spoils of office cannot buy,
> Men who possess a conscience and a will,
> Men who have honor, men who will not lie—
> Tall men, sun-crowned, who live above the fog.

In the hectic days of Congress, CARL MAPES remained calm and thoughtful. When others were excited, he was well poised and deliberative. He remained, like the Rock of Gibraltar, untouched and unscathed.

Francis Thompson, in one of his beautiful poems, said:

> For there is nothing lives but something dies,
> And there is nothing dies but something lives.
> Till skies be fugitives,
> Till time, the hidden root of change, updrives,
> Are birth and death inseparable on earth,
> For they are twain yet one, and death is birth.

CARL MAPES was modest in demeanor, earnest in action, faithful to his trust, and when the shades of eternal night descended upon him it could be said of him, as of the Apostle Paul, "He has fought a good fight, he has finished his course, he has kept the faith."

CARL MAPES, as an outstanding Congressman for 27 years, as a defender of the Constitution, as a preserver of those great institutions which have made America great, as a hope and inspiration for the youth of the land, did fight a good fight, and to his last days preserved his faith in our great country, which is without prototype in the history of nations.

Tennyson, in that beautiful poem of his, says:

> And the stately ships sail on
> To the haven under the hill,
> But, oh! for the touch of a vanished hand,
> And the sound of a voice that is still.

And while we will no longer hear the voice of our departed colleague, no longer grasp his friendly hand, yet his memory will linger with us through the years to come, like the aroma of beautiful flowers.

Emmett Marshall Owen

MEMORIAL ADDRESS
OF
HON. PAUL BROWN
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. EMMETT MARSHALL OWEN, late a Representative from the State of Georgia

Mr. BROWN of Georgia. Mr. Speaker, on June 21, 1939, EMMETT MARSHALL OWEN departed this life after 37 years of distinguished public service.

He was born at Hollonville, Pike County, Ga., October 19, 1877. He was a graduate of Gordon Institute, Barnesville, Ga., and of the University of Georgia Law School. In 1904 he married Miss Alma Jones, of Greenville, Ga., who died in 1928. Two children were born of this union—Mrs. H. B. Floyd, of Covington, Ga., and Emmett Marshall Owen, Jr., of Jacksonville, Fla.

He was a kind and devoted husband and an affectionate father. He was always loyal to his church.

He served two terms in the Georgia Legislature, was solicitor of the city court of Zebulon for some time, solicitor general of the Flint and Griffin judicial circuits for 20 years, and a Member of the House of Representatives for nearly 7 years.

As a lawyer he was zealous and absolutely fearless. His understanding of human nature, ready wit, keen sense of humor, combined with his great natural legal ability, made him one of the oustanding prosecuting attorneys of his State.

EMMETT OWEN was a man of brilliant intellect and retentive memory. He was the only man I ever knew who never forgot anything. He was a strong character, always tactful, and had the knack of never giving offense, and in his 37 years of public service, as a general practitioner, as prosecuting attorney, as a member of the Georgia Legislature, and as a Member of the Congress of the United States, he had as many friends and fewer enemies than probably any man in the history of his State. In all these years he had opposition only one time, and he was one of the few men who ever came to Congress without opposition.

As a citizen he was deeply interested in all matters pertaining to the advancement of his community, his State, and his country. He rendered useful service in Congress as an outstanding member of the Committee on Agriculture.

His charming personality, pleasant manner, cheerfulness, charitableness, and loyalty endeared him not only to every Member of Congress who knew him but to a host of friends throughout the State of Georgia and the Nation. He was one of the most generous and unselfish men I have ever known.

The thousands of people who attended his funeral as a last tribute were from all walks of life, and they recognize the great loss to the State and the Nation in the passing of this distinguished and useful citizen.

It was my great privilege to know him intimately and to love him dearly, and I submit these brief remarks as my humble tribute to him.

Cassius Clay Dowell

MEMORIAL ADDRESS
OF
HON. BEN F. JENSEN
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CASSIUS CLAY DOWELL, late a Representative from the State of Iowa

Mr. JENSEN. Mr. Speaker, I desire to take this occasion to pay tribute to our late colleague from Iowa, Hon. C. C. DOWELL.

Before joining this august body, I felt that I knew Mr. DOWELL, because the fine reputation he had made in Congress was well known throughout the State. He belonged not alone to his district but to the State of Iowa and to the Nation.

Upon becoming personally acquainted with him while here in Congress, my affection and respect for him increased each succeeding day. To me he embodied the finest there is in man. He was a Christian gentleman and an able and conscientious legislator, devoted to the interests and preservation of our Government.

Because of the warm-hearted affection and untiring efforts he gave to the veterans of all wars and their interests, I should like to read in part a tribute paid to him by Frank Miles, editor of the Iowa Legionnaire:

World War veterans and thousands of other Americans had no better friend than Sixth District Congressman CASSIUS C. DOWELL, who died in Washington, D. C., February 4.

The kindly Iowan spent most of his 76 years in public service—the Iowa House and Senate and the National House. He made a splendid record from beginning to end, but he will be best remembered for his goodness to and affection for his fellow men.

Mr. DOWELL visited Iowa Rainbow veterans in France in 1918. He shook hands with and hugged all who reached him, and when he departed all of his pockets were full of letters to mothers and sweethearts at home.

After the war, Past State Commander Robert W. Colflesh, then an obscure orphan boy who had left a leg in France, won his heart. DOWELL made "BOB" a clerk to a House committee, thus enabling the brilliant and now nationally known Legionnaire to acquire a higher education at George Washington University.

"The next election will send another Representative to Washington," said Rev. C. N. Bigelow, preaching the funeral sermon amid the banks of flowers around the brown casket in the University Church of Christ in Des Moines, to which Mr. DOWELL belonged; "we have other statesmen and world citizens, but our good friend CASSIUS DOWELL cannot be restored to us.

"Some called him 'Cautious CASSIUS.' I should say he was courageously cautious, because he did always what he was impelled to do by his honest convictions."

Mr. DOWELL was born in Warren County. From a log cabin he went to the National Capitol. He traveled in Europe and the Orient. He knew people all over the United States. He loved humanity, he loved America, he loved Iowans, his home folks. He was as nearly good as a human could be.

No memorial in stone needs to be erected to commemorate his memory; that will be preserved in the hearts and minds of the thousands who knew and cherished his friendship.

Chester Castle Bolton

MEMORIAL ADDRESS
OF
HON. J. HARRY McGREGOR
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CHESTER CASTLE BOLTON, late a Representative from the State of Ohio

Mr. McGREGOR. Mr. Speaker, I approach the task of paying tribute to the late CHESTER C. BOLTON with humility, for here truly was a great man.

Quiet, earnest, always a gentleman in the true sense, Hon. CHESTER C. BOLTON won his way to esteem and high honor, not through spectacular gestures and vain display of his powers but through tireless effort and perseverance.

A personality of eminence, who always had the interest of the oppressed in his heart, CHESTER C. BOLTON will be remembered and mourned for his understanding, great sympathy, and human feeling for those in distress—a servant of the people and for the people who always placed human rights above property rights.

In his death the people of the State of Ohio, and his district in particular, have lost a faithful public servant, a wise counselor, and a scholar whose simplicity of life and high ideals may serve as a model for us all.

Chester Castle Bolton

MEMORIAL ADDRESS
OF
HON. HARRY N. ROUTZOHN
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CHESTER CASTLE BOLTON, late a Representative from the State of Ohio

Mr. ROUTZOHN. Mr. Speaker, I first met CHESTER C. BOLTON a number of years ago when he as a young man was a member of the Ohio Senate. Upon invitation from the Lawyers' Club of Dayton, Ohio, he had come to my home city to address the members.

His subject dealt with a fiscal policy of the State government, and he was advocating its adoption. I recall very distinctly his masterly presentation and development of the subject, as well as the favorable comments and compliments of his hearers.

It was then generally predicted, and I marked it well, that CHESTER BOLTON had the ability and presence to go far in the attainment of political prominence.

It was my privilege to note his progress and, eventually, to meet him here as a fellow Member of the House. At the time of his passing I took occasion to speak of his kindness, his gentility, and emphasized them, although he had all the

other qualities of a fine Christian gentleman. I sought his counsel and advice, knowing that I could unqualifiedly depend upon his superior experience and sound judgment.

I cherished the opportunity of sitting beside him here in this Chamber because those contacts, however brief, uplifted my thought and inspired conscientious devotion to duty.

For some time before he passed on I was conscious of the struggle he was having with dread disease and of his courageous endeavors to remain at his post of duty.

His was the spirit of life that never capitulates to the mortal belief in death.

He is not dead.
The stars go down
To shine upon some fairer shore,
And bright in heaven's jeweled crown
They shine and shine for ever more.

William Irving Sirovich

MEMORIAL ADDRESS
OF
HON. CHARLES KRAMER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. WILLIAM IRVING SIROVICH, late a Representative from the State of New York

Mr. KRAMER. Mr. Speaker, when the messenger of death knocked at the door of the House and summoned to everlasting life our dearly beloved colleague, Congressman WILLIAM I. SIROVICH, he took one of our most beloved Members.

My acquaintance and friendship with the "Doctor," as he was familiarly known, began when I was elected to Congress in 1932, and during the 7 years I served with him on the Patents Committee I became very fond of him and admired his brilliant statesmanship. The value of his friendship is inestimable, and to evaluate his achievements is wellnigh impossible. The scope of his labors was almost all-embracing, and he was a dominent influence in whatever field of endeavor he was occupied. He was a most forceful and eloquent speaker, and his silver-tongued oratory will long be remembered.

Mere words are inadequate to pay tribute to the noble, self-sacrificing, energetic personality that was Dr. SIROVICH. His loss will be keenly felt for a long time to come. We salute and cherish his memory—we believe that in the breast of all who knew him there is enshrined an unwritten memorial of his deeds—we pray his departed soul may rest in peace.

William I. Sirovich

MEMORIAL ADDRESS
OF
HON. MATTHEW J. MERRITT
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. WILLIAM I. SIROVICH, late a Representative from the State of New York

Mr. MERRITT. Mr. Speaker, our late colleague, "Doc" SIROVICH, as he was affectionately known among the Members of the House, whose sudden departure we deplore and whose passing we mourn, was a scholarly gentleman and an able legislator.

His sincerity at all times was admirable, and at no time was the constituency of this Representative ever neglected or their rights jeopardized by his actions.

He was the exemplar of humanitarianism, his every act was kindness toward his fellow man.

In his death we have lost a real friend and wise counselor.

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. ALLEN T. TREADWAY
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. TREADWAY. Mr. Speaker, in the death of my long-time friend and colleague, CARL E. MAPES, I feel a sense of deep personal loss.

CARL and I began our service in this body together, as Members of the Sixty-third Congress. We had been close companions for over a quarter of a century, and his passing leaves a distinct void in my own life.

The poet comforts us with the thought that—

To live in hearts we leave behind
Is not to die.

CARL MAPES will live in hearts he has left behind. During our long association, my love for him as a friend, and my respect for him as a man, continued to grow.

Quiet and unassuming, he nevertheless forged to the front as one of the outstanding Members of this body by reason of his profound knowledge of parliamentary procedure and his grasp of legislative problems. At the time of his death he was the ranking Republican member of two major committees of the House of Representatives. He stood as high in the esteem of the Members, regardless of party affiliation, as anyone possibly could, and his opinion on a matter was always respected for its sincerity and depth of understanding.

While a loyal Republican, CARL was never a bitter partisan, nor was his viewpoint either biased or provincial. Rather, he was a statesman of the highest order, whose sole purpose in life was to serve his country and his district to the best of his ability.

His untimely death came while he was on a mission as an agent of the House of Representatives, and it was this characteristic devotion to duty, even when at the risk of his health, which undoubtedly hastened his end.

We extend our sincere sympathy to his family and join in their bereavement.

George Henry Heinke

MEMORIAL ADDRESS
OF
HON. JOHN W. GWYNNE
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. GEORGE HENRY HEINKE, late a Representative from the State of Nebraska

Mr. GWYNNE. Mr. Speaker, the news of the tragic death of the Honorable GEORGE HEINKE came as a shock to all of us. During his year in Congress I had the opportunity of knowing him both at his work and in his home. As a Member of Congress he was in constant attendance upon his duties. He made a careful study of all legislation coming before the House. He was quick to grasp the principles involved in the most complicated bill, and decided upon it after he had reduced it to its simplest terms. However, his outstanding characteristic was his courage. His vote was dictated by his own conscience and by no other consideration. His philosophy of life and his views of government were those of the pioneers who made his State and his Nation great.

The passing of such a man from public life is a distinct loss to the Nation in this critical period. Those of us who had the privilege of knowing GEORGE HEINKE and his family, most sincerely sympathize with them in their bereavement.

John Andrew Martin

MEMORIAL ADDRESS
OF
HON. USHER L. BURDICK
OF NORTH DAKOTA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. JOHN ANDREW MARTIN, late a Representative from the State of Colorado

Mr. BURDICK. Mr. Speaker, in the death of Congressman JOHN A. MARTIN, of Colorado, the people of the United States have sustained what I believe to be an irreparable loss. No man ever sat in the House of Representatives who was his peer in patriotism and devotion to our democracy. At the same time he worked overtime to make this Government better. He was not afraid to speak out and condemn the evils that have developed in our system of government. His knowledge of government, his logic, and power of argument were always trained on the mistakes of our Government. Yet those great powers of his were at the same time trained against all enemies of this Government who advocated its destruction. Men of the type of JOHN A. MARTIN can easily be misunderstood for the reason that the number of men in this country who have his most excellent viewpoint is relatively small.

Those who heard him demand the correction of the evils of government; those who heard him insist upon making our Government serve the interest of the men, women, and children of the lower strata of our population, who not only need but deserve protection, would brand him as a "troublesome progressive," who was not content to acquiesce in things as they are in government. Those who heard him condemn that radical element in this country who openly assert that this Government must be dispensed with and a new one set up would brand him as a servile instrument of the capitalistic class. Few men in the United States, and a rare few in the Congress of the United States, desire to take or ever have taken that stand which JOHN A. MARTIN defended to his last breath.

Others who shall pay tribute to the memory of JOHN A. MARTIN will tell of his official record and his background, but I desire to speak of him as I saw him here in Congress. A short synopsis of his record will serve the purpose I have in view. He was a farmer, a railroad man, lawyer, newspaper editor, soldier, and statesman. He was born in Cincinnati, Ohio, April 10, 1868, and died in the city of Washington, D. C., December 23, 1939.

He never appeared to be a man past 70, and when in action in the Well of the House, with his snow-white hair and ruddy face, he seemed to possess the power of youth. He was a natural orator as I interpret the meaning of the word. He created immediate attention in the first paragraph of his speech and held it to the end; when he had finished, those who heard him remembered what he said. Is there anything else an oration can do?

His philosophy was to help and assist those who were unfortunate; he was a friend of the poor and the needy. He abhorred charity and many times said that our economic mistakes could not be cured by charity. He insisted that every citizen of the United States should have an equal opportunity in our economic system. He was outspoken against special privilege; and on this issue he never erred, as his votes in the House will disclose.

JOHN MARTIN was endowed with a delightful personality, and from his struggles in reading law while a fireman on the Santa Fe Railroad he knew what work was. From that experience his whole nature was in sympathy with those who toil. He was honest with himself and, accordingly, with everyone else. He was liked by every Member of Congress; and from his repeated elections in Colorado, he must have been at least one Member of Congress who was admired by the home folks.

His struggle here in Congress to assist the people in Colorado and the Nation who were in distress wore him out. He intended to retire from Congress at the close of the Seventy-sixth Congress and rest. But that was not to be; he died in the harness, working for the plain people of this great country. No one ever represented them more faithfully and more efficiently in the Congress of the United States; and while his body is dead, his works remain in a permanent record of the affairs and history of this great Republic. His spirit still lives, and his labors here on earth will be an inspiration to the youth of today and to the unborn generations who will come after us.

THERE IS NO DEATH

There is no death! We find it so.
We sought and searched and now we know.
There is no death! Across the way
We find new life, a better day.
Our newer home where love is king,
Where every soul with praise doth sing.

There is no death! What seemed a pall
Was but a shadow over all,
Above there floats in heavenly space
God's angel, with a glowing face;
His wings of peace so calmly spread
To cover those that we call dead!
They, in the morning, fresh and bright,
Shall rise to clearer, better sight;
They'll breathe with love's eternal breath
And sing, Thank God, there is no death!

O, men arise, shake off thy fear,
Look up and smile, nor shed a tear;
Prepare to live so well on earth
That thou shalt know the larger birth.
O, live so closely to God's love
That when His angels from above
Shall whisper in thy listening ear,
Each word thou shalt most plainly hear.
Press forward! Live as they have said;
Thou, too, shalt prove, There are no dead!

—*Harrie Vernette Rhodes.*

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. ALBERT J. ENGEL
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. ENGEL. Mr. Speaker, I was on the good ship *Cristobal* on my way back from Panama when I read the radio news that CARL MAPES was dead. I had left him a few days before in apparently good health, smilingly saying "good-by," and now he was gone. Somehow, it was hard to believe that a man with his influence in Congress and at the height of his mental powers was dead. I was not only shocked—I was stunned when I read the news. I looked across the ocean to the island of San Domingo where Columbus had landed nearly 450 years ago when he discovered America. Four hundred and fifty years is a long time as time is measured by ones own life, and yet but a grain of sand in the mountain of eternity.

It has been 150 years or one-third of that period since we adopted our Constitution—a comparatively short time as time is measured by human lives. I thought of the service CARL had rendered to his State and Nation. For 27 years, or more than one-sixth of that period, CARL MAPES sat in Congress. For 27 years he helped to guide the destinies of our Nation and to protect our liberties and our freedom. For 27 years he helped to pilot the Ship of State. He helped to guide her through the greatest war the world has ever seen. He was here when the Nation heard the news of Chateau-Thierry, the Meuse Argonne, and many other battles where men

fought, bled, and died for a cause in which they believed. He was here during that great period of American history when men marched and flags waved, when every American heart throbbed with patriotism, and when it was considered treason to say anything disloyal of our Government or to cast any reflection on our flag or Constitution.

He was here during the greatest depression the world has ever seen, when hungry men and women went radical, socialistic, and some even communistic; through times when men doubted the wisdom of the founders of our Government; when they would have destroyed the Constitution; through times when men in their despair or through their desire for political power would have delegated all the power of the legislative branch to the executive branch of the Government; when they would have made the judicial branch subservient to the executive branch; when they would have, in effect, destroyed the greatest protector of American liberty—the Supreme Court itself.

He was here during the days when Communists sat in the Members' family galleries of the House of Representatives, and claimed to have, and undoubtedly did have, influence in forming the legislative policies of our Government.

For 27 years he sat in the House of Representatives and helped to guide the destinies of our country, always calm and collected, refusing to become excited, never permitting his prejudices to sway him on the one hand, or temporary pressure groups to influence him on the other. An ardent believer in prohibition, he stood stanch for the principles in which he believed during the period when few men were able to withstand the tide against prohibition. To Carl it was a moral question, and to do other than that which he did was to do a moral wrong. Moral questions, according to his code, must be decided according to the dictates of his conscience and according to the right as God gave him to see the right.

And so he kept coming back term after term. Fourteen times his constituents elected and reelected him. Many who differed with him admired his quiet, unassuming courage, devotion to duty, and his sincere honesty. They forgot their differences of opinion and helped to send him back again and again.

Some of his political opponents called him a conservative and some even a reactionary, but he voted for the social-security bill and much other progressive legislation. They sometimes accused him of favoring big business as against the little fellow, but he voted for the largest relief appropriation bill in the history of Congress.

To be permitted to serve one's country in the House of Representatives; to help to guide her destinies and to write her history for more than one-sixth of the constitutional life of our Nation is a privilege accorded to few men. Still fewer in number are those who served their Nation for that period of time as conscientiously, loyally, and devotedly as did CARL MAPES. It is men like CARL MAPES whom the poet had in mind when he wrote:

God give us men—
Strong minds, great hearts, true faith, and willing hands;
Men whom the lust of office does not kill;
Men whom the spoils of office cannot buy;
Men who possess opinions and a will;
Men who have honor; men who will not lie;
Men who can stand before a demagogue
And damn his treacherous flatteries without winking;
Tall men, sun-crowned, who live above the fog,
In public duty and in private thinking.

We will always remember him as being strong mentally, for he died at the height of his mental powers. It is because of men like CARL MAPES that our Constitution and our Nation have been preserved thus far. Whether our Government continues to survive as we know it, and as our fathers handed it down to us, will depend upon the unselfish, devoted, and self-sacrificing service of men like him.

Carl is dead. He has gone to his eternal reward. His tired and weary soul is at rest. We mourn for him and thank God He gave our country a man like him. We sympathize with his good wife and companion of his lifetime, who stood so loyally by his side these many years; who helped and encouraged him; who bore and helped rear his children; who cared for and helped to make his a happy home, where he at the end of each day could find peace and rest and contentment. To her who must now carry on lonely and alone, we extend our heartfelt sympathies. We join her in mourning not only her, but our loss. The tender memories of the past will make it easier to bear the burden. God bless her!

Thomas Marion Eaton

MEMORIAL ADDRESS
OF
HON. CHARLES KRAMER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. THOMAS MARION EATON, late a Representative from the State of California

Mr. KRAMER. Mr. Speaker, once more the Angel of Death has summoned to his eternal reward one of our beloved colleagues, Congressman THOMAS M. EATON.

Although Mr. EATON's service in Congress was short, it was memorable, and his sudden and untimely passing was a distinct loss to his many friends. While I did not have the pleasure of close association with Mr. EATON until he was elected to Congress in 1938, I soon learned to love and respect him, and had the highest regard and esteem for him and for his untiring efforts in Congress. He was always willing to cooperate with his colleagues in matters of interest to the public and was a tireless worker in his efforts to serve the State of California to the best of his ability as a Representative from the Eighteenth Congressional District. During his short service in Congress I have had the opportunity to observe at close range his achievements and to note the respect that was accorded him by his colleagues, regardless of political affiliations.

The State of California has lost an able citizen. Many of us will miss him sorely. His place will be hard, indeed, to fill. As one of his friends and associates, I mourn his passing; and to his sorrowing family let us extend the sympathy which their hour of grief and sorrow entitles them.

Edward W. Curley

MEMORIAL ADDRESS
OF
HON. MATTHEW J. MERRITT
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. EDWARD W. CURLEY, late a Representative from the State of New York

Mr. MERRITT. Mr. Speaker, with the passing of our colleague, ED CURLEY, no words can be uttered or printed which will diminish the distinguished public record or the excellent character of this outstanding legislator. Likewise, little can be said that will add to the esteem and affection with which he is still held in the hearts and mind of the people of his congressional district.

In the House he was very active in the cause of labor and helped draft many important laws on that subject. His knowledge and sincerity were recognized by his colleagues, and at the time of his death he was one of the outstanding leaders for this cause.

In his death labor has lost a real friend, and his constituency a distinguished legislator and neighbor.

Wallace Edgar Pierce

MEMORIAL ADDRESS
OF
HON. B. J. MONKIEWICZ
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. WALLACE EDGAR PIERCE, late a Representative from the State of New York

Mr. MONKIEWICZ. Mr. Speaker, the death of WALLACE E. PIERCE affected me deeply. He and I were elected to the Seventy-sixth Congress as new Members, and we were both assigned to the Judiciary Committee where we sat next to each other during the first session. During this period I became very much attached to him.

There are certain events which remain in one's memory forever because of the effect they have and the part they play in one's life. I knew WALLACE E. PIERCE for a short time only. In fact, it was so brief that it seems as if his presence in my life were like the coming and going of the pleasant glow of sunshine between rainy periods. It was like a drink of fresh, cool water to one spending days in a desert. I had known him for only 1 year, but within that brief period the benefits derived from my association with him were immeasurable. He was inspiring to his associates, loyal to his friends, learned in his profession, and honorable in both his public and private life. He was retiring by nature and unassuming in manner, yet one need not have known him very long to discover the strong character and sound judgment behind that pleasant smile.

WALLACE PIERCE never wasted words. His remarks, whether in committee or on the floor of the House, were brief but to the point. Sound thought, profound wisdom and intellect were found in his discussions of legislation.

His life was as beautiful as it was wholesome. He was devoted to his family. I shall ever remember how happy he was on Friday mornings in Judiciary Committee when, at the end of the day's session, he was expecting to leave for Chicago for a week-end visit with his daughter and granddaughter. While always busy and occupied, he seemed to be looking forward to those cherished moments.

His career as a statesman was cut short by his ultimely demise. We, who remain, can only console ourselves with the beautiful memories that he leaves with us.

Thomas Sanders McMillan

MEMORIAL ADDRESS
OF
HON. MALCOLM C. TARVER
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. THOMAS SANDERS MCMILLAN, late a Representative from the State of South Carolina

Mr. TARVER. Mr. Speaker, it is impossible to describe the feeling of grief and personal loss which swept over me when I heard over radio on a September night in 1939 the news of the death of TOMMIE MCMILLAN.

Closely associated with him for 13 years, serving during part of that time on the subcommittee of which he was chairman which formulated appropriations for the Departments of State, Justice, Commerce, and Labor, I knew him more intimately than many Members were privileged to know him, and that intimate knowledge confirmed in me participation in the universal esteem and admiration of which he was the recipient throughout his public life.

I shall not attempt a flowery tribute to his memory. He would not have it so. There was nothing bombastic nor ornate about TOM MCMILLAN. Content to work long hours, weeks, and years in the seclusion of a committee room, where few of the public realized the importance and efficiency of his labors, he contributed during the last several years more than any other one man to the efficiency and economy of the administration of the finances in the four departments over which his subcommittee had jurisdiction. The elimination of waste, the provision at the same time of adequate funds for necessary activities, the prevention of discriminations against the lower-paid and more humble employees whose interests are too frequently neglected—these were his especial objectives.

His loyalty to the interests of his district and State were outstanding qualities and yet above and beyond them he was devoted to the welfare of the American people. No selfish motive ever led him to support legislation or appropriations which were not justified upon the basis of national interest. Firm in his convictions as to what principles are essential to good government, he was frequently found in the last few years voting on the unpopular sides of pending issues, regarding as his obligation, transcending consideration for his own political welfare, to give the best his brain and heart could afford to the interests of his people.

It was an inspiration to have known and served with him. The State of South Carolina has lost in him an invaluable public servant; and I, in common with many thousands of others, have lost a friend.

William Edgar Borah

MEMORIAL ADDRESS
OF
HON. HENRY C. DWORSHAK
OF IDAHO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. WILLIAM EDGAR BORAH, late a Senator from the State of Idaho

Mr. DWORSHAK. Mr. Speaker, almost 50 years ago a young lawyer arrived in Boise, to become intimately associated with the development of Idaho, which had entered statehood in 1890. The Gem State, recognizing outstanding ability, sent WILLIAM E. BORAH to the United States Senate in 1907. Thus began a political career without parallel in the current annals of American history, culminating on January 19, 1940, when this illustrious statesman's demise caused profound sorrow throughout the civilized world.

History will record the valor, integrity, and vision which characterized the services of WILLIAM E. BORAH in more than three decades throughout which he championed many proposals vitally affecting our Government, the security of our Nation, and the welfare of our people. As chairman of the Foreign Relations Committee, he became an authority on international affairs, thus materially shaping the destinies of this Republic. His intense nationalism inspired his opposition to the League of Nations, and contributed materially to preserving American traditions of nonintervention in the internal affairs of Europe. His devotion to peace and his championship of human rights motivated his antipathy to the Versailles Treaty, about which he made this prophetic statement on September 26, 1921:

> We know the Versailles Treaty has in it the seeds of many wars. It hangs like a storm cloud upon the horizon. It is the incarnation of force. It recognizes neither mercy nor repentance and discriminates not at all between the guilty and the innocent, friend or foe. Its one-time defenders are now frank to admit it. It will bring sorrow to the world again. Its basic principle is cruel, unconscionable and remorseless imperialism. Its terms will awaken the reckoning power of retribution.
>
> We know that Europe cannot recover so long as this treaty exists—that economic break-down in Europe, if not the world, awaits its

execution, and that millions of men, women, and children, those now living, and those yet unborn, are to be shackled, enslaved, and hungered if it remains the law of Europe.

Senator BORAH's lofty statesmanship did not minimize the human qualities which endeared him to all who were fortunate enough to be acquainted with him. Like Lincoln, he loved the common people, and understood their philosophy of life. His friendliness and solicitude won for him the devotion and love of his fellow men. This was manifested at the funeral services held at Boise, when thousands lined the streets in silent tribute as the cortege passed.

At this critical time when war stalks throughout many lands, and threatens to engulf our own country, the loss of this brilliant American is poignant. It is difficult for anyone to take his place in the Senate and expose the internationalism which endangers our peace and security today. He sensed the menace of imperialism abroad, and constantly stood as a bulwark against the destruction of American ideals. His departure is indeed an irreparable loss, but his indomitable spirit will serve as an inspiration in the trials and battles of the days to come.

With the passing of the years, greater luster will be added to the unselfish career of this distinguished Senator. Like Clay, Webster, and Calhoun, he has won his niche in American history, and his fame will endure throughout the ages.

The State of Idaho is honored and proud to have given WILLIAM E. BORAH the opportunity to serve his country. His earthly remains are entombed in Morris Hill Cemetery in the capital of his adopted State, but his memory is enshrined in the hearts of those whom he represented for 33 years. With reverence and devotion, we join in these memorial services, with this parting tribute to our departed friend and immortal statesman:

O noble soul, O gentle heart,
Hail, and farewell!

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. CLIFFORD R. HOPE
OF KANSAS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. HOPE. Mr. Speaker, I was inexpressibly shocked last December to learn of the sudden death of my dear friend, CARL E. MAPES. During the time I have been in Congress, there has been no Member for whom I have felt a higher regard or have more greatly admired than Mr. MAPES.

When I came to Washington, in the Seventieth Congress, Mr. MAPES was already a veteran and seasoned Member. He was one of the leaders of the House, an excellent parliamentarian, and a man of wide influence. Yet, notwithstanding the fact that he was one of the busiest men in Congress, CARL MAPES found time to counsel and advise new Members like myself. I formed the habit, which I continued until his death, of consulting him about many matters of legislation and party policy. Always he was the same—dependable, conscientious, and level-headed.

Of all men whom I have known, in this and other legislative bodies, CARL MAPES came the nearest to being an ideal legislator. Some Members of Congress acquire fame and reputation through their sponsorship of special causes. Others make their reputation by specializing in some particular phase of legislative activity. Others become known because of their oratorical or persuasive ability. Still others wield influence because of their ability in working out the details of legislation and in bringing about the compromises and agreements that are a necessary, if little recognized, part of legislative procedure.

The fame of CARL MAPES did not arise out of his ability along any of these particular lines. He was not an orator. He was not a pleader for special causes, or for the ideas of organized minorities of one type or another. He was not what I would call a practical politician, and I use that term in the best sense of the word. CARL MAPES was a leader and an eminent legislator because he was intellectually honest, because he was thorough, because he was dependable, and because he took a broad national view of his responsibilities as a Member of Congress.

While he believed in party organization, party platforms, and party responsibilities, yet he was no narrow partisan in any sense of the word. He was honored and respected equally on both sides of the aisle and by both those who were for and those who were against him on any particular legislative matter.

During my time in Congress, I know of no man who as an individual had more influence among the membership than CARL MAPES. His kind are all too few, and in his passing, this country and this Congress have lost a leader who could ill be spared, especially in times like these.

Emmett Owen—The Man

MEMORIAL ADDRESS
OF
HON. MALCOLM C. TARVER
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. EMMETT MARSHALL OWEN, late a Representative from the State of Georgia

Mr. TARVER. Mr. Speaker, in the Congressional Directory for last year's first session there appears in the biographical section, where Members customarily record outstanding facts concerning themselves and their careers, oftentimes at great length, a statement of seven words, indicative of the modesty and simplicity of the man who wrote it:

EMMETT MARSHALL OWEN, Democrat, of Griffin, Ga.

Others have spoken, and will speak again, of the oratorical brilliance of our deceased colleague, of the honors paid him by his people during many years of public service, of the unswerving fidelity with which he met fully and capably every requirement of public trust; but EMMETT OWEN made official record only of his name, that he was a Democrat, and that he resided in Griffin, Ga. The same innate reticence about himself and his accomplishments is evidenced by his labor of 7 years on the Committee on Agriculture, striving, struggling, thinking, and talking in the interest of a better deal for the farmers of the country, who have been and are now passing through a period of terrible trial, with never an effort on his part to make the headlines or even to let his constituents know the important, faithful, and useful part he was playing in the formulation of farm legislation.

There are Members of the Congress whose oratory on every conceivable subject scintillates in the CONGRESSIONAL RECORD who never accomplish anything except to advertise themselves. All of us know that legislation in the main is accomplished here in the committee rooms, and that the advices of Members in whom their colleagues have confidence when they talk as man-to-man around the committee table have far more weight than impassioned orations on the floor, which few hear or even read. EMMETT OWEN knew this; and, knowing it, he used his abilities, his fine personality, the friendships that he made, where those assets would accomplish the most

for his people. The stamp of his influence is indelibly impressed upon much of the important farm legislation enacted during the last 7 years.

His constituents elected him to Congress because he possessed those qualities which appeal to men everywhere and in all walks of life. He was loyal not only to his public trust but to his friends. He had one of the most gentle natures I have ever known. Everybody who knew him loved him. Members of the House who knew him well would take pleasure in helping him in his undertakings. No death in recent years has caused more general sorrow among the membership of the House of Representatives.

The Georgia delegation in the House will sorely miss him. His friendly cooperation in every effort for the advancement of Georgia's interests, his pleasant comradeship with every Member of the delegation, these are memories which shall forever hold their place in our hearts and minds. Georgia laments the passing of a distinguished citizen, the Fourth Congressional District sorrows over the loss of a faithful and capable Representative, but the Georgia delegation, while not unmindful of these losses, mourns most of all the departure from our circle of EMMETT OWEN—the man.

Clyde Harold Smith

MEMORIAL ADDRESS
OF
HON. JAMES C. OLIVER
OF MAINE
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CLYDE HAROLD SMITH, late a Representative from the State of Maine

Mr. OLIVER. Mr. Speaker, among all the States of this great Nation which we, with reason, delight to regard as the greatest and best in all the world, few have such a number of deservedly famous native and adopted sons as the State of Maine.

The roll is a long one and embraces names famous in varied walks of life and known the world over. Such men as Longfellow, Elijah Kellogg, Francis Clark, Melville Fuller, Cardinal O'Connell, Maj. Gen. Joshua L. Chamberlain, and many others of equal note.

Among these native sons of Maine is one of our late-lamented colleagues, CLYDE H. SMITH, of Maine, who represented the State and constituency formerly represented in this body by Hannibal Hamlin, who was Vice President with the beloved Lincoln; James G. Blaine, 10 years a Member and Speaker of this House, United States Senator, Secretary of State, and creator of our incomparable Pan American Union; Nelson Dingley, Jr.; and William P. Frye, many years President of the United States Senate.

CLYDE H. SMITH was known to all of us as a quiet and friendly soul, whose worth was best known by those who knew him best. Long years of service in public positions of responsibility in his native State endeared him to his own people. His work in Maine was noteworthy and extensive before election to Congress. He served as superintendent of schools, 1903–6 and member of the board of selectmen of his home town of Hartland, 1904–7, and Somerset County sheriff for 4 years; member of the Maine House of Representatives, 1899–1903, and moved to Skowhegan, Maine, in 1905, and there served as member of its board of selectmen, 1914–27 and 1928–32; again member of the Maine House of Representatives, 1919–23 and the State senate 1923–29; chairman of the State highway commission, 1928–32; member of the Governor's council, 1933–37, and elected to the Seventy-fifth Congress on September 14, 1936; reelected to the Seventy-sixth Congress, September 12, 1938. The faith and confidence which the people of Maine reposed in CLYDE H. SMITH is evidenced by the record of his long public career during which he was never once defeated for election to the public offices which he sought and secured.

His constituents sent him here as their Representative, knowing that he would always conscientiously, energetically, and courageously serve them and the Nation. His public record recalls to memory these words:

> Men whom the lust of office does not kill;
> Men whom the spoils of office cannot buy;
> Men who possess opinions and will;
> Men who have honor, men who will not lie.

But for his untimely death our friend would, without doubt, have been continued a Member of Congress as long as he was willing or able to serve.

With Francis Thompson let us say that—

> The fairest things in life are death and birth,
> And of these two the fairer thing is death.
> * * * *
> It is the falling star that trails the light,
> It is the breaking wave that trails the might,
> The passing shower that rainbows maniple.
> * * * *
> Thus hath He unto death his beauty given;
> And so all which form inheriteth,
> The fall doth pass the rise in worth;
> For birth hath in itself the germ of death,
> But death hath in itself the germ of birth;
> It is the falling acorn buds the tree,
> The falling rain that bears the greenery.
> * * * *
> For there is nothing lives but something dies,
> And there is nothing dies but something lives.
> Till skies be fugitives,
> Till time, the hidden root of change, updrives,
> Are birth and death inseparable on earth
> For they are twain yet one, and death is birth.
>
> We who remain can only
> Dimly guess what time in mists confounds;
> Yet ever and anon a trumpet sounds
> From the hid battlements of eternity.

At this point, Mr. Speaker, I wish to incorporate my remarks as made here in the House of Representatives on Monday, April 8, the day when our friend left us.

It is with the deepest regret that I rise this morning to announce the passing into the Great Beyond of our colleague, CLYDE H. SMITH, of Maine. His passing was gentle and merciful and for that we are and shall be thankful but, because of its suddenness, it is a great shock to all, especially those of us who knew him intimately and well.

Clyde was a fine soldier in the interests of the rank and file of the people. During his many years of public service which have extended over nearly half a century he has constantly and consistently stood firmly for the principles in which he so ardently believed. Always a valiant fighter for those who labor, he sought an appointment to the House Committee on Labor and for the past 4 years has been in the midst and the thick of all the many legislative controversies which have been under the consideration of that congressional group during that period. Having been a pioneer in the principle of old-age pensions, he has made his name more than familiar to the people of our State and the Nation who are particularly interested in this phase of our economic life. He has always shown in his legislative career a fine sense of balance and proportion which has enabled him to do good service for all in the light of the many extreme demands which are often made by those most ardent on both sides of any issue.

Clyde has always been an humble man, unassuming and unpretentious; he has been extremely conscientious and devoted to duty; at his desk almost until the very moment of his untimely passing, he has epitomized his determined consecration to the best welfare of his constituents.

I have learned through personal contact with him during the past several years to lean heavily upon his judgment and I feel that in his passing away I have suffered the loss of a true friend. I know that literally thousands in our State of Maine have suffered a similar loss.

The following few words taken from the pen of a great son of Maine, Henry Wadsworth Longfellow, characterizes with peculiar appropriateness the real personality of our deceased colleague in always thinking in terms of the best for others:

A man of such a genial mood
The heart of all things he embraced
And yet of such fastidious taste,
He never found the best too good.

During the several days since the sudden passing of our colleague, many Members of this body, Mr. Speaker, have expressed to me their profound sorrow and deep regret, occasioned by his loss. He had the faculty of making friends easily, and what is far more important, he had the invaluable capacity of keeping the friendships once made. Soft spoken and moderate at all times, his personality was exceptionally pleasing. Devotion to duty and to the responsibility of office was the cardinal principle of his whole life. Conscientious, capable, and with an exceedingly cheerful optimism, he faced each day and in the execution of his daily duty he spread good cheer among all with whom he came in contact. Such a man is missed and will continue to be missed. Maine has lost a faithful servant. Again, I state, I have lost a friend.

But in the words of Cardinal Newman, we must learn to depend upon the Divine Father:

May He support us all the day long, till the shades lengthen and the evening comes, and the busy world is hushed, and the fever of life is over, and our work is done; then in His mercy may He give us a safe lodging and a holy rest, and peace at the last.

O death, where is thy sting?
O grave, where is thy victory?

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. JOHN D. DINGELL
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. DINGELL. Mr. Speaker, I arise upon this solemn occasion to pay my humble tribute to the late CARL E. MAPES, who for 26 years represented the Fifth Congressional District of Michigan in the Congress of the United States.

CARL MAPES was my friend. In fact, he was a friend of every Member of this House who knew him, and poor indeed was he who failed to make his acquaintance. CARL MAPES was as modest and honest as he was helpful and productive. He enjoyed the regard and the esteem generally of his fellow Members, and particularly those who were privileged to be included in Michigan's delegation. He towered above us because of his great public service and a record unattained, I dare say, by any other man from Michigan who ever served in Congress. Intellectually his greatness cannot be overstated; he was a student and, too, he was a master. His character and disposition were matchless, and he was fearless, outspoken, and uncompromising in his attitude toward error.

He was not of my political faith, yet he was not partisan in the narrow sense of the word. He could not be compelled to suport or oppose a measure unless he was convinced that it was right to do so. The origin of a bill or proposal was not what concerned CARL E. MAPES, its purpose, effect and objective were deciding factors which governed his attitude and course. Matters that were of great concern and the expression of his own great party, Congressman MAPES would support only when he was convinced that they were fundamentally sound, correct, and, therefore, honorable. He frequently threw the weight of his superior knowledge and experience into the parliamentary fray and ever so often swayed his colleagues who drank deep of his sound philosophy and argument. Thus, he was a great help to the minority in recent years. With equal fervor and sincerity, he would aid the majority in the passage of a given bill or measure when he was convinced that the proposal was for the best interest of the people of this Nation.

We are privileged to record our sentiments regarding one of Michigan's noblest sons, and certainly we all agree that he was without peer among her Representatives in Congress.

I bow my head, Mr. Speaker, and I pray God our Father will grant eternal rest to the noble soul of CARL E. MAPES, and that He will strengthen and sustain the family and loved ones until once again all are reunited in Heaven.

John Andrew Martin

MEMORIAL ADDRESS
OF
HON. CLIFFORD R. HOPE
OF KANSAS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. JOHN ANDREW MARTIN, late a Representative from the State of Colorado

Mr. HOPE. Mr. Speaker, I esteem it a privilege to have this opportunity to pay a tribute to my friend, JOHN A. MARTIN. I became acquainted with Mr. MARTIN soon after the opening of the Seventy-fourth Congress, and we remained firm friends until his death. JOHN MARTIN was an able man, a man of strong convictions which he was always ready to defend with courage and ability. He had the distinction of having served two terms in Congress many years ago, after which he voluntarily retired. He was a successful lawyer for many years; and notwithstanding the fact that he was far beyond the age for military service, he volunteered for service during the World War, attaining the rank of major.

JOHN MARTIN was a self-made man. He understood the problems of the average man, because he had been in contact with those problems himself. He was generous in his sympathies and had a splendid capacity for friendship.

We represented adjoining districts which had many problems in common. Consequently, we were associated in many matters of interest to our districts. Particularly through these contacts, I learned to appreciate JOHN MARTIN as an associate and a friend. His place will be hard to fill.

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. CLARE E. HOFFMAN
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. HOFFMAN. Mr. Speaker, words are inadequate to express the sense of loss which we feel as we go about our daily tasks and realize that the helpful and sustaining presence of our friend and colleague, CARL E. MAPES, is no longer with us.

Kindly and considerate in his attitude toward all of us; helpful and instructive as a colleague; ever loyal and patriotic, not only to his district and his State, but to the Nation, he left behind memories which renew our faith in the thought that consideration for those one meets, faithful, quiet, but energetic service to our country and its needs, are well worth while and win for one who so devotes his life a high and lasting place in the memory of his friends and in the history of his Government.

William Albert Ashbrook

MEMORIAL ADDRESS
OF
HON. THOMAS A. JENKINS
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. WILLIAM ALBERT ASHBROOK, late a Representative from the State of Ohio

Mr. JENKINS of Ohio. Mr. Speaker, Hon. WILLIAM A. ASHBROOK was a very unusual man. His strong character and his keen insight into human nature made him a very useful citizen. There are some people who are distinctive because of their natural gifts, and there are others who win distinction because of what they do. While WILLIAM A. ASHBROOK was blessed with a bright mind and with a genius for making friends, his desire to be of service to those who needed help was, in my mind, his outstanding characteristic. In other words, he was a useful man. While Mr. ASHBROOK achieved great distinction in public office and in the financial circles of his community and was highly respected, still I am sure it will always be remembered that he was a man who did things. It is only natural that one hears fine encomiums about a person when that person has passed away, but I was very strongly impressed with the fact that so many people spoke to me at Mr. ASHBROOK'S funeral with reference to the kindly deeds that he had done for them. Through his numerous and extensive business and financial connections he had many opportunities to do acts of kindness for many deserving people. The fact that he accepted all these opportunities and rendered innumerable acts of kindness and assistance to many people was proved by the testimony of his neighbors to that effect and by the presence at his funeral of an exceptionally large concourse of people.

Mr. ASHBROOK stayed close to his people. He lived all his life on the site where his grandfather first settled nearly 120 years ago. Licking County, Ohio, is a fine agricultural county. Early in life he began his career of helping the people. Before he was 18 years of age he was publishing a newspaper in his home town and continued the publishing of his paper all his life. Being industrious as well as public spirited he early found himself in the midst of the business activities of his community. Although his newspaper was always a success, still it was not big enough to command all his attention. When yet a young man he started in the banking business and continued in that business during the remainder of his life. He was also connected with agriculture in a large way and was the owner of many large and prosperous farms. By reason of his having assisted many of the young farmers in his community in a financial way, he not only had a friendly, neighborly interest in them but he was naturally interested in their financial success.

In addition to the numerous and varying business, financial and agricultural activities in which he was engaged, his flair for politics manifested itself early. When a young man he was made postmaster of his home city and soon thereafter was elected to the legislature of his State, where he served with credit and distinction. He was elected to Congress in 1906 and served for 14 successive years. He was defeated in the election of 1920 but was reelected again in 1934 and continued in office until his death in this year, 1940.

His services in Congress were marked by a determination to give to his constituents his best efforts. Although in national matters he was a consistent Democrat, yet in local matters and matters of economic and financial importance, he voted according to his own best judgment and without regard to party affiliations. Although he had gathered about him what would be considered a very substantial fortune, his wealth and high position had had absolutely no effect on his disposition toward people who were less fortunate than he. The BILL ASHBROOK of years ago was the BILL ASHBROOK of this year, 1940. Frequently he took occasion to say to his friends that he was now "just plain old BILL ASHBROOK." This implied that he had always been plain BILL ASHBROOK but that now he was getting to the place where he was willing to be called "plain old BILL ASHBROOK."

Mr. ASHBROOK was one of my warmest and stanchest personal friends. Although we were not of the same political faith, yet we found ourselves on very frequent occasions voting together on matters in which the interests of the great common people were involved. I was very much saddened at the news of his passing, because I had a high regard for him, and somehow I felt that he was my friend. When the Speaker of the House of Representatives indicated that it was his wish and the wish of the family that I should be designated as the one member of my political party to attend his funeral I felt highly honored. As one of Mr. ASHBROOK'S friends I attended his funeral, and on the high hill in the cemetery on that cold, zero day, when we laid him in the ground covered with a thick blanket of snow, I thought of what the poet said of the burial of Sir John Moore:

> We carved not a line, and raised not a stone,
> But we left him alone with his glory.

The children of Mr. ASHBROOK have every reason to be proud of the life, character, and accomplishments of their father. The widow of Mr. ASHBROOK has every reason to feel that her husband and the father of her children had her interest and the interests of their children in his mind at all times. She has lost a devoted husband, and the children have lost a noble father. The community has lost one of its most useful citizens. I dare say that the fame and good name of Mr. ASHBROOK will be kept alive long by those who have been the recipients of his kindnesses.

William Irving Sirovich

MEMORIAL ADDRESS
OF
HON. JAMES H. FAY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. WILLIAM IRVING SIROVICH, late a Representative from the State of New York

Mr. FAY. Mr. Speaker, this memorial service in the House of Representatives in commemoration of our departed colleagues brings to mind a former Member of Congress whose kindly spirit, unselfish devotion, and integrity endeared him to the hearts of all who knew him.

I speak of Dr. WILLIAM IRVING SIROVICH, who represented the Fourteenth District of New York City and served through the Seventieth, Seventy-first, Seventy-second, Seventy-third, Seventy-fourth, and Seventy-fifth Congresses, was reelected to the Seventy-sixth Congress, and died during his tenure of office.

While serving as a junior Member of the House, it was my good fortune to count on Dr. SIROVICH as a wise and friendly counselor, who was never too burdened with his own problems to lend a helpful hand to a colleague.

Dr. SIROVICH was known for his simplicity, his purposeful directness, his humanitarian sympathies which served the people of the Fourteenth District of New York City for so many years.

He was born in York, Pa., in 1882, devoted himself as he grew into manhood to the study of medicine. Perseverance to high principles in his professional practice and private life enabled him to grasp a keen insight, not only into sick and injured bodies, but also into the very souls of those to whom his healing hands administered. He developed an intuition into the unexpressed hopes and fears of mankind and began to realize that man might well serve his brothers by becoming an instrument through which the democratic principles of Americanism could be demonstrated; he knew that security, a

good standard of living, improved housing conditions, and assurances of a true representation of the people through our form of government were also vital to the well-being of the Nation.

And so WILLIAM IRVING SIROVICH became a public servant of the United States of America and served well and faithfully for many long years, gaining the love and respect of all those with whom he came in contact.

Brave, courageous, and farsighted, he had the courage of his convictions and stood steadfast on those principles he believed right and just.

It is a sad loss to us and to the country at large that our friend passed on before his life span had normally completed itself. I feel that Dr. SIROVICH himself would have said, "As long as I must leave you now, I am proud to depart while still in the service of our wonderful country which I love so much."

Therefore, this should be no occasion for sadness, but rather one of thankfulness that it was our privilege to work side by side with such a great exponent of Americanism.

In assuring his family of our great sympathy, I wish also to pledge to them that the citizenship, love of country, and conscientious adherence to humanitarian principles exhibited by WILLIAM IRVING SIROVICH will always linger over this body, as a perpetual example of a great American.

William Albert Ashbrook

MEMORIAL ADDRESS
OF
HON. J. HARRY McGREGOR
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. WILLIAM ALBERT ASHBROOK, late a Representative from the State of Ohio

Mr. McGREGOR. Mr. Speaker, as the Representative of the Seventeenth Congressional District of Ohio I come here today to pay my humble tribute to the memory of the late WILLIAM A. ASHBROOK. Through long and close association in these halls, doubtless many of you knew Congressman ASHBROOK far better than he was known to me. But without discounting the indelible impression which BILL ASHBROOK left upon the National Capital, I can assure you that back in his home district in Ohio he was a human institution, trusted and respected universally by his fellow men.

It does not fall to the lot of many of us to serve in any public capacity as long as did WILLIAM A. ASHBROOK. He resigned from the Ohio legislature in 1906, in order to take up his duties in the Sixtieth Congress. For seven full terms he served his district.

Defeated for reelection to an eighth term in 1920 by the small margin of 125 votes, he devoted himself for the next 14 years to his many personal and business interests in Licking County, Ohio.

Again, in 1934 Mr. ASHBROOK offered himself as the congressional candidate of his party, and was elected. He served in the Seventy-fourth and Seventy-fifth Congresses, and had filled half of his term in the present Congress when death ended his career on last New Year's Day, at the age of 72½ years to the day.

WILLIAM A. ASHBROOK was born in Johnstown, Ohio, July 1, 1867, and always maintained his residence on the site which his grandfather, the Reverend Eli Ashbrook, selected in 1821. He was the youngest of six children of William and Lucy Ashbrook.

When only 19 years of age, BILL ASHBROOK began the practice of keeping a diary, and from this record have been taken many interesting facts which reveal not only his many activities but also his wholesome philosophy of life. He continued this diary until the day of his death, marking 53 consecutive years of recounting his daily impressions of the passing scene.

Among the earlier recordings in the Ashbrook diary are comments on a diligent but happy childhood. His notations indicate that he was much impressed with the familiar and too rarely practiced motto, "Waste not; want not."

Perhaps his first public job was the grading of the public square in his home village of Johnstown. His diary explains that by careful planning and long hours he was able to finish the task "on the right side of the ledger."

Before attaining his majority, BILL ASHBROOK had affiliated himself with the Democratic Party, with which he remained actively identified throughout his 72½ years. At 21 he was elected secretary of his county central committee. Thus began a political career which was to lead him into the legislative halls of his State and his Nation.

He discovered that the editorship of the Johnstown Independent, a position which he assumed when only 18 years of age, fitted practically into his political career. Through his weekly newspaper he made hosts of friends, and never did he lose interest in this phase of his exceptional life. In 1935, when he celebrated a half century of consecutive service as editor of the Independent, he commented that the job "was the first thing that really interested me and doubtless was the deciding factor in molding my future."

In 1903 Mr. ASHBROOK was elected secretary of the National Editorial Association. In this capacity he traveled extensively. He also found time for a trip abroad, which he often referred to as giving him a breadth of vision which became a valuable asset in later life.

Other local interests crowded the schedule of the young editor. He became identified with banking institutions in his town and county, took an active part in several fraternal orders, entered the insurance field, was active in the promotion of good roads and other public improvements, devoted himself to the interests of church and school.

Among the earliest honors that fell to his lot was an appointment as postmaster by President Grover Cleveland.

His hobbies were varied, including geneology, the collection of rare coins, and farming. In reality, his farming became much more than a hobby, for before his death he had accumulated 2,200 acres of the finest of Ohio's farm land.

At the age of 22 Mr. ASHBROOK was married to Miss Jennie Belle Willison, a teacher in the Johnstown schools. She died 20 years later.

A second marriage, to Miss Marie Swank, of nearby Bellville, brought into the Ashbrook home five children—three sons and two daughters—whose ages range from 8 to 17 years. The only other immediate surviving relative was a sister who passed away shortly after the death of her distinguished brother.

As the New Year came into life, WILLIAM A. ASHBROOK, affectionately known as "Pension Bill," passed from the familiar scene with which he had been identified for 72 years.

Final services were conducted at the Ashbrook home in Johnstown, with Dr. Avery A. Shaw, past president of nearby Denison University, officiating. The occasion was one on which an enviable career of long public service was honored in all sincerity by neighbors and friends, by leaders of the State and the Nation.

In closing this humble tribute, which falls far short of doing justice to the memory of my predecessor in this Congress, I can think of no better way to give an insight into his true character than by calling attention to this sympathetic interest for the people of the Seventeenth District.

He was the idol of his family, the beloved friend and adviser of his associates, the respected leader of thought and action in the various enterprises and philanthropies with which he was identified.

It is my ambition to merit so far as possible the confidence and high regard in which "PENSION BILL" ASHBROOK was held during his more than 50 years of public service.

William Irving Sirovich

MEMORIAL ADDRESS
OF
HON. JAMES M. FITZPATRICK
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. WILLIAM IRVING SIROVICH, late a Representative from the State of New York

Mr. FITZPATRICK. Mr. Speaker, my first meeting with Hon. WILLIAM I. SIROVICH was in the Seventieth Congress, when we were serving our first term in the House of Representatives.

He was a sympathetic, kind, and understanding person, and always worked untiringly in behalf of the struggling masses in this country.

As a doctor of medicine, he was always ready and willing to serve the poor people of his district in a professional capacity. As a Member of Congress he advocated the enactment of humanitarian legislation that would be beneficial to the people throughout the United States.

His passing is not only a loss to the people of his congressional district but to the Nation as a whole.

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. BARTEL J. JONKMAN
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. JONKMAN. Mr. Speaker, when God in his inscrutable wisdom took away CARL E. MAPES his district, his State, and Nation lost a genuine, faithful, and valuable public servant.

His fine character, marked ability, and untiring energy in public affairs were quickly recognized and drew him from his law practice into the legislature of his native State. There he served with distinction, but not for long.

Soon these qualities, together with his unerring and unswerving devotion to the fundamentals and ideals of republican government, called him to a higher and greater stewardship as a Member of Congress. Here he served his district and his country with eminence and distinction for over a quarter of a century.

It was not my privilege to be personally familiar with his work in Congress. It has, however, been my inspirational experience in the last few weeks to privately hear scores of my colleagues from both sides of the House eulogize in glowing terms his sincere patriotism, his outstanding ability, his able counsel, his sympathetic and helpful nature, as well as his fine Christian character.

It was this same transcendent personality which endeared him to the people of his district. I cannot recall any death that caused greater shock or more profound and universal grief in the community than the passing of Carl as high and low addressed him.

The services in his home city were conducted by the Reverend Dr. Edward Archibald Thompson, minister of the Park Congregational Church at Grand Rapids, of which Congressman MAPES was a member. He preached a most appropriate and beautiful sermon, which I quote, as follows:

There is nothing more admirable in human nature than the impulse to honor the memory of noble men. We are assembled today to pay tribute to one to whom tribute is due. However, in keeping with his fine taste, his modest, unassuming nature, his antipathy to ostentation, and in conformity to his wish, often expressed after funeral services held for some of his friends, this service must be one of sincere simplicity.

It is not our purpose here to eulogize the life of one who was so well and so favorably known and one who was so much beloved by the thousands who knew him best. High tribute has already been justly paid by political associates and by friends in every walk of life. Yet we would be unfair to ourselves if we did not pause for a moment on this solemn occasion to at least mention a few of the vital and magnificent qualities of character that undergirded his unusual life and which have made him an outstanding and trusted leader, not only in his own city but throughout the State and Nation, then to here pledge ourselves to carry on those high principles by which he lived and through which he gave to his fellow men and to his country such humble yet such distinguished service.

CITES TRIBUTES OF OTHERS

In printed and in uttered tributes to the memory of this real American, this truly great servant of his country, we find an unusual list of words and some striking sentences, all of which are markedly true.

He was dependable yet modest, able yet quiet, tolerant yet conscientious, loyal yet sincere. He was scrupulously honest. He was winsome, clean, wholesome. He was a charitable friend and helpful neighbor.

Congressman MAPES was a man of real courage, yet he was always fair to those who disagreed with him. He had the welfare of his people at heart. He felt a deep sense of responsibility to them. To an unusual degree he was able to sit where other people sat and see life from their point of view. His masterful strength, sometimes concealed by his rare modesty and always combined with his deep sympathy, gave him an insight into human problems and marked ability in helping to solve them. In the words of an outstanding associate of his: "He demonstrated as few other men have done what sheer force of character can do in human contacts and in public relationships. * * * He was a Christian gentleman in every sense of the word."

FAIR AND UNSELFISH

Congressman MAPES was always alert to the needs of his time. He clung to the best in our American tradition but was always forward-looking and open-minded. His judgment was unusually accurate and his opinions commanded the respect of both his associates and his opponents. He had a mind which quickly discerned the true from the false and a nature which instantly threw the whole fiber of his being back of that which was true. This was because his conclusions were based on a fair and unselfish consideration of the facts at hand, for unselfishness was the key to his useful life. Selfishness dims the vision and warps judgment of men. It is therefore refreshing and inspiring to find in public life men as unselfish, as fair-minded, as noble of purpose, and as keen in judgment as was the Honorable CARL MAPES. He saw the best in his fellow men. He believed in the dignity of the individual and the possibilities of every human being. He carried the idea of brotherhood into all the relationships of life and he made no exceptions. His presence dignified any occasion and his approval put the stamp of value on any project.

A life and a character such as his must be built on a strong foundation. Little has been said in a public way about two great cornerstones in the foundation of his life. His home and his church formed the steel framework and the reinforced concrete for this stalwart life. Upon these was built his life of noble service to his country. Seldom was there a Sabbath when he was in his home city that he could not be found in his pew at church.

LOYALTY A FINE EXAMPLE

There are some people who sit in the congregation from Sunday to Sunday who are quiet and unobstrusive, but who bring to the minister and to those who worship with them an inspiration that heightens the service and strengthens the spirit of worship. Mr. MAPES had this quality to a marked degree. He was thoughtful, cooperative, buoyant, idealistic, and a man of deep faith. His loyalty to his church was a silent but powerful example to the thousands of young men and women who wished to be like him. It is an opportunity by way of example that is too often omitted by many busy men in public and business life.

His cooperation with his church and his expressions of appreciation were not perfunctory; they were discerning and helpful. On retiring from the service a week ago last Sunday (his last Sabbath in Grand Rapids) he made one of his most appreciative, discerning, and helpful comments.

In his home he was, indeed, a loving husband and a wise father. He loved his family and his home. Loving comradeship existed there. He never forgot the kind, helpful, little courtesies that make life sweet and happy. His home was the beginning source of his inspiration and the place where his plans for larger service were made.

We measure life not by years alone but by how much one has lived. He has lived much and well.

It would be tragic if a life like this could be cut off with the passing of the physical body. However, I am thoroughly convinced that whatever may become of the physical body, you cannot take away the real self—the spirit. The disciples felt this way about Jesus. Whatever had become of His body they knew that He still lived in them. And CARL MAPES still lives in the lives of men and women who have been made nobler and given a truer conception of life because they knew him.

Death is not the end, but just a turn in the road of life. It frees us from the shackles of the physical body that we might grow and be that which we yearn to be at our best. While Mr. MAPES had a stalwart body, it was not strong enough to express his full spirit at its best, and somehow now we feel that he is free to attain unto his highest ideals without the limitations of the physical. So while we are sad and lonely today because of the passing of our friend into that larger life, we do not grieve as those without hope. It is a time of triumph and victory. He lived an unusually full and useful life. He died in harness, serving his country.

The greatest tribute that we can pay to him and the finest expression of sympathy that we can give to his loved ones is to rededicate our lives to the ideals, the love of country, and the noble principles for which he lived.

"He has fought a good fight. He has finished his course. He has kept the faith."

Sudden and shocking as was the death of CARL E. MAPES, it came nevertheless as a fitting mantle for his life of strenuous service. He died far from the home and family he loved so much in the midst of actual service to his country.

He was prepared to approach his grave—

> Like one that wraps the drapery of his couch
> About him, and lies down to pleasant dreams.

Chester Castle Bolton

MEMORIAL ADDRESS
OF
HON. THOMAS A. JENKINS
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CHESTER CASTLE BOLTON, late a Representative from the State of Ohio

Mr. JENKINS of Ohio. Mr. Speaker, there is something about service in the Congress of the United States that tends to make warm friendships among the Members. These friendships do not always come from favorable and attractive social contacts, neither do they always come from a kinship of spirits. In many cases they come from the feeling of respect one has for a worthy adversary who has crossed swords in hot debate on the floor of the House. Sometimes we form a warm friendship with a person because he has been agreeable and kind and helpful to us; and, again, we may form a friendship with one because we have seen him do his duty where it was not pleasant for him to do it. And sometimes we feel a friendship for people because of their ability and their character and their moral courage, even though we may not know them intimately.

It was my good fortune to have known CHESTER C. BOLTON for many years. In 1922 we were both elected to membership in the Ohio Senate. Our service and association there was cordial and agreeable. It was there that we formed a friendship that became more complete and sincere as time went on. When he came to Congress I had already been here a number of years, and I was glad to welcome him. His former service as a legislator in the Ohio Senate equipped him for the work in Congress, and he fitted into that work with great readiness.

There are not many precise and mandatory requirements on one's service in Congress. A Member may follow his own natural inclinations in most cases and permit them to guide him and dictate to him if he chooses. He may shirk the work and responsibility, if he so desires, or he may find an abundant opportunity to put his energy and ability and his desire to serve honestly to a complete test. The duties of a Member of Congress give full opportunity for the most capable to exert his capabilities to the limit and they will give the most brilliant Member ample opportunity to flash his brilliance. Yet the mediocre need not falter for by industry and honest effort he, too, has a chance to serve honorably and acceptably.

CHESTER C. BOLTON was naturally industrious. He was practical and sensible. He was a capable executive and a man of large affairs and a man with wide and varying experiences. He was especially well informed on financial questions. Not all of his associates were as well equipped as was he by temperament and training to cope with the problems of national finance. His colleagues always gave great weight to his opinion on such questions.

His cordial personality plus his industry and good common sense made him a valuable and popular Member of Congress. His colleagues trusted him and his constituents recognized in him all the elements of a faithful and competent public servant.

His untimely passing was a shock to his many friends in Congress and all over the country. He was a national figure and his death was a matter of national concern.

He was well equipped to render useful and efficient public service. Fortified with a forceful personality and with the best possible preparation by way of education and experience, he was especially well equipped to render public service. Although he represented a very large district, both in population and in business activities, he had been able, because of his superior qualifications, to render very conspicuous service for his district. His constituents rewarded him with reelection on many occasions and he died in the midst of his many efforts to give to his constituents faithful service and to give to his country his loyalty and devotion. It was of men such as CHESTER C. BOLTON that the poet spoke when he said:

> Men whom the lust of office does not kill;
> Men whom the spoils of office cannot buy;
> Men who possess opinions and a will;
> Men who have honor; men who will not lie.

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. GEORGE A. DONDERO
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. DONDERO. Mr. Speaker, on December 12, 1939, the Great Architect of the Universe removed from our midst a wise man, a noble and lovable friend, and a revered colleague, Hon. CARL E. MAPES, of Grand Rapids, Mich.

When I was first elected to Congress in 1932, prominent men and women in my congressional district, as a parting word of advice, counseled me to lend an attentive ear and hold a receptive mind to the sound judgment, wise leadership, and acknowledged statesmanship of CARL E. MAPES. He was one of Michigan's great and best-known men. To him I went often as a son to an exalted father to drink from his cup of caution and moderation. He always found time to bestow upon others the wisdom of his experienced mind.

He was a national figure, and the Nation, as well as his State of Michigan, lost a loyal and stanch defender of the American system of government. When he went down, like a lordly pine against the sky, he left a vacant place in the councils of the Nation that will not soon be filled.

Endowed with great ability, he was faithful to his trust and always at his post of duty. He was a man of whom no one could say evil. Possessed of sterling character, exemplary habits, and a quiet, unassuming genial nature, he stood like a giant among men, young and old, as an influence for the higher and nobler things of life.

He was a conscientious student, a hard worker, and was careful and painstaking in the consideration of legislation. The welfare of his country came first and his political welfare last in the discharge of his duties as a legislator and a man. He searched for the truth and merit of each proposal. His patience with everyone was a virtue. His love of good humor made him beloved and respected by all.

He left this world as he had lived—sustained by an unfaltering trust. He was a devout Christian gentleman. He left behind the heritage of a spotless name. No greater legacy can be bequeathed to anyone.

His district lost a faithful servant when he crossed the great divide, his State a stalwart son, his country a sublime patriot.

His splendid example and his untarnished manhood will live with the years. The memory of CARL E. MAPES will remain with me while life lasts, for to me he was an example and an inspiration.

He has answered the last roll call. All who breath will share his destiny. His State and Nation were made better by his life and deeds.

My colleagues, if we follow the example set for us by our noble friend who has gone, he will not have lived in vain.

Edward Walter Curley

MEMORIAL ADDRESS
OF
HON. JAMES M. FITZPATRICK
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. EDWARD WALTER CURLEY, late a Representative from the State of New York

Mr. FITZPATRICK. Mr. Speaker, my friend and colleague, Hon. EDWARD W. CURLEY, has answered his last roll call on this earth. However, to his friends and aquaintances his memory still remains.

I served with EDDIE CURLEY on the Board of Aldermen in New York City for many years before coming to Congress. It was a pleasure to be associated with him again when he was elected to the Seventy-fourth Congress. His primary ambition was to serve well the people. Long hours of toil meant nothing to him in his desire to render aid not only to the constituents of his congressional district but to all the people throughout the country.

To his friends and colleagues he was known as "EDDIE" CURLEY.

Bert Lord

MEMORIAL ADDRESS
OF
HON. EDWIN A. HALL
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. BERT LORD, late a Representative from the State of New York

Mr. EDWIN A. HALL. Mr. Speaker, today, among others, we are honoring the memory of the late Hon. BERT LORD. As his successor, it was not my privilege to have served in this House with him. Therefore I am not enriched as are many of you, by his fellowship, his friendly way, his genuine and kindly nature.

Though I never knew BERT LORD as a colleague, I knew him as thousands of his constituents knew him, as a friend. In traversing the length and breadth of the Thirty-fourth Congressional District, it was my experience to hear his name on every lip. Although comment was frequent, it is with honesty that I say I never heard BERT LORD's name disparaged or maligned.

BERT LORD lived all his life in the district he represented. He started life with hard work and was engaged in the lumbering and mercantile business, to which he applied the qualities best known in him, forthright honesty and integrity. As time went on, a love for public service spurred him on to enter politics, and his friends elected him to the board of supervisors of Chenango County, N. Y., in 1905. Then long years he served that body well, and he received the natural reward of merit by being elevated to the New York State Assembly in 1915. Until 1922 BERT LORD represented his beloved Chenango County as its assemblyman, and from 1924 to 1929. During the 2-year interim he was motor vehicle commissioner of the State of New York, a capacity which he filled with great efficiency.

BERT LORD touched every rung in the ladder to success. His public life consisted of a series of elevations which must surely come to those who serve their fellow men with distinction.

The crowning achievement in this distinguished man's life came in 1935, when he was elected to the Congress of the United States. Surely the people could have chosen no Representative more fitted and more adapted to the task of giving the folks back home the type of representation which they deserved.

Beloved by the farmers of his State, BERT LORD has been called the father of the farm-to-market road program. As a member of the House Roads Committee, I have been privileged to sit with men who had the highest regard for his good sense and careful policies when he served there.

My poor power of expression can add little to the fine remarks to be found in connection with BERT LORD, nor can any words describe the vacancy in this House created by his death. The honor of being his successor is great, and since taking office I have felt that the most effective way I can administer it is to hold aloft the memory of BERT LORD as a shining example to pattern after and to emulate.

Cassius Clay Dowell

MEMORIAL ADDRESS
OF
HON. HENRY O. TALLE
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CASSIUS CLAY DOWELL, late a Representative from the State of Iowa

Mr. TALLE. Mr. Speaker, someone has said:

Life is a short space between two eternities.

Out of the one and into the other runs the relentless race of man.

My friend and colleague CASSIUS C. DOWELL has run his race. To him was given a long span of years, something more than the allotted threescore years and ten. In return he gave to his State and to the Nation the type of service that stamped him a statesman.

Gentle, kindly, cheerful, able, honest, attentive to duty—the virtues of noble manhood characterized his life. Always mindful that "a public office is a public trust," his sterling character never permitted him to waver in the performance of conscientious duty.

I recall his last day in the House. So responsive was he to duty's call that he left a sickbed to cast his final vote. Already his body was racked with the pain of the illness which snuffed out his life. His shoulders drooped a bit that day as he walked from the Chamber. Time and toil had left their mark on a once robust and vigorous body. But he was determined, as Kipling says of a real man—

> To fill the unforgiving minute
> With sixty seconds' worth of distance run.

Not many days thereafter he returned to the rolling prairies of Iowa where he was born and grew to manhood, where his long and distinguished public service began, and where loving friends and neighbors gathered to do him honor as his mortal remains were laid away in their final resting place.

And so we pause today to pay tribute to a gentleman who served his country well. The fruits of his labors are not interred with his bones. They live on. Peace be to his ashes!

Cassius Clay Dowell

MEMORIAL ADDRESS
OF
HON. JOHN W. GWYNNE
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CASSIUS CLAY DOWELL, late a Representative from the State of Iowa

Mr. GWYNNE. Mr. Speaker, in the death of the Honorable CASSIUS C. DOWELL, Iowa and the Nation lost a Representative in Congress of wide experience and great understanding. Mr. DOWELL'S many years both in the State legislature and in the House of Representatives gave him a great knowledge of the practical side of lawmaking. He was regarded by his colleagues as an outstanding authority on the rules of procedure. He was chairman of the important Committee on Roads and helped to draft much of the present law under which highways are built throughout the Nation.

During his years of service Mr. DOWELL made a host of friends both in and out of Congress. He regarded their problems as his. Many a citizen in his district can testify to acts of kindness by him. A conspicuous feature of Mr. DOWELL'S service was his regular attendance at the sessions. It was indeed a rare occasion that did not find him in his accustomed place. Even in his last illness he insisted on remaining at his post to the detriment of his health.

It was indeed a privilege to have known and for a brief time to have worked with him.

Thomas Sanders McMillan

MEMORIAL ADDRESS
OF
HON. WILLIAM M. COLMER
OF MISSISSIPPI
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. THOMAS SANDERS MCMILLAN, late a Representative from the State of South Carolina

Mr. COLMER. Mr. Speaker, we pause today in the turbulency of this modern day of congressional procedure to pay our meed of tribute to the memory of those of our colleagues who have gone from our midst into the Great Beyond. It is my purpose to briefly attempt a tribute to that outstanding friend of yours and mine, lately a Member of this House, the Honorable THOMAS SANDERS MCMILLAN.

Mr. Speaker, one of the compensations that we enjoy as Members of this great body is the opportunity for association with some of the Nation's most splendid characters. I believe that the character of a congressional district is indicated by the type of Representatives the district sends to this body. That assumption is indicative of the fact that the First District of South Carolina is composed of a most intelligent and splendid citizenship. Certainly this is borne out by the fact that TOM MCMILLAN represented that district for 14 years in the Congress. Certainly it is safe to assume that had he not been stricken to an untimely death in the very pride and prime of his manhood he could have continued to represent this splendid constituency in the American Congress for many more years to come.

But if our late friend Tommy enjoyed the confidence and respect of his constituency in his beloved State of South Carolina, the situation was not different in this body. I sincerely believe that if a secret poll had been held in the nature of a popularity contest among the 435 Members of this House that the name of TOMMY MCMILLAN, like that of Abou Ben Adam, would have led all of the rest. Kind, gentle, unselfishly thoughtful of all of his colleagues, he enjoyed the confidence and respect of the membership of this body to the highest degree.

While no Representative in the Congress was more zealous of the welfare of his own constituency, and while few, if any, Members of this House succeeded in doing more for their constituency, TOMMY MCMILLAN was nevertheless a statesman in the truest sense. A man of strong convictions and splendid patriotism, he recognized no partisan lines when the fundamental questions involving the welfare of his country arose. Possessed of the rare combination of the virtues of sincerity, industry, zeal, a friendly nature, and abounding faith in our republican form of government, he came as near to qualifying as the ideal Representative as any man whom it has been my pleasure to know in the time I have had the pleasure of serving in this body of outstanding men.

As one who prides himself as having enjoyed the wealth of his warm friendship and close personal confidence, I would that words were adequate to express my infinite appreciation of this noble son whom the great State of South Carolina contributed to the Nation's welfare. As one who enjoyed this relation, who had the opportunity as a result thereof to sound the depths of his innermost thoughts, to observe him in his public and private life, who recognized his unbounded devotion to his splendid family whom he loved better than his own life, I am happy, Mr. Speaker, to add this my humble tribute to a friend whose life has so vastly enriched my own.

TOMMY MCMILLAN'S untimely passing is a profound loss to his stalwart sons, his splendid wife, to this House, and to everyone who knew him. Yet we find solace in the memory of his useful life and his contribution to the welfare of the Nation, all of which will remain as a fine source of inspiration.

Were a star quenched on high,
For ages would its light,
Still traveling downward from the sky
Shine on our mortal sight.
So when a good man dies;
For years beyond our ken,
The light he leaves behind him lies
Along the paths of men.

Wallace Edgar Pierce

MEMORIAL ADDRESS
OF
HON. RAYMOND S. SPRINGER
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. WALLACE EDGAR PIERCE, late a Representative from the State of New York

Mr. SPRINGER. Mr. Speaker, it is with a keen sense of a great personal loss that I rise to add my humble tribute to the life and character of my devoted friend, the late WALLACE E. PIERCE, of New York. I am happy to have extended to me the very high privilege of bearing witness to the very high esteem and the deep and abiding affection with which our colleague of former days was held by the Members of the House of Representatives, and with that treasured memory I speak these few words of my colleague who was a good citizen, a great patriot, a constant humanitarian, an outstanding statesman, and a fine and loyal friend.

Representative WALLACE E. PIERCE was a native of the great State of New York. He loved the entire area of that Commonwealth. The people were his friends, and he was the friend of the people. There he enjoyed the pleasantries of youth, the institutions of learning, and as a young and progressive lawyer he met the privations and hardships incident to his early practice; thus he became deep-rooted in

his great affection for those about him. The people of his State quickly learned that he was a stanch and loyal friend in whom was reposed the choicest ideals of life.

Our acquaintance began when we were assigned to the Judiciary Committee in the House of Representatives in January 1939. In our very close association thereafter I came to recognize in him those rare qualities which directly appeal to men. I knew him in the intimacies of those close contacts which are forever reserved by each one of us for but a few. I knew him in the stress of great turmoil when the multitudinous worries incident to the deliberation on weighty questions of state were at hand; I knew him, too, in the solemn meditations of sadness—when the heart bleeds and the somber voice pleads for rest and solace; I knew him when he voiced his meditations and sound logic respecting the future of his country—the land he loved and the form of government he professed with unerring devotion. He was as kindly as he was brave. Thus I knew WALLACE E. PIERCE, my friend in the days gone by.

My fine friend, whose memory I will long cherish, lived as he died—and he died as he lived—with the weight of livid problems of the people before him. He was at his post of duty when the silent summons came; he was unafraid; he silently stole away from his colleagues and his labors, in the Chamber of the House of Representatives, and calmly wrapped the draperies of his couch about him, in the Nation's Capitol, and laid down as if to peaceful, happy dreams.

Thus his life work was ended. The brilliant career of a brilliant man was thus terminated.

WALLACE E. PIERCE needs no encomium. His life and his living of it stand before us in beauty and in splendor. My tribute to him I give in the words which were spoken of a great hero—in the days gone by—"This was a man."

John Andrew Martin

MEMORIAL ADDRESS

OF

HON. EDWARD T. TAYLOR

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 24, 1940

On the life, character, and public service of Hon. JOHN ANDREW MARTIN, late a Representative from the State of Colorado

Mr. TAYLOR. Mr. Speaker, JOHN ANDREW MARTIN, lawyer, soldier, faithful public servant, loyal son of Colorado, comrade, and friend, has drifted from the lofty mountains of his beloved centennial State to an infinite horizon of eternity beyond our view. The simple, yet inspiring, story of his life is his highest eulogy. In reflecting over it we are able to glimpse into a human heart and perceive the character of a man whose memory will be cherished forever by his legion of friends. Our departed friend would be proud to know that his name is engraved upon the annals of Colorado's history as a typically great pioneer of the West. Yet, prouder by far would he be to know that his memory is indelibly carved in the hearts of all his friends. Thus, "To live in hearts we leave behind is not to die."

JOHN MARTIN was not born to a life of ease. Rather, he was an outstanding example of one who was not subjugated to or daunted by obstacles—he surmounted them with determination. Born in Cincinnati, Ohio, April 10, 1868, he spent his boyhood days in the Middle West and received a primary education in the public schools of Mexico and Fulton, Mo. At the age of 12 he was obliged to leave school to work in a tobacco factory. After several years of farming in Kansas, he moved to Colorado, where he commenced working on a railroad. There he learned of the struggles and hardships confronting the laboring class, and, inspired by an earnest desire to improve their lot, he dedicated his life to this purpose. He was always proud of his close affiliation with the railroad industry. Beginning as a track layer, he worked up to locomotive fireman, his warm, human heart thrilling with joy and teeming with pride as he fired the engine for the first time as it rolled into the capital city of Denver.

Mr. MARTIN was married in 1892 to Miss Rosa May Chitwood, and of this union was born one daughter, Mrs. Gordon Spencer. From that day until his untimely death his wife was not only an admirable helpmate—she was a wonderful balance wheel and inspiration, and as constant and devoted a guardian angel as any man ever had. She saved and prolonged his life many years, and, like countless millions of other wives, she deserves a very large share of the appreciation and distinction her husband received. In 1908 he wrote The Jayhawker, a novel depicting the "dawn life of the prairie West and its people," based on the life of his wife's parents who were pioneer settlers in Kansas.

In 1895 to 1896, Mr. MARTIN published a weekly newspaper in La Junta, Colo., and during that same period served as a member of the city council of that city. He studied law diligently and was admitted to the bar in 1896. A year later he began practicing in Pueblo. He was elected State representative in 1901 and served as city attorney for Pueblo in 1905 and 1906.

During the World War, Mr. MARTIN recruited a volunteer battalion, in which he enlisted as a private, and later was commissioned a major, serving as commanding officer of the One Hundred and Fifteenth Supply Train, Fortieth Division. He has always been proud of his war record, and in Congress has faithfully represented the wishes of his veteran constituency. He served as post commander of the Pueblo Post, No. 2, American Legion, and was also a member of the San Isabel Chapter, No. 2, Disabled American Veterans of the World War.

Step by step, this self-made, self-educated man, rising from humble beginnings, attained honor upon honor until he reached the distinction of becoming a Member of the House of Representatives. It was a long and hard climb for a poor boy to work from a section hand on a railroad in the barren Dust Bowl of the West to 11 years of distinguished service in Congress. He and I were intimate friends for 40 years. We served together in the State legislature. We were both nominated for Congress the first time at the Pueblo convention in the fall of 1908. He was nominated for the Second Congressional District, which at that time included about three-fourths of the State, and I was nominated as Congressman-at-Large. We were together during most of the campaign. We were both elected and entered Congress on March 4, 1909, the day President Theodore Roosevelt retired and President Taft was inaugurated. He served during the Sixty-first and Sixty-second Congresses, from 1909 to 1913, and then retired voluntarily. He was again elected to the Seventy-third Congress, after a lapse of 20 years from his previous service, and served through each succeeding Congress until his death. It has been my rare and great privilege and pleasure to work by his side during his entire service in the House of Representatives.

Colorado never had a more loyal son. He was always an earnest, conscientious, hard-working Representative who had ever uppermost in his mind the welfare of his district, his State, and his Nation. Above all, he toiled incessantly for the common laborer, the underprivileged. His deep, inherent understanding of the needs of the working class qualified him to very effectively present to Congress his first-hand knowledge of these conditions in working out labor legislation. Always a champion of the laborer, he was an extremely useful member of the subcommittee that worked out the Railroad Retirement Act of 1935 and subsequently the Railroad Unemployment Insurance Act. As a member of the House Interstate and Foreign Commerce Committee he helped frame the administration's holding-company legislation and the Civil Aeronautics Authority Act. He was also a member of the subcommittee which drafted the Rural Electrification Act.

JOHN MARTIN has said that if there was one thing he would like people to say of his service in Congress, it was "He

worked." All who knew him must attest to his unceasing efforts actually night and day, in or out of session, all the time. In fact, the immediate cause of his fatal illness was the call of duty which impelled him to make an arduous, man-killing tour of his entire district to learn its conditions and needs from long and heartbreaking unemployment and drought.

He worked on unemployment from the day he took his seat in Congress to the very day he was taken ill. This did not mean simply participating in a legislative way in the support of work relief and public-works programs. It meant going to bat with emergency agencies in Washington week after week in order to answer desperate telegrams from depression-stricken counties which were seeking larger quotas of W. P. A. workers or approval of new and needed projects.

He worked on the drought situation from that blazing hot summer of 1934 on, personally going into every county and making first-hand inspections, doing so under the blistering heat of the sun and wearing out those who attempted to keep up the pace with him. He succeeded in getting those counties designated under the emergency drought program in order that they could qualify for emergency help given by the Federal Government.

He very earnestly and constantly worked with all the various departments, bureaus, and agencies of the Government in behalf of the welfare of his constituents. Today, the Third Congressional District has scores of splendid reminders which stand as monuments to his efforts—C. C. C. improvement and conservation projects, many large P. W. A. and W. P. A. projects, too numerous to enumerate individually.

> The longer on this earth we live
> And weigh the various qualities of men,
> Seeing how most are fugitive—
> The more we feel the high, stern-featured beauty
> Of plain devotedness to duty,
> Steadfast and still, nor paid with mortal praise,
> But finding amplest recompense,
> For life's ungarlanded expense,
> In work done squarely and unwasted days.

The customary limitations of this occasion prevent my humble tribute to a grand soul and a very dear friend from giving any extended résumé of JOHN MARTIN'S infinite variety of services to his constituents in particular and to Colorado and the West in general. I hope someone will compile a suitable review of his life work. It would be a marvelously fine and just tribute to his memory. I think his greatest single work, for which he will be longest remembered and which is now to be realized only after 6 years of persistent and never-ceasing effort on his part is the Caddoa Dam, which will impound and control the gigantic floods and stabilize the flow of the Arkansas River below the dam, thereby enabling the people up the stream in the entire valley in Colorado to use a vast additional amount of vitally needed water for irrigation throughout the dry season. That project will be one of the outstanding great developments in the history of our State, by which tens of thousands of people will be benefited for generations to come. I will not go into the lengthy details concerning the enormous amount of work that he did to bring about that construction. While many others deserve due appreciation, yet I say with all the earnestness and emphasis I have—and I am confident I know whereof I speak—that without the efforts of JOHN MARTIN that project would not be in existence today. As a truly just recognition of his unceasing service, extending over 6 years, that entire project should be officially named the Martin Dam. It does seem to me that by all the instincts of common justice and fair treatment, JOHN MARTIN'S long years of constant, persistent, never-tiring work and successful accomplishment of that gigantic undertaking most richly and rightfully deserve that public and permanent expression of appreciation and gratitude. The history of our Nation and of every State is greatly enriched by such preservation of the names of men who have honored their positions and achieved great accomplishments for the public welfare. Such actions are a perpetual inspiration to the youth of our country.

JOHN MARTIN was intensely American in ideals and point of view. He visited every State in the Union and also visited many of our insular and territorial possessions, including Puerto Rico, Alaska, Hawaii, and Panama. He loved this land of ours with every pulse and fiber within him. His Americanism fired him to make most forceful and eloquent speeches upholding the doctrines and principles upon which our democratic Government was founded. Speaking of subversive influences within this country, he said, in a stirring and patriotic speech on March 3, 1939:

> Apparently the time is at hand when Congress must take cognizance of the growing menace of these subversive activities and pass suitable legislation to deal with them. * * * We want no secret armies in this country, no foreign military uniforms, no alien flag floating above the stars and stripes, no racial group fomenting strife against any other racial group.

Always he was a courageous foe of anti-American doctrines. He was a valiant fighter for whatever he believed to be right, and his was an unswerving idea of right. Of him can truthfully be said:

> Statesman, yet a friend of truth. Of soul sincere,
> In action faithful, and in honor clear;
> Who broke no promise, served no private ends.

JOHN MARTIN sang always of the marvels of Colorado—its grandeur, its beauty, its breath-taking immensity, and its colorful history. In a recent toast to Colorado, he said:

> I propose a toast to Colorado. Its people: How can they fail to measure up to its immensity, its scenery, its history, and its resources? They are of the pioneer type, the people who settled, conquered, and developed this great domain, unearthing its mineral riches, and with infinite pains building the water systems which produce its agricultural wealth and maintain its towns and cities. They have subdued a stern and rugged nature. They have built a Colorado worthy of the eminence given it by its location in the heart of the Nation and at the top of the world.

Truly the sublimity of the mountains and the glories of a great and beautiful State mingled and entered into the character of this great soul. JOHN MARTIN has fully measured up to everything that Colorado typifies.

It is impossible to fill the place left vacant by friends who have entered the dawn of death. Content are we compelled to be with the wealth of elevated thought and human deeds they accomplished. From the earliest days of JOHN MARTIN'S life he stood for a purpose—that of bettering the life of underprivileged humanity. He played the game of life frankly and on the level. He had the priceless heritage of all the ages—a good name. He knew that he was going this way only once. Because he was true to himself, he was faithful to every trust. His sound philosophy is appropriately expressed in the following creed by Edgar A. Guest. This was JOHN MARTIN'S favorite creed—one which he believed firmly and followed unwaveringly.

MYSELF

> I have to live with myself, and so
> I want to be fit for myself to know,
> I want to be able, as days go by,
> Always to look myself straight in the eye;
> I don't want to stand, with the setting sun,
> And hate myself for things I have done.
>
> I don't want to keep on a closet shelf
> A lot of secrets about myself,
> And fool myself, as I come and go,
> Into thinking that nobody else will know
> The kind of a man I really am;
> I don't want to dress up myself in sham.
> I want to go out with my head erect,
> I want to deserve all men's respect;
> But here in the struggle for fame and pelf
> I want to be able to like myself.
> I don't want to look at myself and know
> That I'm bluster and bluff and empty show.
>
> I can never hide myself from me;
> I see what others may never see;
> I know what others may never know,
> I never can fool myself, and so,
> Whatever happens, I want to be
> Self-respecting and conscience-free.

In eulogizing the memory of Joseph W. Byrns, the great unforgettable, and lovable Speaker of the House of Representatives, JOHN MARTIN said:

> At the end of his famous lecture, Elbert Hubbard used to close with the words, "And be kind; and be kind." Joe Byrns was kind.

JOHN MARTIN, too, was kind. He was a friend of all who knew him. He was never too busy to be courteous and was a favorite with the people in all walks of life. He was just naturally big-hearted. His honesty, simplicity, ruggedness, and stainless character are priceless heirlooms.

During the last few months of his life JOHN MARTIN had reached a decision to retire from Congress at the end of his present term. His cherished dream was to return to his beloved State "to live by the side of the road and be a friend to man." It is mysteriously strange how a beautiful dream can be realized—the magnificent preparation to live becoming the magnificent preparation to die. JOHN MARTIN has returned to his beloved State to rest forever beneath its rugged, vigilant peaks, and its peaceful, cloudless sky. No amount of hardships, no obstacles ever daunted his courage. He faced the frontiers of the next world confidently and with the same serene and courageous spirit. He fought a good fight. He kept the faith.

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. CLARENCE J. McLEOD
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. McLEOD. Mr. Speaker, in the untimely death of CARL E. MAPES the Congress, the State of Michigan, the entire country lost a most valuable and beloved statesman. A man who was honest in thought and deed; an able representative of the people; and one who was as industrious as he was able.

We who knew CARL MAPES during his 27 years as a Member of this House loved him for his rugged, steadfast integrity, his deep, quiet temperament, and his unfaltering patriotism.

The legacy which Mr. MAPES left us is a precious one—the more precious because the privilege was ours to know in the intimacy of good fellowship a man whose fineness of character and social sympathy enriched his State and his Nation.

In him we saw no narrow passion of sectionalism, but rather a lifelong determination to interpret the historic forces animating American life, and the will to direct those forces to the real fulfillment of the ideals of a democratic society.

One grand tendency of his life and character was to elevate the public mind. He did this not merely by example. He did it by dealing as he thought—truly and in manly fashion with the public mind. He gained the love of the people, not so much by honeyed phrases as by good counsel, fearless decisions, and service, vera pro gratis. He revealed his true appreciation of the people by submitting sound arguments to their understandings and right motives to their free will.

He came before the people, not with flattery but with wisdom; not with just a vocabulary larded with mere words of humanity, philanthropy, and brotherhood, but with an educational and progressive system of government which would make them prosperous and happy.

What the Greek historians said of Pericles I feel might be said of CARL MAPES:

> He did not so much follow as lead the people, because he framed not his words to please them, like one who is gaining power by unworthy means, but was able and dared, on the strength of his high character, even to brave their anger by contradicting their will.

I cannot attempt at this time to grasp and sum up the aggregate of the service of his public life. It is needless. This House well remembers his service to his State and to his country. Mr. MAPES devoted almost his entire life to public service. Politics to him was the science of good government; never the means to a selfish or unpatriotic end.

Coming to Washington with the convening of the Sixty-third Congress, CARL MAPES, through his earnestness and excellent mind, soon drew the attention of House leaders. As chairman of the District Committee, he served ably in reorganizing the Capital city's administration and its laws.

As a parliamentarian of the highest rank, he became indispensable in the floor leadership of successive administrations.

Mr. MAPES was a strong believer in party government, but never allowed party lines to make him subservient to his own ideals of good government. He campaigned vigorously at every election, but no fear of personal fortune ever warped his words.

We who shared his last days under the dome of this great Capitol witnessed time after time the manifestations of his faith, which was his treasured heritage as an American; faith in the logic and enduring quality of democracy; faith in his fellow men, and in the supremacy of the spiritual force; faith in the essentially democratic ideal of the right of men everywhere to determine the conduct of their own affairs.

Congressman MAPES loved his country with all the ardor of a real American. He was unsparing of himself in the performance of his duties. At the time of his death, the dean of the Michigan delegation was on duty in the city of New Orleans as a member of a subcommittee of the House Committee on Interstate and Foreign Commerce. It was there, on the 12th day of December, that he passed into the realm of eternal mystery. The author of Proverbs says:

> Seest thou a man diligent in his work? He shall stand before kings.

CARL E. MAPES stood before kings and paupers, the mighty and the weak, and in turn received their respect and admiration.

The life and achievements of this man to whom we pay solemn tribute today may well serve as an object lesson to the whole world as to the possibilities of development and accomplishment in a free, democratic country.

No greater portrayal of tribute so catches this man's greatness as the drawing by Frank Williams, which appeared in the Grand Rapids Press of December 14, 1939, titled "There, son, was a real American."

In the passing of CARL E. MAPES, I lost a great friend whose memory will linger long. For me his association was an example and an inspiration. No longer can I meet him in the performance of my daily work, but I can and do remember his handclasp, his sincere manner, his quiet assurance. From these fond memories I receive the sweet, undefinable warmth of fellowship that may only pass between true friends.

Truly it may be said of CARL E. MAPES:

> He is not dead but sleeps;
> Such souls forever live.

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. EARL C. MICHENER
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. MICHENER. Mr. Speaker, I rise to pay my tribute of honor and respect to our late colleague, CARL E. MAPES. No, that is not exactly what I want to say. CARL MAPES was more than a colleague to me. He was my friend in all

that that term implies. Therefore, I must add to the formal statement of honor and respect the terms love and affection, and I mean just that.

When I came to Congress in 1919, Mr. MAPES had served three terms. He was then chairman of the Committee on the District of Columbia and an outstanding Member of the House. As one of the younger Members in service of the Michigan delegation, it was natural that I should gravitate toward him. I sought his advice and counsel on many occasions and soon learned the value of such contact. CARL MAPES never misled. He never camouflaged. He never told one a half-truth. He was candid, frank, sincere, and dependable at all times and on all occasions. Indeed, here was a man.

Mr. MAPES served in the Congress for 27 consecutive years, an honor coming to but comparatively few in the history of the Republic. When one is returned continuously by his constituents for that length of time, it is always interesting to discover the reason. The answer is not difficult to us who knew CARL MAPES down through the years. He had no political organization as such. The Fifth Congressional District of Michigan trusted him, and that is the answer. It trusted him because he had been tested and not found wanting. The period of his service—from 1913 to 1939—was momentous in the history of our country. He was called upon to vote on the question as to whether or not this country should enter the World War. He considered this the most difficult vote of his career. He did not waver. He did that which he believed at the time to be for the best interest of his country. Then, as a Member of the Congress, he passed through the trying days of the World War and the reconstruction period of the twenties. As a legislator, he know what war meant. He helped establish our wonderful veterans' facilities. He helped to provide care for those who bore the scars of battle, and for their dependents. He was an indefatigable worker and was of much assistance in bringing the country back to normal. All this took its toll, yet CARL MAPES never complained. He saw his country reach the height of its prosperity and then, as in the twinkling of an eye, he saw this same country, and the world in general, plunged into the depths of the greatest depression ever known. He labored conscientiously and long, and cooperated in every way, in an effort to bring back the prosperity that seems to have left us.

These were trying days, and the courage, the fearlessness, and the sound judgment of our departed friend were of inestimable value to the people of his country. He was a stabilizing influence in his home city, in his home State, in the Congress, and throughout the country. He was always dependable. There was no artificiality about him. His people soon learned this, and even though some of them did not always agree with his votes in the Congress, yet they recognized the fact that every vote CARL MAPES cast was the honest, conscientious vote of a sincere man.

Possibly no Member of the House was less amenable to pressure groups. CARL MAPES was a stranger to the thought of personal aggrandizement. He demonstrated clearly that a Member of Congress can vote his judgment, become a leader in political life, and yet never yield to what is commonly known as political expediency. His friends and neighbors knew him for what he was—a man who lived a clean and honorable life. one whose home and family came first in his affection, one who was always genial, always kind, one who never made enemies and who kept his friends. In short, he was genuine.

CARL MAPES was not spectacular. He maintained no publicity bureau. He hired no build-up writers. His record was built on service. The most trivial request from a constituent received meticulous attention. Among his constituents he maintained a reputation for careful efficiency. Not a detail was overlooked. He ofttimes remarked that it was not the speeches a Member made on the floor of the House nor the number of times his name appeared in the newspaper that kept a Representative in Congress, but rather it was the record on the roll call. It was the manner in which the job was done. He considered himself the hired man of his constituency, and believed in traditional representative government. His office was always open to receive counsel and advice; yet it was CARL MAPES who reached the conclusion after the evidence was all in, and no one could divert him from the conclusion which in his own mind he thought was right and just.

His position in this body was unique. There was no better parliamentarian among us, and no Member was better known. Although he was slow to reach a conclusion, and immovable when he had reached it, yet with it all he was tolerant and never gave offense. As dean of the Michigan delegation, as Michigan's Representative on the Committee on Committees, as the ranking member on the Committee on Interstate and Foreign Commerce, and the ranking member on the Rules Committee, in addition to acting as assistant minority leader, his sphere of influence in the Congress was greater than that of most Members. His place will not only be difficult to fill—it will not be filled. When the news of his sudden passing reached the Congress all were genuinely shocked and grieved. CARL MAPES is gone, but the memory of this splendid public servant will linger with us long.

Chester Castle Bolton

MEMORIAL ADDRESS
OF
HON. CLARENCE J. BROWN
OF OHIO
IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 24, 1940

On the life, character, and public service of Hon. CHESTER CASTLE BOLTON, late a Representative from the State of Ohio

Mr. BROWN of Ohio. Mr. Speaker, it is an honor and a privilege to take part in this memorial service and to pay tribute to the memory of one of our departed colleagues, CHESTER C. BOLTON.

Ohio has mothered many illustrious sons. None have been more able or more conscientious servants of the people than was CHESTER BOLTON.

I knew him for 25 years. Watching his career develop, I saw him as a young man, actively interested in the welfare of his city and his county. His ability, his honesty of purpose, his high sense of duty, and his exceptional intelligence brought quick recognition from his neighbors, and he was chosen to represent his district in the Senate of Ohio. There his great talents for service and leadership were quickly recognized and his party selected him as majority floor leader. He served with distinction and honor to himself, and to the great benefit of all the people of Ohio. His splendid record in State service shall endure as long as the government of Ohio lives.

Again the office sought the man. CHESTER BOLTON was elected to the Congress of the United States to represent one of the largest districts in the entire country—the Twenty-second of Ohio—with more than 600,000 population. CHESTER BOLTON'S great contribution to his country as a Member of Congress needs no comment from any man. It speaks for itself. Throughout his years of congressional service the common good was always uppermost in his mind. Quietly, efficiently, loyally, he gave of himself that his beloved country might be bettered. During the last months of his life, those of us who worked with him, knowing that he was not well, urged him not to give so much of his energy and his strength to the national problems that confronted the Congress. Loyal to his trust, he carried on until his bodily strength was gone and death was upon him. Surely no patriot could give more.

CHESTER BOLTON was truly a man. Gentle and gentlemanly always, he had the courage of his convictions and bravely maintained the ideals in which he believed and for which he fought and died. Ohio gave him to the Nation. He gave his all to his country. America is better for his having lived.

Bert Lord

MEMORIAL ADDRESS
OF
HON. FRANCIS D. CULKIN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. BERT LORD, late a Representative from the State of New York

Mr. CULKIN. Mr. Speaker, the death of BERT LORD, Congressman from the Thirty-fourth District of New York on May 24, 1939, was a distinct loss to the public service, both State and National. Congressman LORD was a trained public servant, having been a member of the New York State Assembly and New York State Senate for more than 18 years. His record in the State service was outstanding and distinguished. He came to Washington as a Member of the House in the Seventy-fourth Congress and served in that capacity to the day of his death. No man in the House of Representatives knew the desires and ideals of the American people better than Congressman LORD, and his public service was a lifetime devotion to basic American principles.

The Congress has lost a distinguished, conscientious, and hard-working Member and the Members of the New York State delegation deprived of his counsel and advice, have suffered a great loss. Peace be to his ashes.

William Albert Ashbrook

MEMORIAL ADDRESS
OF
HON. ROBERT CROSSER
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. WILLIAM ALBERT ASHBROOK, late a Representative from the State of Ohio

Mr. CROSSER. Mr. Speaker, our late distinguished colleague, WILLIAM A. ASHBROOK, was a Member of the House of Representatives when I first came to the House on March 4, 1913. He had already served two terms and was beginning his third when I began my service in the House. He had been a member of the General Assembly of Ohio before coming to the United States House of Representatives, and had made his mark during the time he had served in the State assembly.

Mr. ASHBROOK was exceedingly active, energetic, and industrious. I hardly remember him when he did not seem to be on the alert, and exceedingly attentive to the duties that commanded his attention at any moment.

Mr. ASHBROOK was unusually successful in a business way and succeeded in every line of work which he chose to undertake. He was a successful publisher. He was a banker who always commanded the confidence of his community to the highest degree. He was extensively engaged in farming, and was very successful and progressive in that field of human endeavor.

Mr. ASHBROOK was a man of sound judgment, was never an extremist, but neither was he static in his attitude. He was astute but scorned to take an unfair advantage of rivals or those opposed to him. In other words, he was eminently fair in his conduct with his fellow man.

Mr. ASHBROOK was elected 10 times to the House of Representatives, being first a Member of the Sixtieth Congress. He served 7 terms in succession after his first election. He was defeated in 1920 and was out of Congress until the Seventy-fourth Congress, when he was reelected, and elected to the Seventy-fifth and Seventy-sixth Congresses.

From the beginning of his service until his death, therefore, he covered a period of 33 years, although during 8 years of that time he was not a Member of the House.

As with his own private affairs, so with public affairs, Mr. ASHBROOK devoted himself intensely to his tasks and never seemed to think to spare himself. Night after night, he could be found at his office in Washington, pouring over his work. In his exchange of views with his fellow men he was direct but never offensive and abrupt. He was independent in his action when he thought such course necessary or to the public interest. He was intense in his opposition to what he believed was unsound public policy and necessarily harmful to the public interest. Frequently his friends would urge him to be more tactful in stating his opposition under such circumstances, but Mr. ASHBROOK felt that his duty required him to be outspoken and unequivocal in making known his attitude.

His district, the State of Ohio, and his country have reason to be glad that WILLIAM A. ASHBROOK served, and served so long as a Member of the House of Representatives.

Emmett Marshall Owen

MEMORIAL ADDRESS
OF
HON. CLIFFORD R. HOPE
OF KANSAS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. EMMETT MARSHALL OWEN, late a Representative from the State of Georgia

Mr. HOPE. Mr. Speaker, I count it a privilege to have had the opportunity in serving in the House and on the Committee of Agriculture with EMMETT MARSHALL OWEN.

In my life I have met few men who were more kindly, unassuming, and modest than he. Coming to Congress after many years of public service in his own State, Mr. OWEN impressed all with whom he became acquainted with his sincerity, his high character, and genial disposition.

Keenly interested in the problems of agriculture, Mr. OWEN served on that committee with ability and distinction. He understood thoroughly and sympathetically the great problems confronting agriculture. Yet, though sympathetic, he never let that quality overcome his good judgment and sound common sense. He was a most valuable member of the committee in every way.

In his passing this Congress lost an able Member and I a friend.

Thomas Sanders McMillan

MEMORIAL ADDRESS
OF
HON. JAMES P. RICHARDS
OF SOUTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. THOMAS SANDERS MCMILLAN, late a Representative from the State of South Carolina

Mr. RICHARDS. Mr. Speaker, the All Wise Ruler of the Universe has removed from among us one of the finest characters I ever knew. THOMAS SANDERS MCMILLAN was a man truly without guile. As a citizen, legislator, father, husband, and friend, none could be found to criticize him even when he walked among us. Now, in death we gather here to commend in unison these virtues of our departed friend.

Tommie, as we knew him, was born near Ulmers, Allendale County, S. C. Realizing the value of an education, he battled his way through the Orangeburg Collegiate Institute,

taught school at Perry, Aiken County, S. C., won a competitive scholarship from Barnwell County to the University of South Carolina, was graduated from that institution in 1912 with a bachelor of arts degree and in 1913 with bachelor of laws degree. After being admitted to the bar, he began the practice of law in Charleston, S. C.; he served in the State house of representatives from 1915 until 1924, as speaker pro tempore in 1921 and 1922, and as speaker in 1923 and 1924. He was elected to the Sixty-ninth Congress in 1924 and served continuously until the fall of last year when he passed away. He died wrapped up in service to the people of his district, his State, and his Nation, with his boots on. As a subcommittee chairman and leader on the powerful House Appropriations Committee he worked unceasingly for the people of his district and there today may be found many monuments to his influence, ability, and industry. As a legislator he was one of the ablest and best-informed men in the House, and his services here day by day are most sadly missed. His friends were legion, both on the Republican and Democratic side of the House, because partisanship never sank to low levels with him.

While his name in history will mainly rest upon his record here, those of us who were close to him, most of all, like to remember him for his great, kindly, smiling, human qualities. As a friend, Tommie was always ready to hold out the helping hand. His word, once given, was never broken. He never understood deceit and treachery, and therefore was always hesitant to charge anyone with or to believe that anyone could be guilty of these despicable traits. Those who have seen his family life know that, as a father and husband, he fulfilled every duty. The laughter of a child touched him more readily than the voice of a king. His love for his wife and children was a beautiful thing.

He had a deep sense of obligation to his people and his country, not only as a Representative, but also as a private citizen. He believed, with all his heart, in the free institutions of our country and fought with all his might against every open or subversive effort to undermine them. In the discharge of his duties as a citizen and public official, no power could corrupt him and no hand could deter him from what he believed to be his duty. He carried near to his heart "that little spark of celestial fire called conscience."

Tommie, early in life, learned the value of good sportsmanship. As a star baseball player, he reveled in the contest and constantly sought to improve himself, but never through taking unfair advantage. Herein we find the key to his life—a contest to attain better and higher things.

Build thee more stately mansions, O my soul,
As the swift seasons roll!
Leave thy low vaulted past!
And let each new temple,
Nobler than the last,
Shut thee from heaven
With a dome more vast;
Until thou at length art free,
Leaving thine outgrown shell
By life's unresting sea!

May the hand of a merciful providence rest gently upon his dear ones left behind and brush away their tears.

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. FRANCIS D. CULKIN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. CULKIN. Mr. Speaker, the Congress and indeed the entire country was deeply shocked and grieved at the death of the Honorable CARL E. MAPES of the Fifth Congressional District of Michigan. During his long service in Congress he had come to be one of the outstanding leaders on the Republican side of the House. His service was not showy, but was based on a thorough knowledge of the subject matter under discussion. It was probably more effective for that reason.

CARL MAPES, better than any man I have known in Congress, had a thorough knowledge of democratic processes. Better than any man I have known, he could separate the wheat from the chaff and no public clamor could deviate him from the course that he had decided upon. He was little concerned about his own political fortunes, but was ever desirous of doing sound service, not only to his constituency but to all of America.

I wish to stress his great modesty which sometimes caused him to be underrated. Those in the House who served with him know that back of CARL MAPES' modesty was high ability, unceasing industry, and an unyielding devotion to what he believed was for the best interests of the country. The Congress and the country have suffered a great loss in the passing of this fine American.

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. MILTON A. ROMJUE
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. ROMJUE. Mr. Speaker and Members of the House, when I first became a Member of Congress one of the Members who had preceded me here was Hon. CARL E. MAPES, Representative from the State of Michigan. I very early formed an acquaintance with and a warm friendship for him. For a time we were members of the same committee, and during the time I served with him, as a member of the same committee and forever afterward until the hour of his death, I found him to be a perfect gentleman in every respect and a man in whom one could fully place his trust. He was a gentleman of most excellent character and a most faithful Representative of the people of the district which he represented, as well as a trustworthy and most honorable Representative of his Nation's best interest.

It was indeed a pleasure to know intimately and to enjoy the respect and friendship of CARL E. MAPES. He always gave most earnest study and consideration to the legislative matters pending during his time in Congress. While he and I were members of different political parties there was no time at which I ever found him unfair and unreasonable or unwilling to confer and counsel together in regard to that which was deemed to be for the best interest of our country. He always took an active interest in the fundamental principles of his party and was loyal to his beliefs and convictions. He was one of the most kind and considerate men I have ever had the opportunity of serving with in this body and my belief and conviction in regard to him was such that I am sure he was always open-minded and ready to give fair and due consideration concerning any problem or legislative matter with which he was dealing. He was kind, sincere, generous, and honest; and he commanded, I am sure, the respect of all who formed his acquaintance while a Member of this body. He is much missed—his State and the Nation have lost a most faithful Representative. The life he lived and the service he rendered while a Member of this body has made a valuable and lasting impression. It was my privilege to enjoy his very sincere and warm friendship

from my first acquaintance with him, as a Member of this body, to the end of his long and useful service.

His character, service, and life were such as to need no eulogy. Those of us who knew him best and enjoyed a close friendship with him could not add anything in the way of admiration or affection that his life and character did not merit. In his passing I have lost a warm personal friend—one whom I always enjoyed meeting and conferring with. The great State which he represented and the Nation as well, in his passing, has sustained a great loss as he was truly a Representative worthy of the honor which his constituents bestowed upon him. He loved his country and was intensely patriotic, and he came to the end of his earthly life full of honor and much beloved.

I cannot say—I will not say—
That he is dead. He is only away.
With a cheery smile and a wave of the hand
He has wandered into an unknown land
And left us dreaming. How very fair
It needs must be, since he lingers there.
And you—oh! you who wildest yearn
For the oldtime step and glad return—
Think of him faring on, as dear
In the love there, as the love here.

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. ROBERT CROSSER
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. CROSSER. Mr. Speaker, when the news of CARL MAPES' passing was brought to me I was stunned for I had an affection for him which it would be hard to overestimate.

CARL MAPES and I first became Members of Congress on the same day, March 4, 1913. We served on the District of Columbia Committee during my first three terms in Congress. We were associates on the Committee on Interstate and Foreign Commerce of the House of Representatives from December 1923 until the day of Carl's death. It was a joy to work with him, whether in committee or on the floor of the House.

I regarded him as a man of high honor and ability, but more important than that he was conscientious in the extreme, and never in the slightest degree tried to take an unfair advantage of a colleague, nor indeed of anyone else. In order to get his viewpoint or counsel one could unfold to him perplexing problems and puzzles, and in so doing never have the slightest fear that any advantage would be taken by him of such guilelessness. I was always impressed with the fact that earnest devotion to his highest conception of right was the governing force in the life of CARL MAPES. He spurned the course and tactics that would give him reputation for mere cleverness and craft. He had the spiritual insight which enabled him to differentiate between substance and mere sheen. CARL MAPES, therefore, sought satisfaction in doing what he felt would result in good for his fellow man rather than engaging in an acrobatic display of so-called intellectual talent. No man on any of the committees on which I have served had sounder judgment or broader understanding than did Carl. He had great moral courage as well as exceptional mental attainments, and it is therefore not surprising that with such qualities he commanded the true respect of everyone who really knew him.

His services were of incalculable value to the American people, and his passing has been a distinct loss. I miss his kindly presence, and his invariably genial greeting, and no doubt I shall continue to do so. He was often the source of encouragement to me when I felt distressed. I appreciate the opportunity of having known him for so many years, and will always remember his lovable character.

Emmett Marshall Owen

MEMORIAL ADDRESS
OF
HON. ALBERT SIDNEY CAMP
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. EMMETT MARSHALL OWEN, late a Representative from the State of Georgia

Mr. CAMP. Mr. Speaker, the empire State of the South has produced few men who have continued through so long and distinguished a career and maintained a more genuine modesty and simplicity while rendering such yeoman service to his people as did the late EMMETT MARSHALL OWEN, Representative for more than 6 years from the Fourth District of Georgia. No one performed his duties more conscientiously, nor was more devoted to the interest of the citizenship of this Republic than he. His concern over injustice wherever found was not superficial. It was a part of his creed and a part of his soul. The problems of all his constituency, great or small, high or low, were his problems.

His public career is probably unique in the annals of our State. First elected to a public office at the age of 25, he remained a public servant of the people continuously for more than 36 years, never meeting defeat at the polls, and having opposition only a few times. His people trusted him implicitly. No shadow or doubt ever existed as to his ability or sincerity, and his great loving heart, his fine personality, his affable and understanding character made him the ideal public official, and the friend of all classes.

For 24 years he was a prosecuting attorney in the district that sent him to Congress, and his record for the fearless performance of his duty is probably unequaled in his State, yet he made no enemies. Criminals feared him, but they knew him to be as fair as he was relentless in his zeal for the preservation of law and order. He was quiet and retiring by nature, yet he was a master of oratory, and his eloquence was appreciated by the whole State. He did not seek the limelight nor the public eye, and these lines best describe his belief:

I wrote my name upon the sand
And trusted it would stand for aye,
But soon the refluent sea
Had washed my feeble words away.

I carved my name upon the wood,
And after years returned again.
I missed the shadow of the tree
That stretched of old upon the plain.

The solid marble next my name
I gave as a perpetual trust.
An earthquake rent it to its base,
Now it lies o'er laid with dust.

All these had failed; I was perplexed.
I turned and asked myself, What then?
If I would have my name endure,
I'll write it on the hearts of men.

A scion of the best family stock of the Old South, he typified by his lofty character and public service the best ideals of the New South.

EMMETT MARSHALL OWEN was born at Hollonville, in Pike County, Ga., October 19, 1877. He was graduated from Gordon Institute, Barnesville, Ga., in June 1897 and from the University of Georgia in 1900, receiving the A.B. and B.L. degrees. After teaching school 2 years, he entered the practice of law at Zebulon, in Pike County, Ga., in 1902. That same year he was elected to the lower house of the General Assembly of Georgia, and he held public office continuously from that time until his death, as follows:

Member, Georgia House of Representatives, from Pike County, 1902–6; mayor of Zebulon, 1905–7; solicitor, Pike County court, 1906–9; solicitor, city court of Zebulon, 1909–12; solicitor general, Flint judicial circuit, 1913–23; solicitor general, Griffin judicial circuit, 1923–33; Representative in the

Congress of the United States from the Fourth District of Georgia from 1933 to the date of his death, June 21, 1939.

He was a member of the Barnesville Blues, military company of Barnesville, 1896–97, and was a member of the board of trustees of the Sixth District Agricultural and Mechanical School, 1906–8, resigning because of other official duties. He was a lifelong and loyal Democrat and a member of the Baptist Church.

On July 27, 1904, he was married in Greenville, Meriwether County, Ga., to Miss Alma Jones, who was born December 25, 1880, at Carmel, in Meriwether County, Ga., and died January 19, 1928. She was a daughter of John O. Jones (March 1840–November 1903) and Sarah Elizabeth Jones (1844–1925). To this union were born two children, Mary Elizabeth (born June 21, 1905; married Henley Floyd of Atlanta) and Emmett Marshall Owen, Jr. (born July 10, 1907), both of whom survive him.

EMMETT OWEN never faltered in his belief in the triumph of democratic principles, nor in his faith in the character and patriotism of the common people. He loved people for their true character, regardless of their station in life, thinking always, as the poet has expressed:

Howe'er it be it seems to me
'Tis only noble to be good;
Kind hearts are more than coronets
And simple faith than Norman blood.

Truly it may be said of EMMETT MARSHALL OWEN:

He is not dead but sleeps;
Such souls forever live.

George H. Heinke and Wallace E. Pierce

MEMORIAL ADDRESS
OF
HON. GEORGE H. BENDER
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. GEORGE H. HEINKE, late a Representative from the State of Nebraska, and Hon. WALLACE E. PIERCE, late a Representative from the State of New York

Mr. BENDER. Mr. Speaker, the United States House of Representatives has lost two of its most promising first termers in the deaths of GEORGE H. HEINKE, of Nebraska, and WALLACE E. PIERCE, of New York.

Representative HEINKE was born on a farm near Dunbar, Nebr., on July 22, 1888, the son of a pioneer family. He was trained in the Nebraska schools and was graduated from the University of Nebraska in 1907, where he studied law, after working his way through the undergraduate school. For 10 years he practiced law with Judge D. W. Livingston, and in 1919 became prosecuting attorney for Otoe County.

The opportunity for distinction was not slow in coming. He led the battle to rid his county of undesirable elements at every turn, and earned reelection for 12 consecutive years. In 1935, he felt that the time had come for him to retire from public life, and he resumed the private practice of law. But he was not permitted to remain long in retirement.

In the spring of 1938 GEORGE HEINKE attended a Republican meeting at Beatrice, Nebr. Here he was asked to say a few words, and in 5 minutes of speaking he demonstrated the ability which it was his great good fortune to possess. Within a week, the demand that he run for Congress was heard throughout his district. He was nominated and elected in November 1938, but he was not destined to serve out his term. Returning to Washington at the opening of the second session of the Seventy-sixth Congress, he lost his life in an automobile accident.

Equally sudden and shocking was the death of Representative WALLACE E. PIERCE of the Thirty-first District of New York. Congressman PIERCE died a few hours after the conclusion of President Roosevelt's opening remarks at the reconvening of Congress in January 1940.

WALLACE PIERCE was born in Clinton County, N. Y., on December 9, 1881, and lived in the county of his birth all his life. He served in the New York State Legislature from 1917 to 1919, and was a leading member of the bar throughout his career. Always an active Republican, he served as chairman of the Clinton County Republican committee and as a member of the executive committee of the New York State Republican organization. Like Congressman HEINKE, Representative PIERCE was elected to the House of Representatives on November 8, 1938.

The death of these two members of the Republican Party in the United States Congress will leave a deep void in the lives of many of their fellows. Their work was just beginning. Their abilities were already evident. In a day when the Nation has need of strong personalities, the loss of Representatives GEORGE HEINKE and WALLACE PIERCE will not be easily repaired.

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. FRED L. CRAWFORD
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. CRAWFORD. Mr. Speaker, skilled hand of craftsman can never carve in stone a monument to statesmanship capable of representing the ideals portrayed in the life of our late colleague and friend, the Honorable CARL E. MAPES.

His kind of statesmanship was that type to which many aspire but few attain. To this type of statesmanship may we point our sons and daughters with pride and truly say "There was a real American." Statesmanship is not weighed in the miserable vehicle of party labels—fortunately for the Nation. So when CARL MAPES passed away the party label under which he labored vanished and all partisans joined in praise of so noble a character.

But the voice of praise for the service of CARL MAPES in his 27 years as a Member of the United States House of Representatives was not held back until the visitation of death. For years he had been recognized by friend and foe as truly a great man; truly a man who acted according to his conscience, and whose conscience was always clear for action.

CARL MAPES took the hard road to success in the House of Representatives. He took the road paved with hard stones of arduous labor, tiring details, and studious research. Along that road he left real friendships, mutual confidence, and great respect.

Years before I was privileged to join Michigan's delegation in Congress I admired the courageous yet quiet manner in which Representative MAPES went about his duties as a national legislator. It was truly an honor to have him as my dean when I came to Congress, a little more than 5 years ago, and I shall never forget the sound advice frequently tendered me by this great servant of the Nation.

The honor accorded him a year ago when he was listed as one of the most valuable men in the House of Representatives was truly his. He was valuable to his delegation, to his State, to Congress, and to the Nation.

Death's great gavel fell, closing this life's physical work for CARL MAPES at a typical moment in his career—a moment when he was deep in the legislative affairs of the Nation he loved so dearly. Yet even though his voice is stilled, we feel his presence, and that presence will long be felt in this great Hall of Congress.

This House misses his amiable fellowship and inspiration and the Nation misses a distinguished statesman.

Bert Lord

MEMORIAL ADDRESS
OF
HON. EDWIN A. HALL
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. BERT LORD, late a Representative from the State of New York

Mr. EDWIN A. HALL. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following remarks by the Honorable JAMES M. MEAD, United States Senator from New York, in memory of the late Honorable BERT LORD, a distinguished Member of the House of Representatives:

The Nation lost a distinguished legislator in the passing of the Honorable BERT LORD. Those of us who were privileged to know him well will long carry warm memories of his pleasant and lovable personality. His State, his community, and his family will suffer by his absence, for he was a pillar of strength in matters of civic interest, and an affectionate and reliable ally as a friend.

I knew BERT LORD particularly well. I served with him in the New York State Legislature, long before we again became colleagues in the House of Representatives. I learned to respect his wisdom, to admire his courage, and to trust his judgment in many matters.

Born at Afton, N. Y., in Chenango County, he was reared in the peaceful and neighborly environment of New York's southern tier. In his earlier life, he engaged in business and, in 1915, entered the New York State Legislature, where we became acquainted and became fast friends. He served as motor vehicle commissioner for the State of New York, later as member of the Senate of the State of New York and, in 1934, was elevated to the Congress of the United States, where he served until his untimely death.

BERT LORD possessed all of the kindlier human traits. He was the type of man who won friends and kept them. His partisanship was lacking of bitterness and rancor.

Friendly, affable, and neighborly, he built a monument of friends. I grieve the loss of this great man whose exemplary life brought so much cheer and happiness to those associated with him.

Bert Lord

MEMORIAL ADDRESS
OF
HON. CLIFFORD R. HOPE
OF KANSAS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. BERT LORD, late a Representative from the State of New York

Mr. HOPE. Mr. Speaker, it is a privilege on this occasion to have an opportunity to pay a tribute to our late beloved colleague, BERT LORD. Mr. LORD came to Congress after many years of legislative and other public service in the State of New York. No doubt partly because of this experience, BERT LORD early made his mark in Congress as a man who was able and dependable as well as thorough in his study of legislative matters.

He quickly made friends among his colleagues by his genial, courteous manner, and his pleasant personality. It was my pleasure to have this opportunity to become well acquainted with him because of our work together in the Committee on Agriculture. Representing as he did a large rural constituency and being inherently a lover of the land, BERT LORD impressed everyone on the committee with his great interest not only in the economic but the human side of agriculture. He quickly became one of the most valuable members of the committee, regular in his attendance at committee meetings and deeply interested in all legislation pending before the committee. Few men in Congress knew the problems of the dairy farmer better than he. Few Members were more conscientious in representing their constituency and in wholehearted devotion to duty than BERT LORD.

His passing was a great loss to Congress and to the Nation.

Thomas Sanders McMillan

MEMORIAL ADDRESS
OF
HON. LOUIS C. RABAUT
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. THOMAS SANDERS MCMILLAN, late a Representative from the State of South Carolina

Mr. RABAUT. Mr. Speaker, it is with the mixed emotions of joy and sorrow that on this day we pay tribute to our companions who have departed from this life during the past year. Joy, because once we had the pleasure and honor of knowing them; sorrow, because they are no longer with us.

My memories are particularly poignant when I recall to mind my friend, THOMAS S. MCMILLAN. My sorrow now is measured only by the joy which once was mine in his company. He was my friend in the truest meaning of that word. But to me he was more than a friend, he was my mentor. His kindly and experienced advice guided me in our work together. It was he who taught me the intricacies, admonished me of the dangers, and tutored me in legislative matters. I can attest to the truth of the statement that the counsel of a friend is the best counsel, because it is true advice. And in death, as in life, he continues to be my counselor, for I shall never forget his wise judgment.

But the competent influence of THOMAS MCMILLAN was not for me alone. God, in His wisdom, has called from our midst many men whom we have called great. The fool says, "What a pity that their prestige is cut short." But the wise man says, "Let us rejoice that the effect of their character will live on." Like the ever-widening circle of ripples felt on distant shores when a pebble is thrown into the sea, his influence is still felt in the committee rooms and the halls of Congress and consequently throughout the Nation. "His life is now grafted upon the infinite and will be fruitful as no earthly life can be."

Chester Castle Bolton

MEMORIAL ADDRESS
OF
HON. ROBERT CROSSER
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CHESTER CASTLE BOLTON, late a Representative from the State of Ohio

Mr. CROSSER. Mr. Speaker, for many years it was my privilege to know CHESTER C. BOLTON intimately. Although we did not always see eye to eye on public questions, on the great majority of questions we found ourselves in complete harmony. Whether we were always in absolute agreement or not, however, I knew always that the motives which actuated him could not be questioned, and that indicates the possession of a most important element of real character.

Mr. BOLTON was elected three times to the Senate of the State of Ohio, and was elected five times as a Member of the House of Representatives. During his entire service in the State senate and the House of Representatives he was noted for his close attention to his duties and for his conscientious efforts to serve the public need.

Mr. BOLTON approached decisions on public questions with as much concern and as conscientiously as if he were making decisions on the most important matters of a private nature. He had a genuine desire to serve the Nation's best interests, and his efforts in that direction were never half-hearted.

As in his public career, so in his private business, he applied himself to his duties earnestly and vigorously.

He was successful to a high degree in the conduct of his own affairs.

CHESTER BOLTON was honorable, courteous, and trustworthy, and so, of course, it was a real pleasure to have served with him.

I shall miss his genial countenance and his cheery greeting.

Wallace Edgar Pierce

MEMORIAL ADDRESS
OF
HON. CLARENCE E. HANCOCK
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. WALLACE EDGAR PIERCE, late a Representative from the State of New York

Mr. HANCOCK. Mr. Speaker, when the third session of the Seventy-sixth Congress met at noon on January 3 to transact routine business and to listen to the President's address on the state of the Union, WALLACE PIERCE was present, cordially greeting his many friends in the House. He was cheerful and courteous, as always, and if he felt any physical distress he concealed it. And yet, before we left our offices that evening we learned that WALLY PIERCE was dead. To those of us who had seen him that afternoon it was almost unbelievable, though a sad fact.

He had just passed his fifty-eighth birthday. There was every reason to believe that many years of his useful life lay before him, but he was struck down as if by lightning. We who survive him cannot but meditate and wonder about the inscrutable ways of providence, which takes away so many fine and valuable men and women in the prime of life and permits the miserable and infirm to linger on in an unhappy, burdensome, and useless existence.

WALLY PIERCE had served but 1 year in the House of Representatives, but that was long enough to impress upon his colleagues the strength of his character, his ability as a lawyer and a legislator, and the depth and purity of his Americanism.

For many years before he was elected to Congress I had known WALLY PIERCE as a leading lawyer in northern New York and a strong political leader in that section. In the 1 year I was privileged to serve with him in the House and on the Judiciary Committee, I came to know him as a delightful and cultured companion, a man with the highest conception of legal and personal ethics, and as a man with a deep desire to serve his country and his fellow man.

He was modest and unselfish. He never sought the limelight, but he shirked no responsibility. He was the kind of American we need in public office, and can ill afford to lose.

Thomas Marion Eaton

MEMORIAL ADDRESS
OF
HON. CARL HINSHAW
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. THOMAS MARION EATON, late a Representative from the State of California

Mr. HINSHAW. Mr. Speaker, today we mourn the loss of our distinguished colleague, the Honorable THOMAS M. EATON, who so ably represented the Eighteenth District of California in the Seventy-sixth Congress until his untimely death, which occurred September 16, 1939. THOMAS M. EATON was born on a farm near Edwardsville, Ill., August 3, 1896, attended the country school and Edwardsville High School, graduated from the State Normal University, Normal, Ill., and was principal of the Lincoln School, Clinton, Ill. During the World War he served in the United States Navy as an ensign in the Supply Corps. He was elected to the Congress of the United States on November 7, 1938, and came to Washington with his beloved wife, Ivah B. Eaton, at the opening of the Seventy-sixth Congress, January 3, 1939. Shortly thereafter his abilities were recognized by his appointment to membership on the House Committee on Naval Affairs. As a member of that great committee he distinguished himself through his intimate knowledge of naval affairs on the Pacific coast of the United States, and particularly in reference to the needs of the Navy, which his home city of Long Beach, Calif., so well serves.

"TOM," as he was known to his colleagues, was beloved by all who knew him, and even by those who knew him only casually. He was quiet and unassuming, and yet, withal, a pillar of strength whenever called upon. Illness crept upon him by slow degrees, and, while he worked, he suffered long without complaint, until after several months it became necessary for him to go under observation to determine the source of his trouble. After a long period in the Naval Hospital in Washington, D. C., he was transported by airplane to the Naval Hospital in San Diego, Calif., where he died.

Mr. Speaker, the death of TOM EATON is more than a loss to his colleagues and to the United States. It was a tragedy to his beloved family, well nigh without parallel, as a son was born to his devoted wife 2 weeks after he passed away. He, therefore, left fatherless his three children, Elizabeth, aged 16, Thomas, Jr., aged 13, and his posthumous son, Robert Burdick.

Mr. Speaker, I present for the RECORD an announcement contained in the Long Beach Sun on September 18, 1939, concerning the death of our colleague, and an editorial from the same paper written by Mr. Charles W. Paddock, which express the love and respect in which TOM EATON was held by his people at home.

[From the Long Beach (Calif.) Sun of September 18, 1939]

FINE CITIZEN, OFFICIAL MOURNED

Announcement of Representative THOMAS M. EATON'S death Saturday night brought shock and grief to many thousands of citizens of Long Beach and other communities of the Eighteenth Congressional District of California, which elected him to the United States Congress last November.

It was generally known that Mr. EATON had been ill for months with a malady which seemed to defy efforts of eminent physicians and surgeons at the National Capital to effect a cure or even to make a complete and satisfying diagnosis. It probably had not become known generally that when he was brought home he had to be moved and attended with utmost care. Few aside from relatives and intimate friends of the family had the distressing knowledge of how pitifully weak he was growing, last week, and how threateningly critical his condition had become.

"TOM" EATON, as he had been known for years to hosts of friends in Long Beach and vicinity, made a long and gallant fight to live. At times there seemed reason to believe he was besting the ailment which had cut deploringly short his active work as this district's congressional representative, a service in which he was deeply interested, and which he was performing most conscientiously and in a manner which already had won for him the admiration and friendship of many prominent figures on Capitol Hill. He was known to be very eager to carry on in the service of his constituency and his country, to work for the welfare of his district and, at the same time and always, for the highest and best interests of the Nation in whose Navy he had served during World War days.

But now, at the age of 43, his active career is ended, a career which was so promising of continued successful achievement. Yet, as his passing is mourned, and sympathy is proffered on every hand to the loved ones who are bereaved, it is gratifying that they and his many friends, here and elsewhere, will remember him as a man who, for one of his age, had accomplished so much and had served so well.

In Long Beach he was esteemed as a man whose fidelity to high ideals was reflected happily in his influence upon the lives of others; as a man whose home life was exemplary—a devoted husband and father; as a man honorable in his business affairs; a man whose intelligent and forward-looking interest in his community's welfare was evinced both in his private life and through-

out his incumbency as a member of the city council and mayor of Long Beach.

He served his city in that official capacity during a period marked by exigencies, problems, and developments which particularly called for clear thinking and calm reasoning. Mr. EATON's election to Congress constituted a community expression of approval of his municipal service and his devotion to the city's interests. In Washington he successfully continued the defense of the interests of his community and State, and otherwise represented his district efficaciously and honorably until incapacitated by the illness which proved fatal.

This newspaper joins in extending deepest sympathy to members of the bereaved family. Long Beach will miss "TOM" EATON greatly and will long remember his fine citizenship and his beneficent influences in, and many valuable services to, the community in which for 18 years he made his home.

[From the Long Beach (Calif.) Sun of September 19, 1939]

YOUTH SPEAKS

(By Charles W. Paddock)

TOM EATON

The death of Congressman THOMAS E. EATON comes as a shattering blow not only to his close friends and those who knew him casually but also to the Congress of the United States and especially to the city of Long Beach and that area which composes his congressional district.

Winning a sensational victory as the Republican nominee, the former mayor of Long Beach distinguished himself in his first session and was regarded by Republicans and Democrats alike as a man whose judgment, soundness, and closeness to his constituents as one likely to play a most important role in the special session which convenes this week.

One never thought in life of the Honorable Mr. EATON as anything but "TOM." He was that well loved, that close to all who knew him. He was a plain, simple man, without affectation, without airs, without any of the bombast which so often typifies the politician. Although he held a political office, I never heard TOM EATON referred to as a politician. He spoke straight from the shoulder with a sincerity which couldn't be doubted. He may not have been a great orator, but he never failed to put across his message. When he spoke people listened.

He realized, as he once told me, the great danger under our democratic system of government which faces the vast majority of us. Our political system is like a gigantic fish net, with holes small enough for the little to creep through, and with lines weak enough for the big to crash through, and yet in all a net where the middle size, which means the most of us, are entangled and held. Had TOM EATON, stricken in the prime of life, lived to fulfill his purpose he would have done much to make that net equal to the task of holding all in check that the greatest good could come to the largest number.

In this special session TOM EATON could have been counted upon to cast his vote where it would have done the most good to keep our country out of war. He would have had no traffic with special selfish interests that would like war, even at the sacrifice of American youth so long as it meant more money in their pockets.

In public life TOM EATON was motivated by a keen desire to do good and in private life he proved himself a fine husband and a splendid father. Would that every seat in our Congress was filled by such a citizen as TOM EATON, who died with his boots on, in the service of his country.

Carl Edgar Mapes

MEMORIAL ADDRESS

OF

HON. LOUIS C. RABAUT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. RABAUT. Mr. Speaker, on this day the sword of partisan conflict is sheathed and we gather as comrades to pay tribute to our colleagues whom we have "loved and lost awhile."

These men were our companions of yesterday and our silent counselors of today. Among them perhaps none is more worthy of honor than CARL E. MAPES, late a Representative from Michigan.

CARL MAPES epitomized that scholarly deliberateness which is so needed in a statesman. His was the quiet way, but it was the effective way, for his influence was great. Often in the stormy, frenzied, feverish, boisterous turmoil about him his calm judgment became manifest, and deliberation took the place of chaos.

He was one of the most outstanding Members of this House, and through the charm of his personality and the serenity of his character he endeared himself to each one of us. I know that the personal grief which his death brought to me was felt by thousands of persons proud to call him "friend."

His name and fame will survive in the annals of the Government which he so loved and served.

Chester Castle Bolton

MEMORIAL ADDRESS

OF

HON. FREDERICK C. SMITH

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 24, 1940

On the life, character, and public service of Hon. CHESTER CASTLE BOLTON, late a Representative from the State of Ohio

Mr. SMITH of Ohio. Mr. Speaker, no doubt all of us in Congress who knew CHESTER C. BOLTON held him in highest esteem. I believe we can truthfully say he was regarded by all of his colleagues as a man of most sound judgment and highest character.

Open, frank, as was his nature, he could be trusted without reservation.

Naturally modest and unassuming, he won and held the affection and friendship of his acquaintances and associates.

Obedient to public duty in the last days of his life, he perhaps sacrificed his own physical requirements in order that he might serve in full measure the cause of his country.

We have lost a good public servant and trusted friend in the passing away of Mr. BOLTON. May our memory of his spirit remain bright always.

Chester Castle Bolton

MEMORIAL ADDRESS

OF

HON. CLIFFORD R. HOPE

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 24, 1940

On the life, character, and public service of Hon. CHESTER CASTLE BOLTON, late a Representative from the State of Ohio

Mr. HOPE. Mr. Speaker, it was with profound sorrow and a sense of personal loss that I learned of the death of CHESTER C. BOLTON last October.

I came to like CHESTER BOLTON early in his service in the House because of his genial and engaging personality, which endeared him to all with whom he came in contact. I came to like him because of his devotion to duty and the ability and thoroughness with which he carried on his work as a Representative. CHESTER BOLTON was a man of wealth. He had a distinguished career before ever coming to Congress. He did not come here to attain distinction. For him membership in this body meant only an opportunity for service.

I have often remarked what a splendid thing it was that men like CHESTER BOLTON were willing to serve their country by undertaking the hard work, and even the drudgery, which fall to the lot of a conscientious Member of Congress when they could, if they chose, live a life of ease.

CHESTER BOLTON, I am sure, regarded his work in Congress as a patriotic service. He could have selected easy committee assignments, but instead he chose the Committee on

Appropriations, where there is no limit to the hard work a member may do. Certainly, no member of that great committee was more thorough and conscientious in his study of governmental problems and expenditures. His entire service was distinguished by a high order of ability.

In his passing this Congress and the Nation lost an able leader and a devoted patriot.

Bert Lord

MEMORIAL ADDRESS

OF

HON. CLARENCE E. HANCOCK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 24, 1940

On the life, character, and public service of Hon. BERT LORD, late a Representative from the State of New York

Mr. HANCOCK. Mr. Speaker, BERT LORD will long be remembered by his colleagues and his multitude of friends for his kindness and generosity in thought and deed. If he ever thought evil of anyone he never gave it expression. By nature he was a friendly man. He liked people and people liked him. That kind of a man makes friends easily and holds them for life.

It was inevitable that he should enter politics and that he should be elected to office time after time. Except for a year or two, when he was New York State Commissioner of Motor Vehicles, he loyally served his friends and neighbors in legislative bodies from 1915 until the day of his death less than a year ago, as a member, successively, of the New York State Assembly, the State senate, and the United States House of Representatives.

He was unassuming and unostentatious but quietly persistent and effective in the service of his constituents. It gave him pleasure to do things for others. His whole life was spent on the farm and in rural communities, when he was not engaged in public affairs, and he was devoted to the interests of the farmer and the plain citizen.

BERT LORD served his country and district faithfully and well. His days on earth were crowded with good deeds and useful accomplishments. His honorable career is ended, but he is held in fond memory by thousands of his fellow countrymen whom he loved and who loved him.

Samuel Davis McReynolds

MEMORIAL ADDRESS

OF

HON. JOSHUA L. JOHNS

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 24, 1940

On the life, character, and public service of Hon. SAMUEL DAVIS MCREYNOLDS, late a Representative from the State of Tennessee

Mr. JOHNS. Mr. Speaker, my remarks today will be directed to SAM D. MCREYNOLDS as a judge, and not as a Congressman, because it was as a judge on the bench that I knew him best.

My renewal of friendship in this House was limited, because of his almost continued illness after my arrival here. However, from close friends I have learned that no man ever occupied a seat in this body who left behind him sweeter or more fragrant memories.

Fortunate are those who knew him during his 17 years of service in this House. Judge MCREYNOLDS lived in an advanced age. Historians now do not accord the laurel to those who have built up their reputations on violence, ambition, and injustice. The measure of man's greatness today is given to those who have founded their careers on kindliness, generosity, and justice. Such a man was Judge MCREYNOLDS. He came to the bench of Tennessee at the young age of 31 years. He served the State of Tennessee on the bench for 20 years before he was elected to this body. He had only been on the bench 4 years when I was admitted to the State bar of Tennessee, and practiced law before him as a young lawyer. No young lawyer ever had a more loyal and sympathetic friend than Judge MCREYNOLDS. His love for, and sense of, justice made him an outstanding jurist.

We are not surprised that he was honored, as few men have been honored in this life by his fellow men.

It is such men as was Judge MCREYNOLDS, who put most into life, and real success should ever be determined by what we put into life rather than by what we take out of it.

May his example of friendship, loyalty, and fidelity to service remain in our memories so long as this Republic shall exist.

Wallace Edgar Pierce

MEMORIAL ADDRESS

OF

HON. CLARENCE E. KILBURN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 24, 1940

On the life, character, and public service of Honorable WALLACE EDGAR PIERCE, late a Representative from the State of New York

Mr. KILBURN. Mr. Speaker, words of mine are inadequate to express the loss which northern New York has sustained in the passing of my predecessor, the Honorable WALLACE E. PIERCE. The love which his people gave to him, the confidence which they reposed in his judgment and character are tributes which come to few men.

Born in the town of Black Brook in Clinton County, N. Y., in the year 1882, WALLACE E. PIERCE lived all of his life in the mountain and lake country, which he loved. The neighbors of his youth were his lifelong friends and to them his service was dedicated. Near the close of his career his people gave him, in his election to the Congress of the United States, the highest office within their power and now that he has gone, they will not forget his integrity, his faith in them, and his friendship for the least of them.

Early in his career Mr. PIERCE completed his preparation for teaching in the State Normal School in Plattsburg. He retained a permanent affection and interest in his alma mater and for years was president of its board of visitors and active in its support. After his graduation he taught in the rural schools of Clinton and St. Lawrence Counties, an almost traditional preparation for so many of America's statesmen. His early political training was obtained not in the school of political theory but rather in his duties as secretary to two of his predecessors, Congressmen George R. Malby and Edwin A. Merritt. In 1914 he was admitted to the bar and practiced his profession in the city of Plattsburg until his death. His legal career early placed him as an outstanding member of his profession in northern New York. In 1917–18–19 he was elected as member of assembly from Clinton County and he served as chairman of the Clinton County Republican Committee for 15 years. Since 1935 he was a member of the State executive committee of the Republican State Committee, and in 1938 he was elected to Congress from the Thirty-first Congressional District. These are the bare outlines, the visible evidence of his distinguished career, but WALLACE E. PIERCE will be remembered by his people for the deeper, intangible characteristics which made the man. His belief in the American way of life, his balanced judgment, his lovable personality, and above all his gift of true and lasting friendship found a heartfelt response from his people. It was their unerring

instinct which discovered in him the qualities of leadership and they were steadfast in their devotion.

As yet his loss is too recent, and the grief of his people too immediate, to fully understand the heritage which WALLACE E. PIERCE has left to northern New York. His civic leadership, the enduring quality of his achievements, the complete selflessness of his service will increasingly be understood as his work, which lives after him, comes to its fruition.

The greatness of a community, a State, or a nation cannot be more than the character of the men who compose it. It is the tradition and the significance of America that it can produce such men and that our people can give them recognition. WALLACE E. PIERCE was a statesman in the true sense of the term. We as a people are better because he lived among us.

Chester Castle Bolton

MEMORIAL ADDRESS
OF
HON. JAMES SECCOMBE
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CHESTER CASTLE BOLTON, late a Representative from the State of Ohio

Mr. SECCOMBE. Mr. Speaker, God in His infinite wisdom has seen fit to take from us one of the most lovable characters it has ever been my pleasure to know. Quiet, unassuming, caring little for the spotlight, yet tireless in his efforts in behalf of his district and his country, CHESTER C. BOLTON was of the mold that is at once great and humble. One had but to meet Congressman BOLTON to know that behind his serenity of spirit lay a driving persistence of attainment of lofty ideals. Simplicity was the very core of his being. His attainments lay not in a belligerent aggressiveness, but in an effective appeal to unemotional logic. Indeed, his contributions to the promotion of the welfare of his constituency appeared on the surface to be so effortless that one was apt to lose sight of the active part he played in their attainment. Yet in his passing, Mr. Speaker, all of us know that Ohio and the Nation have lost one of their most illustrious sons.

One who served his country in time of war as well as in time of peace, a loving husband and a devoted father to his family, he always found time to take an active part in all civic activities and the promotion of such affairs that were a credit to his community.

It was my privilege in coming to Congress as a new Member to have my office adjoining that of his where I had the benefit of his friendly advice and the privilege to counsel with him from time to time on very important legislative matters, and I soon learned to love and admire him for his sincerity and his fearlessness in standing for what he thought best for his country. I therefore feel that I am wiser and better for having had the privilege of knowing him—

> Statesman, yet a friend of truth. Of soul sincere,
> In action faithful, and in honor clear;
> Who broke no promise, served no private ends.

Besides his many years of service in Congress, he served as a member of the Ohio Senate from 1923 to 1928. He was a delegate to the Republican National Convention in 1928 and was elected to Congress from the Twenty-second District of Ohio to the Seventy-first, Seventy-second, Seventy-third, Seventy-fourth, and Seventy-sixth Congresses, when he died and was later succeeded by his good wife, FRANCES P. BOLTON, who is the first woman to serve in Congress from Ohio.

CHESTER BOLTON'S record in Congress is one of many accomplishments and he was always found to be faithful to every trust, conscientious in the performance of every duty, and at all times acted according to what his best judgment told him was beneficial to those whom he sought to serve. He was of the quiet type that made no effort to promote selfish ambition or desires, but seemed to enjoy seeing his friends and associates achieve the successes that came their way without envy or jealousy. The great State of Ohio will always feel proud of his services to our State and Nation and we will always love and preserve his memory, and in his memory I like to think of the words of Alfred Tennyson:

> Sunset and evening star,
> And one clear call for me!
> And may there be no moaning of the bar
> When I put out to sea.
>
> But such a tide as moving seems asleep,
> Too full for sound and foam,
> When that which drew from out the boundless deep,
> Turns again home.
>
> Twilight and evening bell,
> And after that the dark;
> And may there be no sadness of farewell
> When I embark.
>
> For tho' from out our bourne of time and place,
> The flood may bear me far,
> I hope to see my Pilot face to face,
> When I have crost the bar.

Chester Castle Bolton

MEMORIAL ADDRESS
OF
HON. CHARLES H. ELSTON
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CHESTER CASTLE BOLTON, late a Representative from the State of Ohio

Mr. ELSTON. Mr. Speaker, in the passing of CHESTER C. BOLTON Congress has lost an able, sincere, and industrious Member.

He had the qualities of mind and heart which endeared him to all who had the privilege of sharing his friendship. His public service marks him as a true statesman. No responsibility was ever too great for him to undertake, no task was ever so trivial that it was not worthy of his personal attention. Our beloved colleague was quite willing to sacrifice even his health in the service of his district and his country. He was kind, courteous, and considerate, and was faithful to every trust imposed in him. His character will ever be an inspiration to us.

Harry Wilbur Griswold

MEMORIAL ADDRESS
OF
HON. JOSHUA L. JOHNS
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. HARRY WILBUR GRISWOLD, late a Representative from the State of Wisconsin

Mr. JOHNS. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following tribute to the memory of our late colleague, HARRY W. GRISWOLD, by Hon. ALEXANDER WILEY, Senator from Wisconsin:

TRIBUTE BY SENATOR WILEY

HARRY W. GRISWOLD, of Wisconsin, was serving his first term in Congress as a Representative when death called him. He was in the prime of life, having been born on May 19, 1886, on a farm near West Salem, Wis. He was a man of large experience—a businessman, farmer, and stock breeder. From 1932 to 1936 he was a member of the Wisconsin State Senate. For years he had been one of Wisconsin's most outstanding and loyal Republicans.

Besides his wife, Esther Griswold, he leaves four daughters, Mary, Jennie, Alice, and Beulah, and a son, Donald. HARRY GRISWOLD was a man who had a host of friends. He possessed those rare qualities of dependability and common sense.

HARRY GRISWOLD was honest in thought and deed, a clear and straight thinker. He was a student of government, believing in our system of government. There was nothing demagogic in HARRY GRISWOLD. He was not afraid of being with the minority.

Though he was a newcomer to Washington, Mr. GRISWOLD'S ability had already singled him out as a legislator of outstanding caliber. His activities on the Rivers and Harbors Committee had already met with favorable comment.

His opinion on farm matters was highly regarded in Congress because of his wide experience in farm activities as a member of several stock breeders' associations and as president of the Guernsey Breeders' Association and the La Crosse County Breeders.

His qualifications as a Representative were exceptional. His counsel and his friendship were both valued and both will be missed by his many friends in Washington and in Wisconsin.

Edward Walter Curley

MEMORIAL ADDRESS
OF
HON. THOMAS H. CULLEN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. EDWARD WALTER CURLEY, late a Representative from the State of New York

Mr. CULLEN. Mr. Speaker, I desire to pay tribute to the life and memory of my friend and colleague, the late Honorable EDWARD W. CURLEY.

It was my great privilege to have known ED CURLEY intimately. I always found him to be a very unassuming gentleman. His interesting and very active career included membership in the board of aldermen, New York City, for a period of 20 years, and during the course of that time he served as chairman of practically every important committee. He was elected Representative in Congress on November 5, 1935, and served until the time of his death in January 1940.

As a Member of the House of Representatives he served on the important Labor and Civil Service Committees, and he leaves to his memory an outstanding record of accomplishments and achievements in behalf of the people of his district, the State of New York, and our country. He was generally recognized as a prodigious worker and was always ready to give of his time, his counsel, and his guidance.

I have lost a real friend in ED CURLEY and I shall always remember and cherish my happy association with him.

George Henry Heinke

MEMORIAL ADDRESS
OF
HON. KARL STEFAN
OF NEBRASKA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. GEORGE HENRY HEINKE, late a Representative from the State of Nebraska

Mr. STEFAN. Mr. Speaker and friends, as we gather today to pay our respects to the memory of former colleagues who have passed on during the past year, those of us who represent the State of Nebraska in this House of Representatives find our hearts particularly heavy because we miss our former friend and colleague, the late GEORGE H. HEINKE, who was Representative in Congress from the First District of Nebraska.

We who knew Mr. HEINKE became richer in our love of our fellow man because of that acquaintanceship. We feel that not only have we lost a true friend, but that our State and the Nation have lost a valuable servant.

GEORGE HEINKE loved his friends. He loved his State and he loved his country. He transmitted that love in his service in the House of Representatives. He displayed it in his many acts of friendship and in his many acts of service to his district, State, and Nation. Although the time of his service here was short, his quiet presence was felt by scores of Members on both the minority and majority sides, who developed an admiration of his many high qualities.

To me, Mr. Speaker, our late colleague typified the real American—a contemporary of the school that produced our sturdiest forefathers. He typified, to me, that sort of American which the lust of office does not kill; whom the spoils of office cannot buy; who possesses real opinions and a will; a man of honor; a man who will not lie.

Mr. HEINKE was a member of the Republican Party, and he sincerely believed in the principles of republicanism. He demonstrated this belief on many occasions so skillfully that he earned the respect of his political adversaries and the leaders of the opposition party.

I utilize this occasion, Mr. Speaker, to quote an editorial written by a leader and prophet of the current majority party in Nebraska, Mr. James E. Lawrence, editor of the Lincoln Star. The editorial, as follows, illustrates the high respect and esteem in which Mr. HEINKE was held in his own district and in his State even by those who differed with him politically:

Death has the power to subordinate political differences, and so among Republicans and Democrats alike in the First Nebraska District it was sad news which set forth that injuries received in an automobile accident by Representative GEORGE HEINKE, of Nebraska City, had terminated fatally.

Those who differed fundamentally with Congressman HEINKE in politics recognized his honesty. He was a sincere and uncompromising opponent of the policies of the Roosevelt administration. That opposition was consistent and was not dictated by political expediency.

It represented Mr. HEINKE'S political philosophy. It hardly does him justice to say that he belonged to the conservative school of Republicans. He gave it more than lip service. He was energetic, aggressive, and militant in advocating it; a tireless worker, believing fully in his party and in the principles which he believed the party should represent. Mr. HEINKE was not a great scholar but he was in the personal sense a kindly, neighborly, and comradely man, a good student of human nature, imbued with the highest motives in public service. One outstanding trait of GEORGE HEINKE was his capacity to accept criticism good-naturedly, gracefully, and without resentment. He never permitted the conflicting views of his friends to disturb a regard or personal affection which he had for them. That was, perhaps, his greatest source of strength, for it revealed the depth of his own political philosophy, the tolerance that he displayed toward those who thought differently, and his faith in the good old American way through which democracy progresses.

Mr. HEINKE'S life was filled with hard work. As a boy he came to the university, without resources other than a pair of willing hands and a determination to secure a degree. He performed menial tasks to provide the funds necessary for his schooling. In his chosen profession, the law, he won the respect and the confidence of his fellow townsmen and built a thriving practice. He never lost his love of the soil or his interest in farm life, and it gave him a great deal of pleasure and happiness to look over the farm which he owned. His habits were simple and modest; he was thrifty and industrious; he was typical of a large part of the citizenry of the State.

His death was a distressing development and produced regret among the people of the district he represented.

Wallace Edgar Pierce

MEMORIAL ADDRESS
OF
HON. ROBERT F. RICH
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. WALLACE EDGAR PIERCE, late a Representative from the State of New York

Mr. RICH. Mr. Speaker, I wish to join in paying tribute to the memory of my late colleague and fellow Member, WALLACE E. PIERCE, from the State of New York. Through-

out his career of public service he gave himself unstintingly in the performance of his many and arduous duties. His sterling personal qualities and outstanding ability won for him the esteem and respect of all with whom he came in contact. It has been my privilege and pleasure to know and work with WALLACE PIERCE. His death came as a great shock to his host of friends throughout the Nation. His life was marked by many worthy achievements and his name will long be remembered as that of one who wrought much and well for the district in which he lived and the State and Nation to whom he devoted his life.

Chester Castle Bolton

MEMORIAL ADDRESS
OF
HON. FRANK O. HORTON
OF WYOMING
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CHESTER CASTLE BOLTON, late a Representative from the State of Ohio

Mr. HORTON. Mr. Speaker, other Members of this body may be better qualified to give an account of CHESTER BOLTON'S legislative accomplishments, but no one realizes better than I just how profound an influence and fine an example he was to us all.

It was characteristic of CHESTER BOLTON that, when I came here as a new man, he should seek me out and try in so many, though unostentatious, ways to smooth the way for me and to give so generously of his time and advice whenever I called upon him.

Service and generosity were the keynotes of his character in public and in private life. His country and his friends benefited alike from these rare and outstanding qualities. In spite of the fact that his circumstances were such as to permit him a life of leisure and ease, he dedicated himself to the service of his country and died in the service of that country just as surely as a soldier on the field of battle. The country can ill afford to lose men like him and we can ill afford to lose such a friend.

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. EWING THOMASON
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. THOMASON. Mr. Speaker, during the days which have passed since I learned of the passing of my sincere friend and colleague, CARL E. MAPES, I have increasingly realized the great loss which has come to this body and to me personally through his death. His office for the past few years was near mine and each day now as I pass his door, I feel that my life was enriched by my friendship with him. Although our party affiliations differed, I never felt it the slightest barrier between us, and I believe all his associates shared the same feeling.

Few Members of Congress have given more freely of themselves toward fair and just legislation, and he ever upheld the dignity of the House of Representatives. His opinion was valued by all who sought wise counsel and I never knew him to give hasty or slight consideration when asked for advice. As the years go by his influence will continue to be felt and he will be missed by all of those who knew him.

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. JOHN TABER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. TABER. Mr. Speaker, CARL E. MAPES was first elected in Grand Rapids to represent his home district from the State of Michigan in 1912 and for 27 years was an honored Member of this House.

In my early days here I came to know him on the floor as one of the best presiding officers, as one of the best parliamentarians, and one of the finest characters in the House. The last 10 years I came to know him more personally and his family, and had a great deal to do with him. He was one of the ablest men who have served in the House of Representatives in my day. I believe that he was the most popular man on both sides of the aisle and that he had a very marked influence upon legislation. He did not hesitate to stand up and vote his convictions, regardless of whether he was in the majority or in the minority, and I am sure that no one took his responsibilities more seriously.

He passed away suddenly while in New Orleans on a special oil investigating committee in connection with his regular duties. For many years he had been a prominent member of the Interstate Commerce Committee, and for the past 7 years had been, in addition, a member of the Rules Committee. At the time of his death he was minority leader of the Rules Committee and assistant minority leader.

In these troublesome times we need most his jovial spirit and his guiding hand. It will be a long time before we can fill his place.

Thomas Sanders McMillan

MEMORIAL ADDRESS
OF
HON. JOHN J. COCHRAN
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. THOMAS SANDERS MCMILLAN, late a Representative from the State of South Carolina

Mr. COCHRAN. Mr. Speaker, in the death of THOMAS S. MCMILLAN I not only lost a close personal friend but the country a most useful public servant and the Congress one of its influential Members. Tommy, as I knew him, came to Washington in the Sixty-ninth Congress. I met him on the opening day of the session and from that day until he passed away a beautiful friendship developed between us which I will always cherish. I watched his career as he quickly rose to a position of power in this great legislative body. At the time of his death he occupied an outstanding place in the organization of the House, chairman of the Subcommittee on Appropriations that considered the Commerce, Justice, Labor, and State Departments appropriation bill. Few chairmen had the success that he achieved in handling his bill on the floor. This was due to the thorough manner in which he conducted the hearings and above all his kindly attitude while the bill was under consideration in the House. His personality was his success. I never heard a Member of Congress question his sincerity. True, some felt at times he had not been liberal enough with some activity in which they were interested, but his sincerity, and his ability to present a detailed explanation of the subject in question invariably caused a majority of his colleagues to support him.

A Member of Congress who can convince his fellow Members of his sincerity will succeed as time passes on. Not only did we all believe Tommy's sincerity but we likewise recognized his outstanding ability. Regardless of our views we hesitate to question the wisdom of one who has studied a subject, when his sincerity is so pronounced. There were times when powerful influences sought to defeat recommendations of his committee. He always favored free and full debate, relying upon facts to win support. His speeches, free from personalities, coupled with his courage to oppose what we call popular appropriations, would bring him success in the end. Tommy is no longer with us, but the examples he set will always remain and will be beneficial to those who adopt his methods.

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. ROBERT F. RICH
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. RICH. Mr. Speaker, I wish to join in paying tribute to the memory of my late colleague and fellow Member, CARL E. MAPES, of Michigan. He was a fine lawyer and one of the hardest working and most valuable Members of Congress with whom I have had the privilege to serve. His sterling personal qualities and outstanding ability won for him the esteem and respect of all with whom he came in contact. Throughout his career of public service CARL MAPES gave himself unstintingly in the performance of his many duties, and his death came as a great shock to his host of friends throughout the Nation. His life was marked by many worthy achievements, and his name will long be remembered as that of one who wrought much and well for the district in which he lived and the State and Nation to whom he devoted his life.

William Irving Sirovich

MEMORIAL ADDRESS
OF
HON. THOMAS H. CULLEN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. WILLIAM IRVING SIROVICH, late a Representative from the State of New York

Mr. CULLEN. Mr. Speaker, in the death of the Honorable WILLIAM I. SIROVICH, late Representative in Congress from the Fourteenth Congressional District of New York, the House has lost one of its most distinguished Members.

It was my pleasure to have known Congressman SIROVICH most intimately for many years in the practice of medicine in the city of New York, where he was one of the city's most outstanding and celebrated physicians. As a physician, and as a citizen, he stood for the best interests of his community and his country. The finest words that can be spoken of him tell of his devotion to his constituency. They were always uppermost in his thoughts. He not only gave them loyal and faithful service as a legislator, but gave freely of his medical advice and skill to many who were unable to remunerate him because of their financial insecurity. It can be truthfully said that Dr. SIROVICH was a great humanitarian and his one objective in life was to serve his fellow man.

He was elected to Congress on March 4, 1927, and served continuously until the time of his death on December 17, 1939. At the time of his untimely death he was chairman of the important Patents Committee and also ranking majority member of the important Civil Service Committee. He was an indefatigable worker and his counsel and advice was frequently sought in connection with national problems.

Dr. SIROVICH was in all probability one of the most intellectual and cultured men who ever served in the House of Representatives. He was generally recognized as an authority on historical subjects and frequently held the House spellbound with his orations on history and the various political changes which have taken place throughout the centuries.

Death has deprived America of a devoted and distinguished public servant. It has deprived those of us who were close to him of a friend who cannot be replaced.

John Andrew Martin

MEMORIAL ADDRESS
OF
HON. EWING THOMASON
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. JOHN ANDREW MARTIN, late a Representative from the State of Colorado

Mr. THOMASON. Mr. Speaker, this hour is consecrated to the memory of friends who have lain down too weary ever again to rise in mortal form but who will live in our hearts so long as we have breath.

I respected JOHN A. MARTIN as one who stood for all that is finest and best in American traditions. He knew the hardships and privations of the pioneer, as he went to Colorado from Missouri in a covered wagon.

He was a true liberal, a self-made man, who from his tender years was compelled to make his own living. He had a World War record of which any man might well be proud, and long years of faithful and devoted public service.

He had faith in democracy, veneration for the great founders of this Government, an understanding of men and measures. He believed and exemplified in his life that "though a man walk with kings, he should never lose the common touch."

I had the pleasure of a long sea journey with him and during the intimacy of those quiet days learned to know and love him as a man who placed duty to his country above personal comfort and desire, whose high ideals, high principles and noteworthy achievements placed him in the first rank of public men.

There is little I can add to the tributes paid him here today, but I shall never forget him and my life is richer for having known him.

Samuel Davis McReynolds

MEMORIAL ADDRESS
OF
HON. JOHN J. COCHRAN
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. SAMUEL DAVIS MCREYNOLDS, late a Representative from the State of Tennessee

Mr. COCHRAN. Mr. Speaker, we who knew him and loved him realized the stearling qualities of SAMUEL D. MCREYNOLDS. His passing came at a time this country could ill afford to lose the services of such an outstanding legis-

lator. Chairman of the great Committee on Foreign Affairs, he was stricken when his services and experience were most needed. I cannot help but feel his end was hastened because of his inability to discharge the great responsibilities of the office he held, especially the duty that would have been his had he been able to pilot the amendments to the Neutrality Act through the House.

After serving his State for nearly 20 years on the bench, he came to the Congress practically a young man. He not only had the temperament but the ability that warranted his appointment to the Committee on Foreign Affairs, of which he later became chairman.

Many years ago I served as secretary of the Foreign Relations Committee of the Senate. It was during the World War. As a result of that service I know the great questions that come before a chairman of a committee that handles legislation affecting our foreign relations. The manner in which Judge McREYNOLDS carried out his assignment not only reflected credit upon him but also upon those who selected him for the position. It was a privilege for me to have been able to call Judge McREYNOLDS my friend.

James Willis Taylor

MEMORIAL ADDRESS
OF
HON. ROBERT F. RICH
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. JAMES WILLIS TAYLOR, late a Representative from the State of Tennessee

Mr. RICH. Mr. Speaker, I wish to join in paying tribute to the memory of my late colleague and fellow Member, J. WILL TAYLOR, from the State of Tennessee. Throughout his career of public service he gave himself unstintingly in the performance of his many and arduous duties. His sterling personal qualities and outstanding ability won for him the esteem and respect of all with whom he came in contact. It has been my privilege and pleasure to know and work with WILL TAYLOR. His death came as a great shock to his host of friends throughout the Nation. His life was marked by many worthy achievements and his name will long be remembered as that of one who wrought much and well for the district in which he lived and the State and Nation to whom he devoted his life.

James Willis Taylor

MEMORIAL ADDRESS
OF
HON. JOHN TABER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. JAMES WILLIS TAYLOR, late a Representative from the State of Tennessee

Mr. TABER. Mr. Speaker, during all my service here, J. WILL TAYLOR, of Tennessee, was a Member of the House. He held an important place in Republican councils, both by reason of his long service and his great ability. He was a ready debater and gave of his very best to the interests of the country. He was honored by his own State for many years, not only in the Congress, but in the political life of the State where he had been the Republican leader for a long time. People came to rely and depend upon J. WILL TAYLOR.

James Willis Taylor

MEMORIAL ADDRESS
OF
HON. JOHN JENNINGS, JR.
OF TENNESSEE
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. JAMES WILLIS TAYLOR, late a Representative from the State of Tennessee

Mr. JENNINGS. Mr. Speaker, on November 14, 1939, in Congressman J. WILL TAYLOR, for 21 years a Member of this House from the Second District of Tennessee, death chose a shining mark. When "death, the black camel that kneels at every man's door," came for our friend he was full of years and full of honors. He had "bought golden opinions" from thousands. He was at the height of his popularity, in the fullness of his power, secure in the hold he had on his people, happy in the discharge of his duties.

What was the secret of his success? What was it that gave him "open sesame" into human hearts, that for more than two decades kept him a Member of this body? The position that was his in this party, the services he rendered in this House, were not the accomplishments of a weakling. His engaging personality, charming manner, resourceful intellect, indomitable will, tireless energy, fidelity to his friends, and devotion to his country were the dominant traits which contributed to his rarely equaled career as a leader of his party and as one of the most influential Members of this House.

The secret of his greatness is found in his background, his parentage, the difficulties he overcame, and the training ground that was a part of his heritage. He came from that plane whence have come the immortals—from the common people.

> Nursed in the commoner's lowly shed,
> To hardy independence bravely bred,
> By early poverty to hardship steeled,
> And trained to arms in stern misfortune's field.

J. WILL TAYLOR is a magnificent tribute the common people paid to our free institutions.

His paternal grandfather was a Confederate sympathizer, a rarity in east Tennessee. His father served with distinction in the Union Army. Congressman TAYLOR was a Tennessean to the manor born. To properly appraise him you must know the history of the people of east Tennessee, a section that sent more soldiers into the Union Army, in proportion to its population, than any other section of the Nation. There were no slackers—every man made his choice early in the struggle.

His father, James W. Taylor; his mother, whose maiden name was Sarah Elizabeth Rogers, were typical east Tennesseans—people of strong religious convictions, whose home was the home of the Methodist ministers who regularly visited the community in preaching that faith. They were rugged, devout, frugal, industrious, hospitable people, the latchstring of whose home always hung on the outside. Among Congressman TAYLOR's most devoted lifelong friends were these consecrated ministers of the Gospel, who had enjoyed the hospitality of his father's home.

His father, a country merchant and farmer, died 20 days after J. Will was first elected to Congress. In his devotion to his parents he gave a living example of obedience to that great command: "Honor thy father and thy mother that thy days may be long in the land which the Lord thy God giveth thee."

After the death of his father, his mother made her home with her son at La Follette, where she was the object of his tenderest devotion. As a mark of the veneration in which he held his father, he erected a magnificent monument to his memory in the quiet countryside where he spent his life.

As a boy he walked miles over muddy roads to a country school, worked on his father's farm, clerked in his store, taught a district 1-room school at the age of 14. With money thus obtained he paid his way as a student in the American Temperance University at Harriman, Tenn., where, as boys of 18 years of age, we first met. There he gave promise of the man he was to be. He was a wide reader, a ready debater, a hale-fellow-well-met, who made friends easily and held them.

In 1901 and 1902 he attended Cumberland Law School at Lebanon, Tenn., from which have come many of the South's leading lawyers. Upon his graduation he opened a law office in the town of La Follette, in Campbell County, which adjoins Union, the county of his birth.

He took part in the 1902 and 1904 congressional campaigns, in the first of which N. W. Hale made an unsuccessful race for Congress against the then Member from that district, Judge Henry R. Gibson. In 1904 Hale defeated R. W. Austin for Congress, where he served until 1908, when he was defeated by Austin.

In 1918 TAYLOR, in a spectacular race, defeated Austin by a large majority. In this campaign he won his spurs as a campaigner. He was without a superior in rough-and-tumble, catch-as-catch-can political debate. He was forceful, energetic, resourceful, a master of ridicule and invective, and possessed of what, in an east Tennessee stump speaker, is indispensable—a fund of apt anecdotes and an ever-ready sense of humor. These qualities enabled him to carry a crowd with him and keep it in an uproar. The people of east Tennessee take their politics seriously, and they demand that their leader be able to give an account of himself on the stump. This TAYLOR always did.

Before his election to Congress he served as mayor of LaFollette, resigning to take his seat in this body. He had previously served as chairman of the Republican State executive committee as postmaster of LaFollette, and as State insurance commissioner.

As a Member of this House he was in his element, as is attested by the high esteem in which he was held by his colleagues on both sides of the Chamber. His greatest service was performed as a member of the Committee on Immigration. The legislation he helped to pass was especially pleasing to his constituents. He was an unfailing friend of the ex-service men. Letters received by him were promptly answered, and no demand on his time and energy was too exacting to receive his prompt and effective attention.

From 1916 through 1936 he attended every Republican National Convention, but never as a delegate; he always gave that honor to his friends. He served as national committeeman during the administrations of Harding, Coolidge, and Hoover, during which period many of his friends were elevated to high positions: Judge Edward T. Sanford to the Supreme Bench; the Honorable James A. Fowler to the position of assistant to the Attorney General of the United States; ex-Governor Ben W. Hooper to the United States Labor Board; Hu M. Tate to the Interstate Commerce Commission; Judge Xen Hicks to the United States Circuit Court of Appeals for the Sixth Circuit; Judge George C. Taylor to the United States district bench in Knoxville; and Judge John J. Gore to the United States district bench in Nashville. Hundreds of others were the beneficiaries and the recipients of unnumbered favors at his hands.

If I were called upon to sum up his life, it would be in the one word "others"; he did more for others than for himself. Endowed by nature with a pleasing, magnetic personality, he grappled his friends to his heart with hooks of steel. He made friends by being steadfast. He kept them by being honest. His word was his bond. He was endowed with that touch of a common humanity which makes the whole world kin. He was gifted with the golden key that unlocks human hearts. He was tactful, industrious, untiring, forceful. With unflagging zeal, increasing ability, and ever-widening service to his constituents, he pressed on to the end. His was the career of a strong man. No other east Tennessean ever had the hold on his people that was TAYLOR'S. He knew people. He trusted them. They knew and trusted him. As a campaigner, in his personal contacts with his people, he was without a peer. The services he rendered them were not confined to any class. The rich, the poor, the strong, the weak, the white man, the colored man, the businessman, the farmer, the laboring man, the ex-service man, his widow and dependents, all benefited from his helpful, ever-ready desire to serve them.

Just prior to his vote on the question of lifting the embargo on the sale of munitions to belligerents he was in his district, hale, hearty, in fine spirits, apparently in the best of health. Within 10 days the word was flashed over the district, over the State, and throughout the Nation "WILL TAYLOR is dead." His passing was a profound shock and a grievous loss, not only to his family but to his thousands of friends. For more than 20 years in this Chamber, on committee, in the discharge of his official duties, he had woven into the fabric of this body's accomplishments, into the lives and interests of his people, the very fiber of his thought and being.

His passing came at his home in La Follette, under his own rooftree, with his family about him. He fell asleep—glided gently out at ebb of tide. He passed as he would have had it.

Sunset and evening star,
And one clear call for me!
And may there be no moaning of the bar,
When I put out to sea;

But such a tide as moving seems asleep,
Too full for sound and foam,
When that which drew from out the boundless deep
Turns again home.

Twilight and evening bell,
And after that the dark!
And may there be no sadness of farewell,
When I embark;

For tho' from out our bourne of Time and Place
The flood may bear me far,
I hope to see my Pilot face to face
When I have crost the bar.

From the little town of La Follette, from which he had traveled to the Capital of earth's greatest Nation, from the family who adored him, from the friends who loved him, from the eternal hills whence came his strength, he took his journey. Passing from the scenes of his earthly triumphs, he went down—

As when a lordly cedar, green with boughs,
Goes down with a great shout upon the hills,
And leaves a lonesome place against the sky.

Chester Castle Bolton

MEMORIAL ADDRESS
OF
HON. JOHN J. COCHRAN
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 24, 1940

On the life, character, and public service of Hon. CHESTER CASTLE BOLTON, late a Representative from the State of Ohio

Mr. COCHRAN. Mr. Speaker, courage coupled with intelligence made CHESTER C. BOLTON an outstanding Member of this body. Although occupying a position of great responsibility with the political party of which he was a member, no one can ever say there was ever any evidence of partisanship during the years he served in this body.

Shortly before illness required him to suspend his activities in Washington I appeared before a subcommittee of the Committee on Appropriations, of which he was a member. He had no personal or political interest in the question under discussion, but he assisted me in drawing an admission from a public official that he had failed to strictly follow the law.

While I did not achieve my objective, still that admission confirmed the argument I advanced.

It is such men as CHESTER BOLTON that have made this a great legislative body, and we could ill afford to lose a man of his qualifications during the critical times that confront us.

His passing was a source of great regret to those on both sides of the aisle. The Nation and his State lost a valuable public servant when he passed away.

Chester Castle Bolton

MEMORIAL ADDRESS
OF
HON. JOHN TABER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CHESTER CASTLE BOLTON, late a Representative from the State of Ohio

Mr. TABER. Mr. Speaker, CHESTER C. BOLTON died in the latter part of October. He came to Congress about 14 years ago and served with distinction for a long time. He spent many years prior to coming to Congress in active business. He was familiar with all sorts of business and manufacturing practices and, in addition, had served in the Army during the war and was especially familiar with the Army needs and practices. I do not know of anyone who ever came to Congress better equipped than he was.

In the trying days of the depression he was on the Appropriations Committee and served with me on the deficiency committee. Many times he and I alone for weeks at a stretch represented the minority upon the deficiency appropriations subcommittee. He was always there when we needed him, and in those trying days, as a result of his faithful application to his work, we were able to salvage a great deal of order out of the terribly chaotic financial condition of the country which followed the advent of the Roosevelt administration.

He took every responsibility most seriously and was always trying to be of more service to his party and to his country. In the campaign of 1936 he was chairman of the Republican Congressional Campaign Committee and gave so much of his time and energy to the campaign that he neglected his own personal campaign and was defeated. But in 1938 his district again showed its confidence in him, and he came back to us with a large majority. We all were glad to see him back. Our regret was that his too strenuous activities for the party and for the country broke his health, and he passed away.

He was one of the finest men I have ever known. He was one we could ill afford to lose.

Samuel Davis McReynolds

MEMORIAL ADDRESS
OF
HON. EWING THOMASON
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. SAMUEL DAVIS MCREYNOLDS, late a Representative from the State of Tennessee

Mr. THOMASON. Mr. Speaker, in paying lowly tribute to the memory of SAM D. MCREYNOLDS I do so in sorrow for the loss of an intimate and valued friend, as well as in the realization that there has gone forever from this Hall one of the noblest characters that ever graced it, one of the ablest Members of this body and one of the most sincerely beloved.

It was my good fortune to know him from the day I came to Congress until his death, in the prime of life and the fullness of his career. Our families became close friends, and I was associated with him in his hours of relaxation and in his day's work. In all relationships I found him to be a man of uncompromising integrity, ample vision, sympathetic understanding, and profound judgment.

As chairman of the Committee on Foreign Affairs he occupied one of the most important posts in the House of Representatives, and to his sound wisdom and conscientious devotion to the highest interests of his country is largely due the neutrality legislation that is one of the great legislative achievements of this generation.

The example he has left of adherence to the highest principles of living will serve as inspiration to us he has left behind to lead lives of more noble purpose.

May I close with a few lines of Swinburne:

> Content thee, howsoe'er, whose days are done;
> There lies not any troublous thing before,
> Nor sight, nor sound, to war against thee more,
> For whom all winds are quiet as the sun,
> All waters as the shore.

Chester Castle Bolton

MEMORIAL ADDRESS
OF
HON. ROBERT F. RICH
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CHESTER CASTLE BOLTON, late a Representative from the State of Ohio

Mr. RICH. Mr. Speaker, I wish to join in paying tribute to the memory of my late colleague and fellow Member CHESTER C. BOLTON from the State of Ohio. Throughout his career of public service he gave himself unstintingly in the performance of his many and arduous duties, and he served the State of Ohio for many years. His sterling personal qualities and outstanding ability won for him the esteem and respect of all with whom he came in contact. It has been my privilege and pleasure to know and work with CHESTER BOLTON. His death came as a great shock to his host of friends throughout the Nation. His life was marked by many worthy achievements, and his name will long be remembered as that of one who wrought much and well for the district in which he lived and the State and Nation to whom he devoted his life.

Chester Castle Bolton

MEMORIAL ADDRESS
OF
HON. JOHN M. VORYS
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CHESTER CASTLE BOLTON, late a Representative from the State of Ohio

Mr. VORYS of Ohio. Mr. Speaker, I want to add my word of appreciation of CHESTER BOLTON as a statesman and as a friend. He literally gave his life to the public service. He had business and other interests which might have completely absorbed his time and interest. Instead, he threw himself without hesitation and without reservation into the solution of the public problems of his day. We often hear it said, "Why do not our men of means, education, and background go into politics?" CHESTER BOLTON was just such a man.

I first knew him when he was serving in the Ohio Senate. He was then chairman of the taxation committee, on which

I served, and spent himself on the tedious and undramatic problems of the Ohio taxation system of that era, because he knew those problems were of vital importance.

When he came to Congress he served on the Military Affairs Committee, because he knew that in that peaceful era the undramatic problems of our Military Establishment were of vital importance to our country. Later, when the solution of fiscal and budgetary problems became so important that they involved our national defense, he transferred to the Appropriations Committee. It was in the intimate, exacting work of a committee that he showed his great talents, his broad background, his sane judgment, and common sense. He could say no and yet say it tactfully. He had the ability to aid in solving differences of opinion without sacrificing principle. His mark is on much of the legislation that governs the State of Ohio and the Nation.

He was a loyal and intelligent Republican. He sacrificed his health in his intense service as chairman of the Republican congressional committee. He had faith in his party, understood the proper functioning of parties in a democracy, and worked for good government under Republican leadership.

With all his great services to his State and his country, CHESTER BOLTON lives first in my memory as my friend. He first befriended me when I came as a newcomer to the Ohio Senate when he was an older member. He befriended me when I came into Congress as a newcomer, and he had already had years of service. In many little ways, and in many important ways, he gave suggestions and practical help to me. He was never patronizing and never domineering; he was friendly.

The memories of his last days of service will remain with me as an inspiration. He was sick and knew it, but he carried on his work as a Congressman, sacrificing his comfort and strength, risking his very life, and he did it cheerfully. His memory lives on with all who knew him. In years to come, whenever an example is needed of one who went into public service as a way of life instead of for a living, there will be many who will say, as I will, "Let me tell you about CHESTER BOLTON."

Thomas Sanders McMillan

MEMORIAL ADDRESS
OF
HON. ROBERT L. DOUGHTON
OF NORTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. THOMAS SANDERS MCMILLAN, late a Representative from the State of South Carolina

Mr. DOUGHTON. Mr. Speaker, it is with a sense of profound respect that I endeavor to express my feelings over the loss of our esteemed colleague the Honorable THOMAS S. MCMILLAN, of South Carolina.

His passing is a distinct loss to the House of Representatives in which he served and gave of his energies and wise counsel for nearly 14 years, and to his State and district, which he so ably represented. To me, it was the loss of one of the most lovable characters I have ever been privileged to call my friend.

Mr. MCMILLAN was educated at the Orangeburg Collegiate Institute and the University of South Carolina, receiving the degrees of A. B., L. I., and LL. B. In 1916 he was elected to the House of Representatives of South Carolina and served for 8 years continuously. His service was such that he was first elected speaker pro tempore and later speaker of the house. Mr. MCMILLAN declined reelection to the State legislature, but the people of his congressional district in November 1924 chose him to represent them in the Congress of the United States.

His unselfish devotion and tireless work soon endeared him to his colleagues, and it was but a short while until he rose to membership on the important Committee on Appropriations, where he was serving at the time of his death as chairman of the Subcommittee on State, Justice, Commerce, and Labor.

No Member enjoyed the respect and confidence of his colleagues more than did TOM MCMILLAN. Intellectually honest, always candid, sincere, and straightforward in his handling of bills on the floor. Throughout his long, eventful, and distinguished public career, both in the legislature of his State and in the Congress of the United States, he followed the path of duty outlined clearly and unmistakably by a conscience that was responsive always to the noblest impulses of true manhood.

His life was characterized always by intense patriotism and devotion to duty. His love for his country was surpassed by no man.

His career has been notable. His life work has been worth while and full of works and deeds well done.

In his death those of us who were so closely associated with him experience a strong sense of personal loss. We all miss him, not only now, but will in the future. He was a man we all loved, because he had the qualities of mind and heart which endeared him to those who knew him. He has finished his work, he has gone to his reward, but we are happier because we knew him and the world is better for his example.

Bert Lord

MEMORIAL ADDRESS
OF
HON. ROBERT F. RICH
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. BERT LORD, late a Representative from the State of New York

Mr. RICH. Mr. Speaker, I wish to join in paying tribute to the memory of my late colleague and fellow Member, BERT LORD, from the State of New York. Throughout his career of public service he gave himself unstintingly in the performance of his many and arduous duties. His sterling personal qualities and outstanding ability won for him the esteem and respect of all with whom he came in contact. It has been my privilege and pleasure to know and work with BERT LORD. His death came as a great shock to his host of friends throughout the Nation. His life was marked by many worthy achievements and his name will long be remembered as that of one who wrought much and well for the district in which he lived and the State and Nation to whom he devoted his life.

Thomas Sanders McMillan

MEMORIAL ADDRESS
OF
HON. JOHN TABER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. THOMAS SANDERS MCMILLAN, late a Representative from the State of South Carolina

Mr. TABER. Mr. Speaker, THOMAS S. MCMILLAN served in Congress for 15 years. A large part of that time he was on the Committee on Appropriations and on subcommittees on which I served. I became very well acquainted with him

and learned to respect and admire him tremendously. He was courageous and had the very best interests of his country at heart. He overtaxed his strength because of the devotion which he gave to his work and that caused his untimely death.

Our sincerest and deepest sympathy should go to his widow and his sons.

Chester Castle Bolton

MEMORIAL ADDRESS
OF
HON. GEORGE H. BENDER
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CHESTER CASTLE BOLTON, late a Representative from the State of Ohio

Mr. BENDER. Mr. Speaker, the bitterest test to which any man can be put is the test of public office. With pitiless antagonists, critical constituents, ever-alert newspapers, seeking the flaws in his armor, the elected public official must be a great man indeed who escapes adverse criticism. CHESTER BOLTON was such a man. In all his years of public life, from the day he began serving his community as a member of the Lyndhurst Council to the day of his death as a leading Member of the House of Representatives of the United States, no opponent, no American, raised his voice to challenge the integrity of Congressman BOLTON.

His integrity was above suspicion. His love of duty was above life itself. For if ever a man fell in line of battle, CHESTER BOLTON was one of them. Knowing full well that his health was jeopardized, knowing that his physicians had urged him to stop all unnecessary exertion, he insisted upon running for Congress in 1938. The effort taxed his strength unbearably. But Congressman BOLTON would have been first to say that his sacrifice was not in vain. His public career was an integral part of his personality. When he was elected to his first major political post, the State Senate of Ohio, he told his friends, "This is what I want more than anything else."

Unlike so many Americans of our generation, CHESTER BOLTON regarded public service as an opportunity which could not be ignored. He cherished the tradition of devoted and conscientious effort on behalf of his people. Like the men and women who founded this Nation, he looked upon the holding of public office as the highest goal of the State. Government, the direction of national policies, these were the most important matters in the life of Congressman BOLTON.

We would do well to inculcate into the youth of our day the spirit of CHESTER BOLTON. Far too many of them look upon public office as a plague to be avoided. They regard politics as corrupt, forgetting that the government of mankind must always be mankind's noblest task. CHESTER BOLTON never forgot this fundamental democratic truth. His experience in business convinced him that there was need in government for men of sound vision, gifted with a deep interest in facing the facts and the future. In 1923, he sought and gained election to the State Senate of Ohio. By 1927 his outstanding ability won him the post of Republican floor leader of the senate. His expert knowledge of the difficult problems confronting our State government had won the commendation of his friends and the respect of his opponents. By 1929, his community and his State recognized that he was ready for broader ressponsibilities. He was appointed to Congress when Theodore Burton was elected to the United States Senate; and in the House of Representatives he remained from 1929 to 1936. To the House he brought a businessman's perspective and a trained student's mind. His early experiences as a member of the first War Industries Board, his position as Assistant Secretary of War, stood him in good stead. On the vitally important Appropriations Committee of the House he was a leading influence. In the deliberations of the Rivers and Harbors Committee, he was the Middle West's foremost representative. To the city of Cleveland, which gave him birth, he brought a new vision of a great and growing port, receiving the ships of foreign nations, lining her shores with commerce from every part of the globe.

In the House, as in the State senate, his outstanding abilities brought him quick recognition. By 1933 he was chosen to head the Republican National Congressional Committee, directing the campaigns of the 435 Republican candidates for election to the House. He worked day and night, battling for the principles in which he believed. When others of his party timidly counseled "cautious diplomacy," CHESTER BOLTON refused to compromise with principles. The mischief he saw about him, unrestrained spending, the growth of dictatorial bureaucracy, he denounced.

The struggle was too much. It undermined his health, taxing a great and noble heart with a strain too severe for human body to bear. But CHESTER BOLTON would not have willed it otherwise. He had long determined to give himself to the people of America. In a better day, under circumstances more favorable to the Republican Party, he would have become the greatest figure in the entire Nation. Every qualification which the American public demands of its leadership he had in abundant measure. By training, by temperament, by belief in the great traditions which underlie the structure of our Nation, CHESTER BOLTON was eminently fitted for the highest office within the gift of an enlightened citizenry.

Few men of means find time to devote to the service of their people. Their lives become bound up with their own concerns. Their aloofness from public problems becomes a handicap when they seek office. Ordinary folks are suspicious of their motives. No man or woman, no matter how humble his origin, was suspicious of CHESTER BOLTON. He was the friend of all, rich, poor, white, or black. To everyone he rendered the respect which all men must feel for their fellows. His generous hand, strengthened and supported by the most gracious of wives, built great institutions for posterity. His generous heart, with unlimited kindliness, turned no one away unheeded.

His passing leaves us the poorer. A great man, standing strong against the sky, has fallen in action, a soldier bravely doing his duty to the last. The Twenty-second District of Ohio has lost a great spokesman. The people of America have lost a great public-spirited citizen. His memory will endure in the minds of all those who honor public life as a source of inspiration to guide them for years to come.

Thomas Sanders McMillan

MEMORIAL ADDRESS
OF
HON. ROBERT F. RICH
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. THOMAS SANDERS MCMILLAN, late a Representative from the State of South Carolina

Mr. RICH. Mr. Speaker, I wish to join in paying tribute to the memory of my late colleague and fellow Member, THOMAS S. MCMILLAN, from the State of South Carolina. Throughout his career of public service he gave himself unstintingly in the performance of his many and arduous duties. His sterling personal qualities and outstanding ability won for him the esteem and respect of all with whom he came in contact. It has been my privilege and pleasure to know and work with THOMAS MCMILLAN. His death came

as a great shock to his host of friends throughout the Nation. His life was marked by many worthy achievements, and his name will long be remembered as that of one who wrought much, and well, for the district in which he lived, and the State and Nation to whom he devoted his life.

William Albert Ashbrook

MEMORIAL ADDRESS
OF
HON. JOHN M. VORYS
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. WILLIAM ALBERT ASHBROOK, late a Representative from the State of Ohio

Mr. VORYS of Ohio. Mr. Speaker, I wish to be among those to pay a word of tribute to WILLIAM A. ASHBROOK at this time. He served in the district next to mine. For years I had heard of the fine service which Congressman ASHBROOK rendered to his constituents, but I had never met him. When I was elected there were many things I had to know immediately about the details of life and work in Washington as a Congressman. A friend of mine asked Congressman ASHBROOK if he would see me and talk to me. Although he was on a sickbed at the time, he sent me a cordial invitation to come and see him, and I went. From his sickbed in his home he gave me helpful, homely advice about my coming service and work which have stood me in good stead ever since. Although he and I were of opposite political parties he did not let this interfere with a friendship which lasted up to the time he left us in his last sickness. I am one among many who knew WILLIAM ASHBROOK as a friend and as a fine man, and I honor his memory.

Marvel Mills Logan

MEMORIAL ADDRESS
OF
HON. NOBLE J. GREGORY
OF KENTUCKY
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. MARVEL MILLS LOGAN, late a Senator from the State of Kentucky

Mr. GREGORY. Mr. Speaker, again the Grim Reaper has reached out and has taken this time from our midst the Honorable MARVEL MILLS LOGAN, a true Kentucky gentleman, bringing to a close an outstanding and lifelong record of service both to State and Nation.

Senator LOGAN came from humble surroundings in the hills of Edmonson County, made his record which will be everlasting, and now sleeps in peace in the soil of Kentucky which he loved so well. His career as a public servant was outstanding and unusual, having served in many capacities, having been honored with many positions, starting with service to his own county, then advancing to positions of trust and importance in the State government and later attaining a position of leadership in the National Government. As a lawyer, judge, and legislator he was devoted to duty, energetic, and conscientious in his labors, and loyal to his friends. In fraternal circles he was a leader, having served as grand sire of the Independent Order of Odd Fellows. He was gracious and affable at all times, well versed in the laws of his State and Nation, and a Christian gentleman, and at no time did he permit any personal duties to take his time from his work in the church of his choice. For many years he taught a Sunday-school class in his home city of Bowling Green, and after coming to Washington he assumed this same responsibility and at the time of his death was teaching a large men's class in Washington.

The cardinal principle of his life was one of service to those less fortunate, and today many useful citizens of this Nation owe to him a debt of gratitude for his unselfishness and his interest in aiding them to obtain education and attaining a position of usefulness in life. I think Leigh Hunt must have had in mind a man like Senator LOGAN when he wrote Abou Ben Adhem, describing one who loved his fellow men.

In the passing of this great man, a vacancy has been created which will never be filled. The Nation has lost a sincere and able statesman, his family an indulgent and loving husband and father, and I have sustained a deep personal loss in the passing of a true friend and counselor.

Regardless of the kind of monument which may be erected to his memory, the great and towering monument of public achievement, benefaction, and patriotic service which he left will continue to live in the hearts of a grateful people which is best expressed in the lines of the one who said:

> You may break, you may shatter the vase, if you will,
> But the scent of the roses will hang 'round it still.

Bert Lord

MEMORIAL ADDRESS
OF
HON. JOHN TABER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. BERT LORD, late a Representative from the State of New York

Mr. TABER. Mr. Speaker, the Honorable BERT LORD gave 30 years of his life to public service. He was an able man and had the absolute confidence of the people of his district, as much perhaps as any man ever could have. In the House of Representatives he brought to every question a mature judgment based upon sound thinking, long experience, and careful study. He was ever ready to fight for the interests of his people and of his district, but most of all, he had the welfare of the entire country at heart. He had a profound influence upon many Members, and it was an influence that tended to lead them in constructive paths and to break down animosities. He enjoyed people, and enjoyed very much being in the company of others, and was a delightful companion.

My sympathy goes out the fullest to his widow.

William Irving Sirovich

MEMORIAL ADDRESS
OF
HON. ROBERT F. RICH
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. WILLIAM IRVING SIROVICH, late a Representative from the State of New York

Mr. RICH. Mr. Speaker, I wish to join in paying tribute to the memory of my late colleague and fellow Member WILLIAM SIROVICH, from the State of New York. Throughout his career of public service, he gave himself unstintingly in the performance of his many and arduous duties. His sterling personal qualities and outstanding ability won for him the esteem and respect of all with whom he came in contact. It has been my privilege and pleasure to know and work with WILLIAM SIROVICH. His death came as a great shock to his host of friends throughout the Nation. His life was marked by many worthy achievements and his name will long be remembered as that of one who wrought much and well for the district in which he lived and the State and Nation to whom he devoted his life.

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. CHARLES A. WOLVERTON
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. WOLVERTON of New Jersey. Mr. Speaker, it was my privilege to serve in the House of Representatives with our late colleague, the Honorable CARL E. MAPES, of Michigan, for upward of 14 years. During most of that time I have been associated with him in the work of the Committee on Interstate and Foreign Commerce. The intimate and close contact that this service afforded gave ample opportunity to know CARL E. MAPES in a way that could not fail to create respect for him as a man, and confidence in his ability, integrity, and honesty of purpose as a legislator. I consider it a rare privilege to have had this close contact with a man of such outstanding character and virtue. I feel richer and better because of the influence of his life. In the highest sense of the word he thought only in terms of what was right from the standpoint of the principle involved. Decisions with respect to matters of legislation were made by him solely upon the basis of principle. He was strongly of the opinion that party advantage could only be gained by deciding issues upon this basis, and to do otherwise would not provide permanent but only temporary advantage.

Another quality that was very pronounced and made for him a host of friends was the kindly, friendly, and always considerate manner he showed toward all who approached him on any subject and at any time. He always seemed to have time to listen and be interested in the problems of all who sought his advice and counsel. His voice was never raised in anger either in debate on the floor of the House, nor in private conversation. Harsh and unfriendly words were not a part of his vocabulary. As a result there radiated from him a fine friendly influence that cast its beneficent effect over those with whom he came in contact. He lived each day as one who lived "in a house by the side of the road to be a friend to man." His memory will linger long and favorably with those who have known his high character and strict adherence to what was right and just.

Mr. Speaker, it was also my privilege to be one of those who was serving with him in the work of this House, in the distant city of New Orleans, when after a day filled with service to his immediate constituents as well as of the Nation at large he suddenly passed from our midst. He was faithful unto the end. The serenity of his face as we looked upon him was typical of the life he lived in public and in private. It was an exemplification of that noble and inspiring thought of the poet expressed in the choice words of Thanatopsis:

> So live, that when thy summons comes to join
> The innumerable caravan, which moves
> To that mysterious realm, where each shall take
> His chamber in the silent halls of death,
> Thou go not, like the quarry slave at night,
> Scourged to his dungeon, but, sustained and soothed
> By an unfaltering trust, approach thy grave,
> Like one who wraps the drapery of his couch
> About him, and lies down to pleasant dreams.

Mr. Speaker, it was also my sad privilege to accompany the body of our departed colleague from the city of New Orleans, where he had fallen while in the performance of public duty, to his last resting place in his home city of Grand Rapids, Mich. Never shall I forget the outpouring of citizens, of every race and creed, who mourned his loss. Words fail me to adequately and properly express the thoughts and feelings of those who had known him for the many years that he had served them in public office. But, at a meeting of the Grand Rapids Rotary Club, held on December 14, 1939, the thoughts and feelings of the people of the city found expression in the beautiful, forceful, and deserved eulogy delivered by Hon. Fred M. Raymond, judge of the Federal District Court of Western Michigan. Judge Raymond spoke not only as a leading citizen but also as an intimate friend of CARL E. MAPES, when he said:

Mr. President, members of the Rotary Club, and guests: A community, a State, and many of his associates in a far wider sphere of usefulness stand today at the bier of a great man to pay a last tribute of respect. In the presence of this deep sorrow, I shall not attempt to review the life work of CARL E. MAPES. I can find words only to express in that simple way which would have been most pleasing to him my immeasurable grief at his untimely passing.

His life requires no poor eulogy of mine to add to its luster. In a world of hates and fears, of tumult and confusion, of misunderstanding and conflict, he stood calm and true and strong. Loyalty and service were his guiding stars. I have never known a sweeter, purer life, honest in every thought and deed, generous in every impulse. He was as pure-minded as a child and gentle as a woman. His life was not only noble, manly, and pure, it was also in the highest degree, forceful. He despised intrigue and cunning and condemned any cause which could not triumph in the light of day.

It is sometimes asked, Can a man in these days be absolutely honest? Can a man actually live a life of service devoted to his fellow men? Can a man champion always the rights of the downtrodden? Can a man in public life refuse to bow to the political boss? Can a man do all of these things and succeed? The affirmative answer is the life of CARL E. MAPES.

I know of no man of whom it could be more truly said that he had so lived that he "approached his grave, sustained and soothed by an unfaltering trust, like one who wraps the drapery of his couch about him and lies down to pleasant dreams."

Emerson has said:

"It is easy in the world to live after the world's opinion: it is easy in solitude to live after our own: but the great man is he who, in the midst of the crowd, keeps, with perfect sweetness, the independence of solitude."

Measured by these standards, or by any other, CARL MAPES was a great man. He knew not only the great but he knew the humble. He was one of whom it can be truly said that he "walked with kings and kept the common touch." The last few moments of his public life were spent championing the rights of the weak against the strong and the interests of his beloved State of Michigan. On late Monday afternoon of this very week he refused to concede that the rich and prosperous oil fields of other States should not be subjected to the same limitations and restrictions as the less-productive oil fields of his own State.

Loyalty and service were his watchwords. Without induction into any service organization, without insignia of office, without form or ceremony, his was a life of service. As nearly as may ever be, he lived the life of the perfect Rotarian.

Mr. President, may I suggest that we stand for a moment in silence in honor of his memory.

In conclusion, I wish to mention a tribute paid to our colleague by one of the newspapers of Grand Rapids. No finer tribute could ever be paid to anyone who, like CARL E. MAPES, had given himself to the service of the public. On the editorial page of the paper there was a picture showing a father and son standing before a picture of CARL MAPES that hung upon the wall. The father, looking intently at the picture, pointed his finger toward it and said to his son, "There, my boy, was a true American." This, in a few words, carries the thought we have sought to express. Our departed colleague was in every sense of the word "a true American."

Cassius Clay Dowell

MEMORIAL ADDRESS
OF
HON. JOHN TABER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CASSIUS CLAY DOWELL, late a Representative from the State of Iowa

Mr. TABER. Mr. Speaker, CASSIUS C. DOWELL, after a long period of service in the Iowa Legislature, came to Congress first in 1915 and, with the exception of the Seventy-fourth Congress, served continuously. He was an able parliamentarian, an able debater, and, I think, the best presiding officer in Committee of the Whole that I have seen

in the House. He was the father of the present Federal-aid highway system.

He was exceedingly active and loyal in his work on the floor and was a man of the finest type and of the best judgment.

The country can ill afford to lose a man like him.

John Andrew Martin

MEMORIAL ADDRESS

OF

HON. ROBERT F. RICH

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 24, 1940

On the life, character, and public service of Hon. JOHN ANDREW MARTIN, late a Representative from the State of Colorado

Mr. RICH. Mr. Speaker, I wish to join in paying tribute to the memory of my late colleague and fellow member, JOHN A. MARTIN, from the State of Colorado. Throughout his career of public service he gave himself unstintingly in the performance of his many and arduous duties. His sterling personal qualities and outstanding ability won for him the esteem and respect of all with whom he came in contact. It has been my privilege and pleasure to know and work with JOHN MARTIN. His death came as a great shock to his host of friends throughout the Nation. His life was marked by many worthy achievements and his name will long be remembered as that of one who wrought much and well for the district in which he lived and the State and Nation to whom he devoted his life.

George Henry Heinke

MEMORIAL ADDRESS

OF

HON. CARL T. CURTIS

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 24, 1940

On the life, character, and public service of Hon. GEORGE HENRY HEINKE, late a Representative from the State of Nebraska

Mr. CURTIS. Mr. Speaker, I wish to say a few words concerning the life and work of Representative GEORGE HEINKE of the First Nebraska District. He was a distinguished lawyer, patriot, and statesman.

I have known Mr. HEINKE for a long time. I first became acquainted with him in the County Attorneys' Association of Nebraska. I was then county attorney of my home county, and Mr. HEINKE represented Otoe County. He was well liked and respected. He was an able lawyer and knew the law; in addition to that he possessed a courage that was admired by everyone. When we came to Congress at the beginning of the Seventy-sixth Session, I found Mr. HEINKE the same lovable, genial, fair, independent, and courageous individual. I have referred to him as a lawyer, patriot, and statesman. He was all three, but, in addition to that, he was my friend. I was grieved at his passing, and I cherish his memory.

I journeyed back to Nebraska with the funeral train to pay the respects of this House for our departed Member. The people of his home town, Nebraska City, were in sorrow. Men and women, young boys and girls of all walks of life, both rich and poor, high and low, came to pay their respects to the man they admired—GEORGE HEINKE. It was, indeed, fitting that the pastor of the church of which Mr. HEINKE was a member, in his funeral sermon likened the courage, honesty, and strong will of Mr. HEINKE to the qualities of the Apostle Paul.

GEORGE HEINKE was not one to boast of his piety, yet there was something in his make-up that convinced me beyond all doubt that there was a spark of the divine in his breast. It was that he loved little children and little children loved him. There was nothing that he would enjoy more than to take little tots on his knees and tell them stories and sing to them. They would look up into his face and know that there was a real friend. He is the father of three manly boys who would be a credit to any man.

Representative HEINKE made a distinct contribution to the Seventy-sixth Congress. Commenting on this, one of the leading daily papers in the State of Nebraska said upon his passing:

> Representative GEORGE H. HEINKE, of the First Nebraska Congressional District, who died Tuesday night of injuries received in an automobile accident, went to Congress imbued with some definite ideas about government. His philosophy was that the Government should not spend beyond its means, that bureaucracy should not be extended, that Congress should keep control over appropriations and not issue blank checks to the executive department, that individual initiative should be encouraged. His enemies called him a reactionary, but the policies he opposed have not yet proven that they can lead this country into the promised land.

When I ponder upon the memory of my friend, I think of the lines of the song, I Would Be True:

> I would be true, for there are those who trust me;
> I would be pure, for there are those who care;
> I would be strong, for there is much to suffer;
> I would be brave, for there is much to dare.

William Irving Sirovich

MEMORIAL ADDRESS

OF

HON. SCHUYLER OTIS BLAND

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 24, 1940

On the life, character, and public service of Hon. WILLIAM IRVING SIROVICH, late a Representative from the State of New York

Mr. BLAND. Mr. Speaker, for many years I served with Hon. WILLIAM I. SIROVICH, a Member of this House from the Fourteenth Congressional District of New York. Not only did I serve with him in the House but he was next to me on the Committee on Merchant Marine and Fisheries of which I am chairman. He became expert in the work of that committee and faithfully attended its hearings and deliberations. In his enthusiasm to do what was best he solicited information from all sources where it might be found. He was keen to promote the best interests of the merchant marine and of the various subjects falling within the jurisdiction of the committee. Whatever the subject, whether pertaining to the merchant marine or fisheries, or any of the other subjects under the jurisdiction of the committee, he was ready and willing to give the best that was in him.

The jurisdiction of the Committee on Merchant Marine and Fisheries extends not only to the merchant marine and fisheries, but also to the Coast Guard, Coast and Geodetic Survey, Lighthouse Service, marine hospitals, and Panama Canal. In all of these subjects Dr. SIROVICH became an expert, and his opinion was sound. Many of his views are now law. Once convinced of the justice of his course, he devoted himself unsparingly to the task of translating his convictions into law.

Dr. SIROVICH was popular. His constant desire to help other Members with their problems made them his friends, and they were considerate of his appeals when matters pertaining to his committee required attention.

Dr. SIROVICH was genial, friendly, forceful, and a capable legislator. He held the best interest of his country as his first consideration. Even when his health should have precluded his participation in the deliberations of the House or

his committee he was present with a constant desire that those whose interests he championed might be fully represented.

Dr. SIROVICH was vigilant and active at all times to protect and promote the best interests of his constituents. He never spared himself where they were concerned. He set an example of service which all of us may emulate and will find it impossible to surpass.

I do not know any way in which I can more fully present my views of his service, and the views of my committee on which he served so efficiently, than by including here a copy of the resolution of the Committee on Merchant Marine and Fisheries unanimously adopted on January 4, 1940, in appreciation of the fine, faithful, and devoted service he rendered at all times.

This resolution tells the story of his service with the committee more eloquently than any words of mine. On motion of his colleague from New York, Congressman JAMES O'LEARY, a member of the committee, the following resolution was adopted and appears in the minutes of the committee and in the CONGRESSIONAL RECORD, Seventy-sixth Congress, third session, age 46:

Whereas during the recent recess of Congress this committee has suffered the loss of one of its members who has contributed materially to its work in the past and has rendered most valuable assistance in the success of the committee's legislative program: Now, therefore, be it

Resolved, first, that the Committee on Merchant Marine and Fisheries of the Seventy-sixth Congress records its appreciation of the splendid service on the committee of Hon. WILLIAM I. SIROVICH, former ranking Democratic member of the committee and late a Member of the Seventy-sixth Congress of the United States from the Fourteenth Congressional District of New York;

Second, that this committee realizes that in the death of Hon. WILLIAM I. SIROVICH the Nation has lost one of its most patriotic and loyal citizens, the House of Representatives of the United States has lost a wise, highly cultured, and industrious Member, and this committee has lost a zealous, courageous, and enthusiastic champion and supporter of legislation for the upbuilding and preservation of the American merchant marine, the improvement of working conditions on board ships, and the best interest of all the various subjects coming within the scope of the jurisdiction of this committee;

Third, that the committee will miss the assistance and guidance of Dr. SIROVICH in its deliberations.

Fourth, that the chairman of this committee is hereby authorized to request that a copy of this resolution be made a part of the CONGRESSIONAL RECORD; and

Fifth, that the clerk of the committee is hereby directed to make this resolution a part of the records of the committee and to transmit a copy of this resolution to the family of the deceased.

Thomas Marion Eaton

MEMORIAL ADDRESS
OF
HON. LELAND M. FORD
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. THOMAS MARION EATON, late a Representative from the State of California

Mr. LELAND M. FORD. Mr. Speaker, on this day devoted to the memory of our departed colleagues, I desire to pay my tribute to THOMAS M. EATON, of the Eighteenth Congressional District, State of California. In the years I have known TOM EATON we worked together and I had an opportunity to observe him in private life and in public service, and those who had this opportunity grew to admire, respect, and love him. Prior to his election to serve as mayor of Long Beach, he had endeared himself to the residents of that beautiful city by his sterling qualities and civic pride. He was easily the outstanding citizen of Long Beach for many years. During the World War he served his country as an ensign in the United States Navy.

When TOM EATON came to Congress he was full of enthusiasm to serve his congressional district, his State, and country in that body, and his ideals were those of a true American citizen. It was a sad shock to us all when the illness came to him which resulted in his death within a few months. During this time and in spite of his suffering, he assiduously and faithfully carried on his duties from his hospital bed and was entirely absorbed in his work. Until the very last he had always before him his standard of faithfulness to a trust placed in him.

In the death of TOM EATON I lost a friend whose memory will always linger, and in closing I wish to pay my tribute to one whose friendship and example will always be cherished.

Wallace Edgar Pierce

MEMORIAL ADDRESS
OF
HON. JOHN TABER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. WALLACE EDGAR PIERCE, late a Representative from the State of New York

Mr. TABER. Mr. Speaker, WALLACE E. PIERCE came to Congress in mature years after a long and successful career as an active trial lawyer. He readily made his place in the House, where he was held in the highest esteem. He took a prominent part in the work of the Judiciary Committee. Although he was serving his first term, he was a very valuable legislator.

His personal friendships were as varied and as devoted as those of any man on the floor, and I know of no one who has created so fine an impression in the time that he served here.

Marvel Mills Logan

MEMORIAL ADDRESS
OF
HON. BEVERLY M. VINCENT
OF KENTUCKY
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. MARVEL MILLS LOGAN, late a Senator from the State of Kentucky

Mr. VINCENT of Kentucky. Mr. Speaker, this is a sad occasion for me, and yet I can rejoice that the Congress of the United States in these days of stress has seen fit to set aside this day in order that we may pay due homage and tribute to the life and memory of a great man and a great statesman, the late Honorable M. M. LOGAN, of Kentucky. He was the greatest man I ever knew. He was the best man I ever knew. Seldom, if ever, do we find both of these attributes blessing one individual, but he was lavishly endowed with these qualities.

He was born in 1875 in Edmonson County, Ky. His father and three of his father's brothers fought through the Civil War, and their stories of travels, hardships, and battles thrilled him, and his alert mind was stirred by these exploits. He hungered for information, and at once became a great student of history and government. He was a natural student. It appeared that he learned about everything without laborious study. His mind was so keen that he did not have to be told anything but once.

He was admitted to the bar when he was 20 years of age and at once became a great lawyer. His reputation grew so fast that in 1915 he was nominated in a State-wide primary for the office of attorney general of the State of Kentucky

without opposition, a peculiar honor that no other person has ever been accorded in the State of Kentucky. After this he was called by the people to the office of judge of the court of appeals of his State, and he soon became chief justice of this court. In 1930, while serving as chief justice, he was called to serve Kentucky in the United States Senate.

He served with great distinction in the Senate, as you well know, until his death on October 3, 1939. He soon became a leader in the Senate and was responsible for much beneficial legislation. He was considered by his colleagues as a great statesman and patriot.

It is befitting his memory that we pause today and cease our pressing duties to pay tribute to the life and memory of this great man.

I will not go into detail in naming the many official acts of Senator LOGAN. They are too numerous to repeat here, and they are well known to you. Future generations will point to these achievements, for they will be an everlasting monument to the memory of this man. These achievements are written in bold type in the records of his State and the Nation, and I will leave them as they came from his hands.

I want to now turn to the man himself. He was the kindest man I ever knew. No matter how poor or how ignorant or how lowly in station, no one was ever turned away that came to him for help. He was wholly unselfish. He made a lot of money but he gave it all away to help others. I recall once when he had collected a very large fee in an important case that he had won, and one of his friends said: "What are you going to do with all of this money?" His friend added that he ought to invest it in real estate. LOGAN rebuked his friend when he replied and merely said: "I am going to invest this money in boys and girls." He went to an orphans home and selected several boys and sent them to college. Many young men now making their mark in the world were picked up by him in an orphanage and sent to college. He often stated that money was the cheapest thing in the world, and that manhood and character were the most priceless. He was the champion of the weak and oppressed. His philosophy of government was "the purpose of government is to protect the weak and restrain the strong."

From boyhood to his death he was an ardent follower of the "Lowly Nazarene." For 30 years he taught a Sunday School class, and it was his proud record that he never missed a single Sabbath day. He was a pillar of his church. He gave lavishly of his time and money for the support of every good cause that came his way. He lived a devoted Christian life.

He was a leader in the fraternal world. He rose to the highest office in the Odd Fellows Order, having been elected Grand Sire of the World.

He was a kind and affectionate father to his one daughter and three sons who survive him. He lent a helping hand to every person that he met who needed assistance. He contended that you could only serve God by serving humanity, and he went about everywhere doing good. He is about the only man I ever knew who loved his enemy. Often when he was attacked unfairly by someone he would merely say: "The poor fellow does not know any better, and I shall not take any advantage of him because he is unfriendly to me." Many times his would-be enemy would turn and admire him and become his friend. He really and truly loved his fellow men, and he will live on in the hearts of his many friends. His life and his memory will inspire thousands to imitate his unselfish Christian life. I fear we shall never see his like again.

In my judgment, he was not only the greatest man I ever knew, but he was the best man I ever knew. Words cannot properly portray this man's life and deeds.

Once when a king had fallen it was said:

A prince once said of a king struck down:
"Taller he seems in death."
And the word holds good, for now, as then,
It is after death that we measure men.

Now a king of men has fallen. I will not say he is dead, for his life and deeds will live forever.

No; I cannot and I will not say
That he is dead.
He is just away!
With a cheery smile and a wave of the hand,
He has entered into that unknown land,
And left us dreaming, how very fair it
Needs must be, since he lingers there.
And you, O you, who the wildest yearn
For the old-time step and the glad return;
Think of him, passing on as fair in the love
Of there, as the love of here.
Think of him still as the same, I say.
He is not dead. He's just away.

He is as great in death as he was in life. His death was calm and majestic. He merely fell asleep when the Lord called him home.

The night shall be filled with music
And the cares, that infest the day,
Shall fold their tents like the Arabs,
And as silently steal away.

Wallace Edgar Pierce

MEMORIAL ADDRESS
OF
HON. ALBERT L. VREELAND
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. WALLACE EDGAR PIERCE, late a Representative from the State of New York

Mr. VREELAND. Mr. Speaker, it was my extreme privilege and honor to have known and associated with the Honorable WALLACE E. PIERCE, late of the Thirty-first District of New York.

In the short space of a year, through association not only on the floor but at the weekly meetings of the Wednesday Night Club, it was my pleasure to know and appreciate the fine character, ability, and knowledge of him whom we knew better as Wally. His thoughtfulness, graciousness, and desire to be of service to any of his friends were always foremost in his everyday task.

Last summer I had the privilege of spending 2 weeks in his congressional district on attending the Army maneuvers at Plattsburg and there found the high esteem that was had for him by all of his constituents and the high regard and respect for his ability that was evidenced by all who came in contact with him.

His passing was a great loss not only to his district but to the Congress and our country, and his will be a bright but difficult example for we who remain to live up to.

Cassius Clay Dowell

MEMORIAL ADDRESS
OF
HON. THOMAS E. MARTIN
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CASSIUS CLAY DOWELL, late a Representative from the State of Iowa

Mr. MARTIN of Iowa. Mr. Speaker, I am truly proud that it was my privilege to serve in the Seventy-sixth Congress with Hon. CASSIUS C. DOWELL, who so ably represented the Sixth District of Iowa.

Mr. DOWELL served his district in Congress for nearly 24 years and he left a record for faithful, conscientious work

and for accomplishment that will be a mark to challenge the best that is in all of us. His character and reputation in his home community, in his State, and throughout the Nation are of the highest.

Mr. DOWELL's service was especially outstanding in three particular fields. His work as chairman of the Roads Committee at the time the Federal road policy was being formulated in the early twenties brought this Nation to the forefront among the Nations of the world in the matter of road development. Those of us who have reason to vividly recall the horrible road conditions in the Middle West and in Iowa in particular before this Federal road program helped to pull us out of the mud will forever be thankful to Mr. DOWELL for his leadership in the development of that program.

Another field in which Mr. DOWELL's name will go down in history as a real leader is that of relief to the World War veterans. Every war veteran living in or near Mr. DOWELL's district has had many, many occasions to observe his great interest in their behalf, and many, many of them have had occasion to be thankful for his undying interest in their affairs and his ever-ready and helpful and friendly assistance in securing just recognition of their rights and fair adjustment of any claims they may have had.

The third field in which Mr. DOWELL had no peer is that of friendly acquaintance with all his constituency. I believe I am the only Member of Congress at this time who has had the delightful experience of campaigning with Mr. DOWELL in his own district, and as a fellow candidate for office in that district. It was, indeed, my own good fortune that I enjoyed this privilege, because Mr. DOWELL had a wealth of experience and a radiant personality that turned that experience to most effective and pleasant service to his entire constituency. It was, indeed, an inspiration to all of us who campaigned with him to observe the manifestation of his devotion to their problems and their interests.

I can say also that I have seen few men in public life who could greet as many individuals and call them by their names. Certainly no man was ever more universally greeted as a close friend.

Truly it can be said that Mr. DOWELL has won outstanding recognition for his accomplishments in public life, and the State of Iowa and the Nation today mourn his passing with deepest regret that his good work here has ended; but we are all happy to know that the influence of his good work will carry on.

Samuel Davis McReynolds

MEMORIAL ADDRESS
OF
HON. ROBERT L. DOUGHTON
OF NORTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. SAMUEL DAVIS MCREYNOLDS, late a Representative from the State of Tennessee

Mr. DOUGHTON. Mr. Speaker, during my almost 30 years of service in this House, many of its Members have been taken by death, but no event has moved me to more profound grief and sorrow than the passing of Judge SAM MCREYNOLDS. Since his election to Congress as a Representative from Tennessee in 1923 it has been my great privilege to be associated with him intimately not only as a colleague but as a friend.

Richly endowed by nature with every quality which humanity admires, SAM MCREYNOLDS was particularly well fitted by ability, background, and training for the successful performance of the duties which fell to him. No man in this body, since I have been a Member of it, commanded greater respect, admiration, and affection of his colleagues. His wisdom, his honesty, his industry, his calm judgment, and his earnest love and devotion to the welfare of this Nation marked him as outstanding in any company.

It was a gracious act of Divine Providence that in one of the most trying periods of the world's history we could have the benefit of his calm counsel and able guidance as chairman of the Committee on Foreign Affairs. In the discharge of his duties on this important committee, as in every other undertaking, Judge MCREYNOLDS exerted zealously and conscientiously the great all-around qualifications of mind and heart which he so abundantly possessed.

We have lost an outstanding colleague, an able, faithful, and industrious representative of his people, a true American, and a patriot. We have also lost a warm and devoted friend.

We can best revere his memory and demonstrate our devotion by consecrating ourselves anew to the principles and ideals he so valiantly advocated. May we prove ourselves worthy of his friendship and of his illustrious example.

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. WILLIAM P. COLE, JR.
OF MARYLAND
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. COLE of Maryland. Mr. Speaker, on December 12, 1939, in the city of New Orleans, a real American, CARL E. MAPES, died, while at work on his Nation's business attending hearings before a committee to which the Congress had assigned him.

It was my privilege during the past 8 years in the work of the Interstate and Foreign Commerce Committee of the House, of which he was ranking minority member, to be intimately associated with Mr. MAPES. The value of that experience and association is immeasurable in words. In the early part of the troublesome days of the depression period, we were frequently together on much of the important legislation reported by the committee. More especially do I recall, however, working together as members of the subcommittee investigating the petroleum industry, which committee had its inception in 1934 and has remained continuously in charge of oil legislation referred to the main committee since that time. Evidence of his active participation in the proceedings of the committee is found throughout its lengthy session. Knowledge of the subject which he frequently displayed and the vision and common sense reflected in legislation on the subject were due to his influence in no small degree, and are well known to his fellow Congressmen.

No words of mine could adequately eulogize CARL MAPES. He had the simplicity of the truly great, the gentleness of a child, the courage of his convictions, and an indomitable strength to accomplish what he felt to be right at all times.

Mr. MAPES died as he would have wished, serving the country he loved so well. He was active in the work of our committee during the entire day before his death, and it would be impossible to describe the deep sense of loss which the members of the committee felt upon learning of his death. Many fine tributes were paid to him by the leaders of the oil industry from all over the country, who were gathered in New Orleans for the petroleum investigation hearings. The hearings were adjourned and the members of the committee took his body home to Grand Rapids. I think no greater tribute could be paid to any man than the devotion and admiration displayed by the people of his home town. From the moment the committee arrived in Grand Rapids and until we left him in his final resting place, few could hope to

equal that display of devotion and real affection and, I am sure, none could excell it.

Among his true friends were many members of the Democratic Party, who loved him for his human worth and who did not hesitate to call upon his great ability and experience, but probably his best friends were the humble people from all corners of his district, who knew how genuine was his interest in them, in their work, and their families.

William Edgar Borah

MEMORIAL ADDRESS

OF

HON. COMPTON I. WHITE

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 24, 1940

On the life, character, and public service of Hon. WILLIAM EDGAR BORAH, late a Senator from the State of Idaho

Mr. WHITE of Idaho. Mr. Speaker, in commemorating the life and work of Idaho's illustrious statesman, the late Senator WILLIAM E. BORAH, there is presented for the RECORD a telegram to the members of the Wardner Industrial Union from President Stanly A. Easton, of the Bunker Hill & Sullivan Mining Co., in his tribute to the memory of Idaho's great Senator, always a stanch advocate of the rights of labor. President Easton said:

On this and many similar occasions proper and worthy tributes will be paid to Senator BORAH's memory because of his services to the Nation for over 30 years past in national and international affairs. This is as it should be. I now acknowledge and memorialize his devotion for over 40 years to the welfare of our community and all its citizens. It is unnecessary for me to remind you that he was the father of the Wardner Industrial Union. He wrote its articles of incorporation, its constitution and bylaws under which you now work. He has spoken at the miners' and smeltermen's picnic so many times in years past I cannot remember them all. On the numerous occasions when I have seen Senator BORAH at Washington and as a guest at my house and at other points he has never failed to express a genuine interest in the welfare of the Wardner Industrial Union and show a real pride in the part which he had in its development and well-being.

His career and the pattern of his political ideals have always been our inspiration and guide. I cannot recount all the services to us, but it is impossible for me to refrain from naming some. Senator BORAH was detained at Bonners Ferry a good many years ago until very late at night. Roads were then unimproved, but he rode all night long to keep a speaking engagement next day at the miners' and smeltermen's picnic. He arrived at my home about daybreak and had time only for 2 or 3 hours rest, breakfast, and a trip to the barber shop before appearing promptly to take his part in the morning's program.

Another typical instance. Right after the war one of our Kellogg youths was confined in a New England military prison because of a technical breach of discipline. His mother was feared to be on her deathbed and dearly wished to see the boy from whom she had been long separated. Senator BORAH was sent a telegram explaining the circumstances with assurance I would undertake personally to see that the young man did not break his parole if released for a home visit. The very same day I had a reply from Senator BORAH saying that the youth was released and that the balance of his sentence was remitted.

I could add numerous other occasions when this outstanding Member of the United States Senate and chairman of its most important committee gave time and attention to your and my welfare in far-off Idaho.

And so we say good-bye to our benefactor and good friend who has so suddenly left us at the height of his fame. "Well done, good and faithful servant, enter thou into the joy of Thy Lord."

In a brief summation of the great work and brilliant career of Senator BORAH, President R. L. Brainard, of the Kellogg, Idaho, Chamber of Commerce, stated in a glowing tribute:

"We are too close to current events to fully appraise Senator BORAH'S great contribution to America's national life, that will be the work of future historians. Senator BORAH championed many lost causes. They were worth fighting for, and some day America will catch up with them. In his death every good cause lost a fearless champion. He passed away in the full flower of his usefulness, and yet his life was peculiarly complete. When the summons came he left us the blessed memory of a life of great and lasting usefulness and a character rich in all the manly virtues."

Samuel Davis McReynolds

MEMORIAL ADDRESS

OF

HON. LUTHER A. JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 24, 1940

On the life, character, and public service of Hon. SAMUEL DAVIS MCREYNOLDS, late a Representative from the State of Tennessee

Mr. LUTHER A. JOHNSON. Mr. Speaker, when the House convened on July 11, 1939, and it became known that in the early morning of that day the Honorable SAM D. MCREYNOLDS had passed away, our entire membership was touched with sorrow, and the transaction of all business for the day was immediately dispensed with.

Before the motion to adjourn out of respect to his memory was passed a score or more of his colleagues paid tribute to his memory. Their remarks were all extemporaneous, but they breathed the honor, esteem, and affection in which he was held, and no more deep and genuine sorrow was ever voiced in behalf of any departed Member.

There was a reason for this spontaneous outburst of sorrow. One of the most popular, one of the most useful, and one of the most beloved Members had left us. One who for more than 16 years had labored, given of himself, his time, his talent, and his very life in serving his country in this great lawmaking body; and during that time, by his courage, his character, his indefatigable energy, and his intense love of humanity had won the affection and esteem of the entire membership upon both sides of the aisle.

It was my privilege to know him intimately and well. We became Members of this House at the same time, and we had been closely associated during our continuous service here. No one in the House or elsewhere knew him better or loved him more than I. Most of us can count on the fingers of one hand our intimate and most devoted friends, and SAM D. MCREYNOLDS was among that small and select group of mine.

If I should be called upon to mention his one outstanding trait, I would say that it was his loyalty to his friends and his fidelity to duty, which was second only to his love and devotion to his faithful wife, his only daughter, and his two little grandchildren, all of whom he idolized.

I saw him grow and his influence widen from a rookie Congressman to one of the real leaders of this House. It did not come suddenly. He was content to toil, to start at the bottom, first serving on minor committees, but to do each task assigned him well. He was not a headline seeker. He cared not for publicity or the sensational, but the consciousness of duty well performed was the reward he most coveted and desired. He was genuine. He despised hypocrisy and sham, and could not countenance it in others.

He was a man of profound and deep conviction, intense in his thoughts and language, and when once his judgment was deliberately formed he fought unswervingly to the end for what he conceived to be right. He was courageous and fear was not a part of his physical or mental make-up. He was candid, and at times almost brutally frank, but he never deceived anyone, and when he made you a promise you knew it would be religiously kept. He was as ruggedly honest as the mountains of east Tennessee, which he loved and among which he lived during his entire life. He was fair. His 20 years' service as a judge on the bench developed his judicial qualities of mind and heart, and he had a very high sense of justice. He was endowed with an abundance of sound common sense, which is indispensable to one serving in public office, since it enables him to appraise conditions and more intelligently determine the solution of all problems.

There was something about him which drew men to him. His large and fine physique impressed you with his strength.

His was a most pleasing personality. He possessed a keen sense of humor, but, best of all, he had a great heart, which beat in sympathy for the poor and oppressed, and his desire to alleviate human suffering and give equal opportunity to all was the controlling motive of his entire public service.

For 12 years he served as a member of the Foreign Affairs Committee of the House, and at the time of his death was chairman of that important committee, and had been its chairman for 6 years.

He was vitally interested in maintaining peaceful relations between our country and the other countries of the world, and his hatred of war caused him to be exceedingly active in support of all legislation designed to prevent our involvement in foreign wars.

The various neutrality acts passed during recent years were sponsored by him, and while he was ill during the last session of Congress, when the present neutrality law was passed it was the outgrowth and development of legislation previously championed by him, and many provisions of the present neutrality law were largely reenactments of legislation which his leadership had made possible.

His legislative activities were not confined to international affairs, but he was active, not always in public debate, but in counsel and advice he wielded a tremendous influence in support of all legislation which he espoused.

During the more than 16 years that he labored here he has left his imprint upon the legislation of the Congress of the United States during that period, and contributed much toward the welfare of his country in serving it in one of the most critical and trying periods of its history.

SAM D. MCREYNOLDS is gone, but his spirit still lives, and a grateful people will long remember and revere him for his able and faithful service in their behalf, and his memory is forever enshrined in the hearts of his friends. I shall always think of him not as a judge, not as a legislator, not as one of the great leaders of the House, but as my friend, whom I loved and honored, and whose memory shall abide with me forever.

Samuel Davis McReynolds

MEMORIAL ADDRESS
OF
HON. SCHUYLER OTIS BLAND
OF VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. SAMUEL DAVIS MCREYNOLDS, late a Representative from the State of Tennessee

Mr. BLAND. Mr. Speaker, I realize how absolutely impossible it is in this hour and at this time for me to add anything to the tributes which have been paid to SAM MCREYNOLDS. I do not wish the time to pass, however, without my tribute for myself and for every Member of the Virginia delegation in Congress to the splendid ability, the loyal service, and the continued friendship of SAM MCREYNOLDS.

Personally, I suppose he was as close to me as any Member of any Congress has ever been or ever will be. He visited my home at various times. I shared with him his hospitality and he mine. I learned to love him as a brother. For me his going has left a void that cannot be filled. He will be always missed.

In the trying period preceding the present disturbed condition throughout the world, his sound judgment, his complete comprehension of world affairs and our relation to them, his fine patriotism, his practical common sense, and his Christian loyalty served always to guide us well. Where he led we were glad to follow for we knew that with him there had been no hasty conclusion, but that there was invariably the most careful consideration of every angle of every problem before him. He was most valuable to the administration, to the Nation, and to his State. Eulogies cannot tell in full measure the story of his public life. His work here constitutes his finest memorial. Tennessee has lost a great representative, the Nation a patriot of the finest order, and every Member of this House a devoted friend.

In 21 years of service in this House I have seen many men of outstanding ability, of deep convictions, of unswerving honesty, and of sincere devotion to duty on both sides of the aisle come and go. Each has contributed much to the life of the Nation and to the work of the men he has left behind. Since he came here no man has contributed more to the splendid achievements of this Chamber than SAM MCREYNOLDS, and in the days that are to come his fine example will be an inspiration. He has gone, but he still lives. Such as he can never die. We who knew him will ever feel the touch of a vanished hand. We will ever hear the sound of a voice that is still.

Carl Edgar Mapes

MEMORIAL ADDRESS
OF
HON. WILLIAM P. COLE, JR.
OF MARYLAND
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. CARL EDGAR MAPES, late a Representative from the State of Michigan

Mr. COLE of Maryland. Mr. Speaker, while in Grand Rapids, Mich., for the purpose of attending the funeral of our late and distinguished colleague CARL E. MAPES it was my pleasure to attend a meeting of the Grand Rapids Rotary Club on December 14, 1939, before which a eulogy was delivered by the Honorable Fred M. Raymond, judge of the Federal district court of western Michigan. Judge Raymond was a close personal friend of Congressman MAPES, and the affectionate and sincere estimate of a life which was so close to us, as presented by Judge Raymond, is one I know will be read with interest. I insert it herewith:

REPRESENTATIVE CARL E. MAPES

(A eulogy delivered by Hon. Fred M. Raymond, judge of the Federal District Court of Western Michigan, before the Grand Rapids Rotary Club, December 14, 1939)

Mr. President, members of the Rotary Club, and guests, a community, a State, and many of his associates in a far wider sphere of usefulness stand today at the bier of a great man to pay a last tribute of respect. In the presence of this deep sorrow I shall not attempt to review the life work of CARL E. MAPES. I can find words only to express in that simple way which would have been most pleasing to him my immeasurable grief at his untimely passing.

His life requires no poor eulogy of mine to add to its luster. In a world of hates and fears, of tumult and confusion, of misunderstanding and conflict, he stood calm and true and strong. Loyalty and service were his guiding stars. I have never known a sweeter, purer life, honest in every thought and deed, generous in every impulse. He was as pure-minded as a child and gentle as a woman. His life was not only noble, manly, and pure, it was also, in the highest degree, forceful. He despised intrigue and cunning and condemned any cause which could not triumph in the light of day.

It is sometimes asked, Can a man in these days be absolutely honest? Can a man actually live a life of service devoted to his fellow men? Can a man champion always the rights of the downtrodden? Can a man in public life refuse to bow to the political boss? Can a man do all of these things and succeed? The affirmative answer is the life of CARL E. MAPES.

I know of no man of whom it could be more truly said that he had so lived that he approached his grave sustained and soothed by an unfaltering trust, like one who wraps the drapery of his couch about him and lies down to pleasant dreams.

Emerson has said:

"It is easy in the world to live after the world's opinion; it is easy in solitude to live after our own; but the great man is he who, in the midst of the crowd, keeps, with perfect sweetness, the independence of solitude."

Measured by these standards, or by any other, CARL MAPES was a great man. He knew not only the great but he knew the humble. He was one of whom it can be truly said that he walked with kings and kept the common touch. The last few moments of his public life were spent championing the rights of the weak against the strong, and the interests of his beloved State of Michigan. On late Monday afternoon of this very week he refused to concede that the

rich and prosperous oil fields of other States should not be subjected to the same limitations and restrictions as the less productive oil fields of his own State.

Loyalty and service were his watchwords. Without induction into any service organization, without insignia of office, without form or ceremony, his was a life of service. As nearly as may ever be, he lived the life of the perfect Rotarian.

Mr. President, may I suggest that we stand for a moment in silence in honor of his memory.

Chester Castle Bolton

MEMORIAL ADDRESS

OF

HON. CLIFF CLEVENGER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 24, 1940

On the life, character, and public service of Hon. CHESTER CASTLE BOLTON, late a Representative from the State of Ohio

Mr. CLEVENGER. Mr. Speaker, today the House pays its last tribute of respect to the memory of my late colleague, CHESTER C. BOLTON.

Words are not adequate to measure our affection for the one who has passed on or the loss his countrymen feel, for an eminent American citizen has passed away.

One had to know CHESTER BOLTON intimately to know the real, true man. He was warm-hearted, broad-minded, and tolerant. He was a man who stood high amongst the constructive statesmen of his time. What he said was based not on impulse but on sincere conviction. His deeds of kindness, of charity, and of generosity will ever keep alive his memory.

Notwithstanding that his career was cut short, he accomplished much that was useful. We may look to him for an example of devotion to public service, of honesty, of friendliness, and of good will to all.

In the death of CHESTER BOLTON this body and the Nation which he served so well will have sustained an irreparable loss.

William Edgar Borah

MEMORIAL ADDRESS

OF

HON. GEORGE H. BENDER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 24, 1940

On the life, character, and public service of Hon. WILLIAM EDGAR BORAH, late a Senator from the State of Idaho

Mr. BENDER. Mr. Speaker, WILLIAM EDGAR BORAH, spokesman of the United States Senate, worthy successor to Webster, Hayne, and Stephen Douglas, has spoken his last words in the Nation he loved so well. For more than 33 years, from 1907 until his death, Senator BORAH served the State of Idaho and the people of the United States in the upper House of Congress with the greatest distinction.

Few men in the history of our Nation have wielded the influence or commanded the respect which were granted to Senator BORAH. In every assemblage his word carried the weight of earnest conviction and careful consideration. Senators and Representatives throughout the Nation listened attentively to his views on any subject. The people back home came to regard him as one who spoke for them more eloquently and persuasively than any other Member of Congress. They gave him their support, as he gave them the breadth and wisdom of his mind.

Seventy-four years ago, on June 29, 1865, WILLIAM BORAH was born in a small town of Illinois. The moving spirit of the generation in which he grew to manhood called him west, and in his first days as a practicing attorney he settled in Boise, Idaho. The only public position he ever occupied in his long career of service was the post of United States Senator. He was first elected in 1907, and never left the Senate, despite the shifting tides of American politics throughout the years. In 1916 Idaho went Democratic, voting for Woodrow Wilson, but the senatorial contest of 1918 found Senator BORAH returned to his seat by a large margin. In 1936 President Roosevelt carried Idaho with 125,683 votes, the largest number ever gained by a Presidential candidate in Idaho. Yet despite the 2 to 1 victory margin of the President on the Democratic ticket, Senator BORAH, on the Republican ticket, rolled up the unprecedented total of 128,723 votes, to defeat his opponent, the former Governor of Idaho, by a margin almost identical with the President's.

This amazing popularity was due entirely to the personality and integrity of WILLIAM BORAH. For many years in the early days of his public career the activities and beliefs of the Mormon Church were a recurrent issue in Idaho politics. Senator BORAH eliminated the religious controversy as a matter of political concern. His complete belief in an acceptance of the Bill of Rights amounted to a passion with him. He once wrote a constituent, "I am a believer in the fundamental principles of religious liberty. If the time ever comes when I have to sacrifice my office for those principles, I shall unhesitatingly do so."

Senator BORAH was happy in the Senate. There he found the opportunity to reconcile his views of the growing Pacific Northwest with the development of the entire Nation. The development of cheap power, the reclamation of land, subsidies for farming, the curtailment of monopolistic practices were part and parcel of the vast new empire he saw rising about his State.

Yet his greatest fame came to him because of his stand on matters of international concern. Curiously, this distinguished Senator, representing a State landlocked on all sides, hemmed in by vast mountains, became the Nation's greatest authority on international problems. His strong isolationist views were part of his patriotism. The United States belongs to a group apart, he told us. Our ideology, our hopes, our position in the world do not depend for their success on anything which takes its origin in Europe. Stand clear of foreign entanglements was Senator BORAH's solemn warning.

He did not speak for himself alone. Millions of people throughout the Nation shared—and still share—the views he advanced. At the special session of Congress which met last October, six of the eight Senators from the Pacific Northwest region voted against the repeal of the arms embargo, following Senator BORAH's lead. From 1924 to 1933 Senator BORAH was chairman of the Senate Foreign Relations Committee, and led innumerable battles on the floor of the upper House for his viewpoints. His last great fight was in the condemnation of the Supreme Court packing plan, a plan which he branded as a violation of the "sacred traditions of American democracy."

Here was the keynote of his entire life. In his last Senate address he told the Nation:

> Before any progress can be made by totalitarian ideologies in breaking down American institutions a way must be found to discredit the American Bill of Rights. I have said it is a sacred document. If human liberty is sacred, this document is sacred.

A great man has left the people of our Nation. He was more than the "lion of Idaho." He was a sturdy, human "rock of Gibraltar," standing steadfast against every force which he regarded as hostile to the American way of life.

His State will not speedily forget him. In his honor there will remain forever the name of Idaho's highest mountain, Borah Peak. Nor will the State of Idaho or the Nation at large soon find his equal.

Edward Walter Curley

MEMORIAL ADDRESS
OF
HON. WALTER A. LYNCH
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. EDWARD WALTER CURLEY, late a Representative from the State of New York

Mr. LYNCH. Mr. Speaker, it is well that amidst our multitudinous duties, involving matters of deep concern to the country, we pause in reverent memory to those men who were elected to and served in this Seventy-sixth Congress, but whose tenure in the service of their country was terminated during the past year, by a Divine Providence.

Perhaps it was always so, but to me it seems peculiarly fitting in these tumultuous days when our country is overwrought with its tremendous economic problems at home, and as it watches with anxious eyes, bated breath, and a heavy heart, the great nations of Europe that once typified the apogee of the world's culture and civilization, grappling at each other's throats in a barbaric war, bringing ruin and destruction to the people of defenseless and inoffensive nations, spreading the propaganda, even in peaceful America, of the totalitarian governments on the one hand, or, on the other, the hypocritical preachments of the so-called democratic nations, whose historic past gives no indication that they ever understood the fundamental principle of democracy, that a nation, no matter how weak or defenseless, has the inalienable right to govern itself, and to be free and independent, it is peculiarly fitting, I say, that not only should this Congress pause in its labors, but also that those who have elected us to be the Nation's guides, should give thought to those whom they chose to represent them in this Congress of the United States, who served them faithfully and who died in that service with their armor buckled and their shields untarnished.

So it is that on this occasion I arise to pay my tribute to the late Hon. EDWARD W. CURLEY, my distinguished predecessor in this House from the Twenty-second Congressional District of New York.

Pennsylvania was the State of his birth, but at an early age he was brought to New York, where he was educated in the public schools of our metropolis and later attended the College of the City of New York. He first entered public life in 1915, when he was elected a member of the Board of Aldermen of the City of New York, and for 20 years thereafter he continuously served in that capacity. Conscientious, tireless, energetic, he gave himself completely to his office and won the favor and high regard of all with whom he came in contact.

When the late Honorable Anthony J. Griffin, who so long and ably had represented the Twenty-second Congressional District, New York, died in 1935, it was most natural that the citizens of that district should elect as his successor in Congress Alderman CURLEY. He knew their needs, and he knew their troubles. The people of the district were largely wage earners, but unemployment was rife, families were destitute, the relief rolls were very heavy. The people wanted a man who would represent them as unselfishly and as self-sacrificingly as had their deceased Representative, Anthony J. Griffin, and in one of the greatest tributes to a public official that I have ever seen thousands of persons, willingly and voluntarily, signed petitions for the nomination of Mr. CURLEY, who was then designated by his party as its nominee for Congress, and on November 5, 1935, at a special election he was overwhelmingly elected a Member of the Seventy-fourth Congress. In 1936 he was elected to the Seventy-fifth Congress, and in 1938 he was elected to the Seventy-sixth Congress, where he served until his death on January 6, 1940.

Democratic in party affiliation, EDWARD W. CURLEY was likewise democratic in spirit. While in Congress he devoted himself, until death took its toll, to the cause of labor and civil service. Quiet, unassuming, and unobtrusive, his kindly persuasiveness won many a contest where oratorical effort would have failed. He preferred the work of the committee room to the Well of the House. He never scaled nor sought to scale the alpine heights of national prominence, but he did achieve the high tableland of respect in the heart of his community, and this he did the hard way, by conscientious effort, by unflagging zeal, and by unselfish devotion to the service of the people of his community.

Twenty-five years of association is too long a time to know a man, to be able, within the limitations necessarily imposed upon one on an occasion of this kind, to recount his fine qualities and the appealing incidents of a fruitful life; so I will conclude with the simple testimonial, that to his widow, the people of the Twenty-second Congressional District of New York and the Members of this Congress renew their expressions of sympathy and unite in the thought that the district which he represented, the city which he served, and this House, representative of the entire country, lost a lovable character and a distinguished Member in the death of the late Honorable EDWARD W. CURLEY.

Thomas Sanders McMillan

MEMORIAL ADDRESS
OF
HON. SCHUYLER OTIS BLAND
OF VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, April 24, 1940

On the life, character, and public service of Hon. THOMAS SANDERS MCMILLAN, late a Representative from the State of South Carolina

Mr. BLAND. Mr. Speaker, when TOM MCMILLAN, of South Carolina, was called to his reward the House lost a faithful Representative and South Carolina one of its most loyal ones. Every Member of this House lost a friend.

I was here when he came. I have served since he left. Out of the service here there has gone something which time cannot replace. Genial, lovable, friendly, he had a personal charm and a compelling friendship which endeared him to his colleagues and made him easily one of the most beloved Members of the House.

In my period of service I have seen many men come and go, but none who made a more lasting impression than TOM MCMILLAN.

His masterly presentation of the measures coming from his subcommittee was evidenced by the ease with which he carried through the measures which his committee reported. At all times on the floor he was in complete mastery of his measures. This would be difficult to understand by anyone who had not appeared before him in the exhausting hearings of his subcommittee when with exacting detail he fathomed all of the minute intricacies of the problems before him. He took his work seriously and desired at all times to protect the people of the United States while doing absolute justice to the bureaus and departments with which his subcommittee was concerned. The best interest of his country was the polar star of all his labors.

I have never seen a Member with a finer sense of justice, and yet with a more earnest desire to do the right thing by the country whose Representative he was, by the colleagues with whom he served, by the State from which he hailed, and by the great constituency which honored him.

On the occasion of a trip to his city of Charleston I saw on every side evidences of the affection and esteem in which he was held.

Many men will come and go in the future, but none will surpass TOM MCMILLAN in a fine sense of loyalty or in a comprehensive grasp of public problems or in practical common sense. Peace to his ashes. He will live forever among those with whom he wrought his great work.

The Farm-Labor Problem

EXTENSION OF REMARKS

OF

HON. ROBERT M. LA FOLLETTE, JR.

OF WISCONSIN

IN THE SENATE OF THE UNITED STATES

Thursday, April 25 (legislative day of Wednesday, April 24), 1940

STATEMENT BY HON. ROBERT M. LA FOLLETTE, JR.

Mr. LA FOLLETTE. Mr. President, I ask unanimous consent to have inserted in the Appendix of the RECORD a copy of a statement which I authorized for yesterday's newspapers in connection with additional hearings to be held by the subcommittee of the Senate Committee on Education and Labor under Senate Resolution 266.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

National aspects of a developing "farm labor" problem will be explored by the subcommittee of the Senate Committee on Education and Labor in a final series of hearings to be opened in Washington beginning late next week.

This decision to hold additional hearings results from a consideration of certain facts obtained during the course of the recent investigation by the committee into the problem of civil liberties in California agriculture and the plight of the migratory farm laborers there. Additional study and consultation in Washington has convinced the committee that the California situation is not an isolated one but only a striking symbol of a much more far-reaching problem, national in scope, involving the present and future welfare of a large proportion of our rural population in many States other than California.

The committee will limit this final phase of its inquiry to testimony from expert witnesses. Included among the topics of discussion are the location and character of "farm-labor areas" other than California, conditions among migratory farm labor groups in those areas, the nature of industrialized agriculture, and the trend away from the "family farm." The committee will devote considerable attention to an analysis of the forces that are displacing farm families from the land, causing them to migrate to other States and regions seeking employment as migratory farm laborers. Most of the expert witnesses will be called from the various departments and agencies of the Federal Government who are familiar with various phases of the general problem.

The California investigation was another of the 4-year series of inquiries made by the committee into violations of civil liberties and the rights of labor. It is now apparent that the problem of civil liberties in California agriculture, which has suffered 180 strikes in the last 7 years, signalizes the existence of a tragic underlying condition which must be remedied if farm laborers are to attain a full enjoyment of their civil rights. That condition is the distressing economic, social, and political status of the hundreds of thousands who make up California's seasonal and migratory farm labor population. That problem of long standing in California, dating back in the public mind to the Wheatland riots of 1914, has been accentuated by the influx of a large number of farm families from other States in the last 5 years.

During the hearings in California the committee devoted considerable attention to some 45 statements by various economists, growers, rural sociologists, State and Federal officials, and spokesmen for various business and labor interests who were invited by the committee to discuss these broader phases of California's agricultural labor problem. Before submitting its final report and recommendations to the Congress, it seeks more complete information on the extent and character of similar conditions elsewhere in the Nation and the underlying causes.

Some general observations which throw light on this determination to carry forward the committee's inquiry beyond the borders of California are as follows:

1. California has no monopoly on farm laborers. Over one-third of the persons gainfully employed in American agriculture, according to the 1930 census, were either ordinary wage workers or sharecroppers, who work for "furnish" rather than cash. Only a small percent are in California. Apart from the traditional hired man, who is diminishing in relative importance, this group is largely dependent upon a seasonal, casual, and intermittent agricultural employment. Of them, the President's Committee on Farm Tenancy said in 1937:

"The great majority of farm laborers, as we have noted, are only intermittently employed; their incomes are extremely low and uncertain; their places of residence continually changing; and their contacts with schools, churches, and other elements of community life variable and uncertain. Relatively little economic and social data concerning them have been collected, and in the short time available the committee has not been able to secure the information necessary to an adequate consideration of farm-labor problems. A greater degree of national attention should be focused on them."

2. The peculiar problem raised by the so-called migratory farm family, which follows a nomadic way of life precluding any normal home or community advantages, is not confined to California. The irrigated areas of Idaho and Arizona; the Yakima Valley of Washington; the Willamette and Hood River Valleys of Oregon; the beet-sugar areas of Colorado; the Rio Grande and Winter Garden areas of southern Texas; the Mississippi Delta and Texas cotton area; the berry regions of Louisiana, Mississippi, Arkansas, and Michigan; the Florida vegetable and citrus area; and the truck and vegetable farms of eastern Virginia, Maryland, and New Jersey—all receive an annual influx of migratory farm workers. They form a rather similar pattern as they move from camp to camp, recruited by labor contractors or organizations of growers to work for brief periods in gangs on an hourly or piece-rate basis in the performance of laboring operations of a specialized character. Recent studies have indicated that California is not the only locale of indigent and disadvantaged groups of this type, who move about, failing to earn an annual living wage from casual, seasonal employment in agriculture.

3. Nor is California the only locale in which industrialized agriculture has developed to a degree worthy of observation. According to estimates by experts, in 1935 there were 36,000 farms in the United States on which 7 or more farm laborers were hired for some period of employment. On 100,000 farms at least 3 persons were hired. Although California leads all of the other States in the number of its large-scale farms, they have developed, or are beginning to appear, in substantial numbers in such widely scattered States as Arizona, Texas, Washington, Louisiana, Arkansas, Oregon, Missouri, Ohio, Pennsylvania, New York, Virginia, North Carolina, Florida, Georgia, and South Carolina. As yet this problem is not typical of the traditional American "family farm," and is restricted to less than 1 percent of the Nation's farms. It has been estimated that 75 percent of our farms do not employ any hired labor, and 24 percent hire only a small number of workers. But there is great significance in this 1 percent of the Nation's large-scale, or corporate, farms when one considers the large number of their employees, their increasing share of agricultural income, and their impact upon the future welfare of the "family farmer" in a competitive commercial agriculture. The availability of large supplies of migratory labor facilitates their development.

4. California's existing farm-labor problem has been complicated by the recent migration into the State of nearly a half-million persons, largely native white Americans, seeking manual employment as seasonal laborers in California agriculture. Many of those who are migrant farm families do not come exclusively from the Dust Bowl, as is commonly thought. At least 16 States have contributed substantial numbers in excess of 1 percent of this total. Included in this list are Oklahoma (which has contributed approximately 22 percent), Texas, Kansas, Colorado, New Mexico, Nebraska, Montana, South Dakota, Arizona, Idaho, Utah, Nevada, Arkansas, Missouri, Oregon, and Washington. There have been other distinguishable waves of migration of farm families from other States of origin in the great Mississippi Valley to other States of destination on the coastal fringes, such as Oregon, Washington, Texas, Florida, and the eastern seaboard. The reasons for unintelligent and misguided migration, the welfare of the families who are so uprooted from their local communities, and various aspects of their adjustment in areas of destination, are matters for further inquiry. Their impact and future in an already crowded labor market in agriculture is a matter of serious concern.

5. The causes of this movement of farm families off the land into crowded channels of employment in industrialized agriculture, are variously attributed to mechanization and amalgamation of farms, drought, foreclosures, and movements away from submarginal land. These agents do not seem to have spent their force. Every farmer standing in their way becomes a farm laborer. The recent marked development of the use of labor-saving machinery and large-scale operations threatens to displace from the land ever-increasing numbers of the two-million-odd farm tenants and 800,000 sharecroppers in our great Wheat, Corn, and Cotton Belts. Their status on the land is solely dependent upon the landowner's opinion of the continued economy of operation through manpower in a competitive agriculture. Thousands of farm owner-operators are burdened with indebtedness contracted for amounts so large and rates so high that they are likely to be forced to become tenants, croppers, or farm laborers. There are various expert opinions on the extent of additional annual migration to be expected from drought-ridden areas in the Great Plains, eroded or submarginal units in the Appalachian-Ozarks area, and the Great Lakes cut-over area, if land resources there are to achieve a proper balance with population. All agree that substantial population movements and shifts in tenure from owner or tenant to farm laborer are in the offing. Evidence on the full expectancy of these potential developments is necessary to any evaluation of the present scale and methods of coping with this problem.

6. The absence of urban opportunities for the natural increase in farm population annually confront hundreds of thousands of young farm people with the dismal prospect of moving into an already crowded farm-labor market without substantial opportunities to become individual landowners.

7. There are ominous signs that the Nation is confronted with a transition from the traditional family farm toward industrialized or corporative agriculture. Farming as a way of life is threatened. This transition challenges long-accepted national ideals of the farmer on his own land. If our national agriculture faces the same cycle that changed the form of industry from 1870 to 1930, the problem should be fully recognized if it is to be checked and revised. New patterns of security and opportunity that preserve the native values of our traditional system must be provided for those who are about to be displaced. For them there must be some alternative protection in harmony with democratic methods, from the harsh workings of competition in a crowded labor market. The Nation faces again, as at the time of the Homestead Act in 1862 and the inquiry of the Commission on Country Life in 1909, the periodical necessity of restating our national ideals of the place of agricultural workers in society.

Presentation of Brandeis Medal to Hon. Harold L. Ickes

EXTENSION OF REMARKS

OF

HON. JAMES M. MEAD

OF NEW YORK

IN THE SENATE OF THE UNITED STATES

Thursday, April 25 (legislative day of Wednesday, April 24), 1940

ADDRESSES BY HON. CLAUDE PEPPER, OF FLORIDA, AND HON. HAROLD L. ICKES

Mr. MEAD. Mr. President, I ask unanimous consent that there be printed in the RECORD the eloquent and inspiring address delivered by the junior Senator from Florida [Mr. PEPPER] upon the occasion of the presentation of the Louis D. Brandeis Medal to Hon. Harold L. Ickes, Secretary of the Interior, through the Jewish Forum, at the Biltmore Hotel, New York City, on Sunday, April 14, 1940, together with the address of Secretary Ickes in accepting the medal.

There being no objection, the addresses were ordered to be printed in the RECORD, as follows:

ADDRESS OF HON. CLAUDE PEPPER, OF FLORIDA

Under the shade of the trees on the other side of the river of life, I have always imagined a pleasant company of men and women of all times, coming together at frequent intervals to reminisce upon the world from which they came.

The picture my imagination has drawn of these scenes shows each of the group, if not speaking eagerly, awaiting his or her time to tell, in animated words, of the glories of his or her generation on earth—of the heroic story of that generation's great. It is easy to see visions of earnest but good-natured rivalry among the spokesmen as the virtues of each generation's heroes are extolled and the majestic figures of earth are called in review before admiring champions of their own time.

I know that one of those giants of this generation, who shall be a favorite of those of us who shall have the privilege to speak for our time, shall be Hon. Louis D. Brandeis, recently retired as Associate Justice of the Supreme Court of the United States, who gave the medal which is to be bestowed today.

The life of Louis D. Brandeis is an epic of America and Americanism. This man—the subtle force which makes up this man's mind and spirit—has been one of the stars by which the course of the world has been fixed. If one believes that men are pushed up like mountains by the irresistible urge of the inner forces of nature, then surely this man has been the spokesman of his time to deliver a prophetic message.

To him has been vouchsafed a vision of a complex world; to his ear the plaintive note of the world's oppressed has been audible; to him has been given an eye to see—to see down the long, dark corridors of time—to see through the fog and the haze of confusion—to see the light of coming day, even from the feeble streaks of first dawn.

His still voice, reaching through the clamor of the day, has penetrated the deep recesses of men's understanding. It has drawn the reins of reason tight upon the violent wills of men. It has warmed and melted out of men's hearts their prejudices.

This convincing voice, which has been the light and assurance of a generation, speaks in a characteristic sentiment again in the donation of the medal which is to be awarded to a great American today, through the Jewish Forum, for a distinguished service to humanity in the past year.

It is stimulating that again this medal is to be awarded for exemplary service to mankind. In the awards which have been made in the past, the high standards governing the award, and the broad scope which it covers, have been established.

One award went, with universal acclaim, to that sweet spirit who has beautified and dignified her generation with her own life, and given herself immortality of influence in the motherhood of the greatest man of his time, her son, Franklin—Mrs. Sarah Delano Roosevelt.

Another award justly was bestowed upon James McDonald, one of the noblemen of the Catholic Church, who distinguished himself by his magnificent service to the pathetic and oppressed people of another faith than his own.

Another award gave recognition to a sad figure, driven from his own land by a government which disdained the world's acclaim and affection for one of its great scholars—Thomas Mann, citizen of the civilized world—late a resident of a strange new land, Nazi Germany.

Now, true to its already great tradition, the award is again to be bestowed upon another Christian by the Jewish Forum. True to the spirit of its conception and its history, this award gives recognition to what a man thinketh in his heart, for by that criterion, as the Scriptures have told us, do we know so he is.

Some men are considered great for what they have done, and great deeds deserve great rewards; but the true standard of greatness is what men are, what they stand for, what do they think in their hearts, what causes have they lent their strength to, what forces have they thwarted. Whom and what have they championed and dared to die for, what hard-pressed warrior have they come to the side of when the battle was going to the enemy.

Harold L. Ickes is not just a great American, nor is he only a member of the Cabinet of the President of the United States; nor, indeed, is he merely a public official in whom is singularly personified the sentiment that a public office is a public trust. Harold L. Ickes has reached his present stature in the opinion of his generation—a stature which has brought him this eminent recognition today—because of what the man Harold L. Ickes thinketh in his heart.

A passion for liberty, for freedom—the larger liberty and the sure freedom which not only the bodies but the minds and souls of men thirst for—a hatred of tyranny, oppression, intolerance; that is what Harold L. Ickes thinketh in his heart. That is why he has been brought here today to be honored by the people of another faith and creed from his own, for this passion for liberty and freedom is universal, knowing no race, no particular faith, or creed.

How good that we have not lost in this mad world some sense of values, that moral heroes have their rewards and men pause to honor one of their generation for the great things he stands for.

It is fitting that the Jewish Forum has chosen to present this award to the honoree—a man who has attained distinction himself as artist, scholar, and citizen.

I have the pleasure to introduce Hon. M. Manischewitz, member of the advisory board of the Jewish Forum and chairman of the presentation committee.

ADDRESS OF SECRETARY OF THE INTERIOR HAROLD L. ICKES

It is indeed a great honor to accept this medal so generously tendered by the Jewish Forum in the name of Louis D. Brandeis who, in addition to being a very great American, is one of the justly famous men in the world today. It is universally recognized that Justice Brandeis is one of the three or four most distinguished jurists who have graced the United States Supreme Court in the century and a half of its existence. But even transcending this, he has always been a champion of the common man, a lover of justice, and an uncompromising doer of it. In these qualities, Louis D. Brandeis expresses what is finest in his country and noblest in the human race. In him have been wedded the undying aspirations of the Jewish religion and of American democracy, the offspring of which have brought great spiritual riches to our country.

In trying days like these it is the Jews in particular, both distinguished and humble, who have something precious to offer our country and our common civilization. I am thinking especially of the spiritual heritage of the Jews, their civic skills, and their passion for justice. Jewish history is an ancient well of human experience, which throughout the ages, has been infinitely varied. But be it said, to the Jews' everlasting honor, that it contains few examples of organized brutality or deliberate injustice.

This record is impressive and has few, if any, parallels. Throughout the centuries Jews have been active in virtually every human pursuit, whether of gain or of God's truth. Outstandingly the Jews are a people of peace. They love peace with all their souls because, from long experience, they have learned the bitter lesson that war and violence engender more horrible wars and greater violence. They early learned that life is sacred and that the supreme duty of man is to cherish it. They recognize, as did the great Benjamin Franklin, their friend, that "even successful wars at

length become misfortunes to those who commence them." Jews are historically too old and spiritually too wise to have any childlike illusions about the heroism of death and the glory of the bondage of man.

Herein, in my view, lies one of the reasons for the Jewish tragedy in Europe today. Devoted to the arts and eager in the pursuit of peace, the Jews, for these very reasons, are the objects of the cruel gangster who must, perforce, see an enemy in every man who longs for a life of peace, whether he be Jew or Gentile. It happens that the Jew, belonging, as he does, to a minority religious group, initially is more vulnerable than the peaceful Christian who may have transitory protection because he is a member of a group within the majority. But neither the peace-loving Jew nor the humanitarian gentile can be safe in his life or serene in his liberties, so long as stronger and ruthless groups of men are able to preach hatred and practice violence.

There is no safety under the sun for civilized man, except under conditions of genuine toleration and inalienable legal equality.

In the last analysis, the fate of both Jews and Christians is so closely linked that one cannot be injured without serious damage to the other. It is a fatal illusion to think, as some seem to be doing in countries like Germany, that you can throw a Jew into the arena and therewith satisfy the beast. The experience of mankind has shown that the more you throw to the beast, the more bloodthirsty he becomes, until in the end he devours the very one who has fed him.

It seems to me that the problem of anti-Semitism is more a non-Jewish than a Jewish one. Wherever the cancer of anti-Semitism is permitted to spread, there society as a whole is in danger of a deadly epidemic. Anti-Semitism is the kind of disaster that is unique in this respect: First it strikes down one set of victims, the while lulling in false security the remainder who will suffer a like fate in its turn. First the Jew is stricken, then other political, religious, and racial minorities are engulfed. Such has been the conventional course of this disease. In Germany half a million Jews felt the mailed fist at the beginning. Then 70,000,000 non-Jews found themselves exposed to privation and compelled to endure suffering. Today the whole German nation stands on the brink of an abyss.

This is why I insist that the past of anti-Semitism is largely the concern of us non-Jews. We, being in an overwhelming majority, stand, from a quantitative point of view, in proportionately greater danger than do the Jews.

There has been no time in history when there has been a greater need for Jewish-Christian understanding and Christian-Jewish cooperation than today. Both of these great religions have enriched our lives. The basic ethical teachings of both stem from the same principles. We should remember that the Golden Rule, which is the very essence of Christianity, sprang from the older Jewish religious philosophy. Today, both faiths must fight shoulder to shoulder in the defense of their ideal of civilized humanity, based upon democracy.

The Jews, who have suffered infinitely more than any other peace-loving people, must not be permitted to feel that they are alone in the struggle for the preservation of a humane and civilized way of life. All of us who are men of good will, Gentiles and Jews, must enlist in the same cause.

There is a pressing need to succor the already stricken victims of organized savagery abroad and to find a haven for them. In his first annual message to Congress, President Jefferson raised his eloquent voice in favor of a refuge here for victims of Napoleonic fascism. "And shall we," Jefferson asked, "refuse the unhappy fugitives from distress that hospitality which the savages of the wilderness extended to our fathers arriving in this land? Shall oppressed humanity find no asylum on this globe?"

The difficulties in the way of large-scale immigration are great today, as they were in Jefferson's time, although for different reasons. But something must be done. There is the possibility of the settlement of some refugees in Alaska, although such opportunities are necessarily limited by geographical, political, and financial considerations. I am bound to say that Alaska would be fortunate, as were our States, in their early history, if it could absorb the talent and idealism which other nations unwisely cast out.

Anyone who knows the true qualities of the Jews will agree with the estimate made of them by the learned John Adams, second President of the United States. He believed that no people, not excluding the English and the French, had contributed more to the progress of science and civilization than the Jews. I can do no better than to conclude this brief address of appreciation of the great honor that you have done me by quoting these little-known words of John Adams:

"The Hebrews have done more to civilize men than any other nation. If I were an atheist, and believed in blind eternal fate, I should still believe that fate had ordained the Jews to be the most essential instrument for civilizing the nations. If I were an atheist * * *, I should believe that chance had ordered the Jews to preserve and propagate to all mankind the doctrine of a supreme, intelligent, wise, almighty sovereign of the universe, which I believe to be the great essential principle of all morality, and consequently of all civilization."

Wheeler, Liberal Champion

EXTENSION OF REMARKS

OF

HON. EDWIN C. JOHNSON

OF COLORADO

IN THE SENATE OF THE UNITED STATES

Thursday, April 25 (legislative day of Wednesday, April 24), 1940

ARTICLE BY RAYMOND P. BRANDT

Mr. JOHNSON of Colorado. Mr. President, I ask unanimous consent to have printed in the RECORD an article from the pen of Raymond P. Brandt, which appeared in the Washington Sunday Star of April 21. The subject of the article is Wheeler, Liberal Champion, and I am sure it will be of great interest to the readers of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Star of April 21, 1940]

WHEELER, LIBERAL CHAMPION, FIGHTS TO WIN IN CAREER CHECKERED BY DEFEATS

(By Raymond P. Brandt)

The original story for the motion picture Mr. Smith Goes to Washington was called The Man from Montana and was based in part on the tempestuous career of Senator WHEELER. Will Hays vetoed the title and many drastic changes were made in the story before it reached the screen. But the original idea was sound, for BURT WHEELER'S career is studded with episodes more lurid than any in Frank Capra's film.

Furthermore, WHEELER at 58 looks like a screen Senator—or a President. He stands well over 6 feet. His head is large and well shaped. His small, expressive hands—gambler's hands, they have been called—constantly move from the wrist as he talks. He has "presence."

The salty New Englander who settled in Butte because card sharps got his money there and he couldn't travel any farther has been fighting ever since. He has taken a licking again and again. He has been viciously framed at home and in Washington. He has been vilified outrageously. But waste no sympathy on him, for he can dish it out as well as take it. When he fights, he fights to win, rough and tumble, and he isn't dainty about his weapons. Just now he is riding high; he can unquestionably stay in the Senate; he is an avowed candidate for the Presidency.

ANACONDA ANCIENT ENEMY

His first fight was with "the company." When WHEELER says "the company," he still means the Anaconda Copper Co. When he was a fledgling legislator in Helena, 30 years ago, Anaconda regarded Montana as its private domain and the legislature was expected to pay homage. WHEELER joined the forces trying to send Thomas J. Walsh to the United States Senate. Walsh was barely defeated then, but won his seat 2 years later, in 1912, and got President Wilson to appoint WHEELER United States attorney for Montana.

That district attorneyship, during the World War, continued WHEELER'S political education. Superpatriots clamored for prosecution of enemy Irish and German workers, syndicalists, and labor leaders. Behind the agitation WHEELER sensed the hand of the mining interests maneuvering to crush unionism. Refusing to yield to the clamor, he was denounced and the spy hunters shrieked that Montana was a hotbed of sedition because of his attitude. WHEELER'S answer was to go after war profiteers and grain speculators. But in 1918 he resigned because he was told that otherwise Senator Walsh would be defeated for reelection.

Thereafter WHEELER was offered appointment as Federal judge in Panama, but refused because he was convinced that it was a trick of the interests to get him out of the State. In 1920 he ran for Governor. Mobs broke up his meetings, once chased him out of town. He was the worst beaten Democratic candidate who had ever sought office in Montana. Two years later he won the Senatorship by the largest majority ever given a senatorial candidate. Popular approval had caught up with WHEELER'S views.

WENT AFTER DAUGHERTY

He had not been long in Washington when the Teapot Dome scandals broke. "I came to the conclusion that if Daugherty was the Attorney General he should be, he must have known about the whole affair," WHEELER recalled the other day. "I prepared a resolution demanding his dismissal from the Cabinet. Imagine my surprise when Joe Robinson, of Arkansas, got ahead of me by calling for the ouster of Denby, Secretary of the Navy. Joe persuaded me to change my resolution to a demand for investigation

instead of dismissal. It passed 66 to 1. During the debate Senator Willis, of Ohio, coined a political classic. Harry Daugherty, he said, was 'clean as a hound's tooth.' "

WHEELER had only hearsay to go on. But just a few days before the hearings started he found in Ohio the bizarre Roxy Stinson, divorced wife of Daugherty's most intimate friend, Jesse Smith, who had killed himself the year before in Daugherty's apartment. Roxy broke the case wide open. WHEELER was severely criticized for using her as his principal witness, but this was rough-and-tumble fighting of the Montana kind. He was out to win.

In revenge, he was shamefully framed. Federal courts in Montana indicted him on the trumped-up charge of "unlawfully accepting money to influence issuance of oil and gas prospecting permits." There was a blast from the opposition press: WHEELER was a demagogue, a subversive influence, the "most dangerous radical in America," a friend of Moscow.

In the midst of all this, Ray Baker, a Democratic wheel horse, former Director of the Mint, told WHEELER he had heard the Republican administration would indict him in the District of Columbia as well if he joined Robert M. La Follette, who had just been nominated for President on a third-party ticket. WHEELER already had refused to run, but now he got La Follette on the telephone and told him he had reconsidered. That is the story, here told for the first time, of how WHEELER came to run for Vice President in 1924. And, sure enough, the following March he was indicted in Washington. He was acquitted in both courts and exonerated in the Senate by an overwhelming vote.

BEAT SUPREME COURT BILL

In some respects his greatest fight was with Roosevelt. WHEELER, more than any other man, beat the proposal to pack the Supreme Court. He had been a New Deal supporter from the start, had steered through the Senate some of its most important legislation—for instance, the holding companies' "death sentence" act. Most of his liberal friends—reluctantly or otherwise—were for the Supreme Court reorganization bill. In the opposition were elements he had scorned and who had scorned him.

But he did not hesitate; he was one of the first to announce his opposition. "A liberal cause," he said, "was never won by stacking a deck of cards, by stuffing a ballot box, or packing a court."

He had no hope of beating the bill when the fight began, but thought that he might be able to win modifications. Popular sentiment gradually swung his way; Senators slowly were won over, and eventually WHEELER administered the coup de grace.

Chief Justice Hughes had declined to testify before the Senate Judiciary Committee, although obviously the best person to present the views of the Court. WHEELER went to see Justice Brandeis, his close friend. Telephone to the Chief Justice, Brandeis urged; maybe he will write a letter. WHEELER demurred; he didn't know the Chief Justice.

"Well, the Chief Justice knows you, and what you're doing," said Brandeis. He led WHEELER to the telephone, stood with his arm across the Senator's shoulders as WHEELER made the call. Hughes was, possibly, just waiting to be asked. Next day WHEELER had an eight-page letter on which the Chief Justice and his law clerk had worked most of the night. The Supreme Court was not behind in its work, said the Chief Justice. The President's proposal to add six more Justices would impair, not increase, the Court's efficiency. That letter killed the bill.

NO LONGER CALLED A "RED"

Conservatives suddenly discovered this man WHEELER wasn't so bad after all. Has WHEELER himself changed? There is evidence that his views have broadened. The railroads shuddered when he became chairman of the powerful Interstate Commerce Committee of the Senate, in 1934, but they have found him notably fair and ready to hear both sides of any case. He made a speech last December to the National Association of Manufacturers which that organization still is circulating in pamphlet form. It pleads for Government cooperation with business. Nobody calls him a "red" any more. But it is probable that though he is less impatient, not so sure of quick panaceas, he is unchanged fundamentally. He still is the spokesman for the agrarian West, for silver, for labor.

To be for monetization of silver is good politics in Montana. A high price for silver means jobs for miners. And silver inflation would mean that farmers could pay off their debts with debased dollars. WHEELER has twice proposed coinage of silver at the Bryan ratio of 16 to 1. It is likewise good local politics to be against the Hull reciprocal-trade treaties, for Montana is a cattle-raising State and fears competition of imported beef.

This man from Montana, now 17 years in the Senate, is not a student in the sense that La Follette and Borah were; his liberalism grows out of personal experiences. He is essentially a scrapper, a courtroom lawyer. Born in Hudson, Mass., he talks the earthy western vernacular with a residual trace of Yankee accent. He puts the New England "r" on "hadn't orter." But he cusses in pure Montanese.

He was the youngest of 10 children on a farm. After going through high school and a business college he worked in a hardware store, an optical-goods factory, and a lawyer's office to scrape together $750, enough to enroll in the University of Michigan Law School. At Ann Arbor he waited on table and did clerical work in the dean's office. Summers he peddled Dr. Chase's cookbook, published in English, German, and Norwegian, price $1 to $3.50, depending on the binding; commission, 60 percent. He cleared about $300 each summer. It was while peddling cookbooks that he met Miss Lulu White at Albany, Ill.

When BURT WHEELER was graduated from law school, in 1905, he was sent West by a physician who mistook overwork for tuberculosis. He established a law practice in the tough mining town of Butte, after he had been cheated of his small bank roll there.

In 2 years he was doing well enough to go back to Illinois to claim his bride. There was a large crowd on the Mississippi River steamboat carrying him on the last stage of his journey.

"There's a wedding up at Albany," the captain explained. "John White's daughter's getting married."

"Who's the bridegroom?" WHEELER ventured.

"Some damn' book agent."

The WHEELERS live in a sprawling white frame house in Washington—big because they have six children. Mrs. WHEELER likes to play nine holes of golf with him before breakfast to be sure he gets his exercise.

HAS FEW INTIMATES

WHEELER is easy to meet, easy to talk to, but has few real intimates. He plays the game expertly with the Washington correspondents, with the result that he often gets the breaks in news columns even when editorial pages are lambasting him.

The Senator keeps up his law practice. Borah complained when liberal colleagues would not support his perennial bill to bar Senators from representing firms which do business with the Government. "The difference between Borah and me is that I've got six kids," said WHEELER. Summers the WHEELERS go to a log cabin in Glacier Park. Described by political opponents as "palatial," actually it cost $750. WHEELER and his three boys built some additions.

Montana is Far West. It is not populous—has only four electoral votes. Yet WHEELER has a chance to win the Democratic nomination. He has elements of strength, is acceptable to most new dealers and not unpalatable to conservative Democrats. If the 1940 election is to be decided by three minority groups—farmers, organized labor, and Negroes—WHEELER is in a powerful position. He is the sponsor of three farm-relief bills. John L. Lewis has singled him out for special political favor—indeed, he seems to be Lewis' first choice for the Presidency—and William Green has spoken highly of him. He is the darling of the railroad brotherhoods. He has demonstrated ability to get support from Republicans in the Senate.

It is an outside chance. He knows it and is hedging his bet by seeking reelection to the Senate. That's the shrewd Yankee in him.

It is a long shot—but long shots have won before.

Balkanizing the United States

EXTENSION OF REMARKS

OF

HON. EMANUEL CELLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 25, 1940

RADIO ADDRESS BY HON. EMANUEL CELLER, OF NEW YORK

Mr. CELLER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include an address entitled "Balkanizing the United States," which I delivered over station WJZ, of the blue network of the National Broadcasting Co., Friday, April 19, 1940:

Ladies and gentlemen of the radio audience, the Constitution of the United States contemplated absolute free trade among all the States. It has been our pride for many years to think of the United States as the greatest free-trade area in the world. That, of course, is what it should be; that is what every American wants.

But we've had a rude awakening in the last year and a half.

An awakening that has not been pleasant.

Our ability, as a nation, to achieve greater happiness and prosperity for everyone; our ambition to maintain a free flow of trade from 1 State to the 47 sister States is threatened.

We have been planting a new jungle—planting it vigorously and thoughtlessly for the last 25 years—and we have been planting the new jungle not to maintain the United States but, unfortunately, to create a dis-United States.

The seeds of that jungle are statute laws, regulations, and orders of administrative agencies in each of the 48 States that restrict the movement of products of the factory and of the farm in interstate commerce. Lately we have been calling them trade-barrier laws. There are others, that have not been so classified, which also act to restrict the free flow of commerce among the States.

The Detroit Free Press, in reviewing the testimony on trade barriers before the Temporary National Economic Committee in Washington during the last week in March, wrote:

"Americans may awake some day, if this process of Balkanizing the United States continues, to the fact that they are no more secure than are the peoples of some of the smaller countries of Europe who have got into trouble by erecting trade barriers around themselves."

Business is keenly aware of the problem and sees it in its practical realism.

It is probably true that the bulk of these regulatory laws were put on the statute books as a result of the powerful pressure for local selfish protection or subsidy, but today business as a whole has finally realized that these barrier laws do not remain local affairs. On the contrary, they reach out from coast to coast and affect all business—affect the farmers of this land—and touch the pocketbooks of all of us as consumers.

The practical effect of State barrier laws is to:

First. Raise prices.

Second. Reduce consumption, decrease jobs, and lower the standard of living for the masses.

Third. Because of these two factors, lower income for farmers and office workers.

Fourth. Reduce employment. Lowering of consumption necessarily cuts production and this not only causes existing organizations to lay off workers but discourages the formation of new enterprises which, if formed, would take up much of the employment slack.

Assuredly President Roosevelt's goal of an annual national income of at least $90,000,000,000 can never be reached unless interstate business is allowed to operate freely.

Let me give you a few of the typical examples of some of the silly and ridiculous legislation that this administration found when it took office, and is still trying earnestly and diligently to remove.

Rhode Island dairymen want all Rhode Island markets for themselves. Hence, milk coming in from other States must be, and actually has been, colored pink. Imagine drinking pink milk!

An egg laid in Florida this very morning cannot be sold in adjoining Georgia and marked as a fresh egg. But, presumably, a Georgia egg laid by a Georgia hen in Georgia is still a fresh egg—no matter how old it is.

In certain New England States, eggs laid even this morning in adjoining States cannot be sold unless, as the laws ridiculously prescribe, "they have nontremulous air cells." That keeps out-of-State eggs out of those States most effectively. The consumer pays the price.

Milk, no matter how pure or cheap, cannot come into Washington, D. C., markets unless it has come from cows that have been wiped clean, teat by teat, with a hemstitched linen towel of certain dimensions used by a man sitting on a three-legged stool in a barn that has a smooth ceiling. This would seem to put the dairyman right into the laundry business.

In Michigan the tax on wine from home-grown grapes is 4 cents a gallon, but wine from California grapes is taxed 50 cents a gallon.

Alabama imposes a tax of $1,000 on each liquor-manufacturing plant, but the tax drops to $25 if the materials originate within the State.

Eleven States have established ports of entry where motortrucks are stopped, measured, inspected, weighed, registered, taxed as to gasoline, mileage, weight of pay load, etc. Inland Kansas has 66 of these customs-duties barriers or ports of entry. Nebraska has 31; New Mexico, 22; California, 14. Imagine ports of entry or customhouses between States. Isn't it just like Yugoslavia, Hungary, Bessarabia, and Rumania?

Tourist permits: The tourist season is getting under way and the highways will be crowded with vacationers on the way east, west, north, and south. Thousands of them will be surprised to run into border barriers erected by States.

There are four types of these barriers that affect private passenger-car owners and offer a threat to the free interstate movement of vehicles. These include the requirement that visitors obtain tourist permits, application of caravaning laws to privately owned vehicles, discrimination against motorists at agricultural inspections, and restrictions placed on commercial travelers using their own vehicles.

There are 13 States that require visitors to obtain tourist permits. Two of these States charge fees for the permits. These are not dissimilar to passports required between different countries. Caravaning laws, designed to halt the passage of cars under their own power or in tow for purposes of sale, are in effect in 14 States.

Florida keeps out California oranges for fear of a long-vanished brown rat, and California retaliates by banning Florida oranges and lemons because of a nonexistent citrus canker.

Oleomargarine, a butter substitute, a poor-man's food, pure food wherever butter cannot be afforded, is taxed practically out of use in 31 States. The cotton producer is thus deprived of the sale of millions of dollars of vegetable-oils sales regularly. And no one profits, not even the butter producer.

Motor-vehicle levies have worked a hardship on interstate truck lines. Taxes, size and load limitations, directional-light, tail-light, and side-light statutes are so diverse that trucks traveling over large areas resemble circus wagons when decorated with tags complying with various State laws.

Trucks loaded with market produce for the family table are held up in Ohio, Indiana, Illinois, the innocent drivers arrested, the market produce allowed to rot—causing loss to farmer and consumer—on the silly regulation that makes the truck 3 inches too long in one State or a pound over the weight permitted in another State. Existing regulations today require a motor-vehicle operator to pay $1,100 in fees to pass on a single trip from Alabama, through Georgia, to South Carolina.

Motor vehicles: Interstate truckers probably have been more vitally affected by trade barriers than any other group.

In one case an Iowa farmer started for St. Louis, Mo., with a load of melons. He was stopped by the Iowa State highway patrol because his truck was not equipped with three green lights required by law.

His delay in putting on the lights caused him to be overtaken by darkness in Missouri, where he was stopped and forced to remove the lights, because in Missouri they were illegal.

In yet another trucking case a Texas man wanted to ship his household belongings to West Virginia by moving van.

He found he could not make the trip by short southern route because in Kentucky the length of the truck and trailer was limited to 30 feet, 2 feet shorter than his truck and trailer.

If he wanted to go the northern route, he would have to spend at least $1,000 in attorney's fees, travel expenses, and taxes, and would have to use 6 weeks of his time in changing the appearance of his truck for one State, rechanging it for another State.

Lightning disabled the municipal power plant of Old Hickory, Tenn., and its 10,000 inhabitants were left temporarily without light, water, and fire protection. A truck was dispatched from Chicago with a transformer necessary to repair the plant. Knowing vaguely of the red tape ahead, the shipper gave his driver a letter:

"This truck is on an errand of mercy. A city of 10,000 people is dependent on light, water, and fire protection which the transformer carried hereon will provide. If this vehicle should happen not to be within State regulations, please consider its mission and let it go through."

At West Point, Ky., the truck was halted. By the inspector's tape measure it was 12 inches longer than the law allowed. The driver showed his letter. It was interesting, but the law was the law; the truck didn't move. The driver telephoned Chicago for help, and soon the wires to the Tennessee Governor's office in Nashville were buzzing. The Governor sent a telegram; that, too, was interesting. But only when $100 was telegraphed the driver to pay his fine was the truck released. While a city in danger waited, relief was held lawbound a full day.

After delivering the transformer the driver asked permisison to take the empty truck home through Kentucky. It was denied, after another 24-hour delay, and the driver finally got his truck back to Chicago via a wide detour of Kentucky through Missouri.

As A. H. Martin, Jr., national director of the United States Marketing Laws Survey, pointed out in his testimony before the T. N. E. C. in March, the survey, at this stage in its tremendously important work, has found upon the statute books of the 48 States a total of 1,489 of such trade-barrier provisions.

I would not have you think that is all that business has to contend with and the consumer has to pay for.

There are thousands of laws still to be examined and analyzed.

There are tens of thousands of administrative orders and regulations issued by administrative agencies in the 48 States yet to be examined. Director Martin, of the Marketing Laws Survey, told the T. N. E. C. committee that one box of Illinois regulations received in his office from only 10 of its administrative agencies weighed 282 pounds.

If we may assume that a like number of administrative orders, rules, and regulations exist in other States, multiply the 282 pounds by 48 and you get 13,436 pounds—six and a quarter tons of regulations that business enterprises would have to wade through to find out what must be done and what must not be done before one can sell a bill of goods.

There remain yet to be examined the municipal ordinances and regulations of the principal marketing centers of the country.

Through the work of the Council of State Government, and particularly the United States Marketing Laws Survey, we have just learned as a nation of these 1,400 instances I have just mentioned.

The work has just begun.

It must be continued.

Before the industrial ills of the Nation can be cured we must have expert diagnosis of the causes of our troubles and ills.

It is for the reasons that I have just sketched for you that I have introduced in the House of Representatives a resolution—House Joint Resolution 457—proposing that the temporary marketing laws survey (which pioneered in this work and, along with the Council of State Governments, the Department of Agriculture, and other agencies, is responsible for awakening America to the havoc that threatens us) be continued as a permanent agency of research into the laws and administrative rulings that affect the distribution of goods or services throughout the United States. That bill now being considered by the House Committee on Interstate and Foreign Commerce is known as House Joint Resolution 457.

Frank Bane, executive director of the Council of State Governments, proposed such an agency.

It is beyond the information and the powers of any business executive in planning the efficient distribution of products to keep abreast of the thousands of laws enacted by the 48 States that direct under what conditions and terms, under what complexity of taxation and regulation, how, when, and where business enterprise may gain access to the theoretically free markets of the United States.

The question of free markets is no longer a speculation within academic halls. It is today a problem on the desk of every sales manager who sells goods or services across State lines. It is a problem confronting every retailer. And to some as yet unmeasured extent, it is a question that further shrinks the freedom and purchasing power of the dollar in the housewife's purse when she enters her neighborhood store.

Trade barriers, discriminatory and retaliatory, have been written into statutes in each of the 48 States. Also, these trade barriers not easily identified because of many cunning disguises exist in hundreds of other statutes and in thousands of unprinted administrative orders and regulations in each of the 48 States.

There is a way to find out about these laws. And that is through such an agency as the Marketing Laws Survey. The cure is through entities like the Council of State Governments, which by negotiation and conference can induce the States mutually to remove these trade barriers; otherwise the Federal Government must step in and force removal.

The fight against trade barriers, led by the Council of State Governments, is a fight for a free commerce and business between States and for a united America. The public should recall that the United States Constitution was brought into being because of the trade wars that threatened in the first hours of our life as a nation by the the existence of the Federation of States.

You may recall the hostility between the Colonies of Maryland and Virginia. Maryland had jurisdiction over the whole width of the Potomac region and, jealous of Virginia's commercial prowess, prevented vessels destined to Virginia ports from entering the river.

Virginia controlled the ports of Cape Henry and Cape Charles, at the entrance of the Chesapeake. After Maryland showed her hand as outlined above, the fight was on. Virginia retaliated by excluding all Maryland ships from entering the great bay and thereby from gaining access to the Potomac itself. Virginia had long maintained lighthouses, buoys, and other aids to navigation in the Chesapeake and the Potomac. These were just as necessary to Maryland as to herself. Virginia demanded that Maryland pay part of the expenses. Maryland refused.

This colonial war occupied the serious attention of Jefferson and Madison. They caused the appointment of a commission to arrive at some peaceful settlement. The famous Mount Vernon Compact of 1784 between Maryland and Virginia resulted. This compact is one of our greatest historical documents.

Several years after, New York similarly attempted to close its rivers and sounds to the vessels and boats of New Jersey. New Jersey retaliated in kind along her shores. New York sought revenge by imposing duties, and the former asserted her sovereignty by placing imposts on New York goods. Only due to the intercession of the great statesmen of the day was the so-called war between these two States adjusted and both agreed to permit free access to the produce and services of the other.

The same kind of war is on again. Thousands of pieces of idiotic legislation in the various States, throwing up barriers at State borders against one product after another produced in neighboring or distant States, have put commerce and industry into 48 kinds of Balkan strait jackets, and divided this Nation, so far as trade is concerned, into 48 unneighborly small countries. The full extent of these trade barriers has been brought to light by the research of the Marketing Laws Survey.

The Survey's work has attracted the attention and won the endorsement of more than 680 trade associations, of chambers of commerce throughout the country, of the law schools of our great universities, and other professional bodies and organizations.

This resolution that I have introduced proposes that the work of the Marketing Laws Survey be made a permanent source of usefulness as a division of marketing laws research under the auspices of the United States Department of Commerce.

States must stop making faces at each other. They must stop shaking their fists at each other. This Balkanization of the Union must cease.

The Railway Mail Service

EXTENSION OF REMARKS

OF

HON. JAMES M. MEAD

OF NEW YORK

IN THE SENATE OF THE UNITED STATES

Thursday, April 25 (legislative day of Wednesday, April 24), 1940

ADDRESS BY POSTMASTER GENERAL FARLEY AT KANSAS CITY, MO.

Mr. MEAD. Mr. President, I ask unanimous consent that there may be inserted in the Appendix of the RECORD a very able address delivered by the Honorable James A. Farley, Postmaster General of the United States, at a luncheon of the Seventh Division, Railway Mail Service, Hotel President, Kansas City, Mo., on Wednesday, April 3, 1940.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

It is a real pleasure to avail myself of this opportunity to meet with the clerks and officials of the Railway Mail Service. Kansas City is one of the most important railroad centers in the United States. It is the gateway to the vast agricultural and cattle regions of the South and Southwest. Naturally it must be a hub of Railway Mail Service activities. Trade and industry cannot prosper without efficient, dependable means of communication and that, of course, embraces the Postal Service and its very important unit, the Railway Mail Service.

I am therefore very happy to find here a very live Railway Mail Service personnel, in step with the dominant spirit of progress so characteristic of this wide-awake city. You may be sure I am really delighted to meet so many of the seventh division clerks and officials gathered here today. From the number present, I apprehend I may be laying myself open to the charge of being responsible for some of your runs going out by default. However, my time here is so limited that I am encouraged to believe some of you may yet relieve yourselves and me of possible embarrassment by piling into your cars just about leaving time.

Ever since I became a member of the Post Office Department I have been constantly impressed with the intelligence, loyalty, and alertness of its personnel. My definite respect for those very qualities would restrain any impulse that might plague me to attempt to ingratiate myself through the too common artifice of giving voice to any suggestion of flattery. I shall hold to my rule never to offend by taking up anyone's time with hollow and idle compliments just to reap a reflected but doubtful halo. This attitude, however, should cause no hesitation or restraint in giving credit where credit is due. So I find, in the limited research I have had the time to make, that the men of the seventh division, Railway Mail Service, have been alert and in the front rank of Railway Mail Service and R. M. A. progress. It has given to the Postal Service some of its finest officials.

May I digress here for just a moment to say that very naturally we take pride in the advancement and achievements of men who, through their progressive spirit, native ability, and industry, have graduated into places of higher responsibility in other fields. These fine men reflect credit upon the Postal Service and the personnel with which they have been associated. In this connection may I mention my good friend Harvey Couch, who graduated from the Railway Mail Service to become an outstanding leader in the industrial and civic life of this country. There is Lloyd Binford, who left the Railway Mail Service and has become an expert in insurance and the president of the Columbian Mutual Life Assurance Society of Memphis. And then there is United States Senator CLYDE M. REED, whom most of you know personally. CLYDE advanced through the various grades in the Railway Mail Service, became an official of the Post Office Department, and Superintendent of the Railway Mail Service. Later he became the Governor of the State of Kansas. He is now her United States Senator and a member of the important Committees on Post Offices and Post Roads and Interstate Commerce.

I might continue to call the roll of former Railway Mail Service men who became distinguished in business and the professions after leaving the Service. Many of the key men in the Post Office Department are graduates of the Railway Mail Service. In that group permit me to mention Smith Purdum, Fourth Assistant Postmaster General; Kildroy P. Aldrich, Chief Post Office Inspector; Jim Cole, Deputy Second Assistant Postmaster General; Roy North, Deputy Third Assistant; Aubrey Clayton, superintendent, Division of Cost Ascertainment; your own splendid inspector in charge, Emmett Hallock. I am convinced that in this representative gathering of postal people there are a number of fine men qualified and eligible to move onward and upward.

I find that in the Railway Mail Association the seventh division has been foremost in every movement for the betterment of the Service and for the improvement of the working conditions of the employees. Since the organization of the Railway Mail Association there have been 13 national presidents, including the present strong incumbent, my good friend, Frank Bennett. The seventh division has been honored with the presidency of the organization more times than any other division, having elected to that responsible office J. G. Fennessey, D. E. (Daddy) Barnes, and George H. Fair. After acquitting themselves with credit as presidents of the association, the latter two rendered efficient and faithful service to the Department as chief clerks of the Railway Mail Service until the date of their retirement. I have been looking forward to greeting "Daddy" Barnes and George Fair at this meeting. May I add also that my good friend, Henry Strickland, industrial secretary and editor of the Railway Post Office, is a member of the alumni of the seventh division.

It was here in Kansas City that the first postal convention of postmasters and postal employees of all branches of the Service was held. At that conference there was an attendance from six neighboring States to study the problems of the Postal Service and to make recommendations to the Department for Service improvements. The organization was launched in September 1909, as "the Southwest Postal Association" and George H. Fair was elected its first vice president. This association motivated Department officials, field officials, and the rank and file of the Service toward organization; endeavors not only for the advancement and improvement of the Postal Service but also to cement the relationship between all groups of postal units and to promote their common welfare.

Right here I wish to reiterate my attitude toward organizations. I have always been a firm believer in the happy results that must flow from friendly and constructive cooperation between management and employee organizations. Such cooperation is the surest way to secure the highest measure of mutual reward. I believe these views apply especially to Service organizations. I do not subscribe to the ideas advanced by some that membership in employee organizations necessarily implies antagonism to the management or the weakening of loyalty to the Service in which they are employed. It is through these organizations that a more enlightened understanding of the currents and problems of the Service is developed and a more tolerant viewpoint of the responsibility of administration and management is assimilated.

Service organizations that adhere to their real objectives, as defined in their organic laws, exert a very effective influence in the promotion of any movement for service betterment as well as for employee welfare. It is very gratifying to be able to say that the Department enjoys the most cordial relations with the regular Service organizations and I am sure you need have no apprehension about the friendly and cooperative spirit prevailing between Mr. O'Connell, Mr. Cole, and Mr. Hardy for the Post Office Department, and your president, Mr. Bennett, and the executive committee of the Railway Mail Association. This is as I wish it to be.

I trust that my record as Postmaster General is ample assurance to you that it is my firm purpose that all employees in the Service shall receive fair treatment at all times and that their working conditions shall be as favorable and their remuneration as liberal as may be justifiable under the prevailing credit and debit balances of the Post Office Department and the general economic conditions of the country.

Right here it may be proper to say that good leadership recognizes with clearness of vision that continuing aggressive drives by organized groups to advance their interests unduly and disproportionately at the expense of, or, in utter disregard of unorganized groups of taxpayers, may sooner or later bring on definite and unfavorable reactions. To find concrete proof of such reactions we need only to study public opinion as reflected in the daily press.

I have no fear that our Service organization leaders will make such a mistake and I am encouraged in this belief by my experience with these organizations. I shall always remember with deep appreciation the unselfish and cooperative spirit of the men and women of the Postal Service when under the stern necessities of the early period of the economic depression, which began in 1932, some of the more liberal conditions of employment as well as salaries had to be temporarily curtailed. The situation was accepted in such a truly patriotic and loyal spirit that I was especially gratified and delighted to recommend restoration of the predepression status just as soon as the fiscal conditions of the Post Office Department and the country would permit.

And now in closing, I wish to assure you of my keen interest in the continued success of the Railway Mail Service and my desire that with your loyal and constructive cooperation we shall continue to uphold and advance the reputation it has gained for unexcelled efficiency. It is gratifying to be associated with a service that has earned the high appraisement that has been so universally accorded you. I am especially pleased to have had this opportunity to meet so many of you and to briefly address you.
